Chapter XI—War Food Administration (Distribution Orders)

[FDO 79-131]

PART 1401—DAIRY PRODUCTS

FLUID MILK AND CREAM IN GREENSBORO, N. C., SALES AREA

Pursuant to the authority vested in me by Food Distribution Order No. 79 (8 F.R. 12426), issued on September 7, 1943, as amended, and to effectuate the purposes of such order, it is hereby ordered as follows:

§ 1401.168 *Quota restrictions*—(a) *Definitions.* When used in this order, unless otherwise distinctly expressed or manifestly incompatible with the intent hereof:

(1) Each term defined in Food Distribution Order No. 79, as amended, shall, when used herein, have the same meaning as is set forth for such term in Food Distribution Order No. 79, as amended.

(2) The term "FDO 79" means Food Distribution Order No. 79, issued on September 7, 1943, as amended.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, sub-dealer, or secondary dealer, who purchases in a previously packaged and processed form milk, cream, or milk byproducts for delivery.

(4) The term "industrial user" means a person, as determined by the market agent, in the capacity of a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of for resale to consumers off the premises where made.

(5) The term "base" means the total pounds of milk solids delivered by a handler within the sales area during the base period, (i) in the form of milk, or (ii) in the form of cream and milk byproducts, minus the milk solids in quota-exempt deliveries of milk, and cream and milk byproducts, as described in (j) hereof. (For the purpose of this order, the milk solids content of milk, milk byproducts, and cream shall be computed as follows: Each hundredweight of milk, cream, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of milk solids calculated by multiplying the pounds of butterfat in such milk, and cream and milk byproducts by .906; and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 62.5 pounds of milk solids plus one pound of milk solids for each one percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is hereby designated as a "milk sales area" to be known as the Greensboro, North Carolina, sales area, and is referred to hereinafter as the "sales area":

The cities of Greensboro and High Point, and the townships of Gilmer, High Point and Morehead all in Guilford County, North Carolina.

(c) *Base period.* The calendar month of June 1943 is hereby designated as the base period for the sales area: *Provided,* That the month of May may be used as the base period for computing base and quota for deliveries to elementary, junior high, and high schools: *And provided further,* That in the computations set forth in (e) hereof the total deliveries to elementary, junior high, and high schools in the base period shall be divided by the number of days such schools were in session in lieu of the total number of days in the base period as set forth in (e) (1) and the average daily deliveries so determined shall be multiplied by the number of days such schools are in session in each quota period in lieu of the number of days in the quota period as set forth in (e) (2).

(d) The remainder of the calendar month in which the provisions hereof become effective and each subsequent calendar month, respectively, is hereby designated as the quota period for the sales area.

(e) *Handler quotas.* Quotas for each handler other than a sub-handler or producer-handler shall be determined as follows:

(1) Divide his respective bases by the number of days in the base period;

(2) Multiply the foregoing result by the number of days in the quota period; and

(3) Multiply the aforesaid resulting amounts by 100 percent in the case of the base for milk, and 75 percent in the case of the base for cream and milk byproducts.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, whichever represents his larger total deliveries; and

(2) The applicable percentages shall be 100 percent in lieu of those specified in (e) (3).

(g) *Quota adjustments.* Each handler may increase his quota for milk within any quota period by one pound of milk solids for each one pound of milk solids he reduces his quota for cream and milk byproducts.

(h) *Cream deliveries.* The units of cream delivered subject to quota in any quota period shall not exceed 100 percent of the units of cream in his base, irrespective of the milk solids content of such deliveries.

(i) *Handler exemptions.* Quota shall not apply to any handler who delivers in a quota period a daily average of less than 200 units of milk, cream and milk byproducts. For the purpose of this order, a unit shall be the equivalent in volume of the following: (1) One quart of milk, buttermilk, or fluid milk byproducts; (2) one-half pint of cream; and (3) one-half pound of cottage, pot, or baker's cheese.

(j) *Quota exclusions and exemptions.* Deliveries of milk, milk byproducts, or cream (1) to other handlers, except for such deliveries to sub-handlers, (2) to plants engaged in the handling or processing of milk, milk byproducts, cream or other dairy products from which no milk, milk byproducts, or cream, is delivered in the sales area, (3) to industrial users, and (4) to the agencies or groups specified in (d) of FDO 79, shall be excluded from the computation of deliveries in the base period and exempt from charges to quotas.

(k) *Transfers of bases.* The market agent is empowered to transfer base from one handler to another:

(1) Upon receipt of a request in writing from both handlers; and

(2) Upon application from a handler and written notice to the Director and to both handlers, (i) to permit deliveries to a purchaser not being served by a handler whose quota reflects deliveries to such purchaser in the base period, (ii) to permit a handler to serve an account which customarily rotates among several handlers inclusive of a contract let by a public agency or institution on a bid basis and (iii) to permit a handler to serve an account which he is serving on the effective date of this order and which was served by another handler during the base period.

(l) *Consumer priorities.* In the distribution of milk subject to quotas established hereunder, a handler shall give preference in the order listed, taking into consideration the type of purchasers served by him in the base period, to:

(1) The need of children, expectant mothers, and invalids requiring milk;

(2) Homes and retail stores handling milk for consumption off the premises; and

(3) Establishments serving milk for consumption on the premises.

(m) *Petition for relief from hardship.* (1) Any person affected by FDO 79 or the provisions hereof who considers that compliance therewith would work an exceptional and unreasonable hardship on him, may file with the market agent a petition addressed to the Director. The petition shall contain the correct name, address and principal place of business of the petitioner, a full statement of the facts upon which the petition is based, and the hardship involved and the nature of the relief desired.

(2) Upon receiving such petition the market agent shall immediately investigate representations and facts stated therein.

(3) After investigation, the petition shall be certified to the Director, but prior to certification the market agent may (i) deny the petition or (ii) grant temporary relief for a total period not to exceed 60 days.

(4) Denials or grants of relief by the market agent shall be reviewed by the Director and may be affirmed, modified or reversed by the Director.

(n) *Reports.* Each handler shall transmit to the market agent on forms prescribed by the market agent the following reports:

(1) Within 20 days following the effective date of this order, reports which show the information required by the market agent to establish such handler's quotas;

(2) Within 20 days following the close of each quota period, the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts during the preceding quota period; and

(3) Handlers exempt from quotas pursuant to (i) hereof shall, upon the request of the market agent, submit the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts.

(o) *Records.* Handlers shall keep and shall make available to the market agent such records of receipts, sales, deliveries, and production as the market agent shall require for the purpose of obtaining information which the Director may require for the establishment of quotas as prescribed in (b) of FDO 79.

(p) *Expense of administration.* Each handler shall pay to the market agent, within 20 days after the close of each calendar month, an assessment of $0.015 per hundredweight of each of milk, milk byproducts, cream, and skim milk equivalent of cottage, pot, or baker's cheese delivered during the preceding quota period and subject to quota regulations under the provisions hereof.

(q) *Violations.* The market agent shall report all violations to the Director together with the information required for the prosecution of such violations.

(r) *Bureau of the Budget approval.* The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Subsequent record-keeping or reporting requirements will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(s) *Effective date.* This order shall take effect at 12:01 a. m., e. w. t., February 1, 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–446, Stay of Execution]

ROSS PLUMBING SUPPLIES COMPANY

Benjamin Ross of Pittsburgh, Pennsylvania, doing business under the trade name of Ross Plumbing Supplies Company, has appealed to the Chief Compliance Commissioner from the provisions of Suspension Order S–446 upon various grounds and has represented that the period covered by the suspension order is the period when the respondent and all others in a like business are compelled to do their buying of merchandise for spring and summer operations and that the suspension order would prevent the respondent from obtaining merchandise for sale during the greater part of the year 1944. On January 1, 1944 the Chief Compliance Commissioner directed that execution of Suspension Order S–446 be stayed pending final determination of the appeal and on the same day notified the respondent of said direction. In view of the foregoing, *It is hereby ordered*, That:

(a) The provisions of §1010.446 Suspension Order S–446, issued December 20, 1943, shall be stayed and shall have no force or effect pending final determination of the appeal.

Issued this 21st day of January 1944.

PART 933—COPPER

[Conservation Order M–9–c as Amended Jan. 22, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of copper for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 933.4 *Conservation Order M–9–c—*(a) *Restrictions on manufacture of articles appearing on combined list.* No manufacturer of any article on the combined list attached, or of parts (including repair parts[1]) for any such article, may, if such article or parts contain copper products, or copper base alloy products, continue their manufacture by means of processing, assembling or finishing.

(b) *Restrictions on manufacture of articles not appearing on combined list out of inventory on hand on June 30, 1942.* (1) A manufacturer of any article omitted from the combined list or excepted from that list, or of parts (including repair parts[1]) for such an article, may not continue the manufacture thereof by means of processing, assembling or finishing:

(i) Unless all copper products or copper base alloy products contained in such articles or parts were acquired by the manufacturer after June 30, 1942; or

(ii) Unless such articles or parts are being manufactured to fill a purchase order, existing or prospective, bearing a preference rating of AA–5 or higher or, in the case of a controlled materials producer under the Controlled Materials Plan, to fill an authorized controlled material order; and no such article or part so manufactured shall be delivered except to fill such an order; or

(iii) Unless the manufacturer has been specifically authorized in writing by the War Production Board, pursuant to an application on Form WPB–940 (formerly Form PD–426), or otherwise, to manufacture the article or parts in question with the copper products or copper base alloy products being used.

(2) The provisions of paragraph (b) (1) shall not apply to a manufacturer assembling a completed fractional horsepower electric motor into machinery of any kind omitted from the combined list or excepted from that list. The provisions of paragraph (b) (1) shall also not apply to the manufacturing of any machinery omitted from the Combined List or excepted from that list, or of parts (including repair parts) for such machinery, if the only copper products or copper base alloy products used which were in the inventory of the manufacturer on June 30, 1942 are bushings, bearings, nuts, bolts, screws, washers, and wire weighing in the aggregate less than 5% of the total weight of the article or part.

(c) *General restrictions on manufacture and plating.* (1) No manufacturer may continue the manufacture of any article or parts (including repair parts) if such article or parts are to contain copper products or copper base alloy products where the use of any less scarce material[2] is practicable. Furthermore, no manufacturer may continue the manufacture of any article or parts (including repair parts) if they are to contain more copper products or copper base alloy products than is necessary for the article's proper operation or a higher type or grade of copper or copper base alloy than is necessary for the article's proper operation.

(2) (i) The use of copper products or copper base alloy products for plating any article on the combined list or for plating any parts (including repair parts) of such an article, is prohibited unless such plating is expressly stated in the list to be permissible.

(ii) The use of copper products or copper base alloy products for plating any article omitted from the combined list or excepted from that list, and the plating of parts (including repair parts) for such an article, is permitted provided that:

(a) Such plating is not for decorative purposes, or part of a decoration, or an undercoating for lead or silver plating (however, a copper strike may be used as an undercoating for silver when silver is used as a substitute for cadmium in electroplating); and

(b) The use of, or the normal wear on, such article or parts would make impracticable any other form of coating.

(d) *Restrictions on deliveries to manufacturers.* No person shall hereafter deliver copper products or copper base alloy products to any manufacturer, directly or indirectly, if he knows or has reason to believe that such products are to be used in violation of the terms of this order.

(e) *General restrictions on deliveries.* The disposition of frozen and excessive inventories containing certain copper products or copper base alloy products shall be subject to the applicable provisions of Priorities Regulation No. 13 (§ 944.34), as amended from time to time.

(f) *Exceptions*—(1) *Applicability of order to certain Governmental agencies.* The provisions of this order shall not apply to the use of copper products or copper base alloy products in the manufacture of any article on the "Military Exemption List", or part therefor, which is being produced for purchase by, or for the account of, or for use by, the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, or the Coast Guard, where the use of copper products or copper base alloy products to the extent employed is required by the specifications (including performance specifications) of the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, or the Coast Guard applicable to the contract, subcontract or purchase order.

(2) *Installation.* The provisions of this order shall not apply to the installation of any article or part (including a repair part) for the ultimate consumer on his premises when any manufacturing of such article or part is incidental to the installation and is done on the consumer's premises. This exception does not, however, in any way affect or modify the provisions of Supplementary Conservation Order M–9–c–4 (restricting the installation of certain types of copper and copper base alloy pipe, tube, fittings, plumbing fixture fittings and trim, and building materials) or of any other order restricting installation.

[1] See also paragraph (f) (3) permitting the manufacture of repair parts to make specific repairs of used articles under certain conditions.

[2] Priorities Regulation No. 1, § 944.14, prohibits the manufacture of more than a practicable minimum working inventory of articles or parts to fill prospective orders.

[3] The Conservation Division of the War Production Board issues, periodically, a publication showing the relative scarcity of materials entitled "Materials Substitutions and Supply."

(3) *Repair.* The restrictions of this order (other than those contained in paragraph (c)) shall not apply to the manufacture of repair parts to make a specific repair of a used article, or to a person repairing a used article, on or off the premises of the owner, if the manufacturer of the parts or the person making the repair does not use copper products or copper base alloy products weighing in the aggregate more than two pounds and when all manufacturing done by him is with knowledge of the particular used article to be repaired. The restrictions of this order (other than those contained in paragraph (c)) shall also not apply to the manufacture of repair parts to make a specific repair of a used article, or to a person repairing a used article, on or off the premises of the owner, even if the manufacturer of the parts or the person making the repair uses copper products or copper base alloy products weighing in the aggregate more than two pounds, when (i) the copper scrap or copper base alloy scrap derived from the article being repaired weighs within one pound of the copper product or copper base alloy product used, (ii) all such scrap is delivered to a scrap dealer or to any other person to whom such delivery may be made under the provisions of Supplementary Order M–9–b and (iii) all manufacturing done is with knowledge of the particular used article to be repaired.

(g) *Special products; restrictions and exceptions*—(1) *Printing and publishing industries.* After October 3, 1943, the provisions of this order shall not apply to the use of copper products and copper base alloy products in typography, engraving, photo-engraving, gravure plate making, electrotyping, stereotyping, and printing in the printing and publishing industries. In those processes, the use of bronze powder, bronze ink, bronze paste, and bronze leaf is controlled by Supplementary Conservation Order M–9–c–3 All other uses in those industries of copper products, copper base alloy products, copper scrap, and copper base alloy scrap are governed by Conservation Order M–339. Nothing contained in this paragraph (g) (1) shall affect the prohibition against the manufacture of powder containing copper products or copper base alloy products under paragraph (a) and the Combined List of this order.

(2) *Insect screening.* The provisions of this order shall not restrict the delivery, installation or cutting of used or second-hand insect screening, of insect screening in rolls which Copper Recovery Corporation has refused to accept, or of insect screening in any roll cut initially on or before April 9, 1942. However, no person shall deliver, install, or cut any other copper or copper base alloy insect screening (i) unless such screening is to be delivered to, installed for or cut on the order of the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, the Panama Canal, the Coast Guard, any foreign country pursuant to the Act of March 11, 1941 entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act), or Defense Supplies Corporation, Metals Reserve Corporation or any other corporation organized under section 5 (d) of the Reconstruction Finance Corporation Act as amended (except Defense Plant Corporation) or any person acting as agent of any such corporation (except Defense Plant Corporation); or (ii) unless such delivery, installation, or cutting shall be with the specific authorization of the War Production Board. Applications for specific authorizations shall be made by letter addressed to the War Production Board, Copper Division, Washington 25, D. C. Reference: M–9–c. Nothing contained in this paragraph (g) (2) affects the prohibitions on the manufacture, processing, assembling or finishing of insect screening with copper products or copper base alloy products under paragraph (a) and the Combined List. (See the item "insect screening" under the heading "Miscellaneous" on the combined list).

(3) *Copper products not controlled by order.* The provisions of this order shall not apply to the manufacture of the following articles and parts (including repair parts) even though they contain copper products, or copper base alloy products, since these articles are specifically governed by the following orders:

Shoe findings and footwear of all kinds governed by Supplementary Conservation Order M–9–c–1.
Fire protective equipment governed by General Limitation Order L–39.
Motorized fire apparatus governed by General Limitation Order L–43.
Bronze paste, bronze ink, and bronze leaf, and products made with bronze paste, bronze ink, bronze leaf and bronze powder (other than decalcomanias and ship bottom paint), governed by Supplementary Conservation Order M–9–c–3.
Jewelry governed by Supplementary Conservation Order M–9–c–2.
Musical instruments governed by Supplementary Limitation Order L–37–a.
Water meters governed by Schedule I of Limitation Order L–154.

(4) *Attachment and assembly work.* (i) The provisions of this order do not apply to attaching finished slide fasteners, hook and eyes, brassiere hooks, sewon, machine attached or riveted snap fasteners, buckles, buttons, corset clasps, eyelets (other than eyelets usable as shoe eyelets), garter trimmings, hose supporters, insignia, jewelry, loops, mattress cottons, pin fasteners, pins, staples, slides, and trouser trimmings. The order does apply to the manufacture, processing, assembling and finishing of the closures and associated items listed above where the provisions of this order are more restrictive than other orders of the War Production Board.

(ii) The provisions of this order do not apply to the assembling of watch or clock movements finished prior to June 15, 1942, into cases not made of copper or copper base alloy. The provisions of this order do, however, apply to the manufacture, processing and finishing of watch and clock cases and of all other parts of watches and clocks and to assembling watches and clocks except as specifically exempted in this paragraph.

(h) *Definitions.* For the purposes of this order:

(1) "Copper" means unalloyed copper metal. It shall include unalloyed copper metal produced from scrap.

(2) "Copper base alloy" means any alloy metal in the composition of which the percentage of copper metal by weight equals or exceeds 40% of the total weight of the alloy. It shall include alloy metal produced from scrap.

(3) "Copper products" means products made of copper fabricated to the extent that they are plate, sheet, strip, rolls, coils, wire, rod, bar, tube, tubing, pipe, extrusions, ingot, powder, anodes, castings, or forgings, or fabricated to any greater extent.

(4) "Copper base alloy products" means products made of copper base alloy, fabricated to the extent that they are plate, sheet, strip, rolls, coils, wire, rod, bar, tube, tubing, pipe, extrusions, ingot, powder, anodes, castings, or forgings, or fabricated to any greater extent.

(5) "Manufacturer" means a person who manufactures, processes, assembles, or finishes. "Manufacture" includes processing, assembling, and finishing.

(i) *Miscellaneous provisions*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(2) *Appeal.* Any appeal from the provisions of paragraphs (a) or (c) of this order shall be made by filing Form WPB–1477 (formerly PD–500 revised) with the War Production Board, Washington 25, D. C., Reference: M–9–c. Relief granted pursuant to an appeal under this order shall remain in effect despite any amendment to this order, unless the grant of relief is specifically revoked or modified by the War Production Board.

(3) *Communications.* Any reports required to be filed under this order and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Copper Division, Washington 25, D. C., Reference: M–9–c.

(4) *Applicability of order.* The prohibitions and restrictions contained in this order shall apply irrespective of whether the articles or parts whose manufacture is governed hereby are being manufactured pursuant to a contract made prior or subsequent to the effective date of this order. Insofar as any other order of the War Production Board may have the effect of limiting or curtailing to a greater extent than herein provided the manufacture of any articles or parts, the limitation of such other order shall be observed.

(5) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States, is guilty of a crime, and, upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 22th day of January 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

Interpretation 5

Use of Copper in the Manufacture of Certain Drains and Strainers

Copper Conservation Order M-9-c, as amended December 10, 1941, specifically prohibited any person from using after March 31, 1942, any copper or copper base alloy in the manufacture of gutters, leaders or downspouts, or accessories thereto, and of all roofing items, to go on private buildings. These provisions have remained in the order without interruption.

In addition, since May 7, 1942, paragraph (d) (1) of Order M-9-c (relettered as paragraph (c) (1) when the order was amended on October 4, 1943), has provided that no manufacturer may continue to manufacture from copper or copper base alloy, any article the manufacture of which, with copper or copper base alloy, is not specifically prohibited by the order, if it is practicable to use any material less scarce than copper, brass or bronze to make the article.

For some time, many manufacturers have been making floor, roof, cesspool and shower drains and strainers out of galvanized steel or iron; and it has been demonstrated that the use for such purposes of this type of material instead of copper or copper base alloy is practicable for all uses to which these articles are put except their use in places where explosives are handled or stored or where explosive vapors may be present. Furthermore, the types of iron and steel used as well as zinc, are less scarce materials than copper or copper base alloy.

Accordingly, manufacturers are prohibited by Copper Conservation Order M-9-c from using brass or other copper and copper base alloy materials to make all roof, floor, cesspool and shower drains or strainers, even if the drains or strainers are not accessories to gutters, leaders or downspouts, or roofing items. An exception to the foregoing arises in the case of drains or strainers for floors in places where explosives are handled or stored or where explosive vapors may be present.

PART 3133—PRINTING AND PUBLISHING

[Limitation Order L-241, Interpretation 1]

COMMERCIAL PRINTING

The following interpretation is issued with respect to Limitation Order L-241.

Schedule II to Order L-241 limits the amount of paper which a person may cause to be consumed in printing certain "items". Each of the numbered paragraphs in the schedule is a separate "item", not the individual products described in a particular paragraph. Thus, for example, a person who issued shopping guides in 1941 may use his quota under the Schedule for the issuance of free distribution newspapers or want ad periodicals in 1944.

Issued this 22d day of January 1944.

(2) Producers may manufacture replacement batteries in capacities and sizes other than as specified in sub-paragraph (1) of this paragraph (e) only from materials on hand on August 29, 1942, provided:

(i) No additional material is required;

(ii) Such material cannot be consumed without change in form in manufacturing replacement batteries of the capacities and sizes specified in sub-paragraph (1) above;

(iii) Replacement batteries so produced be included in the number authorized for production in the periods specified in paragraph (f) below.

(f) *Restrictions on production of replacement batteries for passenger automobiles, light, medium and heavy trucks, truck tractors, truck trailers, passenger carriers and off-the-highway motor vehicles.* (1) No producer shall, during any calendar quarter of 1944, manufacture automotive replacement storage batteries in excess of the number (hereinafter referred to as "quota") obtained by multiplying the percentage shown below for that calendar quarter of 1944 by the total number of such batteries sold by him during the calendar year 1941:

Calendar Quarter of 1944:	Percentage of 1941 sales
January 1 to March 31	22½
April 1 to June 30	22½
July 1 to September 30	30
October 1 to December 31	25

(2) Notwithstanding subparagraph (1) of this paragraph (f), a producer may, in addition to the quotas permitted thereby,

(i) Manufacture during the second, third and fourth calendar quarters of 1944 that number of replacement batteries by which he failed to reach his full quota during the next preceding calendar quarter provided that this additional production does not exceed 5% of the number of replacement batteries sold by him during the calendar year 1941; and, in addition,

(ii) Manufacture during the first, second and third calendar quarters of 1944 not in excess of 5% of the number of such batteries sold by him during the calendar year 1941, provided he deducts such number from his quota for the next succeeding calendar quarter of 1944; *And Provided further,* That in no event shall any producer manufacture during the calendar year 1944 a number of such replacement batteries in excess of 100% of the number of such batteries which he sold during the calendar year 1941.

(3) *Additional 10% production authorized in 1944.* In addition to the production authorized by subparagraphs (1), (2) (i) and (ii) of this paragraph (f), producers may manufacture replacement batteries during the period January 1, 1944 to December 31, 1944 in an amount equal to 10% of the total number of such batteries sold by the producer during the calendar year 1941 or the calendar year 1943, whichever is higher, except as provided in subparagraph (5) below. In no event, however, shall the production of any producer for the year 1944 exceed 110% of the number of replacement batteries sold by him during the calendar year 1941 or the calendar year 1943, whichever is higher.

(4) *Foregoing not applicable to producers of less than 25,000 units.* The restrictions on production of replacement batteries contained in this paragraph (f) (1) and (2) (i) (ii) and (3) shall not apply to a producer who during the year 1941 sold less than 25,000 replacement batteries; *Provided, however,* That during the year 1944 his total production shall not exceed 25,000 units.

(5) *Plants in Group I Labor Market Areas not authorized to increase production.* On and after January 1, 1944, no producer whose plant is located in a Group I Labor Market Area as classified

by the War Manpower Commission as of January 1, 1944, shall produce replacement batteries in any such plant in excess of 100% of his sales of batteries produced in that plant in the calendar year 1941 or the calendar year 1943, whichever is higher.

(6) *Production in excess of 110% limitation may be authorized.* Any producer having a plant which is not located in a Group I or Group II Labor Market Area who believes that such plant has capacity available to produce replacement batteries in excess of 110% of the sales of batteries produced at such plant in the calendar year 1941 or in the calendar year 1943, whichever is higher, may file an application in writing at the Field Office of the War Production Board nearest to such plant, for leave to increase production at such plant. Such application shall contain a full statement of the plant's capacity, the labor presently employed and the additional production which can be secured, by quarters. Thereupon the War Production Board may authorize an increase in the production of replacement batteries at such plant in such quantities and upon such conditions as it shall find requisite in the public interest. Such authority will be issued either in the form of individual letters or by published Directions supplemental to this order.

(g) *Restrictions on inventories of producers of automotive replacement batteries.* (1) No producer shall have in inventory on the first day in any month a stock of replacement batteries and rebuilt batteries as defined in paragraphs (c) (8) and (9) above, in excess of one third of the number of batteries sold by him during the calendar year 1941.

NOTE: Paragraphs (h) (1), (h) (2), (h) (3) formerly (h) (2), (h) (3), (h) (4), redesignated Jan. 22, 1944.

(h) *General restrictions*—(1) *Return of used batteries.* On and after August 29, 1942, no producer or distributor shall sell or deliver a new or rebuilt replacement battery to any consumer unless such consumer delivers to the seller concurrently with his purchase one used battery of the same size or larger for each replacement battery delivered to such consumer. The provisions of this paragraph (h) (1) shall not apply to any Federal or Territorial department, bureau or agency, State or political subdivision thereof, which is forbidden by law from making such disposal of used batteries.

(2) *Consumer's certificate.* Notwithstanding the provisions of paragraph (h) (1) above, a producer or distributor may sell and deliver a replacement battery to a consumer without receiving a used battery in exchange therefor provided that: (i) The producer or distributor does not install such replacement battery in the consumer's vehicle; and (ii) the consumer signs and delivers to the producer or distributor with each purchase order (or written confirmation thereof if such order is placed by telephone or telegraph) a certificate in the following form:

Consumer's Certificate

I hereby certify that: (a) the replacement battery specified on this order is essential for the operation of a vehicle I now own or operate; (b) the replacement battery will be used only to replace a battery, which to the best of my knowledge, cannot be economically reconditioned; and (c) I will, within thirty days after receiving the replacement battery here ordered, dispose of through scrap channels a used automotive battery (excepting in the event of the loss or theft of such battery) of similar size for each replacement battery delivered to me.

(Signed) _____
Vehicle Owner or Operator
_____
Address
Date_____

A copy of each such certificate must be retained by the producer or distributor as part of his records.

(3) *Electric fence user's certificate.* Notwithstanding the provisions of paragraph (h) (1) above, a producer or distributor may sell or deliver a replacement battery to a consumer without receiving a used battery in exchange therefor, provided that the consumer purchases the battery for use in connection with an electric fence or other piece of farm machinery which had formerly been operated in whole or in part by dry cell batteries, and provided further that the producer or distributor secures from the consumer, for each purchase order (or written confirmation thereof if such order is placed by telephone or telegraph) the consumer's signature to a certificate, to be supplied by the producer or distributor, in the following form:

Electric Fence or Farm Equipment User's Certificate

I hereby certify that the battery purchased by me under this date is for use in connection with an electric fence or other farm equipment; that I have previously not used a storage battery for this purpose and, therefore, have no used battery to turn in.

(i) *Metal-containing parts of used, traded-in, imperfect or condemned batteries to be disposed of as scrap in 30 days.*

No producer or distributor may keep in his possession, or under his control for a period of more than thirty (30) days any metal-containing parts of any used, traded-in, imperfect or condemned replacement battery or rebuilt battery for the purpose of repairing or rebuilding the same, or for any other purpose, but must dispose of such parts through customary disposal or scrap channels. The provisions of this paragraph shall not apply to distributors located in Alaska, Hawaii, Panama Canal Zone, Porto Rico or the Virgin Islands.

(j) *Exceptions to applicability of this order.* The limitations and prohibitions contained in this order shall not be applicable to the manufacture, sale or delivery of replacement batteries under contract or orders for delivery to or for the account of:

(1) The Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, the Panama Canal, the Coast and Geodetic Survey, the Coast Guard, the Civil Aeronautics Administration, the National Advisory Committee for Aeronautics, the Office of Scientific Research and Development;

(k) *Records.* Every person to whom this order applies shall keep and preserve for a period of not less than two years accurate and complete records of his inventories, production and sales.

(l) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(m) *Reports.* On or before the 25th day of January, the 15th day of April, July and October 1944 and the 15th day of January 1945, each producer shall execute and file with the War Production Board Form WPB 2163 (PD 765) reporting for each of his plants, with the address of each, the shipments of automotive replacement storage batteries made during the preceding calendar quarter from each plant. These reporting provisions have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(n) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control and may be deprived of priorities assistance by the War Production Board.

(o) *Appeals.* An appeal from the provisions of this order shall be made by filing a letter in triplicate with the field office of the War Production Board nearest the appellant's place of business, referring to the particular provisions appealed from and stating fully the grounds for appeal.

(ii) The installation in place, for plumbing, heating or cooking purposes, of any copper or copper base alloy pipe, tubing, fittings, or plumbing fixture fittings and trim, in any building or structure.

(iii) The installation in place, whether inside or outside of a building, of any copper or copper base alloy pipe, tubing or fittings in any water supply or water distribution system, in any water sprinkling system, in any underground gas supply or gas distribution system, or in any cooling tower or water tower.

(2) *Exceptions.* Notwithstanding the prohibitions against installation of paragraph (b) (1):

(i) Copper or copper base alloy building material, pipe, tubing or plumbing fixture fittings and trim, in the possession on June 23, 1943 of the person owning a building, structure or system, may be installed in place when necessary to replace in that building, structure or system like items of copper or copper base alloy, if the aggregate weight of the items installed to make a particular repair does not exceed 25 pounds.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 3, Interpretation 9]

CERTAIN MRO RATINGS ASSIGNED UNDER P-98-b ARE NOT BLANKET MRO RATINGS

The following interpretation is issued with respect to Priorities Regulation 3:

Paragraph (e) (2) of Priorities Regulation 3 prohibits the use of a "blanket MRO rating" to get any item on List B. See that paragraph for a definition of a "blanket MRO rating". Some of the items which are on List B also appear on Schedule B of Preference Rating Order P-98-b. That schedule provides a way to get a rating for the items which appear on it so that such P-98-b ratings will not be "blanket MRO ratings". These ratings are assigned to specific purchase orders for a specific kind and quantity of the material desired.

Therefore, when a rating assigned pursuant to Schedule B of P-98-b (as evidenced by the symbol MRO-P-3) is applied to a purchase order for any item which is set out on Schedule B of that order that rating is valid, despite the fact the item is also on List B of Priorities Regulation 3.

The order does not require the purchaser to furnish a copy of his approved purchase order to the supplier, and the supplier should give effect to the rating and certification unless he knows or has reason to believe that the purchase order has not been rated as provided in Schedule B of Order P-98-b.

Issued this 24th day of January 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-482]

MARTIN NILSON

Martin Nilson of Rocky Hill, Connecticut, is a general building contractor. In August, 1943, he began construction which consisted of moving a restaurant building onto new foundations and extending the building in Rocky Hill, Connecticut. The estimated cost of this construction was approximately $6800, which exceeded the $200. limit permitted under Conservation Order L-41. Martin Nilson had such information of Conservation Order L-41 that his beginning this construction was gross negligence and constituted a violation of the order.

This violation of Conservation Order L-41 has diverted scarce materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.482 *Suspension Order No. S-482.* (a) Deliveries of material to Martin Nilson, his successors or assigns, shall not be accorded priority over deliveries under any other contract or order and no preference ratings shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders or any other orders or regulations of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(b) No allocation or allotment shall be made to Martin Nilson, his successors or assigns, directly or indirectly, of any material or product the supply or distribution of which is governed by any order of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve Martin Nilson, his successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on January 22, 1944, and shall expire on April 22, 1944.

Issued this 15th day of January 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-484]

ELIS G. DE LIA

On or about February 1, 1943, Mr. Elis G. DeLia, a former housing contractor, of Paris Road, New Hartford, New York, began construction of a multiple residence located at 1416 Genesee Street, Utica, New York, for the purpose of remodeling a large dwelling into apartments. He obtained authorization to commence construction work of an estimated cost of $10,000; the estimated cost of the work done amounted to approximately $15,000. This constituted a violation of Conservation Order L-41. In (or prior to) August, 1943, the respondent installed copper building material in the form of flashings, flashing valley linings, gutters and roofing items on the building in violation of Supplementary Order M-9-c-4. Respondent also obtained approximately 32 radiators on or about March 20, 1943, by means of a material and wilful misstatement that said delivery was covered by an A-10 rating under Preference Rating Order P-84. The respondent had knowledge of the orders involved, and the violations thereof must be deemed wilful.

These violations have hampered and impeded the war effort of the United States and have diverted essential critical materials to uses unauthorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.484 *Suspension Order No. S-484.* (a) Neither Elis G. DeLia, his successors or assigns, nor any other person shall order, purchase, accept delivery of, withdraw from inventory, or in any manner secure or use material or construction plant in order to continue or complete construction of the premises at 1416 Genesee Street, Utica, New York, unless hereafter specifically authorized in writing by the War Production Board.

(b) For four months from the effective date of this order, deliveries of material to Elis G. DeLia, his successors or assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or any other order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve Elis G. DeLia from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on January 22, 1944.

Issued this 15th day of January 1944.

Recording Secretary.

PART 1044—CADMIUM

[General Preference Order M-65, as Amended Jan. 22, 1944]

Section 1044.1 *General Preference Order M-65* is hereby amended to read as follows:

§ 1044.1 *General Preference Order M-65*—(a) *Scope of this order.* This order controls deliveries of cadmium from a producer or distributor. No producer or distributor shall deliver cadmium to any person, and no person shall accept delivery of cadmium from any producer or distributor, except as provided in this order. The order also restricts the use which may be made of cadmium or cadmium products. The permitted uses will be found listed below in paragraphs (d) and (e).

(b) *Definitions.* For the purposes of this order:

(1) "Cadmium" means all grades of metallic cadmium, oxide, or plating salts produced directly from ores, concentrates or other primary materials, or redistilled or remelted from cadmium scrap or any secondary cadmium-bearing material; or cadmium-bearing materials suitable for the manufacture of pigments.

(2) "Cadmium product" means an electroplated coating of cadmium.

(3) "Distributor" means any person regularly engaged in the business of buying cadmium and selling the same in forms suitable for general fabrication or electroplating.

(c) *Deliveries of cadmium.* Producers and distributors may deliver cadmium, and persons may accept delivery of cadmium from a producer or distributor in the following cases only:

(1) *Small order delivery.* Deliveries of cadmium from a producer or distributor may be made and accepted without the necessity of obtaining any specific authorization from the War Production Board if (i) The delivery in question, combined with all other deliveries of cadmium to the purchaser during that calendar month, from whatever source, will

not aggregate more than 100 pounds of contained cadmium; (ii) The purchaser has not requested from the War Production Board authorization for that particular month to accept delivery of cadmium in any quantity—see paragraph (c) (4) below (a request to the War Production Board shall be deemed a request within the meaning of this paragraph, regardless of whether it has been granted or denied); (iii) The cadmium purchased will be used only as permitted in paragraphs (d) and (e) of this order and not for resale; (iv) The inventory of the purchaser is not, and will not upon acceptance of the delivery become, in excess of a 30-day supply on the basis of his current method and rate of operation; and (v) The producer or distributor may make deliveries without any specific authorization from the War Production Board unless he knows or has reason to believe, that the delivery will be in violation of this paragraph (c) (1) or that the cadmium delivered is to be used in violation of the restrictions of this or other applicable orders of the War Production Board.

(2) *Deliveries to distributors.* Deliveries of cadmium may be made to and accepted by distributors.

(3) *Deliveries to Metals Reserve Company.* Deliveries of cadmium may be made to and accepted by Metals Reserve Company for the sole purpose of stockpiling or redistribution.

(4) *WPB authorization.* Other deliveries of cadmium may be made only on specific authorization of the War Production Board and in accordance with an authorization certificate issued by the War Production Board on Form WPB-945. Deliveries so specifically authorized shall take precedence over any preference rating which may be assigned to deliveries on other contract or orders. Authorization certificates will be issued on or about the first of each month for this purpose. An authorization certificate will authorize the holder to accept from a producer or distributor deliveries of specified amounts of cadmium shipped during the month for which the certificate is issued. The producer or distributor may ship on notification from the purchaser of the date and serial number of the authorization certificate. Any person wishing to apply for an authorization certificate should file an application on Form WPB-945 not later than the fifteenth day of the month preceding the month in which the authorization to purchase is desired.

(d) *Restrictions on the use of cadmium.* No person may use in any fashion any cadmium after January 22, 1944, except upon receipt by him of a certificate in substantially the form prescribed by Priorities Regulation No. 7 that the cadmium containing item to be produced will be used for one or more of the following purposes, and then only to the extent necessary to meet applicable specifications or for the proper service performance of the end product:

(1) For the manufacture of pigments for the following:

Luminescent paint for military uses
Luminescent printing ink for military uses
Luminescent paper for military uses
Luminescent plastic for military uses
Signal and illuminating glass ware for safety, religious, military and industrial uses only
Thermometer tubing
Rubber sea buoys
Dental rubber
Artist's colors

(2) For the manufacturer of silver brazing alloys containing no more than 11% by weight of cadmium to be used for military and industrial purposes to the extent that the use of a less critical material is impracticable except that silver brazing alloys containing up to 19% may be manufactured for applications specifically required by the Armed Services.

(3) For the manufacture of copper base alloys containing no more than 1¼% by weight of cadmium for the following:

(i) Current carrying parts of electrical current interruption devices to the extent that sufficient contact pressure cannot be maintained in service with other less critical materials.

(ii) Parts inside electronic tubes.

(iii) Resistance welding electrodes.

(4) For the manufacture of bearings for the following:

(i) Internal combustion engines for the propulsion of naval vessels when specifically required by the U. S. Navy.

(ii) In radio and radar equipment.

(5) For the manufacture of low melting point alloys for the following:

(i) On dry type rectifier elements.

(ii) In fire protective systems and electrical fuses.

(iii) In plastic fire control instruments for the mounting of optics.

(6) For the manufacture of a lead base alloy containing more than 3% by weight of cadmium for the coating of copper wire;

(7) For the manufacture of any cadmium product permitted by paragraph (e).

(e) *Restrictions on the use of cadmium products.* No person may use in any fashion any cadmium product made after January 22, 1944 except as permitted in subparagraphs (1) to (12), and then only to the extent necessary to meet applicable specifications or for the proper service performance of the end product.

(1) On functional parts which in service are subjected to frequent and extended periods of alternate immersion in sea water or wet spray of sea water to the extent that other finishes cannot be used for reasons of close tolerance or performance;

(2) On heddles and pin boards used in textile plants to the extent that corrosive action makes the use of other materials impracticable;

(3) On ferrous hardware parts in direct contact with fabric or leather when used on the following:

Aircraft parachutes.
Aircraft safety belts.
Aircraft shoulder harnesses.
Aircraft bomb slings.

(4) On moving parts which require close tolerances for proper functioning and on adjacent parts to the extent that the tolerances cannot be maintained in service with other finishes because of inadequate hardness or mechanical or electrical interference by corrosion products;

(5) On electric controllers and switches incorporated into underground mining machinery as required by the safety regulations of the Bureau of Mines;

(6) On functional ferrous parts subjected to the combined effects of corrosion, stress and temperatures exceeding 500° F. and on parts in direct contact therewith;

(7) On parts which serve to maintain an electrical contact for the suppression of radio interference to the extent that one of the contacted surfaces is aluminum, magnesium or their alloys;

(8) On electrical contact parts of aircraft ignition harnesses and propeller hubs;

(9) On parts in electronic equipment which for performance reasons must be soldered with the use of non-corrosive fluxes without affecting nearby parts of organic materials to the extent that other finishes do not provide required corrosion protection;

(10) On the following parts of electronic equipment when required by the Armed Services, the Maritime Commission and War Shipping Administration:

(i) Surfaces involved in unsoldered butt joints which must remain constant in electrical and radio frequency resistance or both.

(ii) Surfaces which require good conductivity for radio frequency current.

(iii) Non-ferrous parts in contact with aluminum parts for prevention of electrolytic corrosion.

(11) On ferrous nuts, bolts, machine screws and washers for use in aircraft except for self-locking nuts designed for application below 250° F;

(12) On nuts, bolts, machine screws and studs having threads ⅜ inch diameter and smaller and/or having sixteen or more threads per inch for use by the United States Navy, Maritime Commission or War Shipping Administration and for use by the United States Army in ship construction.

(f) *Certification on purchase orders.* No person shall place an order for, deliver or accept delivery of any cadmium or cadmium product, unless the purchaser shall have certified in substantially the form set forth in Priorities Regulation No. 7 that the cadmium products to be delivered will be used for a purpose permitted by this order.

(g) *Appeals.* Any person may appeal from the provisions of paragraphs (d) or (e) of this order in letter form, in triplicate, and filed with the Field Office of the War Production Board for the district in which is located the plant to which the appeal relates, setting forth essentially the following information where applicable. The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(1) Name and address of plating firms or other persons who actually process the cadmium and the quantity of cadmium required by each processor;

(2) The quantity of cadmium required for each part or group of parts fulfilling related functions;

(3) Period of time for which relief is requested;

(4) Description and function of each part or group of parts;

(5) Prime contract number, including symbol, if the item on appeal is covered by an Army, Navy, Maritime Commisison or War Shipping Administration contract;

(6) Justification, including the reasons why substitutes are unsatisfactory because of performance, lack of facilities or manpower.

(h) *Special directions.* The War Production Board may, from time to time, issue special directions to any person as to the sources, destination, or amounts of cadmium or cadmium products to be shipped and delivered by any producer or distributor or received by any person, and the War Production Board may also specifically direct the manner and quantities in which such cadmium or cadmium product may be processed.

(i) *Reports.* All producers, distributors and consumers of cadmium shall file reports with the War Production Board, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942, at such time and in such manner and form as it may prescribe, showing inventory, production, purchases, sales and consumption and such other information that the War Production Board may require.

(j) *Communications.* All applications, statements or other communications filed pursuant to this order or concerning the subject matter hereof, other than appeals from the provisions of paragraphs (d) and (e), shall be addressed to: War Production Board, Zinc Division, WPB Dept. 7515, Washington 25, D. C.; Ref.: M-65.

(k) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and, upon conviction, may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 1, Direction 46]

CHANGE IN PROGRAM NUMBERS OF THE MARITIME COMMISSION

The following direction is issued pursuant to CMP Regulation 1:

(a) The Maritime Commission will use a single allotment number M-1 for all ship construction programs. It will, therefore, discontinue using major program numbers M-2, M-3, M-4, M-5, M-6 and M-7. This direction does not affect the use of major program numbers M-8, M-9 and M-0.

(b) After this, manufacturers who have received allotments for programs identified by allotment numbers starting with the major program numbers M-2 through M-7 may, but need not, use the allotment number M-1 in placing orders for production materials or making allotments for these programs. If they prefer, they may continue to use the old numbers. Also, they may, but need not, consolidate all allotment accounts for programs identified by the major program numbers M-1 through M-7 in a single allotment account under the symbol M-1.

PART 3270—CONTAINERS

[Conservation Order M-81 as Amended Jan. 3, 1944, Interpretation 1]

CANS

The following official interpretation is hereby issued with respect to Conservation Order M-81 (§ 3270.31):

(a) Several items in the schedules of this order require that the quantity of product packed in glass containers during 1944 must be deducted from the quantity of the product permitted to be packed in cans. To compute the quantity of product permitted to be packed in cans, the following method shall be used:

(1) Determine the area of plate (base boxes) in packing quota.

(2) Using largest listed size allowed for the product as a basis, convert to quantity (gallonage or pounds) of product which may be packed.

(3) Deduct quantity (gallonage or pounds) of product packed in glass containers.

(4) Convert remainder (gallonage or pounds) of product to area of plate (base boxes) based on largest listed size used in step (2).

The remaining area of plate (base boxes) resulting from step (4) represents the balance of metal quota which may be used for packing the product in cans of sizes permitted for that product.

Example. Supposing a person packing paint products as permitted under Item 43 of Schedule III determined that 75 percent of the area of plate used by him in 1940 for these products was 1,200 base boxes. The largest listed size for products in Item 43 is 1-gallon which requires 10 base boxes per thousand cans. Therefore, using the largest listed size (1-gal.) as a basis, this person could pack 120,000 gallons of paint products. Assume that this person packs in glass containers during 1944 a total in terms of gallonage of 15,000 gallons of paint products. Deducting 15,000 from 120,000 will leave 105,000 gallons, which if converted to base boxes (again using 10 base boxes per thousand as a conversion factor) will result in 1,050 base boxes. These 1,050 base boxes represent the area of plate which may be used for packing paint products as listed in Item 43 in any of the sizes permitted for those products.

(b) Under Item 55 of Schedule III, shoe and leather polishes, waxes, dyes, dressings, stains and saddle soap, the quantity packed in 1944 in glass containers to be deducted from the quantity permitted to be packed in cans refers only to the quantity of paste products packed in glass containers in 1944.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Limitation Order L-251, Schedule I as Amended Jan. 24, 1944]

PAINTERS', DECORATORS' AND CERTAIN INDUSTRIAL BRUSHES

§ 3290.156 *Schedule 1 to Limitation Order* L-251—(a) *Definitions.* For the purposes of this schedule:

(1) "Paint brush" means any brush having a ferrule and used in the painting, varnishing or decorating trade, including all types of brushes specified in the Ferrule List and all brushes of similar construction or use.

(2) "Ferrule" means the metal band by which the bristles of a paint brush are attached to the handle.

(b) *Limitations.* (1) No person shall commence the manufacture of any ferrule:

(i) Of a size other than that specified in the Ferrule List with respect to each paint brush, except that where the manufacture of brush handles requiring ferrules of other sizes was commenced before December 9, 1943, ferrules of other sizes may be made on specific orders from brush manufacturers to the extent necessary to supply them with those ferrules in order that the manufacture of brushes with those handles may be completed.

(ii) With an assembly containing an inner band, a bridge or a spout;

(iii) Which is seamless, except for a shipbottom, stencil, oval varnish or oval sashtool brush;

(iv) Which is embossed or stamped, except that the size of the brush and other markings may be applied if to do so will not require any special or additional operation for that purpose during the process of manufacturing the ferrule.

(2) No person shall commence the manufacture of any paint brush:

(i) Of a type other than that specified in the Ferrule List;

(ii) With a ferrule not conforming to the limitations provided in paragraph (b) (1);

(iii) With a handle finished in more than one color.

PART 3301—CORK, ASBESTOS AND FIBROUS GLASS[1]

[Conservation Order M-262, As Amended Jan. 24, 1944]

FIBROUS GLASS TEXTILES

Section 3301.21[1] *Conservation Order M-282* is hereby amended to read:

§ 3301.21 *Conservation Order M-282*—(a) *Definitions.* For the purpose of this order:

(1) "Fibrous glass textile" means any cloth, tape, cord, sleeving, thread or yarn fabricated from fibrous glass textile type fibers.

(2) "Producer" means any person who both forms fibrous glass textile type fibers and fabricates them or causes them to be fabricated into fibrous glass textiles.

(3) "User" means any person who accepts delivery of fibrous glass textiles from a producer, whether for use, processing or resale, and includes a producer who uses or processes any part of his own production.

(b) *Fabrication of fibrous glass textiles by producers.* (1) No producer shall fabricate, or cause to be fabricated, fibrous glass textiles, in forms, at times or in quantities different from those reported on Form WPB 2272 (formerly PD-789), as originally submitted or later amended, unless otherwise specifically directed in writing by the War Production Board.

(2) Each producer shall file a monthly report on Form WPB 2272 (formerly PD-789) in time to ensure that copies will have reached the War Production Board in Washington, D. C., on or before the 10th day of each month, showing, among other things, proposed production, product availability, inventories and past shipments. However, amended reports may be filed at any time.

(c) *Delivery of fibrous glass textiles by producers* (1) No producer shall deliver fibrous glass textiles to any user, except as specifically authorized in writing by the War Production Board.

(2) Authorization to deliver will be issued to the producer on a copy of the user's application on Form WPB 2273 (formerly PD-790), filed in accordance with paragraph (d) (2) below.

(d) *Acceptance of delivery and use.* (1) No user shall accept delivery of fibrous glass textiles from a producer, and no producer shall use any part of his own production of fibrous glass textiles, except as specifically authorized in writing by the War Production Board.

(2) Application for authority to accept delivery or use shall be made on Form WPB 2273 (formerly PD-790), in time for copies to reach the War Production Board in Washington, D. C., on or before the 10th day of the month preceding the month for which allocation is requested. However, supplemental or interim applications may be filed at any time.

(3) Each user authorized to accept delivery of fibrous glass textiles, and each producer authorized to use fibrous glass textiles, shall use them only for the purposes authorized, unless otherwise specifically directed by the War Production Board.

[1] Formerly Part 3179, § 3179.1.

(e) *Procedure for allocation of fibrous glass textiles.* (1) On the 10th day of each month the War Production Board will close its allocation registers and thereafter will allocate fibrous glass textiles for shipment in the next succeeding month. Any quantities remaining after the allocation, will be available for distribution to applicants who submit supplemental or interim requests on Form WPB 2273 (formerly PD-790) after the registers have been closed.

(2) Advance and reliable statements of requirements by users in the form of purchase contracts specifying future delivery are of value in planning a balanced manufacture of fibrous glass textiles sufficient for war purposes. The War Production Board, in making allocations of fibrous glass textiles for delivery in any month, will give special consideration to users who have made purchase contracts with the producer during the third preceding month, or earlier months, for the delivery of specified quantities of specific forms in the applicable month, and may allocate the quantities so contracted for (or a proportionate part if the total production is insufficient) to the persons so contracting, before allocating any quantities to other persons.

(f) *Exemption for free sample deliveries.* Free sample deliveries of fibrous glass textiles may be made by a producer and accepted by users without application or specific authorization, provided that the total amount delivered during any calendar month does not exceed ½ of 1 per cent of the producer's total production during that month.

(g) *Special directions.* The War Production Board may, in its discretion, issue special directions at any time with respect to:

(1) Production or fabrication of fibrous glass textiles by a producer; or

(2) Delivery of fibrous glass textiles by a producer; or

(3) Acceptance of delivery and use of fibrous glass textiles by a user; or

(4) Preparation and filing of Forms WPB 2272 and WPB 2273 (formerly PD-789 and PD-790), subject to approval of the Bureau of the Budget when required by the Federal Reports Act of 1942.

(h) *Miscellaneous provisions*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(2) *Forms.* Forms WPB 2272 and WPB 2273 (formerly PD-789 and PD-790) have been approved by the Bureau of the Budget in accordance with Federal Reports Act of 1942.

(3) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States Government is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(4) *Communications to the War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Cork, Asbestos & Fibrous Glass Division, Washington 25, D. C., Ref: M-262.

Issued this 24th day of January 1944.

Recording Secretary.

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1, as amended May 15, 1943, 8 F.R. 6727.

PART 4500—POWER, WATER, GAS, AND CENTRAL STEAM HEAT

[Utilities Order U-1 as Amended Jan. 22, 1944]

UTILITIES

Section 4500.1 *Utilities Order U-1* as heretofore amended is hereby amended to read as follows:

Definitions

§ 4500.1 *Utilities Order U-1*—(a) *Definitions.* (1) "Producer" means any individual, partnership, association, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not, located in the United States, its territories, or possessions, supplying, or having facilities built for supplying, directly or indirectly for general use by the public, one or more of the following services:

(i) Electric power,

(ii) Gas, natural or manufactured, exclusive of the production and transmission of natural gas up to the point of its entry into gas transmission lines from field gathering lines,

(iii) Water, other than exclusively for irrigation purposes,

(iv) Central steam heating, or

(v) Any of the foregoing services but not for general use by the public, if a specific direction from the War Production Board entitles such person or agency to apply the ratings herein assigned. Application for such a specific direction should be made by letter to the War Production Board, Washington 25, D. C., Ref.: U-1.

(2) "Material" means any commodity, equipment, accessory, part, assembly or product of any kind.

(3) "Controlled materials" means controlled materials as defined in Schedule I of CMP Regulation 1.

(4) "Maintenance" means the upkeep of a producer's property and equipment in sound working condition. It does not include any plant addition.

(5) "Repair" means the restoration of a producer's property and equipment to sound working condition after wear and tear, damage, destruction of parts, or the like have made such property or equipment unfit or unsafe for service. It does not include any plant addition.

(6) "Plant addition" means the construction or installation of new facilities or the replacement of existing facilities with facilities of greater capacity.

(7) "Minor plant addition" means a plant addition having a net material cost of not more than $1,500. No job or project may be subdivided to come within this limit.

(8) "Major plant addition" means a plant addition having a net material cost of more than $1,500.

(9) "Net material cost" means the cost of material incorporated in plant less the cost of material removed from plant, priced in accordance with the producer's regular accounting practice.

(10) "Operating supplies" means material, other than fuel, which is used or consumed in the course of a producer's operations, except in maintenance, repair, and plant additions.

(11) "Inventory" means all material in the producer's possession, without regard to its accounting classification, excluding, however, (i) material incorporated in plant, (ii) appliances and merchandising supplies, (iii) fuel, (iv) water purification and treatment material except equipment, (v) gas chemical material, (vi) material segregated for use in approved major plant additions, and (vii) scrap.

(12) "Class" means any one of those categories of material established as a basis for classification of inventory in Schedule A of this order.

How To Obtain Material

(b) *Preference ratings.* (1) A preference rating of AA-1 is hereby assigned to orders to be placed by a producer for material (other than controlled materials) in every class except the transmission and distribution class, for use in maintenance and repair, as operating supplies, and for minor plant additions.

(2) A preference rating of AA-1 is hereby assigned to orders to be placed by a producer for material (other than controlled materials) in the transmission and distribution class, for use in the repair of an actual or imminent breakdown.

(3) A preference rating of AA-3 is hereby assigned to orders to be placed by a producer for material (other than controlled materials) in the transmission and distribution class, for use in maintenance and repair, as operating supplies, and for minor plant additions, except where an AA-1 rating is assigned in paragraph (b) (2) above.

(4) Material obtained with the AA-1 rating may be used for purposes which are assigned lower ratings, but it may be replaced in inventory only by applying the lower rating to an equivalent dollar value of material in the same class. Material obtained with the AA-3 rating may be used for purposes which are assigned the AA-1 rating and may be replaced in inventory with either the AA-1 rating or an authorized AA-3 rating. The provisions of this paragraph (b) (4) supersede those of § 944.11, paragraph (a), of Priorities Regulation 1.

(5) Preference ratings for major plant additions may be obtained by filing an application on Form WPB–2774, unless ratings are assigned by a Supplementary U–1 Order such as U–1–h.

(c) *CMP allotment number.* (1) The abbreviated CMP allotment number U–9 is hereby assigned to orders to be placed by a producer for controlled materials for use in maintenance and repair, as operating supplies and for minor plant additions. Allotments of material for major plant additions may be obtained by filing an application on Form WPB–2774 unless an allotment number is assigned by a supplementary U–1 order such as U–1–h.

(2) An order for controlled materials for use in maintenance and repair, as operating supplies, and for minor plant additions bearing the abbreviated CMP allotment number U–9 and the certification required by paragraph (d) of this order shall be deemed an authorized controlled materials order. This abbreviated CMP allotment number shall constitute an "allotment number or symbol" for the purpose of CMP Regulation 3.

(d) *Certification.* The ratings assigned by subparagraphs (b) (1), (2) and (3) of this order and the abbreviated CMP allotment number U–9 may be applied by a producer only by the use of a certification in substantially the following form unless an order of the War Production Board affecting a particular item of material requires some other form of certification:

Preference Rating ——, Abbreviated CMP Allotment Number U–9. The undersigned producer certifies, subject to the penalties of Section 35 (A) of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, to receive, for utility uses under Utilities Order U–1, the material ordered, and to use the preference ratings or allotment numbers which the undersigned has placed on this order.

The certifications set forth in Priorities Regulation 3 and CMP Regulations 1 and 5 may not be used but the standard form of certification provided in Priorities Regulation 7 is permissible if the producer adds a statement saying that material ordered is for utility uses under Utilities Order U–1.

Restrictions on Ordering Material

(e) *Scheduling deliveries.* Except as permitted by paragraphs (f) and (g) below, no producer shall schedule for delivery to it in any calendar quarter any material to be used for maintenance and repair, as operating supplies, or for minor plant additions, unless both of the following conditions are satisfied:

(1) The dollar value of material to be scheduled for delivery together with the dollar value of all material in the same class which has been scheduled for delivery for these uses in the same calendar quarter, does not exceed the quota established in Schedule B, and

(2) The producer does not have reason to believe that its inventory of material in the same class is or will, by virtue of its acceptance of the delivery when made, become in excess of a practical working minimum. A practical working minimum inventory is that amount of material which a producer, exercising prudent operating judgment, considers the smallest quantity of material it can hold and render war-time service at minimum standards. It may be less than the values established in Schedule C, but it shall in no case exceed them.

(f) *Exceptions to paragraph* (e). (1) The restrictions of paragraph (e) do not apply to a producer so long as its inventory does not exceed $10,000 in value, except that such a producer must restrict its inventory to that amount of material which, in the exercise of prudent operating judgment, it considers the smallest quantity it can hold and render war-time service at minimum standards. A producer engaged in furnishing more than one of the services named in paragraph (a) (1) may consider its inventory for each service separately for the purposes of this paragraph.

(2) The restrictions of paragraph (e) do not apply to material excepted from inventory by the definition in paragraph (a) (11).

(3) If a producer sells material to another producer from its practical working minimum inventory for the repair of an actual breakdown of facilities or equipment it may schedule additional deliveries in the affected classes to the extent necessary to replace the material sold.

(4) If a producer's property has been damaged by acts of the public enemy, sabotage, explosion, fire, flood, storm, or similar contingencies, it may schedule deliveries to the extent necessary to repair the damage. Deliveries scheduled under this exception which are in excess of the producer's quota must be reported immediately to the War Production Board by letter, with a statement of the reasons why the excess deliveries were necessary.

(5) The War Production Board may from time to time establish specific delivery quotas and limits for permissible inventory for individual producers, modifying the provisions of Schedules B and C.

(6) The restrictions of paragraph (e) (1) on the dollar value of materials which a producer may schedule for delivery do not apply to material scheduled for delivery from the producer's own excess inventory, or from the excess inventory of another producer.

(g) *Short item deliveries.* Even though it cannot schedule deliveries without exceeding the limits of paragraph (e) (2), a producer may schedule for delivery material which it will require for use in maintenance and repair, as operating supplies, and for minor plant additions during the ninety-day period following the date it expects to receive such material, so long as all of the following conditions are satisfied:

(1) The producer's inventory of the required material, together with material already scheduled for delivery, will be insufficient to meet requirements during such ninety-day period.

(2) All material in all classes of inventory in excess of a practical working minimum is (i) continuously recorded as excess on records kept by the producer for that purpose, (ii) continuously held for sale to financially responsible persons and agencies authorized (under applicable regulations issued by the War Production Board) to accept delivery thereof; and (iii) reported to the War Production Board, when requested by the War Production Board, on Form WPB–2641, to the extent required by such form, or in such other manner as the War Production Board may prescribe, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Restrictions on Use of Material

(h) *Restrictions on use of material for maintenance and repair.* A job which can be classed as maintenance or repair, as those terms are defined in paragraphs (a) (4) and (5), may be done without regard to the dollar value of the material required when the following standards are met:

(1) The job must be necessary to maintain or restore service at minimum service standards or to prevent damage to facilities from serious overload, deterioration, storm, flood, climate, soil conditions, or similar contingencies.

(2) Design must emphasize economy of manpower and material as well as the substitution of the more plentiful for scarce material.

(3) No facility or part which is serviceable in its existing installation may be replaced except to avoid an imminent breakdown.

(i) *Restrictions on use of material for minor plant additions.* A job which is a plant addition, as defined in paragraph (a) (6), rather than maintenance and repair, may be done without special permission from the War Production Board, if it is a "minor plant addition"; that is, if its net material cost does not exceed $1,500. Paragraph (a) (9) explains what is meant by net material cost. However, all minor plant additions are subject to the following restrictions:

(1) No facility or part which is serviceable in its existing installation may be replaced except to avoid an imminent breakdown.

(2) Design must emphasize economy of manpower and material as well as the substitution of the more plentiful for scarce material.

(3) New facilities must be necessary for rendering service at minimum standards.

(4) No extension of a line to consumer premises may be made or connected by a producer unless it is authorized by a Supplementary U–1 order or by the approval of an application filed on Form WPB–2774. In an emergency approval may be obtained by telephone or telegraph. Confirmation must be obtained, however, by the submission of an application on Form WPB–2774.

(j) *Restrictions on use of material for major plant additions.* No material may be used for a major plant addition unless the job has been authorized by a Supplementary U–1 Order, such as U–1–h, or by the approval of an application filed on Form WPB–2774. In an emergency approval may be obtained by telephone or telegraph. Confirmation must be obtained, however, by the submission of an application on Form WPB–2774.

Selling Material

(k) *Sales of material.* A producer may sell material which is in its practical working minimum or excess inventory or which it acquired for major plant additions only in accordance with the following rules:

(1) It may be sold to any person to fill an order rated AA–5 or higher unless it is controlled materials.

(2) It may be sold without a preference rating to any person if the aggregate dollar value of all sales by the producer to that person during the current calendar quarter does not exceed $100, and if the material is not controlled materials.

(3) It may be sold to fill an authorized controlled materials order if it is controlled materials.

(4) It may be sold pursuant to a specific written direction from the War Production Board to the seller or to the purchaser.

(5) It may be sold without a preference rating or allotment number to a person who produces, or to the person from whom the producer purchased, the material in its present form.

(6) It may be sold without a preference rating to a scrap dealer as scrap.

(7) It may be sold without a preference rating to a used equipment dealer, if it is used equipment.

(8) It may be sold without a preference rating or allotment number to the Army, Navy, Maritime Commission, or a public housing authority for the repair of an actual or threatened breakdown of their electric, gas, water or central steam heating facilities.

(9) The restrictions on sales in Priorities Regulations 1 and 13 do not apply to sales by producers made under this paragraph.

(10) The provisions of Limitation Orders L–94 and L–102 relating to transfers of electric generating equipment, L–196 relating to transfers of used construction machinery, and Utilities Order U–7 relating to transfers of gas equipment must be observed.

(l) *Refusal to sell to other producers.* Any producer may, by specific direction from the War Production Board, be prohibited from applying or extending preference ratings assigned by this order or by any other certificate or order, upon a determination by the War Production Board, that such producer has wilfully refused to sell (after receiving a bona fide offer to purchase at not less than maximum prices established by regulations of the Office of Price Administration, made by any financially responsible producer who is authorized—under applicable regulations—to accept delivery of the material specified in such offer) the following material:

(1) Material which is in inventory in excess of a practical working minimum, unless the value of the material requested is less than $100, and

(2) Material which is includedin practical working minimum inventory when such material is required by another producer for the repair of an actual breakdown of facilities or equipment.

Inventory Redistribution

(m) *Placing orders through Regional Utility Engineers.* Except in an emergency no producer may transmit to any supplier other than another producer an order totaling $100 or more for the delivery of any item of material (including material for major plant additions) listed in Schedule D of this order without first obtaining a statement from the Regional Utility Engineer in his region or from the Office of War Utilities in Washington, that such material is not reasonably available in the excess inventory of another producer. This statement shall be secured by filing an inquiry, in duplicate, with the regional utility engineer, in letter form or by using the producer's own price inquiry forms, stating (1) the quantity of each item required and (2) a description of the item. An oral or telephonic statement will be sufficient for the purposes of this paragraph, provided that written confirmation is promptly obtained.

General Provisions

(n) *Appeals.* Relief from any of the strictions of this order may be requested by filing a letter with the War Production Board, Office of War Utilities, Washington 25, D. C., Ref.: U–1, stating the reasons why relief is necessary. If the relief requested involves a request to make a plant addition, the request should be filed on Form WPB–2774.

(o) *Records.* In addition to the records required to be kept under Priorities Regulation 1, each producer who applies the preference ratings or allotment number hereby assigned shall maintain a continuing record of inventory and of segregated material in his possession.

(p) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: Office of War Utilities, War Production Board, Washington 25, D. C., Ref.: U–1.

(q) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priorities control and may be deprived of priorities assistance.

(r) *Applicability of WPB regulations.* This order and all transactions affected hereby are subject to all applicable regulations of the War Production Board, as amended from time to time, unless there is a conflict between this order and such regulations, in which case this order shall govern, if it specifically so provides. No producer is, however, subject to the restrictions of CMP Regulation 5 nor may any producer in any way use the preference ratings therein assigned.

(s) *Special delivery quota and inventory directions.* Nothing in this order is intended to supersede any special quota for scheduled deliveries or any special inventory base established by a specific direction from the War Production Board to a named producer. All such directions shall remain in effect unless modified by a further specific direction to the producer affected.

Issued this 22d day of January 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

SCHEDULE B

DELIVERY QUOTAS

To compute the delivery quota (not applicable to producers having inventories of $10,000 or less because they are exempted by the provisions of paragraph (f)), in any class of material for the purposes of paragraph (e) (1), first determine the "base quota" for that class. The base quota in any class is the dollar value of withdrawals in that class made during the last nine months of 1942 for use as "maintenance, repair, and operating supplies", as those terms were defined in Utilities Order U–1 as amended September 24, 1943.[1] Second, use this base quota to determine the actual delivery quota for the class of material in question in accordance with the following:

WATER PRODUCERS [2]

Class 1—A quota of four-thirds of the base quota, increased proportionately to the increase in system output in the year preceding the current year over output in 1940. This quota may be divided among the four calendar quarters as the producer requires.

Class 2—A quarterly quota of one-third of the base quota.

Class 3—A quarterly quota of one-third of the base quota or, at the producer's option, a quarterly quota equal to 60 per cent of the dollar value of material in this class withdrawn during the corresponding quarter of 1940 for use in "maintenance, repair, and operating supplies", as those terms were defined in Utilities Order U–1 as amended September 24, 1943.[1]

Class 4—A quarterly quota of one-third of the base quota.

GAS PRODUCERS [2]

Class 1—A quota of four-thirds of the base quota, increased proportionately to the increase in system output in the year preceding the current year over output in 1940. This quota may be divided among the four calendar quarters as the producer requires.

Classes 2, 3 and 4—A quarterly quota of one-third of the base quota.

[1] These definitions are reprinted here for convenience in reference; please note that they differ from definitions used in the current order:

"Maintenance" means the upkeep of a producer's property and equipment in sound working condition.

"Repair" means the restoration of a producer's property and equipment to sound working condition after wear and tear, damage, destruction of parts, or the like have made such property or equipment unfit or unsafe for service.

"Operating supplies" means (1) material which is essential to the operation of any of the industries or services specified above and which is generally carried in a producer's inventory and charged to operating expense accounts, and (2) material for an addition to or an expansion of property or equipment (including a minor extension of lines), provided that such addition or expansion shall not include any work order, job, or project in which the cost of material shall exceed $1500 in the case of underground construction and $500 in the case of other construction, and provided that no single construction project shall be subdivided into parts in order to come below these limits.

[2] See Schedule A for complete identification of classes.

ELECTRIC POWER PRODUCERS [2]

Class -A quota of four-thirds of the base quota, increased proportionately to the increase in system output in the year preceding the current year over output in 1940. This quota may be divided among the four calendar quarters as the producer requires.

Classes 2, 3, 4, 5, 6 and 7—A quarterly quota of one-third of the base quota.

CENTRAL STEAM HEATING PRODUCERS [2]

Class 1—A quota of four-thirds of the base quota, increased proportionately to the increase in system output in the year preceding the current year over output in 1940. This quota may be divided among the four calendar quarters as the producer requires.

Class 2—A quarterly quota of one-third of the base quota.

SCHEDULE C

LIMITS ON PRACTICAL WORKING MINIMUM INVENTORY

Paragraph (e) (2) provides that a practical working minimum inventory (except for producers having a total inventory of $10,000 or less, who are exempted by paragraph (f)) may in no case exceed the following dollar values:

WATER PRODUCERS [2]

Class 1—The dollar value of items of material of this class in inventory on the most recent date in 1940 on which the producer's inventory was taken, increased proportionately to the increase in system output in the twelve-month period preceding the current quarter over output in 1940.

Class 2—Four-thirds of the dollar value of authorized withdrawals in this class made during the last nine months of 1942 for use as "maintenance, repair, and operating supplies", as those terms were defined in Utilities Order U-1 as amended September 24, 1943.[1]

Class 3—Sixty per cent of the dollar value of material in this class in inventory on the most recent date in 1940 on which the producer's inventory was taken.

Class 4—Two-thirds of the dollar value of authorized withdrawals in this class made during the last nine months of 1942 for use as "maintenance, repair, and operating supplies", as those terms were defined in Utilities Order U–1 as amended September 24, 1943.[1]

Chapter XI—Office of Price Administration

PART 1341—CANNED AND PRESERVED FOODS

[MPR 475,[1] Amdt. 2]

DRIED FRUITS, 1943 AND LATER CROP

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation No. 475 is amended in the following respects:

1. Section 2 (f) is amended to read as follows:

(f) All maximum prices, except for government sales and sales described in paragraphs (j) and (k) of this section, include brokerage. The packer shall maintain his customary cash and quantity discounts to different classes of purchasers.

2. Section 2 (j) and (k) are added to read as follows:

(j) For dried prunes and raisins of the 1943 crop (other than Three Crown

*Copies may be obtained from the Office of Price Administration.

[1] 8 F.R. 13707, 14215.

London Layer Muscats and Zante Currants), the base prices to be used by the packer in determining his maximum export prices under the Second Revised Maximum Export Price Regulation[2] shall be the maximum prices respectively set forth in paragraphs (a) (4) (i) and (a) (5) (i) of this section for sales to government agencies, plus an amount equal to the discount customarily allowed in cash sales and the selling expense customarily included in the price on civilian sales, but not in excess of 5% for both selling expense and cash discounts. The provisions of this paragraph shall not apply to sales to government procurement agencies of the United States.

(k) The packer's maximum prices, f. o. b. factory, for dried prunes and raisins of the 1943 crop (other than Three Crown London Layer Muscats and Zante Currants) for sales to an exporter, for export (purposes only shall be the maximum prices respectively set forth in paragraphs (a) (4) (i) and (a) (5) (i) of this section for sales to government agencies, plus an amount equal to the discount customarily allowed in cash sales and the selling expense customarily included in the price on civilian sales, but not in excess of 5% for both selling expense and cash discounts. However, this pricing method is applicable only if:

(1) The exporter furnishes the packer, prior to sale in each case, with a statement in writing that the commodity is being purchased for the purpose of export and that it will be used only for such purpose, and

(2) The packer furnishes the exporter with an invoice or other written evidence of sale to which is attached the following statement:

> As required by section 2 (k) of MPR 475, I have agreed to sell and you have agreed to buy (indicate items) for use by you in making export sales and not sales to purchasers in the United States. I have received your statement that these commodities will be used for these purposes only.
>
> The maximum prices established by section 2 (k) of MPR 475 apply only to sales by a packer to an exporter of prunes and raisins of the 1943 crop which are to be exported. My maximum prices under this section are higher than my maximum prices for civilian sales because under my existing contract with Commodity Credit Corporation sales made in this manner do not entitle me to compensatory benefits which would be received were the sale made for domestic civilian consumption. My selling price for (indicate items) which are to be exported, which does not exceed my maximum price is $_____. If you sell any of these items to civilian purchasers in the United States you must sell at maximum prices applicable to your type of selling based on my maximum price for domestic civilian sales, f. o. b. shipping point, which is $_____ plus incoming freight paid by you. In making this contract I agree to reduce my selling price to you and refund to conform with the maximum price for domestic civilian sales if you do not export the goods, if you furnish me with satisfactory evidence, within 20 days after such a sale, that the goods have been sold to a civilian purchaser in the United States.

(3) If, instead of exporting all of the prunes or raisins, the exporter sells all or part to a civilian purchaser within the United States his maximum price in such sales shall be the maximum price of his supplier as adjusted under this subparagraph, f. o. b. the supplier's shipping point, plus incoming freight paid by the exporter, except that where he sells the goods as a primary distributor or a wholesaler or a retailer he shall take the maximum price appropriate to that type of seller when making domestic sales. In this event, if the exporter, within 20 days after making the sale, furnishes satisfactory evidence to the packer that the prunes or raisins have been sold to civilian purchasers in the continental United States on or before September 30, 1944, the packer shall adjust his maximum price for such sale by refunding to the exporter the difference between the maximum price as established under this paragraph (k) and the applicable maximum price for domestic civilian sales. (The packer in such case should report and certify such sales to Commodity Credit Corporation as sales to domestic civilian purchasers.)

3. Section 5 (c) is added to read as follows: "and (c) keep all correspondence in connection with the sales of dried prunes and raisins which are sold at export, or to an exporter, together with a copy of every invoice or other written evidence of purchase or sale and (d) preserve for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, all of his existing records relating to his customary allowances, discounts and other price differentials."

4. Section 13 (a) (7) is added to read as follows:

(7) "Exporter" means any person respectively referred to as such in the Second Revised Maximum Export Price Regulation.

FRESH FRUITS AND VEGETABLES FOR TABLE USE, SALES EXCEPT AT RETAIL

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.[*]

Maximum Price Regulation No. 426 is amended in the following respect:

1. Appendix H is added to section 15, Article III, to read as follows:

APPENDIX H—MAXIMUM PRICES FOR CERTAIN FRESH FRUITS AND VEGETABLES.

(a) *Explanation.* This appendix establishes maximum prices for certain sales of spinach, snap beans (green and wax), carrots, green peas, eggplant, green peppers, and cucumbers, and such other fresh fruits and vegetables as may later be added. (These will be referred to as "listed commodities".) It supersedes the provisions of Maximum Price Regulation No. 376[2] (except as otherwise provided) and all regional or district orders, issued under that regulation, which affect listed commodities.

Each of the listed commodities is covered by a separate table of prices. Provisions applying specially to a commodity are to be found in footnotes to the applicable table. Provisions applying to all the listed commodities are to be found in the paragraphs following the tables. The maximum markups which may be added to f. o. b. or delivered maximum prices, as the case may be, for certain types of sales common to all the listed commodities, are set forth in a separate table of general applicability. Thus, for each listed commodity a special table and a general table must be referred to.

The provisions of this appendix do not apply to sales of any listed commodity in unbroken packages not exceeding one pound (net weight) for all listed commodities, except spinach, and five pounds (net weight) for spinach, which has been trimmed, cleaned, washed, or otherwise prepared for sale to the consumer ready for consumption without further preparation other than cooking. Insofar as applicable to these sales, the provisions of MPR 376 remain in effect.

The Office of Price Administration reserves the right to change the basing points named in this appendix at any time, or to establish new or additional basing points, without changing the maximum price, f. o. b. country shipping point.

(b) *Maximum price tables applicable to individual listed commodities.* The following tables state the maximum prices which apply to certain sales of listed commodities by growers, country shippers, and by intermediate sellers. (For other transactions by these sellers, see the table in paragraph (c) and the provisions of paragraphs (d) and (e)).

Except as specified for bulk sales, the maximum prices named in the tables of this paragraph include all costs of harvesting, hauling, and packing, and no additional charge may be made for containers.

Although f. o. b. shipping point maximum prices are named only for listed commodities shipped from certain states (see Column 5 in each case), all listed commodities are subject to the maximum prices named in Columns 6 and 7 of the following tables, regardless of where produced or shipped.

(c) *Table of maximum markups applicable to all listed commodities.* The following table states the maximum markups which may be added for certain distributive services. In each case, the maximum price shall be figured by adding the appropriate markup to the named f. o. b. or delivered maximum price, as the case may be. In figuring maximum prices, markups may not be taken cumulatively.

Example. If a carlot receiver buys a carlot of snap beans delivered at the wholesale receiving point from a grower selling through a broker, the grower's ceiling price is the maximum delivered price plus the broker's fee (not to exceed 11¢ per bushel) and the carlot receiver's ceiling price on the resale is the maximum carlot delivered price plus 40¢. In other words, the broker's fee comes out of the 40¢ and is not added to it.

[1] Charges determined under MPR 165 shall be used instead of those listed in this table if such charges are lower than the mark-ups listed.

[2] Mark-ups listed in column 9 are on a full container basis (except where otherwise specified). Where the total quantity sold is a half-container or larger but less than a full container, the per pound or other unit mark-up shall be used, whether the goods are sold in a container or in bulk. Where the total quantity sold is in less than a half container, the per pound or unit mark-up in column 10 shall be used. Column 10 shall not apply to sales made in bulk.

[3] The bushel and crate containers listed in this column must contain the minimum net weights specified in Column 2 of the applicable table in paragraph (b). For bushels and crates containing less than this minimum net weight the per pound mark-up shall apply.

(d) *Provisions applicable to growers and country shippers*—(1) *Prohibition against certain payments.* No grower or country shipper shall receive, and no person shall pay to any grower or country shipper, an amount in excess of the maximum price, f. o. b. country shipping point (if sold f. o. b.) or the maximum price for delivered sales (if sold delivered), regardless of the type of sale or the type of purchaser, and regardless of any prior or future commitment between buyer and seller, except for allowances made to growers and country shippers for sales through agents, and except as provided for sales by growers and country shippers delivered to premises of retail stores, government procurement agencies, institutional buyers and ultimate consumers. No person who does not pack and ship the listed commodity being priced and who does not regularly operate a packing and shipping plant for that commodity, shall purchase acreage at a price which, after the costs of harvesting, hauling and packing have been added, results in a price higher than the maximum price, f. o. b. shipping point, listed in the applicable table in paragraph (b).

Example.—Suppose a retailer wishes to buy an unharvested field of carrots from a grower. The amount which he pays the grower for the carrots, plus the cost of harvesting, hauling and packing, may not exceed the maximum price, f. o. b. shipping point, for carrots in the kind of container in which they are being packed, as set forth in the table for carrots in paragraph (b).

"Country shipper" means any person, including a grower, grower's cooperative, or packer, who grades, sizes, packs or otherwise prepares the listed commodity being priced for shipment and who sells the commodity from a farm, orchard, grove or other country shipping point. A person who has the listed commodity packed or prepared for him for sale shall be deemed to be a "country shipper", and the country shipping point shall be deemed to be the place where the particular fruits or vegetables have been prepared for shipment.

"Ultimate consumer" means a person who buys the listed commodity being price for direct consumption. However, as used in this appendix, the term does not include a commercial, industrial, or institutional user or government procurement agency.

(2) *Sales by country shippers or growers through brokers, shippers' sales agents, commission merchants or terminal auctions.* (i) For sales of listed commodities by growers or country shippers in carlots or truck-lots through a broker, shipper's sales agent or commission merchant or in less-than-carlots or less-than-trucklots through a broker or shipper's sales agent, the maximum price in each case is the maximum price, f. o. b. country shipping point or the maximum delivered price, as the case may be, for the listed commodity being priced, as named in the applicable table in paragraph (b), plus the actual commission or fee charged for the particular sale, not to exceed the maximum allowable commission, or fee which such selling agent may charge under Maximum Price Regulation No. 165 [4] or the markup shown in Column 4 of the table in paragraph (c), whichever is lower.

"Broker" or "shipper's sales agent" means a person other than a commission merchant or a salaried representative of a grower or country shipper, who for a commission or fee sells the listed commodity being priced on behalf of his principal, without packing any part of the particular goods sold.

"Commission merchant" means a seller's agent who receives the listed commodity being priced and who, for commission or fee, sells it in a terminal market or other wholesale receiving point, and who performs the wholesale functions of unloading cars or trucks and selling in lees than carlots or less than trucklots on behalf of his principal, or who sells carlots or trucklots on behalf of his principal.

"Commission" or "fee" means the charge made by an agent for services performed in connection with the sale of a listed commodity. No amount which the agent pays over to his principal shall be considered part of his fee or commission.

(ii) For sales of listed commodities by growers or country shippers through a commission merchant in less-than-carlots or less-than-trucklots, the maximum price in each case is the maximum delivered price for the listed commodity, as named in the applicable table in paragraph (b), plus the actual commission or fee charged for the particular sale, not to exceed the maximum allowable commission or fee which such selling agent may charge under Maximum Price Regulation No. 165 or the markup named in Column 5 of the table in paragraph (c), whichever is

[4] 8 F.R. 14990.

lower. (For deliveries made in conveyances owned by the seller, see paragraph (iv), below).

Example. Assume that the maximum price for a carlot of carrots in L. A. crates delivered in a particular market is $4.50 per crate. Assume that the commission merchant's actual fee (and his maximum fee under MPR 165) is 7% of the selling price, or $0.34 per crate. The maximum markup in Column 5 of the table in paragraph (c) is $0.50 per crate. The maximum price for sales through the commission merchant is therefore $4.50 plus $0.34 or $4.84 per crate.

(iii) The maximum price in each case for sales by growers or country shippers through a terminal auction is the maximum delivered price, as named in the applicable table in paragraph (b), plus the respective actual commission or fees charged for the particular sale, not to exceed the maximum allowable commission or fee which the agent of the auction seller and which the auction company may charge under Maximum Price Regulation No. 165, plus any actual unloading charges in the terminal market, or, the markup named in Column 4 of the table in paragraph (c), whichever is lower.

"Terminal auction" means a place where, on the basis of competitive bidding open to any person who has established credit with the auction company or pays cash, the listed commodity being priced is sold in less-than-carlots or less-than-trucklots, by persons operating through a licensed sales organization, known as an "auction company", for whose services a fee is charged.

(iv) For sales by growers or country shippers delivered from the country shipping point in conveyances owned by the seller to retail stores where resale is made to ultimate consumers, to government procurement agencies, or to institutional buyers, the maximum price in each case is the price for the listed commodity named in Column 7 of the applicable table in paragraph (b). (For deliveries made in a conveyance not owned by the seller, see paragraphs (i), (ii), and (iii) above). For sales by growers or country shippers to ultimate consumers the maximum price is the applicable price for the listed commodity named in Column 7 of the applicable table in paragraph (b) multiplied by 1.33.

(e) *Maximum prices for sales by persons other than growers or country shippers.* (i) If any person other than a grower or country shipper purchases and resells a listed commodity in unbroken carlots or trucklots, the maximum price in each case is the maximum price f. o. b. country shipping point of the maximum delivered price, as the case may be, in the applicable table in paragraph (b) plus the markup named in Column 6 of the table in paragraph (c).

(2) The maximum price in each case for sales by persons other than growers and country shippers through a terminal auction is the maximum delivered price, as named in the applicable table in paragraph (b), plus the respective actual commission or fee charged for the particular sale, not to exceed the maximum allowable commission or fee which the agent of the auction seller and which the auction company may charge under Maximum Price Regulation No. 165, plus any actual unloading charges in the terminal market, or, the markup named in Column 4 of the table in paragraph (c), whichever is lower.

(3) The maximum price in each case for sales of less-than-carlots or less-than-trucklots by carlot or trucklot receivers is the maximum delivered price for the listed commodity in the applicable table of paragraph (b) plus the markup named in Column 7 of the table in paragraph (c). This price does not include delivery charges. If the seller makes delivery, he may also add the amount which the appropriate regional or district office determines to be applicable to deliveries in these cases (see paragraph (f)).

"Carlot receiver" or "trucklot receiver" means a person who for his own account and profit buys the listed commodity being priced in unbroken carlots or unbroken trucklots for resale, in less-than-carlots or less-than-trucklots, to persons other than ultimate consumers. For sales of particular goods in unbroken carlots or trucklots, the seller shall not be considered a carlot receiver.

(4) The maximum price in each case for sales by secondary jobbers on a delivered basis is the maximum delivered price for the listed commodity in the applicable table in paragraph (b) plus the markup named in Column 8 of the table in paragraph (c). "Delivered" means delivered to the buyer's premises within the free delivery zone and, in the case of retailers, delivered to the retail store.

The maximum price in each case for sales by secondary jobbers not on a delivered basis is the maximum price for sales on a delivered basis less five cents per container for containers under 50 pounds (gross weight) and ten cents per container for containers 50 pounds or more (gross weight), except as these amounts may be changed by the appropriate regional or district office (see paragraph (f)).

"Secondary jobber" means a person other than a retailer who for his own account and profit purchases the listed commodity being priced in less-than-carlots or less-than-trucklots and resells it in any quantities.

(5) The maximum price in each case for sales by service wholesalers on a delivered basis is the maximum delivered price for the listed commodity in the applicable table in paragraph (b) plus the markup named in Column 9 of the table in paragraph (c). "Delivered" means delivered to the buyer's premises within the free delivery zone and, in the case of retailers, delivered to the retail store.

A service wholesaler, when selling the listed commodity being priced on a delivered basis in quantities of less than one half-container, may add to the maximum delivered price for the listed commodity in the applicable table in paragraph (b) the markup named in Column 10 of the table in paragraph (c) but only if he has first offered to sell to the buyer on a full package basis.

The maximum price in each case for sales by service wholesalers not on a delivered basis is the maximum price for sales on a delivered basis less five cents per container for containers under 50 pounds (gross weight) and ten cents per container for containers 50 pounds or more (gross weight), except as these amounts may be changed by the appropriate regional or district office (see paragraph (f)).

"Service wholesaler" means a person who maintains a store or warehouse at which the listed commodity being priced is stored, or warehoused, who receives the commodity at the premises of his store or warehouse, who maintains at such store or warehouse facilities for cold storage, ripening, trimming, sorting, washing, packing and other handling of the listed commodity, who employs salesmen to call on the trade in the city or country points which he services, and who sells to retail stores, government procurement agencies or institutional buyers.

(6) The maximum price for sales by secondary jobbers or service wholesalers delivered to the premises of any purchaser located outside of the free delivery zone is the maximum delivered price in Column 6 of the applicable table in paragraph (b) plus the markup named in Columns 8, 9, or 10 of the table in paragraph (c), plus the cost of transportation, beyond the free delivery zone, figured at the lowest common or contract carrier rate for available transportation, from the seller's place of business to the premises of the purchaser. The amount added for transportation shall not exceed 25 cents per cwt. for the first 25 miles beyond the free delivery zone and five cents per cwt. for each successive 25 miles, and the total amount may not exceed 50 cents per cwt., except as these amounts may be changed by the appropriate regional or district office (see paragraph (f)).

(7) The maximum prices for sales of listed commodities by purveyors shall be those established by the regional or district offices (see paragraph (f)).

"Purveyor" means a person who (1) purchases the listed commodity being priced, (2) maintains facilities for washing, trimming, sorting, grading, repacking and warehousing, (3) employs salesmen to call on institutional and commercial users, (4) makes less-than-carlot or less-than-trucklot sales or less than original container sales, and (5) delivers within the metropolitan area surrounding and including the city, town, village, or other populated area in which his warehousing and selling facilities are located, (6) and performs such additional functions as may be defined by the appropriate regional or district office of the Office of Price Administration for the area in which the seller is located.

(f) *Adjustments by regional and district offices.* The authority delegated by section 2 of this regulation to the regional and district offices does not apply to the listed commodities covered by this appendix.

For the listed commodities, the regional offices of the Office of Price Administration, and such district offices as they in turn may authorize, are authorized:

(1) To determine the limits of the free delivery zone at any wholesale receiving point located within its jurisdiction and to adjust upwards or downwards the allowances provided in paragraphs (e) (4) and (e) (5) for sales by secondary jobbers and service wholesalers on a non-delivered basis and to adjust upwards or downwards the allowances for transportation beyond the free delivery zones named in paragraph (e) (6), at the lowest rates for customary and generally available means of transportation.

(2) To determine and publish orders announcing the maximum amounts which carlot or trucklot receivers may add to their maximum prices for deliveries made within the free delivery zone at that wholesale receiving point.

(3) On individual application, to adjust the maximum markups for carlot and trucklot receivers, but not to exceed the maximum markups for service wholesalers named in Column 9 of the table in paragraph (e). These adjustments shall be restricted to cases where the applicant demonstrates, to the satisfaction of the regional or district office, that he is performing substantial functions beyond those performed by carlot or trucklot receiver.

(4) To establish maximum markups for purveyors at wholesale receiving points located within its jurisdiction, not to exceed 125% of the maximum markups named for service wholesalers in Column 9 of the table in paragraph (c), and to add further limitation to the definition of the term "purveyor" in order to reflect any additional functions normally performed by such seller in the particular wholesale receiving point for which the markup is being fixed.

This amendment shall become effective January 31, 1944 as to maximum prices, f. o. b. shipping point and February 15, 1944 as to all other maximum prices.

KOMA, INC.

NOTICE OF HEARING

In re application of KOMA, Incorporated (KOMA); date filed, January 15, 1944; for renewal of license; class of service, broadcast; class of station, broadcast; location, Oklahoma City, Oklahoma. Operating assignment specified: frequency, 1520 kc; power, 5 kw; hours of operation, unlimited. (File No. B3-R-469.)

You are hereby notified that the Commission has examined the application in the above-entitled case and has designated the matter for hearing, in consolidation with Dockets 5948, 5949, and 6560, for the following reasons:

1. To determine the populations and areas now receiving primary service from Station KOMA, operating on the frequency 1520 kc, 5 kw power, unlimited time, as well as what other broadcast services are available to those populations and areas;

2. To determine the extent of the interference, if any, which would be occasioned to a station operating at Guatemala City, Guatemala, on the frequency 1520 kc, with 12 kw power, unlimited time, from the continued operation of KOMA on 1520 kc, 5 kw power, unlimited time, at Oklahoma City;

3. To determine the extent of the interference, if any, which would be occasioned to the operation of Station WKBW at Buffalo, New York, on 1520 kc, with 50 kw power, unlimited time, directional antenna day and night, from the present operation of KOMA, Oklahoma City, Oklahoma, and what populations and areas, if any, within the normally protected contours of Station WKBW, are subject to objectional interference by such operation of KOMA.

4. To determine whether a grant of this application would be consistent with the priority claims of the Government of Guatemala to the use of the frequency 1520 kc for operation at Guatemala City with the protection afforded a 1-A station under the standards set up in the North American Regional Broadcasting Agreement.

5. In the event it should be found that the present operation of KOMA causes interference to the Guatemala City station and WKBW, Buffalo, which is inconsistent with priority claims of Guatemala to the use of the frequency 1520 kc as recognized by the United States in its agreement to afford a station at Guatemala City the protection of a 1-A station, and the requirements of the Commission's Rules and Regulations and Standards of Good Engineering Practice, to determine whether public interest, convenience and necessity would be served by the continued operation of KOMA on 1520 kc upon condition that its radiations be reduced to such values as to afford the Guatemalan station protection as a 1-A station and to afford WKBW, Buffalo, New York, protection in accordance with the Commission's Rules and Regulations and Standards of Good Engineering Practice.

6. To determine whether the granting of this application would tend toward a fair, efficient, and equitable distribution of radio service as contemplated by section 307 (b) of the Communications Act of 1934 as amended;

7. To determine, in view of the facts adduced under the foregoing issues, whether public interest, convenience, or necessity would be served by the granting of this application.

The application involved herein will not be granted by the Commission unless the issues listed above are determined in favor of the applicant on the basis of a record duly and properly made by means of a formal hearing.

OFFICE OF PRICE ADMINISTRATION.

WATER HEATERS, ETC.

[Order A-2 Under MPR 188, Amdt. 11]

ADJUSTMENT OF MAXIMUM PRICES

Amendment No. 11 to Order No. A-2 under § 1499.159b of Maximum Price Regulation No. 188. Manufacturers' maximum prices for specified building materials and consumers' goods other than apparel.

An opinion accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Paragraph (a) (11) is added to read as follows:

(11) *Direct-fired gas side-arm water heaters, plumbing brass specialty fittings, asbestos packed plug cocks, and furnace and stove pipe and elbows*—(i) *Scope of this subparagraph.* This subparagraph permits the granting of relief to manufacturers of the following commodities who are unable to maintain production under their existing maximum prices whenever there is a general shortage in the essential supply, or the loss of the sellers production would result in higher prices to consumers. The extent of relief to be granted under each provision is set forth in subdivision (ii).

(*a*) *Direct-fired gas side-arm heaters.* The term "direct-fired gas side-arm heaters" means a heater designed for gas-firing, with copper or cast-iron coils as heating vessels, customarily enclosed in a cast-iron or steel jacket and commonly referred to in the trade as a gas-fired side-arm heater.

(*b*) *Plumbing brass specialty fittings.* The term "plumbing brass specialty fittings" means fittings manufactured from brass which are used principally as a

medium to join lead pipe to cast-iron pipe, or lead pipe to steel pipe, and are used primarily in a sanitary plumbing system. The term includes but is not limited to solder nipples, solder vent tees, solder bushings, and ferrules.

(c) *Asbestos packed plug cocks.* The term "asbestos packed plug cocks" means a manually-operated device manufactured from cast-iron, to control the rate of flow of either liquid or vapors, in which the shut-off mechanism is separated from the body of the device by means of asbestos packing vulcanized in place, or by means of a vulcanized one-piece asbestos bushing of the same contours as the shut-off mechanism.

(d) *Furnace and stove pipe and elbows.* The term "furnace and stove pipe and elbows" means a circular conductor, manufactured from 24, 26, 28, or 30 gauge metal, to be used either as straight pipe or as a device to alter the direction of such straight-pipe and which is commonly used to convey vapors, fuels, or smoke from furnaces, stoves, or other heating appliances, to the atmosphere, either direct or through chimneys or flues.

(ii) *Extent of relief to be granted.* (a) Whenever it appears that a shortage exists or threatens to exist in the essential supply of any of the commodities specified above and that a manufacturer of any such commodity is unable to maintain his production at his maximum price or prices, the Office of Price Administration may, either on application for adjustment in accordance with the provisions of Procedural Regulation No. 1, or on its own motion, by order, adjust his maximum price or prices by an amount necessary to permit maintenance upon a basis which will cover the cost to manufacture and sell the commodity; or

(b) Whenever it appears that the loss of a manufacturer's production of any of the commodities specified above would force his customers to resort to higher priced sources of supply and that the manufacturer is unable to maintain his production at his maximum price or prices, the Office of Price Administration may, either on application for adjustment in accordance with the provisions of Revised Procedural Regulation No. 1, or on its own motion, by order, adjust his maximum price or prices by an amount necessary to permit maintenance upon a basis which will cover the cost to manufacture and sell the commodity: *Provided, however,* That in no instance will the manufacturer's maximum price be increased to a price in excess of the general level of prices prevailing for alternative sources of supply of the same commodity.

For the purpose of this subparagraph the term "cost to manufacture and sell" shall include the cost of material, labor, maintenance, supplies, power, taxes (other than State and Federal income taxes), insurance, workmen's compensation taxes, royalties, depreciation and depletion (wherever practicable as determined by the Bureau of Internal Revenue in the computation of Federal income taxes), other manufacturing expenses, and reasonable costs for selling and administration properly applicable to the particular commodity. Expenses not related to the manufacturing and selling of the particular commodity will be excluded.

(iii) *Filing of applications.* Applications under this subparagraph should be filed in accordance with the provisions of Revised Procedural Regulation No. 1.

Before filing an application for adjustment, each applicant shall obtain from the Office of Price Administration, Building Materials Price Branch, Washington 25, D. C., a statement of the specific information that will be necessary in order that the application may receive attention.

(iv) *Passing on of permitted increase by levels beyond the producer.* In issuing adjustment orders under this subparagraph, the Price Administrator will, wherever required, provide the extent to which any increase permitted under this subparagraph, by way of adjustment, may be added to the maximum price or prices of sellers other than the manufacturer.

This Amendment No. 11 to Order No. A–2 shall become effective January 24, 1944.

STARCH AND DEXTRINE PRODUCTS

[Order 11 Under 19a of GMPR]

ORDER AUTHORIZING ADJUSTABLE PRICING

Requests for a change in manufacturers' maximum prices for sales of starch and dextrine products made by the wet corn milling process is now pending before the Office of Price Administration and will require extended consideration. Maximum prices for those sales are now determined under the provisions of the General Maximum Price Regulation, § 1499.19a of which provides for the issuance of the order in appropriate circumstances permitting deliveries under prices to be adjusted upward after delivery.

Starch and dextrine products made by the wet corn milling process have a great variety of uses as a necessary raw material in such highly technical processes as production of iron, steel, textiles and paper products. However, manufacturers are contending that their operation is not profitable because of substantial increases in the price of their basic ingredient, namely corn, and the continued production and distribution of starch and dextrine products are threatened.

The Price Administrator has found that authority to use adjustable pricing for manufacturers' bulk sales of starch and dextrine products made by the wet corn milling process, pending final action on the requests for change in the maximum prices, is necessary to promote the production and distribution of these essential products. He has found further that such authorization would not interfere with the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328. Therefore, in accordance with § 1499.19a of the General Maximum Price Regulation, *It is ordered,* That:

(a) Manufacturers of starch and dextrine products made by the wet corn milling process may make sales and deliveries thereof in containers of more than ten pounds' capacity, and purchasers may buy and receive such products at prices to be adjusted upward after delivery to amounts not in excess of maximum prices established by final action upon the pending requests for change in prices, such action to be by denial of the requests or by the issuance of a price regulation or amendment granting increases in maximum prices for those products. Prior to such final action no payment for sales of starch or dextrine products made by the wet corn milling process should be made or received in excess of maximum prices prevailing at the date of delivery.

(b) This order shall be automatically revoked upon the effective date of a price regulation or amendment issued by the Office of Price Administration increasing maximum prices for manufacturers' sales in bulk of starch and dextrine products made by the wet corn milling process or upon denial of the pending requests for change in those prices. It may be revoked or amended by the Price Administrator at any time.

This order shall become effective January 24, 1944.

Issued this 24th day of January 1944.

CHESTER BOWLES,
Administrator.

Regional and District Office Orders.

[Region V Order G–1 Under TMPR 28]

MODIFICATION OF PRICES OF CERTAIN LISTED VEGETABLES IN DALLAS REGION

Order No. G–1 under Temporary Maximum Price Regulation No. 28. Certain perishable fruits and vegetables.

For the reasons set forth in the opinion issued simultaneously herewith and under authority vested in the Regional Administrator, Region V, of the Office of Price Administration, by § 1439.251 of Temporary Maximum Price Regulation No. 28, *It is hereby ordered:*

(a) The purpose of this order is to establish definite maximum prices for the following fresh vegetables hereinafter referred to as "listed commodities" when such vegetables are produced or sold in Region V, of the Office of Price Administration:

(1) Snap beans.
(2) Carrots.
(3) Cabbage.

(b) The maximum price which a "country shipper" may charge or receive for a "listed commodity" is the dollars and cents price set forth in Table A of this order, f. o. b. "country shipping point."

(c) A "country shipper" is any person, other than such farmers as are exempt under § 1439.254 of Temporary Maximum Price Regulation No. 28, whose name appears on the railroad bill of lading as the shipper the first time the particular vegetable or vegetables move by rail transportation.[1]

"Country shipping point" means the first place in or near the producing area where the "listed commodity" is loaded on cars for rail shipment.[1]

The prices set forth in the following Table A are f. o. b. "country shipping point" as that term is defined in this order but apply only to "country shipping points" where the produce is grown within Region V. The "country shipping point" prices set out in this Table A shall apply, regardless of the quantity sold.

(d) Table A—Maximum "country shipping point" prices.

Commodity	Type package	Maximum price
Cabbage (all fresh, including but not limited to Red, Savoy, and Texas Round types).	50 lb. sacks	$2.25 per sack.
	100 lb. sacks	$4.25 per sack.
	LA Crates (85 lbs.)	$3.90 per crate.
	½ LA crates (44 lbs.)	$2.25 per crate.
	Bulk	$75.00 per ton.
Carrots (all fresh)	LA crates (6 doz. bunches)[1]	$3.00 per crate.
	LA crates (8 doz. bunches)[1]	$3.75 per crate.
	Bunches in bulk or in all other types of containers.[1]	$0.45 per doz. bunches.
Snap beans (all fresh)	Bulk carrots (topped or clipped top)	$3.00 per cwt.
	Bushel hamper (minimum net weight, 30 lbs.)	$4.50 per bushel.
	All other containers of bulk	$0.14 per lb.

[1] Minimum weight of bunch carrots shall be 13 lbs. per dozen bunches. Whenever a seller sells carrots in bunches of lighter weight, the maximum price shall be reduced in proportion to the reduction in the weight.

(e) The maximum price which a "terminal seller" may charge or receive for a "listed commodity" shall be the actual cost to such "terminal seller" of the "listed commodity," multiplied by 1.035: *Provided,* That such maximum price shall not exceed the "country shipping point" price established by Table A, plus "freight" from the "country shipping point" from which the "listed commodity" was shipped to the "terminal seller," times 1.035.

A "terminal seller" or a "car lot distributor" is a person who receives or purchases vegetables, either for his own account or for the account of another person, and who customarily sells ex-track, ex-truck or ex-shipping shed, at the terminal market, and who does not customarily warehouse or deliver beyond the terminal market area.

The "freight" which may be added to the "shipping point" price in determining the ultimate maximum price of a "terminal seller" or a "car lot distributor" means the freight on a particular quantity of the "listed commodity" calculated on car lot rail freight rates (including icing the car when required) from the "country shipping point" involved to the destination involved in the particular transaction.

(f) A wholesaler shall determine his maximum price Wednesday of each week for each "listed commodity" before he commences sales on such Wednesday, and such price shall remain his maximum price until the Wednesday of the week following such determination. He shall determine his maximum price as follows:

(1) Determine whether he be a "service wholesaler," a "retailer-owned cooperative wholesaler," or a "cash and carry wholesaler."

(2) Determine whether he be a "first wholesaler" or a "second or subsequent wholesaler."

(3) Look in Table B for the multiplier in the column shown for the type of wholesaler which he has found that he is.

(4) Multiply this figure found in Table B times "his cost," as that is explained below.

[1] Whenever the first time a listed commodity is shipped, it moves by common carrier truck, then the country shipper is the person (other than such farmers as are exempted under § 1439.254 of Temporary Maximum Price Regulation No. 28), whose name appears on the common carrier truck bill of lading as shipper the first time the particular vegetable or vegetables move by common carrier. Likewise, in such circumstances the country shipping point shall be the point at which such vegetables were loaded on the common carrier truck the first time they moved by common carrier.

In figuring the maximum price which "his cost" as follows:

If he be a "first wholesaler," it shall be the net invoice cost to him from his supplier if that be a delivered price, or such cost plus freight[2] if it be a f. o. b. price, for the largest single purchase of the "listed commodity" made by such wholesaler during the seven-day period preceding the Wednesday on which he is fixing prices: *Provided,* That such price does not exceed his supplier's ceiling price as determined by this order and, *Provided further,* That if such wholesaler purchased the particular "listed commodity" from a farmer or other person in a transaction not covered by this order, "his cost" shall in no event exceed the maximum "shipping point" price provided in Table A, plus car lot freight from the "country shipping point" to such wholesaler.

If he be a "second or subsequent wholesaler," "his cost" shall be the cost of the "first wholesaler," (as that term is explained above), who sold the particular lot of the "listed commodity" on which he is determining his maximum price.

A "service wholesaler" means a wholesaler, not retailer-owned, who distributes vegetables for resale to retailers, or to commercial, industrial or institutional users, and who customarily delivers to purchasers.

A "retailer-owned cooperative wholesaler" means either a nonprofit organization or a corporation of which 51% or more of the capital stock is owned by its retail customers, and which distributes vegetables.

A "cash and carry wholesaler" means a wholesaler, not retailer-owned, who distributes vegetables for resale to retailers, or to commercial, industrial or institutional users, and who does not customarily deliver to purchasers.

"First wholesaler" means the first wholesaler, whether "service," "retailer-owned cooperative," or "cash and carry" who sells a particular lot of a "listed commodity."

"Second or subsequent wholesaler" means any wholesaler who purchases a "listed commodity" from another wholesaler.

(g) Table B—Figures to be multiplied by wholesaler's cost in determining maximum prices under this order for wholesalers.

First wholesaler:	
"Service wholesaler"	1.175
"Retailer-owned cooperative wholesaler"	1.095
"Cash and carry wholesaler"	1.095
Second wholesaler:	
"Service wholesaler"	1.29
"Retailer-owned cooperative wholesaler"	1.20
"Cash and carry wholesaler"	1.20

(h) *"Truckers."* A "trucker" selling a "listed commodity" to wholesalers shall determine his maximum price as though he were a "terminal seller" or a "car lot

[2] Freight as used in this instance means the amount of freight actually paid by such wholesaler (including icing the car if required).

distributor."[8] A "trucker" selling to retailers shall determine his maximum price as though he were a "first wholesaler."[8]

(i) *Sales at retail.* A retailer shall determine his maximum price for each "listed commodity" Thursday of each week before he commences selling, and such price shall remain his maximum price until the Thursday of the week following such determination. He shall determine such price in the following manner:

(1) Determine the net cost to him of the particular "listed commodity" in the manner explained below.

(2) If such "listed commodity" be snap beans or carrots, he shall multiply his net cost by 1.39.

(3) If such "listed commodity" be cabbage, instead of multiplying such net cost to him by 1.39, he shall multiply his net cost by 1.50.

The resulting figure is his maximum price.

In determining the net cost to him the retailer buying from any person (other than a farmer or other person in a transaction not governed by this order) shall take the net invoice cost to him of his largest single purchase of the particular "listed commodity" during the seven days preceding the Thursday on which he is determining such prices.

If the retailer purchased such "listed commodity" from a farmer or other person in a transaction not governed by this order, the net cost to him shall be computed in the same manner as though he had purchased from other suppliers, except that such net cost shall not exceed the maximum "country shipping point" price provided in Table A of this order, plus freight figured at car lot rate (including icing the car if required) from the "country shipping point" to such retailer.

(j) All sellers, when they compute their maximum prices, shall compute them for the unit of sale which they wish to use. If this unit is different than the unit upon which their purchase price was determined, they shall first compute the net cost to them of the unit which they wish to sell, and then apply their mark-up, as provided hereinabove, in this order.

In figuring such prices, all sellers other than retailers shall carry their figures out to the second decimal place. Sales by such sellers of single units where a fractional cent of one-half cent or more is involved may adjust the price upward to the nearest cent, and where the fractional cent is less than one-half, they shall adjust the price down to the nearest cent. In sales of more than one unit, the actual maximum price shall be multiplied by the number of units, and if any fractional cent results, they may be adjusted up or down, as above stated.

When such sales are made by retailers, they shall adjust the maximum price of the individual unit to the nearest one-half cent. In sales of single units wherein the maximum price is a fraction of a cent, they may adjust upward to the nearest cent. But in multiple sales they may only adjust the total sales price upward to the nearest cent.

(k) If any person in Region V sells a quantity of a listed commodity which was grown outside of Region V, he may determine the maximum price according to the mark-up formula established in this order, using as his cost the actual cost to him of the largest single purchase of such commodity during the appropriate period: *Provided*, That the first person located in Region V who sells such commodity grown outside Region V shall not take as his cost any price which exceeds the ceiling price of his supplier, if that be a delivered price, or such ceiling price plus freight (including car icing if required) if that be an f. o. b. price.

(l) Sellers of listed commodities for which maximum prices are established by this order shall make all records pertaining to the determination of the maximum prices of such listed commodities available to their purchasers upon request.

(m) During the period from the effective date of this order to the first Wednesday following such effective date, wholesalers shall determine their maximum prices of "listed commodities" by using as a basis of computing their actual cost the last purchase which they made prior to the effective date of this order. In computing their maximum prices on the first Wednesday after the effective date of this order, they shall use as a basis for such computation the actual cost (not to exceed their supplier's ceiling prices as provided in this order) of the largest single purchase of the particular "listed commodity" made by such wholesaler during the period from the effective date of this order to such Wednesday.

(n) During the period from the effective date of this order to the first Thursday following such effective date, retailers shall determine their maximum prices of "listed commodities" by using as a basis of computing their actual cost the last purchase which they made prior to the effective date of this order. In computing their maximum prices on the first Thursday after the effective date of this order, they shall use as a basis for such computation the actual cost (not to exceed their supplier's ceiling prices as provided in this order) of the largest single purchase of the particular "listed commodity" made by such retailer during the period from the effective date of this order to such Thursday.

(o) All sales of "listed commodities" exempt by Temporary Maximum Price Regulation No. 28, as it now exists, or as it may be hereafter amended, are exempt from this order.

(p) Unless the context otherwise requires, or unless specifically defined in this order to the contrary, the terms used in this order shall be defined as they are in the Emergency Price Control Act of 1942, as amended, and as defined in Temporary Maximum Price Regulation No. 28.

(q) All orders adjusting the maximum prices of any sellers of "listed commodities" covered by this order heretofore issued by the Regional Office, of the Office of Price Administration, Region V, or any state or district office in such Region V, are revoked, effective on the effective date of this order.

(r) This order may be revoked or amended at any time by the Office of Price Administration.

(s) This order shall become effective at 12:01 a. m. on Saturday, March 20, 1943, and shall expire simultaneously with the expiration of Temporary Maximum Price Regulation No. 28, as now amended or as hereafter amended.

[8] If such "trucker" purchases the particular "listed commodity" from a farmer in a transaction not regulated by this order, in determining such price he shall use as the "country shipping point" the rail head nearest, by road, to the farm on which the particular "listed commodity" was grown. The freight element to be used by such trucker shall be computed on the basis of carlot freight rate (including icing the car if required) from the country shipping point so determined to the point where such trucker sells the listed commodity.

CARROLL WAR INDUSTRIES

RECOMMENDATION OF FORMATION OF WAR PRODUCTION ASSOCIATION

Carroll War Industries, Westminster, Maryland, is a War Production Association comprising seven companies, having light and medium machine shop facilities, and woodworking equipment and facilities for the production of cabinets and general millwork, as listed in Appendix I. The purpose of this association is to combine the facilities and skills of the member companies for the manufacture of articles, equipment, supplies and materials for war and essential civilian requirements, and more particularly for the manufacture of products involving high precision light and medium general purpose machine shop work, and wooden items, together with their metal components. The activities of the association will relate solely to war and essential civilian work and will terminate within six months after the end of the war.

In my opinion the formation and operation of Carroll War Industries is appropriate to the fulfilment of the purposes of Public Law 603—77th Congress, approved June 11, 1942 (56 Stat. 351) and Executive Order No. 6891 of September 4, 1941. I have therefore approved the Plan of Organization, Procedure, and Objectives of Carroll War Industries,[1] and recommend that the Chairman of the War Production Board find and certify under section 12 of Public Law 603—77th Congress (56 Stat. 357), that the doing of any act or thing, or the omission to do any act or thing, by any person in compliance with said plan is requisite to the prosecution of the war (See Certificate 192, *infra*).

Issued at Washington, D. C., this 6th day of January 1944.

Acting Chairman,

GENERAL GAS AND ELECTRIC CORP., ET AL.

NOTICE OF FILING AND ORDER CONSOLIDATING HEARING THEREON WITH PREVIOUSLY SCHEDULED HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 20th day of January, 1944.

In the matter of General Gas & Electric Corporation, File No. 70-850; Virginia Electric and Power Company, Virginia Public Service Company, and Engineers Public Service Company, File No. 70-846.

Notice is hereby given that a declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by General Gas & Electric Corporation (Gengas), a registered holding company, and direct subsidiary of Trustees of Associated Gas and Electric Corporation (Trustees), also a registered holding company.

This declaration embraces transactions which are complementary to filings with this Commission by Engineers Public Service Company (Engineers), Virginia Electric and Power Company (Vepco) and Virginia Public Service Company (VPS) primarily concerned with the merger of VPS into Vepco (File No. 70-846), and regarding which a notice of filing and order for hearing was issued by the Commission on January 13, 1944 (Holding Company Act Release No. 4837).

All interested persons are referred to said declaration which is on file in the office of this Commission for a statement of the transactions therein proposed, which are summarized below:

Gengas presently owns 782,000 shares of $1 per share par value common stock of VPS, which is all of the common stock of VPS presently issued and outstanding. Gengas also asserts a claim to $1,165,166.67 in cash held by the New York Trust Company as escrow agent under an agreement between VPS, Gengas, and the New York Trust Company, dated June 5, 1942. This cash represents the proceeds of $1,200,000, aggregate principal amount of First Mortgage and Refunding 20-year 5% Gold Bonds, Series B, of VPS, formerly held by Gengas, and reacquired by VPS, for the said $1,165,166.67 (97% of par and accrued interest), pursuant to an order of this Commission entered May 22, 1942. By its order of November 3, 1943, this Commission directed the return of the escrowed fund to VPS (Holding Company Act Release No. 4654). This claim and the common stock of VPS are hereinafter referred to as the "interest" of Gengas in VPS.

As part of a program by which Vepco, a non-affiliate of Gengas, proposes to acquire the properties of VPS, Gengas has entered into an agreement with Vepco and its parent, Engineers, a registered holding company, wherein, among other things, it is proposed, subject to certain conditions, that Gengas sell its interest in VPS for an aggregate consideration of not to exceed $2,500,000, of which $1,000,000 is immediately payable in cash, and an additional amount not to exceed $1,500,000 is to be paid, over a period of not to exceed five years, in the event that the earnings of Vepco exceed certain specified amounts subsequent to the merger therein of VPS.

The filing has designated section 12 (d) of the act and Rule U-44 promulgated thereunder as being applicable to the proposed transactions and states that the nature of the interest being sold is such as to make the use of competitive bidding impracticable.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters, and that said declaration shall not be permitted to become effective except pursuant to further order of this Commission;

The Commission having on January 13, 1944, issued a notice of filing and order for hearing setting a public hearing for February 1, 1944, at 10 o'clock, a. m., e. w. t., regarding the filings of Vepco, VPS and Engineers submitted in connection with the transactions which these companies propose to undertake to effectuate the merger of VPS and Vepco; and it appearing that these matters and the matters embraced by the instant declaration are concerned with common matters of law and fact;

It is ordered, That the hearing on the instant declaration be consolidated with the hearing heretofore set in Engineers Public Service Company, et al., File No. 70-846, and that a hearing on these consolidated matters be held on February 1, 1944, at 10 o'clock, a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. On such date the hearing room clerk in room 318 will advise as to the room in which said hearing will be held. At such hearing cause shall be shown why such declarations should be permitted to become effective and such applications granted;

It is further ordered, That the Secretary of this Commission shall serve notice of said hearing by mailing copies of this order to the above named party and that notice of said hearing be given to all other persons by publication of a copy of this order in the FEDERAL REGISTER. Any person desiring to be heard in connection with this proceeding or proposing to intervene herein shall file with the Secretary of the Commission, on or before January 29, 1944, his request or application therefor, as provided by Rule XVII of the Rules of Practice of this Commission;

It is further ordered, That Richard Townsend, or any other officer or officers of this Commission designated by it for that purpose, shall preside at such hearing. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's Rules of Practice;

It is further ordered, That, without limiting the scope of the issues presented by said declaration, particular attention will be directed at the hearing to the following matters and questions:

1. Whether the proposed sale by Gengas of its interest in VPS meets the requirements of section 12 of the act and applicable rules promulgated thereunder;

2. Whether or not, under the circumstances, compliance with the requirements of paragraphs (b) and (c) of Rule U-50 is necessary or appropriate in connection with the sale of the securities of VPS by Gengas;

3. Whether, and to what extent, it is necessary or appropriate in the public interest or for the protection of investors or consumers to impose terms or conditions in connection with the proposed transactions;

4. Whether, in all other respects, the proposed transactions outlined above comply with all of the applicable provisions of the Public Utility Holding Company Act of 1935 and the rules and regulations promulgated thereunder.

By the Commission.

§ 1440.2 *Delegation of authority*—(a) *Definitions.* The definitions contained in Food Distribution Order No. 81, as amended, shall, when used herein, have the same meaning as set forth in said Food Distribution Order No. 81, as amended; and, when used herein, unless otherwise distinctly expressed or manifestly incompatible with the intent hereof:

(4) The term "distilled red oil" means the lower titer fatty acids, commonly known as commercial oleic acid, obtained by any process which includes the splitting of animal fat and a subsequent separation by pressing, or otherwise, of such lower titer fatty acids from the higher titer fatty acids, and which have been distilled either prior to, or after, separation from the higher titer fatty acids.

For example, such a unit might be one, but not more than one, of the following: a tank car, or fraction thereof; a tank truck, or fraction thereof; a carload, or fraction thereof, of packaged oil; or a truck load, or fraction therebf, of packaged oil.

(b) *Restrictions on delivery, use, processing, and blending of animal oil, neat's-foot oil, and distilled red oil.* Subject to the provisions of (c) and (d) hereof, no person shall deliver, accept delivery of, use, process, or blend animal oil, neat's-foot oil, or distilled red oil, except as specifically authorized by the Director.

(c) *Exceptions.* (1) Notwithstanding the provisions of (b) hereof, specific authorization by the Director shall not be required with respect to the delivery to any one person during any one calendar month, and acceptance of delivery, use, processing, or blending by any one person in any one calendar month of 450 pounds, or less, of animal oil, 450 pounds, or less, of neat's-foot oil, and 450 pounds, or less, of distilled red oil: *Provided, however,* That no producer shall deliver any animal oil, neat's-foot oil, or distilled red oil pursuant to this paragraph (c) (1), in any calendar month, unless specifically authorized by the Director to so deliver a specific maximum quantity of animal oil, neat's-foot oil, or distilled red oil in such month; and no producer shall deliver in any calendar month animal oil, neat's-foot oil, or distilled red oil pursuant to this paragraph (c) (1) in a total amount in excess of the maximum amount authorized by the Director.

The undersigned hereby certifies to the War Food Administration, and to _____ (supplier) _____ that the delivery of _____ pounds of _____ oil to him by said supplier, in connection with which this certificate is furnished, in _____ (month) 194__, will not, together with all other animal oil, neat's-foot oil, and distilled red oil delivered or to be delivered to him in such month, exceed the amount which he is entitled to accept delivery of under (c) (1) of Food Distribution Order 53, as amended.

(d) *Temporary suspension of (b) and (c) with respect to animal oil.* The restrictions and provisions of (b) and (c) hereof, shall not apply to the delivery, acceptance of delivery, use, processing, or blending of animal oil by any person, when such delivery, acceptance of delivery, use, processing, or blending occurs during the period beginning on October 1, 1943 and ending on March 31, 1944.

(e) *Inventory limitations with respect to animal oil.* (1) No person, other than a producer or distributor, shall, after January 1, 1944, accept delivery of any animal oil which will cause his inventory of animal oil to exceed a quantity equal to 60,000 pounds, or the aggregate amount of animal oil used, processed, or blended, by him during any two consecutive calendar months in the period beginning on July 1, 1943, and ending on December 31, 1943, whichever is greater. (2) No distributor shall accept delivery of any animal oil, after January 1, 1944, which will cause his inventory of animal oil to exceed a quantity equal to ⅓ of the amount of animal oil which he accepted delivery of during the period beginning on July 1, 1943, and ending on December 31, 1943.

(3) Notwithstanding the provisions of (e) (1) and (2) hereof, any person restricted by the provisions of said (e) (1), or any distributor, may accept delivery of a quantity of animal oil equal to his maximum unit, if, at the time of such acceptance of delivery, his inventory does not exceed 50% of the quantity he is permitted to have in his inventory under the applicable provisions of (e) (1) and (2) hereof.

(f) *Saponified red oil set aside.* On the first day of each calendar month, every producer shall set aside and hold for delivery pursuant to specific authorizations by the Director, a quantity of saponified red oil equal to ⅓ of the total saponified red oil produced by him in the preceding calendar month. Any saponified red oil required to be set aside hereunder on the first day of any month and the delivery of which is not specifically authorized by the Director prior to the first day of the succeeding calendar month, shall be released from the restrictions of this paragraph on the first day of such succeeding calendar month.

(g) *Orders for saponified red oil which is not to be used for the production of liquid, industrial laundry, or household laundry soap given preference.* (1) Every person, except a distributor, who desires to obtain saponified red oil from a producer or distributor for any purpose other than the production of liquid, industrial laundry, or household laundry soap, shall, prior to the delivery of the saponified red oil to him, deliver to such producer or distributor a written order for such saponified red oil, which has attached thereto, or included therein, a certificate properly filled out and signed by him, in the following form:

No person who receives saponified red oil as a result of such a certified order shall use any of the saponified red oil so received in the production of liquid, industrial laundry, or household laundry soap.

(2) No producer or distributor shall deliver saponified red oil to any person, other than a distributor, in any calendar month, except pursuant to a specific authorization by the Director or a certified order, unless and until he has delivered, offered to deliver, or made provision to deliver all saponified red oil which is ordered from him by means of certified orders which are received by him at any time before the 16th day of such calendar month, and if subject to (f) hereof, has set aside the amount of saponified red oil required thereunder.

(h) *Further allocations.* The Director is authorized at any time to issue orders allocating fats and oils and facilities to the production of particular kinds or grades of animal oil, neat's-foot oil, or red oil.

(i) *Issuance of specific authorizations.* (1) Insofar as practicable, the Director will issue authorizations pursuant to the provisions of this order with respect to delivery, acceptance of delivery, use, processing, or blending in each calendar month prior to the commencement of such month. Each person requiring an authorization to accept delivery of, use, process, or blend animal oil, neat's-foot oil, or distilled red oil, during any calendar month, including a person seeking authorization to accept delivery of animal oil, neat's-foot oil, or distilled red oil for resale, or a producer seeking authorization to make delivery of animal oil, neat's-foot oil, or distilled red oil pursuant to (c) (1) hereof, shall file an application therefor, on or before the 15th day of the preceding calendar month. Separate applications shall be made for each kind of oil on Form FDA 478 (and on Form FDA 477 when it is desired to accept delivery of animal oil, neat's-foot oil, or distilled red oil from another person), or such other form or forms as may be prescribed by the Director. The applications shall be forwarded to the Director of Food Distribution, War Food Administration, Washington 25, D. C., Ref. FDO 53. In each case where the application for authorization to accept delivery of, use, process, blend, or deliver pursuant to (c) (1) hereof, is granted, one copy of Form FDA 478, or such other form as may be prescribed by the Director, signed by the Director, will be returned to the applicant and will constitute his authorization to accept delivery of, use, process, blend, or make delivery pursuant to (c) (1) hereof. Where application to accept delivery from another person is granted, one copy of Form FDA 477, signed by the Director, will be sent to the supplier and will constitute the authorization for the supplier to make delivery.

(2) The Director may prescribe in each authorization issued pursuant to this order, the period of time in which the authorization shall be effective. No person shall take any action pursuant to, or in reliance on, an authorization which has expired.

(3) Animal oil, neat's-foot oil, or distilled red oil authorized by the Director to be used for a specific purpose during a specific period shall revert to inventories where and to the extent that such oils are not used during the specific period for the specific purpose designated in the authorization. Furthermore, any animal oil, neat's-foot oil, or distilled red oil which the Director has authorized to be delivered, accepted for delivery, or used for the purpose of building up inventories, or which has reverted to inventories under the terms of this order, shall not thereafter be delivered, accepted for delivery, processed, blended or otherwise used, except in accordance with the provisions of this order.

(j) *Records and reports.* (1) Every producer or distributor of animal oil, neat's-foot oil, or distilled or saponified red oil, shall fill out and file with the Director of Food Distribution, War Food Administration, Washington 25, D. C., Ref. FDO 53, one copy of Form FDA 476, with respect to such oils, between the 1st and 15th day of each calendar month.

(2) Every person subject to this order shall, for at least two years (or for such periods of time as the Director may designate), maintain an accurate record of his transactions in animal oil, neat's-foot oil, distilled red oil, and saponified red oil, and retain all certificates and certified orders received pursuant to (c) (2) or (g) (1) hereof.

(3) The Director shall be entitled to obtain such information from, and require such reports and keeping of such records by, any person, as may be necessary or appropriate, in his discretion, to the enforcement or administration of the provisions of this order.

(4) The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget, in accordance with the Federal Reports Act of 1942. Subsequent record-keeping or reporting requirements will be subject to the approval of the Bureau of the Budget, pursuant to the Federal Reports Act of 1942.

(k) *Intra-company deliveries.* The prohibitions and restrictions of this order with respect to deliveries of animal oil, neat's-foot oil, distilled red oil, or saponified red oil shall apply not only to deliveries to other persons, including affiliates and subsidiaries, but also to deliveries from one branch, division, or section of a single enterprise to another branch, division, or section of the same or any other enterprise under common ownership or control. However, nothing in this paragraph shall be construed as restricting a person's intra-company movement of any animal oil, neat's-foot oil, or distilled red oil which the Director has specifically authorized such person to use, process, or blend.

(l) *Audits and inspections.* The Director shall be entitled to make such audit or inspection of the books, records, and other writings, premises or stocks of animal oil, neat's-foot oil, distilled red oil, or saponified red oil, of any person, and to make such investigations, as may be necessary or appropriate in his discretion, to the enforcement or administration of the provisions of this order.

(m) *Petition for relief from hardship.* Any person affected by this order who considers that compliance herewith would work an exceptional and unreasonable hardship on him, may file a petition for relief in writing with the Director, addressed as follows: Director of Food Distribution, War Food Administration, Washington 25, D. C., Ref. FDO 53. Such petition shall set forth all

pertinent facts and the nature of the relief sought. The Administrator of this order shall then act upon the petition. In the event that the petitioner is dissatisfied with the action taken by the Administrator of this order, he may request a review of such action by the Director whose decision with respect to the relief sought shall be final.

(n) *Violations.* The War Food Administrator may, by suspension order, prohibit any person who violates any provision of this order from receiving, making any delivery of, or using animal oil, neat's-foot oil, distilled red oil, or saponified red oil, or any other material subject to priority or allocation control by the War Food Administrator, and may recommend that any such person may be prohibited from receiving, making any delivery of, or using material subject to the priority or allocation control of other governmental agencies. In addition, any person who wilfully violates any provision of this order is guilty of a crime and may be prosecuted under any and all applicable laws. Further, civil action may be instituted to enforce any liability or duty created by, or to enjoin any violation of, any provision of this order.

(o) *Delegation of authority.* The administration of this order and the powers vested in the War Food Administrator, insofar as such powers relate to the administration of this order, are hereby delegated to the Director and may be redelegated by him to any employee of the United States Department of Agriculture.

(p) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless instructions to the contrary are issued by the Director, or otherwise provided herein, be addressed to the Director of Food Distribution, War Food Administration, Washington 25, D. C., Ref. FDO 53.

(q) *Territorial extent.* This order shall apply in the United States, its territories and possessions, and the District of Columbia.

(r) *Effective date.* This order shall become effective at 12:01 a. m., e. w. t. February 1, 1944. However, with respect to violations of said Food Distribution Order 53, as amended, or rights accrued, or liabilities incurred thereunder, prior to said date, said Food Distribution Order 53, as amended, shall be deemed to be in full force and effect for the purpose of sustaining any proper suit, action, or other proceeding with respect to any such violation, right, or liability.

[CMP Reg. 5A, Int. 1 as Amended Jan. 25, 1944]

INTERPRETATIONS OF CMP REGULATION NO. 5

The following interpretation is issued with respect to CMP Regulation 5A:

Interpretations of CMP Regulation No. 5 are not all applicable to CMP Regulation 5A. Those which are, and which are of general interest to institutions and governmental agencies, will be republished separately under CMP Regulation 5A.

NON-PROFIT FIRE-FIGHTING ASSOCIATIONS

The following interpretation is issued with respect to CMP Regulation 5A:

An association or corporation, operated not for profit, organized for the purpose of fighting and controlling forest fires, and which, through its employees, is actually engaged in the activity of fighting and preventing forest fires, may use the rating assigned by CMP Regulation 5A to the activity of "fire protection" to obtain maintenance, repair and operating supplies required for such activity, but excluding all items on List A and B of Priorities Regulation No. 3.

[CMP Reg. 5A, Int. 3]

MRO SYMBOL CANNOT BE USED TO MAKE ALLOTMENTS

The following interpretation is issued with respect to CMP Regulation 5A:

A governmental agency or an institution which is permitted to get controlled materials under paragraph (c) of CMP Regulation No. 5A for maintenance, repair and operating supplies is not entitled to use the MRO symbol for purposes of allotting controlled materials to others. For example, a governmental agency requires a spring as a repair part to be used in connection with an activity listed in Schedule I or Schedule II. It may use the MRO symbol to place an authorized controlled material order for steel which it will fabricate into the spring, but if it buys the spring from a spring manufacturer it may not make an allotment with the MRO symbol to the spring manufacturer. The spring manufacturer receives his allotment direct from the War Production Board as provided in CMP Regulation No. 1. (This interpretation is substantially similar to Interpretation No. 2 to CMP Regulation No. 5 issued April 20, 1942).

RESALE OR GIFT OF MRO MATERIAL

The following interpretation is issued with respect to CMP Regulation 5A:

A governmental agency or an institution may not use the ratings or symbol assigned by CMP Regulation No. 5A to obtain supplies which it desires to give or sell to another governmental agency or an institution or to any person. For example, a federal agency desires to purchase office supplies to be given to a state agency. The federal agency may not use CMP Regulation No. 5A to obtain such supplies because they are not operating supplies as far as its own activities are concerned.

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 5A, Int. 5]

MRO SYMBOL AND RATING CANNOT BE USED TO BUY ADDITIONS OR IMPROVEMENTS

The following interpretation is issued with respect to CMP Regulation 5A:

(a) The MRO symbol and rating assigned by CMP Regulation No. 5A for MRO (maintenance, repair and operating supplies) cannot be used by a governmental agency or institution to buy improvements or additions except to the limited extent permitted under paragraph (b) (6) relating to minor capital additions costing $100 or less.

(b) The regulation is intended to give blanket priorities assistance to governmental agencies and institutions for use in ordering products and materials which are essential to keeping the agency's or institution's existing plant and equipment in running order. Attention is called to the fact that ratings assigned by the War Production Board for MRO are, in general, two degrees higher than those assigned for new construction, additions or improvements. The assignment of higher ratings for MRO reflects the recognition by the War Production Board of the necessity for keeping existing facilities in operating condition while the necessity for additions or improvements to existing facilities must be established, pursuant to application, on the merits of each individual case. This policy should be firmly borne in mind in using the blanket priorities assistance made available by the regulation.

(c) The MRO rating cannot be used to replace machinery or equipment which can be repaired. However, where a piece of machinery or equipment is worn out beyond repair the MRO rating can be used to buy a piece of machinery or equipment of the same general type, capacity and design, to replace it. Where an agency or institution wishes to replace worn out machinery or equipment with machinery or equipment of a different type or of greater capacity or improved design it should file an application for priorities assistance on Form WPB-541 (PD-1A) or such other form as may be prescribed. Attention is called to Interpretation No. 6, which explains how use of CMP Regulation 5A is limited by Construction Order L-41. (Compare Interpretation 8 to CMP Regulation No. 5 which explains the different rule under that regulation. The two regulations prescribe different standards because the accounting practices of business and government agencies are not based on the same principles.)

PART 3274—MACHINE TOOLS AND INDUSTRIAL SPECIALTIES

[Conservation Order M-319, Interpretation 1]

USE OF SMALL ORDER EXEMPTION BY CONSUMERS SPECIFICALLY AUTHORIZED TO RECEIVE ABRASIVE GRAIN

The following interpretation is issued with respect to conservation order M-319:

A question has arisen as to whether an ultimate consumer who has been specifically authorized on Form WPB-2781 to accept delivery of abrasive grain may use the small order provisions contained in paragraph (d) (1) of Conservation Order M-319 to obtain additional grain.

If, in any period of authorization, an ultimate consumer requires more than 20,000 pounds of abrasive grain (other than abrasive optical finishing powders) or more than 4,500 pounds of such grain in any one grit size finer than 220, he must file an application on Form WPB-2781 for the total quantity of abrasive grain (other than abrasive optical finishing powders) which he requires from all sources in that period, but need not file an application for abrasive optical finishing powders unless his requirements for powders in the same period exceed 100 pounds or, in the January and February 1944 period exceed $100 worth. Similarly, in any period, an ultimate consumer may accept delivery of 20,000 pounds of abrasive grain (other than abrasive optical finishing powders), subject to the further 4,500 pound limitation, without specific authorization even though the size of his requirements for abrasive optical finishing powders necessitates the filing of an application for such powders.

An ultimate consumer may not, however, use the small order provisions of paragraph (d) (1) to obtain optical finishing powders or other abrasive grain in addition to the quantities which he has been specifically authorized to receive. For example, if he has been specifically authorized to receive 6,000 pounds of size 220 in January and February he must obtain specific authorization for all other deliveries of abrasive grain (other than abrasive optical finishing powders) which he desires to accept during the same period and may not place a "small order" for any abrasive grain except optical finishing powders.

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 5A, Int. 6]

RELATIONSHIP BETWEEN CMP REGULATION NO. 5A AND CONSERVATION ORDER L-41

The following interpretation is issued with respect to CMP Regulation 5A:

(a) Order L-41 requires War Production Board authorization before beginning any construction work except in those cases where the order expressly states that authorization is not necessary.

(b) CMP Regulation No. 5A may not be used to get materials or products for any construction work which cannot be built under L-41 without specific authorization unless the authorization specifically says that CMP Regulation No. 5 or 5A may be used.

(c) In those cases where specific War Production Board authorization is not required before beginning construction and where materials needed for construction cost no more than $100, CMP Regulation No. 5A may be used to buy materials and products needed for the construction. (This Interpretation is substantially similar to Interpretation No. 9 to CMP Regulation No. 5, issued July 29, 1943.)

PART 1364—FRESH, CURED AND CANNED MEAT AND FISH PRODUCTS

[MPR 364,[1] Amdt. 11]

FROZEN FISH AND SEAFOOD

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.*

Maximum Price Regulation No. 364 is amended in the following respects:

1. Section 3 (d) (1) is amended to read as follows:

(1) *Primary wholesalers.* Primary wholesalers are wholesalers who buy frozen fish or seafood from processors and distribute it for resale from cold storage warehouses to other wholesalers or to retailer-owned cooperative and chain store warehouses. In the sale of frozen fish or seafood which has been unloaded, stored and warehoused in the regular course of his business, the primary wholesaler's mark-up is 12%. In the case of sales of goods which have not been stored and warehoused, the primary wholesaler's mark-up is 7%. In the case of sales involving delivery from the processor's cold storage warehouse to the primary wholesaler's customer, there is no mark-up.

2. Section 3 (e) is amended to read as follows:

(e) *Imported frozen fish and seafood.* The maximum price at which a wholesaler, including any agent of a foreign processor, may sell any imported frozen fish or seafood listed in section 14 shall be the base price listed in section 14 for the species and style of dressing plus or minus the differential for packaging provided for in section 13, plus the actual freight to the wholesaler's warehouse from the point at which the frozen fish enters the United States. If that freight is less than the carload rail freight rate from the shipping point in the United States closest to the processor's plant to the wholesaler's warehouse, the latter may be added in place of the actual freight. However, where frozen Atlantic Coast smelts are imported for resale in the United States, the freight from the point of shipment to the wholesaler's warehouse, not to exceed the carload rail freight rate if such rate is available, may be added. To this amount, may be added the mark-up provided for the class of sale in paragraphs (c) and (d) of section 3.

3. In the table of base prices in section 14, Schedule No. 60A is added to read as follows:

Schedule No.	Name	Item No.	Style of processing	Size	Base price per pound
Sched. 60A	Smelts, Atlantic Coast (Osmerus Mordax):				
	(a) Jumbo	1	Round	8½ in. and over	$0.25
	(b) Extra	2	Round	7 to 8½ in.	.21½
	(c) No. 1	3	Round	5½ to 7 in.	.14¼
	(d) No. 2 (medium)	4	Round	4 to 5½ in.	.08
	(e) No. 1	5	Dressed	5½ to 7 in.	.23½

This amendment shall become effective January 24, 1944.

PART 1404—RATIONING OF FOOTWEAR

[RO 6A,[1] Amdt. 6]

MEN'S RUBBER BOOTS AND RUBBER WORK SHOES

A rationale accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Ration Order 6A is amended in the following respect:

1. Section 2.15 is added to read as follows:

SEC. 2.15 *District Office may release excess rubber footwear.* (a) Any retailer or distributor having excess rubber footwear which cannot reasonably be sold for certificates may be authorized by the District Office to transfer it nonrationed in accordance with the following provisions:

(1) For the purpose of this section "excess rubber footwear" includes only the number of pairs by which the applicant's inventory of December 5, 1942, of a particular type exceeds the combined total of the number of pairs of that type released by Amendment 10 to Ration Order 6 and Amendment 3 to Ration Order 6A plus twice the number of pairs of that type transferred by him during the period from December 5, 1942, to December 31, 1943, inclusive.

(2) Application should be made to the District Office for the area in which the establishment is registered. The application shall be in writing and contain or be accompanied by the following information for each type of rubber footwear of which an excess is claimed:

(i) Number of pairs of that type listed on applicant's inventory of December 5, 1942.

(ii) Number of pairs of that type released by Amendment 10 to Ration Order 6 and Amendment 3 to Ration Order 6A.

(iii) Number of pairs of that type transferred during the period from December 5, 1942, to December 31, 1943.

(3) The District Office, if it approves the application in whole or in part, shall indicate its approval in writing and inform the applicant of the number of pairs of each type of rubber footwear authorized to be transferred as nonrationed. The District Office shall issue to the applicant official Non-Rationed Stickers (OPA Form R-123 with the words "Non-Rationed Rubber Footwear" and the type number printed or stamped thereon) equal to the number of pairs of rubber footwear permitted to be transferred as non-rationed. The District Office (or the applicant if required by the District Office) shall write or print on each such sticker the registration number of the establishment to which it is issued.

(4) Before any of such rubber footwear may be transferred or offered for sale as non-rationed, the applicant shall attach to one boot of each pair an official non-rationed sticker supplied by the District Office. Such sticker may be affixed only to rubber footwear which was physically located at the applicant's establishment on January 25, 1944, and only to rubber footwear of the same type as that designated on the sticker. Such rubber footwear may be transferred as non-rationed by and to any person at any time thereafter.

(5) The applicant shall attach to his inventory form (OPA Form R-601A) the written approval of the District Office containing the list of the rubber footwear authorized to be transferred as non-rationed. This shall be in lieu of any reporting requirement of section 2.2 (c).

(b) The District Office may not authorize the release of any rubber footwear under this section until at least 15 days have elapsed after application is made.

(c) Each retailer or distributor may make only one application for release of excess rubber footwear, and within six months thereafter may not make application for an increased inventory of a type released, or make application to exchange certificates of other types of rubber footwear for certificates of a type released, unless the District Office, in its discretion, permits it because of some unusual condition justifying it.

This amendment shall become effective January 29, 1944.

NOTE: The reporting and record keeping provisions of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

§ 1499.2257 *Modification of maximum prices established by Maximum Price Regulation No. 165, as amended, for sales commissions for bunker fuel sold to foreign steamship vessels at certain ports.* The price of 15 cents per net ton is the maximum price which suppliers of bunker fuel to foreign steamship vessels may pay to any agent in the United States as a commission for services rendered in the sale of such fuel, when such fuel is supplied at ports on the Atlantic and Pacific coasts, and 20 cents per net ton at ports on the Gulf of Mexico: *Provided, however,* That such suppliers shall not increase their maximum prices under Maximum Price Regulation No. 189 to compensate them for the increase in the cost of selling such bunker fuel arising from the payment of such commission.

Pursuant to the authority vested in the Regional Administrator of Region VI by § 1340.260 of Revised Maximum Price Regulation No. 122, it is ordered:

(a) *What this order does.* This order establishes maximum prices for sales of specified solid fuels delivered within the cities and villages of Bellwood, Berwyn, Broadview, Brookfield, Chicago, Cicero, Elmwood Park, Evanston, Forest Park, Franklin Park, Hillside, La Grange, Lyons, Maywood, McCook, Melrose Park, Morton Grove, Niles, Oak Park, Park Ridge, River Forest, River Grove, Riverside, Schiller Park, Skokie, Westchester, all within Cook County, Illinois. These are the highest prices that any dealer may charge when he delivers any of such fuel at or to a point within these cities and villages named; they are also the highest prices that any buyer in the course of trade or business may pay for such solid fuels.

(b) *What this order prohibits.* Regardless of any obligation, no person shall:

(1) Sell or, in the course of trade or business, buy solid fuels at prices higher than the maximum prices set by this Order No. G-11; but less than the maximum prices may at any time be charged, paid, or offered.

(2) Obtain a higher than maximum price by:

(i) Charging for a service unless expressly requested by the buyer and unless specifically authorized to do so by this order.

(ii) Charging a price higher than the schedule price for a service.

(iii) Making a charge higher than the schedule charge authorized for the extension of credit.

(iv) Using any tying agreement or requiring that the buyer purchase anything in addition to the fuel requested by him, or

(v) Using any other device by which a higher than maximum price is obtained, directly or indirectly.

(c) *Price schedule.* (1) Immediately below and as part of this paragraph (c) is a schedule which sets forth maximum prices for sales by direct delivery of specified sizes, kinds and quantities of solid fuels. (b) The words "drilling" and "multiple completion" are added to the series of words immediately following the letter "(a)", and the sequence of the words in that series is altered to read as follows:

(a) The drilling, redrilling, deepening, plugging back, or multiple completion of any well or the initial installation on any well of pumping or other artificial lifting equipment, or

(c) Letters "(b)" and "(c)" are relettered "(c)" and "(d)", respectively.

(d) A new series commencing with the letter "(b)" is inserted to read as follows:

(11) The title of paragraph (d) is amended by the substitution of the words *"preference ratings"* for the word *"rating"*. Paragraph (d) is amended by the insertion of the words "for use in any branch of the petroleum industry other than retail marketing" immediately following the word "material)" and before the comma; by the deletion of the words following the symbol "AA-1" to the end of the sentence; and by the substitution of a period for the comma following that symbol. (14) Paragraph (e) (3) (i) is amended by the deletion of the words "less than" before the number "$100" and by the insertion of the words "or less" after the number "$100" and before the comma.

(15) Paragraphs (e) (3) (ii) through (e) (3) (iv), inclusive, are deleted and the following material is substituted in their stead:

(ii) If the delivery order is for controlled materials (other than aluminum) and has a total cost of more than $100 but not more than $2,500 and has no item of more than $500, one copy must be submitted for information purposes.

(iii) If the delivery order is for controlled materials (other than aluminum) and has a total cost of more than $2,500,

or has any item of more than $500, *two* copies must be submitted for approval and an operator may not place such an order with a supplier until approval of the order has been returned to him.

(iv) If the delivery order is for other than controlled materials or for aluminum, and has a total cost of more than $100, one copy must be submitted for information purposes.

(16) Paragraph (e) (3) is amended by the deletion of the three paragraphs within that subparagraph commencing with that paragraph which begins with the words "All orders for MRO" and ending with that paragraph which ends with the words "copy of such order". The final paragraph within that subparagraph, which paragraph will remain, is amended by the substitution of the letter "B" for the letter "A".

(17) Paragraph (e) (4) is deleted and the following material is substituted in its stead:

(4) An operator requiring aluminum as a controlled material need only comply with the previous subparagraphs of this paragraph (e) to obtain 500 pounds or less from all sources during a calendar quarter. If the quantity required is more than 500 pounds, he must apply by letter for permission to purchase the excess amount (furnishing the applicable information called for by paragraph (d) of Supplementary Order M–1–i) to the Aluminum and Magnesium Division, War Production Board, Ref: M–1–i. If approved the operator must then place his delivery orders in accordance with the previous subparagraphs of this paragraph (e).

(18) Paragraph (e) is amended by the addition of paragraph (e) (5) to read as follows:

(5) To use a preference rating obtained for MRO material pursuant to a Form WPB–541 (PD–1A) application, an operator must place on the delivery order the rating and allotment symbol P–3.

(19) Paragraph (f) (3) is amended by the insertion of the word "approximate" before the word "price", and by an alteration in the sequence of the first four words to read, "Quantity, approximate price and".

(20) Paragraph (g) is amended in the following respects:

(a) The last item in the series of special production operations there listed is deleted and the following item is substituted in its stead: "A gas lift compression plant or a field gas booster plant where the material to be installed or added increases the rated capacity of the plant more than 500 h. p."

(b) In the last paragraph within that paragraph the words "and symbol" are inserted in the first sentence between the word "numbers" and the word "and".

(21) The title of paragraph (h) is amended by the insertion of the words "*symbol and preference*" between the word "*and*" and the word "*rating*". Paragraph (h) is amended by the deletion of paragraph (h) (1); by the renumbering of paragraph (h) (2) as (h) (3); and by the insertion of the following material as paragraphs (h) (1) and (h) (2), respectively:

(1) *Application must be made for allotment of controlled materials.* To obtain controlled materials for use in production, an operator must secure an allotment and an allotment number by applying on PAW Form 35, except that a small quantity of carbon steel may be obtained (without such an application) through the use of allotment symbol PSO (petroleum small order), as described in paragraph (h) (2) immediately following. PAW Form 35 applications will be filed in triplicate (3) with the District Office of the Petroleum Administration for War for the District in which operations are to be conducted, Ref: Materials Division.

Operators should file PAW Form 35 at least three months prior to the beginning of the calendar quarter in which the controlled materials are to be delivered, where operations can be planned to permit such advance filing. Otherwise, applications on that form should be filed not less than one month prior to the proposed delivery date of the controlled materials.

Interim assistance may be requested at any time by filing PAW Form 35 as a supplemental application.

(2) *Small order exception for carbon steel.* As an exception to the rule stated in the preceding subparagraph that an operator must apply for an allotment of controlled materials, an operator may use allotment symbol PSO to secure the delivery of no more than 10 tons of carbon steel as a controlled material during any calendar quarter for use in production.

If an operator will require more than 10 tons of carbon steel in any calendar quarter, he should apply on PAW Form 35 for an allotment of the total quantity of his estimated needs in the manner described in the preceding subparagraph. By so doing, the operator will be able to use allotment symbol PSO to obtain up to 10 tons of carbon steel for unanticipated needs discovered after the application has been filed, and will thus be relieved of the need to file many interim applications.

(22) The title of paragraph (i) is amended by the insertion of the words "*symbol and preference*" between the word "*and*" and the word "*rating*". The introductory matter in paragraph (i) up to and including the colon is amended to read as follows: "To use his allotment number or symbol and preference rating, a production operator must:"

(23) Paragraph (i) (1) is deleted and the following material is substituted in its stead:

(1) Indicate on each delivery order for controlled materials the allotment number (and PAW Form 35 serial number) or allotment symbol PSO (in the case of a small order); and indicate on each delivery order for other materials the preference rating and allotment symbol P–1; certifying each delivery order in accordance with paragraph (r).

(24) Paragraph (i) (2) is amended by the insertion of the words "more than" between the word "of" and the number "$100"; by the deletion of the words "or more" following the number "$100"; by the insertion of the word "approximate" between the word "the" and the word "price"; by the insertion of the words ", if any," between the word "number" and the word "if"; and by the addition of the following material to the end of the subparagraph: ", and the month in which delivery of the material is required."

(25) Paragraph (i) (3) is amended by the deletion of the matter in parentheses and the parentheses in the introductory matter and by the substitution of the words ", Ref: Materials Division," in their stead.

(26) Paragraphs (i) (3) (i) is amended by the deletion of the words "less than" before the number "$100" and by the insertion of the words "or less" after the number "$100" and before the comma.

(27) Paragraphs (i) (3) (ii) and (i) (3) (iii) are deleted and the following material is substituted in their stead:

(ii) If the delivery order is for controlled materials, and has a total cost of more than $100 but not more than $2,500, and has no item of more than $500, one copy must be submitted for information purposes.

(iii) If the delivery order is for controlled materials, and has a total cost of more than $2,500, or has any item of more than $500, two copies must be submitted for approval, and an operator may not place such an order with a supplier until approval of the order has been returned to him.

(iv) If the delivery order is for other than controlled materials, and has a total cost of more than $100, one copy must be submitted for information purposes.

(28) Paragraph (i) (3) is amended by the deletion in its entirety of the paragraph commencing with the words "an operator" and ending with the words "such order", which paragraph immediately follows paragraph (i) (3) (iii). The final paragraph, within that subparagraph, which paragraph immediately follows the paragraph deleted in its entirety, is amended by the deletion of the word "asterisked" and by the substitution of the letter "B" for the letter "A".

(29) Paragraph (k) is amended by the deletion of the last item in the series of special production operations there listed and by the substitution of the following item in its stead: "A gas lift compression plant or a field gas booster plant where the material to be installed or added increases the rated capacity of the plant more than 500 h. p."

(30) The title of paragraph (e) is amended by the insertion of the word "*preference*" between the word "*and*" and the word "*rating*". Paragraph (l) is amended by the deletion of all the material following the first sentence, and by the substitution in its stead of the following material as three separate paragraphs:

Form WPB–541 (PD–1A) may be used instead of PAW Form 30 to request a preference rating for machinery or equipment, if the machinery or equipment will be installed with the use of no more than $500 worth of material obtained through the MRO procedure of this order and if the machinery or equipment will be installed as part of a complete operation having a total material cost of no more than $5,000.

Form WPB–541 (PD–1A) may also be used instead of PAW Form 30 to request a preference rating for any material, regardless of cost, which will not be incorporated into a plant or other facility (for example, an item of construction machinery or equipment), unless a War Production Board order requires the use of some other form.

Form WPB–541 applications will be filed with the nearest War Production Board Field Office.

(31) The title of paragraph (m) is amended by the substitution of the words "*or symbol and preference*" for the word "*and*" between the word "*number*" and the word "*rating*", and the paragraph is amended in the following respects:

(a) The first sentence, which ends with the letter "(r)", is deleted and the following material is substituted in its stead:

To use the allotment number and preference rating granted through a PAW Form 30 application an operator must place the allotment number on delivery orders for controlled materials and the allotment number and preference rating on delivery orders for other materials. On each delivery order for material rated after a Form WPB–541 application an operator must place the rating and either allotment symbol F–5 (in refining) or P–1 (in any other branch of the industry). Each delivery order must bear the standard certification of paragraph (r).

(b) The second sentence is amended by the insertion of the words "or Form WPB–541" after the phrase "in connection with the PAW Form 30" and before the word "application", and this sentence, as amended, is to appear as a separate paragraph.

(c) A third paragraph is added to read as follows:

Any rating or allotment number assigned pursuant to an application on either of such forms may be used without submitting delivery orders to the Petroleum Administration for War, unless the operator receives special instructions to the contrary.

(32) Paragraph (n) (1) is amended by the insertion of the words ", as amended and supplemented from time to time" both at the end of the first sentence which ends with the number "15" and at the end of the second sentence which ends with the number "11"; by deletion from third sentence of the word "either" wherever it appears, and the words "or Form WPB–541"; by deletion from third sentence of the words "of these" and the substitution of the word "this" in their stead; and by the change in the third sentence of the word "forms" to the word "form" wherever it appears.

(33) Paragraph (n) (2) is amended by the insertion of the words "from time to time" at the end of the first sentence which presently ends with the word "supplemented" and by the insertion of the words "or an amendment or supplement to that order" in the second sentence between the symbol "PAO–12" and the comma.

(34) Paragraph (p) (1) is amended by the deletion of the words "less than" before the number "$100"; by the insertion of the words "or less" after the number "$100"; and by the deletion of the number "$1,000" and the substitution in its stead of the words "$2,500 or less."

(35) Paragraph (p) (3) is amended by the insertion of the words "where an allotment of controlled materials has been made and an allotment number authorized in connection with it," as the beginning of the first sentence and before the words "the allotment number"; by the insertion of the words "and allotment symbol PSO, in connection with production," in the second sentence after the word "material," and before the word "shall"; by the deletion of the word "an" from the second sentence between the word "constitute" and the word "allotment," and by the substitution of the word "symbols" for the word "symbol" between the word "allotment" and the word "for"; and by the insertion of the following sentence between the first sentence and the second sentence: "In the event that no allotment number has been so authorized, the appropriate allotment symbol stated in the order should be used."

(36) Paragraph (q) (1) is amended in the following respects:

(a) The first two sentences are deleted and the following sentence is substituted in their stead: "An operator who receives an allotment of controlled materials on PAW Form 35 must reallot the same or place delivery orders for such materials within thirty days after the allotment is received."

(b) The word "authorized" is inserted in the third sentence between the word "placing" and the word "controlled," and the word "period" is substituted in the same sentence for the word "periods" between the word "such" and the comma.

(c) The matter in parentheses in the third sentence and the parentheses are deleted.

(37) Paragraph (q) (2) is amended by the deletion of the words "or Form WPB–541" from the first sentence between the number "30" and the word "must"; by the substitution of the word "authorized" for the word "made" as the last word of the first sentence; by the insertion of the word "authorized" in the second sentence between the word "placing" and the word "controlled"; and by the deletion of the matter in parentheses in the second sentence and the parentheses.

(38) Paragraph (q) (3) is amended by the deletion of words "Petroleum Administration for War or the Office of Oil Controller" from the fourth sentence and the substitution of the following words in their stead to complete the sentence: "District Office (in the case of production) or of the Washington Office (in all other cases)."

(39) Paragraph (r) is amended by indenting the second paragraph which commences with the words "the undersigned purchaser."

(40) Paragraph (u) (2) is amended by the substitution of number "(7)" for number "(6)" in the third sentence in the reference to paragraph (c) (6).

(41) Paragraph (u) is amended by the addition of paragraphs (u) (4) and (u) (5) to read as follows:

(4) Privileges granted by other orders and regulations of the War Production Board to persons on Schedule I of CMP Regulation 5 shall be considered as applicable to petroleum operators, other than operators to the extent that they are engaged in retail marketing, operating under this order. For example, Order E–5–a on gauges and precision measuring hand tools classifies a person on Schedule I or II of CMP Regulation 5 as an "approved user." With the stated exception, an operator covered by P–98–b is in identically the same position, provided that certification clauses in and all other provisions of such other orders are complied with.

(5) Where a preference rating or allotment symbol, or both, is permitted or is required to be used by any other "E", "L", "M", "P", or "U" order or any regulation of the War Production Board to obtain a specific item of material, it will not also be necessary to follow any procedure of this order to obtain that item of material.

(42) Paragraph (w) is amended to read as follows:

All reports required to be filed hereunder and all communications concerning this order should, unless other directions are given, be addressed to the Petroleum Administration for War, Interior Building, Washington 25, D. C., Ref.: P–98–b.

The addresses of the Petroleum Administration for War District Offices are set forth in Schedule D.

(43) Schedule A is amended to read as follows:

The items listed on this schedule may be delivered to operators without regard to preference ratings. No operator shall apply or extend any rating to get any of these items and no person selling any such item shall require a rating as a condition of sale.

Items on List A of Priorities Regulation 3.
Rock bits and core bits (rotary bits).

(44) Schedule B is relettered Schedule C and is amended by the substitution of the words "nearest WPB Field Office" for the words "PAW, Washington" where they appear under the column entitled "filing instructions" opposite items lettered (a), (b), (c) and (f), and by the insertion of the following material as an introductory paragraph:

The special MRO procedure of Schedule B may be used to request a rating for only those items on List B of Priorities Regulation 3 as MRO material which are listed on that schedule. Many of the other items on List B of Priorities Regulation 3 may be secured without a preference rating and every attempt should be made to do so. If a rating is required for any of these remaining items or for any other item which cannot be secured with a blanket MRO rating, it should be applied for on Form WPB–541 (PD–1A), filed with the nearest WPB Field Office. There are two general exceptions to this rule. In the first place, laboratory instruments and equipment may be obtained under the regular MRO procedure of this order. And secondly, the forms indicated below will be used for the items there listed.

(45) A new Schedule B is inserted to read as follows:

SCHEDULE B

The procedure established by this schedule must be followed in order to request a rating for any item listed on it. Certain of these items are on List B of Priorities Regulation 3, and any rating secured under this procedure for such an item is not a blanket MRO rating and may be used to secure such item.

In order to request a rating under this procedure two copies of each delivery order (regardless of amount) must be submitted to the District Office of the PAW of the District in which the material will be used (or, if so desired by an operator in any branch of the industry other than production, for the District in which the operator's purchasing office is located.) For each such delivery order, in addition to the statement which must regularly accompany an MRO delivery order submitted to PAW concerning the specific use to which the material will be put, the operator should include a detailed explanation of why he requires the particular item requested. An operator may not place a delivery order with a supplier covering these items until approval of such order has been returned to him. For convenience this will be referred to as the "special MRO procedure."

The following materials are covered by this schedule:

(a) Those items currently identified on (and more completely described in) List B of Priorities Regulation 3 as follows, and any equivalent items replacing them on revisions of that List B, when required as MRO material:

Description

Civilian defense devices.
Filing cabinets, wooden.
Fire protective equipment.
Furniture for use in offices, factories, industrial establishments and institutions, except furniture specifically designed for schools.
Medical, surgical and dental equipment and supplies (except parts for the maintenance or repair of existing equipment).
Medical, surgical and dental instruments.
Slide rules, precision engineering, having a list price of $7.50 or more.
Venetian blinds.

(b) Construction machinery and equipment (on Schedule B of Order L–192) costing in excess of $500, when required as MRO material or as material for use in production.

(46) Schedule C is relettered Schedule D.

Issued this 26th day of January 1944.

PART 1346—BUILDING MATERIALS

[MPR 466,[1] Amdt. 1]

ASBESTOS-CEMENT BUILDING MATERIALS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation No. 466 is amended in the following respects:

1. Section 1.1 is amended to read as follows:

SEC. 1.1 *Persons subject to this regulation.* Any person making a sale or delivery governed by this regulation is subject to it.

A "person" is an individual, corporation, partnership, association, or any other organized group of persons or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government or any of its political subdivisions, or any agency of any of the foregoing.

A "manufacturer" means any person who produces any specific asbestos-cement shingles, sidings or accessories, and includes any person who purchases, rather than produces, any asbestos-cement shingles, sidings and accessories from a producer for resale in the same form and without further processing usually under his own name or trade name, to the same trade classifications through which original producers usually distribute such products. The description also includes commission salesmen, the manufacturer's representatives and any other manufacturer's agents.

A "dealer" is a merchant maintaining a permanent place of business equipped with sales personnel and service facilities sufficient to serve the consuming public.

2. Section 3.9 is added to read as follows:

SEC. 3.9 *Sales between manufacturers.* (a) Any manufacturer of asbestos-cement building materials subject to this regulation may, subject to the filing provisions of paragraph (b) of this section, offer to sell, sell and deliver any such commodity or commodities to any other manufacturer subject to this regulation, at a price agreed upon by the seller and the buyer when the price so agreed upon is in excess of the maximum price for the seller under this regulation under the following conditions:

(1) Both the seller and buyer must be "manufacturers" as the term is defined in this regulation;

(2) The product must be one whose maximum price is established by the regulation and one which is subject to the regulation for both the seller and the buyer;

(3) The buyer must resell the product in the same form as purchased from the seller; and

(4) Any increase in price resulting from the agreement under this section must be absorbed by the buyer and must neither be reflected, directly or indirectly, in the resale price nor may such increase be used as a basis for a request for an increase in price by way of an application for adjustment or petition for amendment under this regulation.

(b) Before any sale or delivery may be made upon the basis of the price arrived at pursuant to paragraph (a), above, the buyer must submit a statement to the Office of Price Administration, Building Materials Price Branch, Washington, D. C., showing:

(1) The commodity or commodities involved in the sale;

(2) The names and addresses of the seller and the buyer;

(3) A specific statement from the buyer that the increase in price or prices will not be passed on in the resale of the product or products and that such increases resulting from the agreement will not be made the basis for an application for adjustment or petition for amendment under this regulation.

3. Section 4.3 (a) is amended to read as follows:

(a) *Practice I—Prices applicable.* In all cases throughout this regulation, every carload and truckload shipment of asbestos-cement building materials will take the price specified as the carload price, and every less-than-carload and less-than-truckload shipment will take the price specified in less-than-carload price, except for asbestos-cement shingles, siding and accessories for which net list prices, as enumerated in this regulation, may be charged on less-than-truckload shipments delivered to destination by a manufacturer.

4. That portion of Table 2 of section 5.4 (b) headed "Maximum Prices Per Lineal Foot—For Battens 3/16" Thick" is amended by inserting directly beneath the table the following footnotes:

[1] These are distributors who purchase materials for resale, erection contractors engaged in the sale and application of roofings and sidings, steel erection contractors and equipment manufacturers who use the materials as part of their finished product.

[2] These are railroads, industrials, general contractors, state, county, and municipal governments and all others purchasing materials for their own use.

5. Table 3A under section 6.3 (a) is amended by deleting $.069 under J–M f. o. b. Marrero, La., under Eastern Area dealer prices and inserting in its place and stead $.0695.

6. That portion of Table 3A of section 6.3 (a) headed "Manufacturer and Product" is amended to delete the letters "DeL", so that it reads:

8. Section 8.1 is amended to read as follows:

The maximum prices specified opposite the term "All other sellers" apply to persons at all levels of production and distribution who offer to sell or sell the applicable commodities of manufacturers other than those of the particular companies designated.

12. Section 9.2 is amended to read as follows:

SEC. 9.2. *Computation of maximum prices.* Maximum prices for asbestos-cement shingles, siding and accessories shall be as set forth in Table 6 below together with the provisions regarding transportation charges, freight equalization and other additional charges contained in this article and in accordance with Practices I through IV set forth in section 4.3 above.

In the case of U. S. G., a freight allowance of 35¢ per cwt. must be made on Nos. 600, 700, 900 and 950 siding shingles. On all shipments, U. S. G. must equalize with Pittsburg, California, up to a maximum of 75¢ per cwt. In the case of Nos. 600, 700, 900 and 950 siding shingles, such equalization of 75¢ per cwt. shall include the allowance of 35¢ per cwt. In the event that the lowest equalized freight rate is less than 35¢ per cwt., the freight allowances allowed on Nos. 600, 700, 900 and 950 siding shingles shall be the amount of the actual equalized freight rate.

PART 1366—USED CONSUMER DURABLE GOODS

[MPR 429,[1] Incl. Amdt. 1]

CERTAIN USED CONSUMER DURABLE GOODS

In the judgment of the Price Administrator, the maximum prices established by this Maximum Price Regulation No. 429 are and will be generally fair and equitable and will effectuate the purpose of the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250. A statement of considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.[2]

Insofar as this regulation uses specifications and standards which were not, prior to such use, in general use in the trade or industry affected, or insofar as their use was not lawfully required by another Government agency, the Administrator has determined, with respect to such standardizations, that no practical alternative exists for securing effective price control with respect to the commodities subject to this regulation.

[Preamble as amended by Supplementary Order No. 59, 8 F.R. 12552, effective 9-11-43]

§ 1366.1 *Maximum prices for certain types of used consumer durable goods.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, Maximum Price Regulation No. 429 (Ceiling Prices for Certain Types of Used Consumer Durable Goods), which is annexed hereto and made a part hereof, is hereby issued.

SECTION 1. *What to look for in this regulation.* This regulation tells how to find ceiling prices for certain types of used goods. As defined in this regulation used goods includes reconditioned, rebuilt, and renovated goods. However, this regulation does not cover goods which were sold new and which have been returned to the original seller who has returned to the buyer the full amount paid on account of the purchase of the goods. (Such goods are to be treated as new goods under Office of Price Administration price regulations).

This regulation does not cover the sale of all used goods. It only covers the sale of the used goods listed below:

(c) All kinds of domestic cooking and space heating stoves except gas cooking stoves.

(d) All kinds of soft surface floor coverings including carpets and rugs; and hard surface floor coverings including linoleum, inlaid, and felt base. Knotted oriental rugs are not included.

(i) All kinds of musical instruments, except pianos.

(j) All kinds of baby carriages, strollers, and baby walkers.

(k) Portable room coolers of one horse power or less.

(l) All kinds of commercial and institutional kitchen equipment including, but not limited to, ranges, broilers, automatic fryers, roasting and baking ovens, steam tables, hot plates, griddles, coffee urns and coffee making systems, toasters, dishwashers, glasswashers, mixers, choppers, slicing machines, burnishers, potato peelers, vegetable steamers, and canopies.

(m) All kinds of store and office fixtures including, but not limited to filing cabinets, lockers, storage cabinets, wardrobes, movable safes, and store measuring devices used in the sale of merchandise such as scales, liquid and bulk measures and linear measuring machines. This regulation does not cover the sale of business machines, such as accounting, computing, recording, reproducing and writing machines, time clocks, registers, and machines for handling checks, mail, fares or tickets or for sorting or changing coins.

(n) All kinds of beauty and barber shop furniture, fixtures and equipment.

[Paragraph (m) and (n) as amended by Am. 1, 8 F.R. 13742, effective 10-5-43]

(o) All kinds of coin operated vending machines for cigarettes, candy, beverages, etc.; and coin operated weighing machines and juke boxes, pin ball machines and other amusement machines.

(p) All kinds of household sewing machines.

[Paragraph (p) added by Am. 1]

SEC. 2. *Relation to the General Maximum Price Regulation and other regulations.* This regulation takes the place of the General Maximum Price Regulation[3] for the sales of the used articles which are listed in section 1 above. However, this regulation does not cover the sale of the used goods listed below which are covered by other regulations.

SEC. 3. *Antiques and objects of art.* This regulation does not cover the sale of antiques and objects of art. An article is an antique if it is more than 75 years old, tends to increase rather than decrease in value because of its age and is commonly known and dealt in as an antique by the trade.

SEC. 4. *What transactions and persons are covered by this regulation.* (a) This regulation covers all sales by any person to any other person with the following exceptions only:

(1) Sales by a householder who is selling goods which he originally bought for use. Sales by dealers or auctioneers whether for their own account, or for the account of a householder or anyone else, and sales of used goods out of a residence as a regular business are covered.

[Subparagraph (1) as amended by Am. 1, 8 F.R. 13742, effective 10-5-43]

(2) [Revoked]

[Subparagraph (2) revoked by Am. 1]

(3) Sales by the War Department, the Department of the Navy of the United States, or the Procurement Division of the Treasury Department.

(4) Sales at wholesale. A sale at wholesale is a sale to a person who buys for the purpose of reselling the goods, rather than for use. Sales at wholesale remain covered by the General Maximum Price Regulation.

(b) "Person" includes an individual, corporation, partnership or any other organized group of persons; their legal successors, or representatives; the United States or any Government, or any of their political subdivisions.

[Paragraph (b) as amended by Am. 1]

SEC. 5. *How to determine your ceiling prices.* (a) First, you must find the price of a new article (which is the same as or similar to the used article you are pricing), according to the rules in section 6.

(b) Second, you must find the class in which the used article you are pricing belongs. (Class I or Class II—See section 7).

(c) You then find your ceiling price which is either ¾ or ⅓ of the price of the new article, depending on the class in which the used article you are pricing belongs.

SEC. 6. *How to find the price of the new article.* You find the price of the new article by using these rules in the order in which they appear:

(a) *Rule 1.* Find the retail selling price of the same article, new, for sale in your own stock.

(b) *Rule 2.* If you do not have the same article, new, in stock, find the retail selling price of a similar article, new, in your own stock. A used article is "similar" to a new article if the used article has the same uses and when new would give fairly equivalent service. In addition, the used article, when new, must have sold for approximately the same price as the similar new article now sells for.

(c) *Rule 3.* If you do not have a similar article, new, in stock, find the retail selling price of the same article, new, in the same shopping area. (The shopping area is the area in which persons in your community shop for new goods of the kind you are pricing.)

(d) *Rule 4.* If the same article, new, is not for sale in the same shopping area, find the retail selling price of a similar article, new, for sale in the same shopping area. A used article is "similar" to a new article if the used article has the same use and when new would give fairly equivalent service. In addition, the used article, when new, must have sold for approximately the same price as the similar new article now sells for.

(e) *Rule 5.* If the same or similar article is not being sold in your community, find the retail selling price when this article was last sold in your community.

(f) *Rule 6.* If you cannot find the retail selling price under any of these Rules above, apply to the appropriate Office of Price Administration District Office, for information on how to determine your price.

Remember, if you can find the price of the new article in Rule 1, you cannot use Rules 2, 3, 4, 5, or 6. If you can use Rule 2, you cannot use Rules 3, 4, 5, or 6. If you can use Rule 3, you cannot use Rules 4, 5, or 6. If you can use Rule 4, you cannot use Rules 5 or 6.

SEC. 7. *How to determine the class of a used article*—(a) *Class I.* An article is a Class I article if:

(1) No part is missing which is necessary to make the article fully useful.

(2) The article is in good working condition, can be used by the consumer for the purpose intended without further repair, and the article is clean and its appearance is good.

For example: In the case of floor covering, upholstered furniture and bedding, the fabric must be clean and substantially free from burns, cuts, tears, stains, frayed edges, faded colors, and worn spots.

(b) *Class II.* An article is a Class II article if it is not in Class I.

SEC. 8. *How to find the ceiling price for each class.* The ceiling price for the used article must be no more than:

Class I. ¾ (75%) of new.
Class II. ⅓ (33⅓%) of new.

Example for Class I: If the selling price of a new article is $40, you determine the ceiling price of the used article by multiplying $40 by 3 and dividing the result by 4; 3 times $40 is $120; $120 divided by 4 is $30; $30 is the ceiling price for the Class I used article.

Example for Class II: The selling price of the new article is $30. To determine the ceiling price of the used article, you divide the $30 by 3; $30 divided by 3 is $10. This is the ceiling price for the Class II used article.

No sales, attempts to sell, offers to sell or deliveries shall be made at prices higher than the ceiling price. Of course, sales may be made at lower than ceiling prices.

[Sec. 8 as amended by Am. 1, 8 F.R. 13742, effective 10-5-43]

SEC. 9. *Fixing of dollars-and-cents ceiling prices for certain articles by Regional or other offices of the Office of Price Administration.* Any Regional Office of the Office of Price Administration or such other offices as may be authorized by the appropriate Regional Office, may by order fix dollars-and-cents ceiling prices for the sales of any articles covered by this regulation in any area or locality within its jurisdiction. Any order fixing maximum prices issued under the authority of this provision will supersede the provisions of this regulation with respect to sales subject to such order.

SEC. 10. *Adjustment of prices under certain circumstances.* Any regional office of the Office of Price Administration or such other offices as may be authorized by the proper regional office may grant permission to any person subject to this regulation to charge a higher price for the sale of any rebuilt or reconditioned article than is permitted by this regulation if it is found that:

(a) The article is essential, and is one of which there is a serious shortage.

(b) There has been expended (in the course of rebuilding, reconditioning, or renovating the used article) a substantial amount for labor and materials.

(c) Considering the substantial amount expended for labor and materials, the establishment of a price by the Class I formula would result in a price so low that he could not reasonably be expected to continue to recondition or rebuild the article.

For further information consult with your nearest district office of the Office of Price Administration.

Until such permission is granted the ceiling price is the price fixed by this regulation.

SEC. 11. *Credit, delivery, packing and other charges.* (a) Any additional charge for credit, packing, delivery, or anything else which is not quoted and billed separately is considered part of the selling price. You may charge for those services only to the extent allowed by this section.

(b) If you were engaged in the business of selling goods during March 1942, and during that month made a separate charge for the extension of credit, or for delivery or packing, you may make a charge for any of those services on the sale of goods covered by this regulation no greater than the charge you made during March 1942, and you must quote and bill those extra charges separately.

(c) If you were not engaged in business during March 1942, or if you did not extend credit or delivery or packing service during that month, you may

make a charge for any of those services rendered the buyer, no greater than the charge made by your closest competitor selling used goods, who makes a separate charge for that service. You must quote and bill those extra charges separately.

(d) You cannot require the customer to take any of these services.

[Sec. 11 as amended by Am. 1, 8 F.R. 13742, effective 10–5–43]

SEC. 12. *Evasion, licensing and enforcement*—(a) *Evasion.* You must not evade any of the provisions of this regulation by any scheme or device, or by any practice which has the effect of getting a higher-than-ceiling price. Specifically, you cannot offer to sell used goods covered by this regulation only on condition that the customer agree to pay for reconditioning, repairing, or rebuilding to be performed by you before or after he buys the merchandise or only on condition that the customer buy goods which he does not wish to buy. If the customer buys an article from you, and asks you to rebuild it or recondition it, the total amount which you receive on account of the sale of the goods and on account of the reconditioning or rebuilding cannot exceed the ceiling price of the goods if you offered the goods for sale as Class I goods.

You may not use the published list price as the price of the new article under section 6, if that published list price was generally not observed by sellers of new goods. Section 6 requires you to find the actual selling price of the new article.

(b) *Licensing.* The provisions of Licensing Order No. 1,* licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation or schedule. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

[Paragraph (b) as amended by Supplementary Order No. 72, 8 F.R. 13244, effective 10–1–43]

(c) *Enforcement.* On and after September 1, 1943, you are subject to the criminal penalties, civil enforcement actions, license suspension proceedings and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended, if you violate any provision of this regulation.

SEC. 13. *Posting ceiling price notice.* If you are a retailer, you must post a sign no smaller than 11" x 17" in size, in a place that is permanently and clearly visible to all customers for used goods. Your nearest Office of Price Administration Office can help you get this sign. This sign must read substantially as follows except that you may omit from it any articles not sold in your store.

CEILING PRICES ON USED, RECONDITIONED, OR REBUILT ARTICLES

(Name of your establishment)

Our ceiling prices for the used, reconditioned, rebuilt and renovated articles listed below have been fixed under Maximum Price Regulation No. 429 issued by the Office of Price Administration.

The regulation sets up ceiling prices for the following articles:

Furniture.
Bedding.
Floor Coverings.
Stoves, ranges and space heaters.
Baby Carriages.
Musical instruments, except pianos.
Lamps and lamp shades.
Housewares.
Hand tools.
Room Coolers.
Office and store furniture and fixtures.
Commercial and institutional kitchen equipment.
Beauty and barber shop furniture, fixtures and equipment.
Coin operated vending machines.

CEILING PRICES

The used goods covered by the regulation must be classified as Class I or Class II, according to quality.

This store is not allowed to charge more for these used goods than the ceiling prices described below under the two classes.

Class I: This group includes all used articles which meet the conditions shown below.

Ceiling prices for articles in Class I must not be priced higher than 75 percent of the present retail selling price of the same or a similar article.

Used articles may be included in Class I only if they meet these conditions:

1. No part is missing which is necessary to make the article fully useful.

2. The article is in good working condition, can be used by the consumer for the purpose intended without further repair, and the article is clean and its appearance is good.

For example—in the case of floor covering, upholstered furniture and bedding, the fabric must be clean and substantially free from burns, cuts, tears, stains, frayed edges, faded colors and worn spots.

Class II: This group includes all articles which do not meet the requirements of Class I.

Ceiling prices of articles in Class II must not be priced higher than 33⅓ percent of the present retail selling price of the same or a similar article.

ARTICLES SELLING AT $2.00 OR MORE MUST HAVE PRICE TAGS

SALES SLIPS WILL BE GIVEN TO ANY CUSTOMER UPON REQUEST

SEC. 14. *Tagging.* If you are a retailer, you must tag or label every article covered by this regulation with the actual selling price in plain dollars-and-cents figures, except that if the selling price is less than $2.00 a tag is not required. In addition to the selling price, the tag must show the class (Class I or Class II). This tag or label must not be removed except by the person to whom you sell the article. The price written on the tag or label must be the one set by this regulation or a lower price. Any goods priced and tagged under the provisions of this regulation, before the effective date, are covered by this regulation.

SEC. 15. *Sales slips or receipts.* If you have customarily given a customer a sales slip, receipt, or similar evidence of purchase you shall continue to do so. Upon request, regardless of previous custom, you shall give a receipt showing the date, your name and address, a list of the articles bought and the prices paid, kind and amount of any additional charges, and the name and address of the customer.

SEC. 16. *Petitions for amendment.* You may seek a change in this Maximum Price Regulation No. 429 or any exception to its terms by filing a petition for amendment in accordance with the rules outlined in Revised Procedural Regulation No. 1 [10] issued by the Office of Price Administration.

SEC. 17. *Geographical coverage of this regulation.* The provisions of this regulation apply to the forty-eight states, the District of Columbia and the territories and possessions of the United States. It becomes effective in the territories and possessions 45 days after its effective date in continental United States.

Effective Date

The regulation shall become effective September 1, 1943. [Originally issued July 15, 1943]

NOTE: The reporting and record-keeping requirements of this Regulation have been approved by the Bureau of the Budget, in accordance with the Federal Reports Act of 1942.

This compilation is issued this 25th day of January, 1944.

SEC. 4. *Containers and parts not specifically priced.* Used fruit and vegetable containers and parts not specifically priced in this regulation are nevertheless subject to its terms. Any person desiring to buy or sell used fruit and vegetable containers not specifically priced herein shall make application to the Office of Price Administration, Washington, D. C., for approval of a price. The application shall contain a complete description of the container to be priced; the type of purchase or sale, that is, whether by an emptier, accumulator, dealer or the Army or Navy, and the requested price. The applicant may use the requested price, subject to adjustment upon the action of the Office of Price Administration, pending approval of the price. Approval may be by letter or telegram, and any requested price not disapproved within 15 days from receipt of application for approval shall be automatically approved until revoked or amended by the Office of Price Administration.

SEC. 5. *Additions for delivery.* On shipments by common or contract carriers the actual cost of transportation paid or incurred by the seller may be added to the maximum price, f. o. b. seller's loading plant. If shipment is by private truck owned or controlled by the seller, actual transportation costs may be added; except that in no case shall the addition exceed 80 percent of the common carrier truck charges for the same shipment.

SEC. 6. *What the invoice must contain.* All invoices must contain a sufficiently complete description of the containers or parts to show whether the price is proper or not. They must also show the name and address of the seller, the name and address of the purchaser, the quantity of each particular container, the origin and destination of the shipment, and any addition to the maximum price for delivery. In sales by dealers the invoice must also show the registration number of the dealer.

SEC. 7. *Prohibited practices.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price. This applies to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings, changes in discount practices, and the like.

ARTICLE III—MISCELLANEOUS

SEC. 8. *Definitions*—(a) *Emptier.* An "emptier," as referred to in this regulation, is any person who acquires for use or sale fruit or vegetables in containers and after removing the contents, sells the containers. Included in the term are grocery stores, canneries, restaurants, hotels, markets, institutions, etc. Specifically excluded are army and navy posts.

(b) *Accumulator.* An "accumulator," as referred to in this regulation, is any person who collects used fruit and vegetable containers or parts from emptiers for resale to dealers, growers, shippers, etc. Included in the term are salvage warehouses (chain), commission merchants, peddlers, junkies, or open lot dealers.

(c) *Dealer.* A "dealer," as referred to in this regulation, is any person who buys and sells used fruit and vegetable containers and maintains from season to season enclosed storage space and facilities for selecting and/or reconditioning such containers.

(d) *Farmers' cooperative.* A "farmers' cooperative" as referred to in this regulation is any organization or association approved by the Farm Credit Administration and engaged in selling used fruit and vegetable containers or parts.

(e) *Reconditioned or selected containers.* A "reconditioned or selected container", as referred to in this regulation, is any used fruit or vegetable container which has no broken or missing parts and which has utility equal to that of a new container.

SEC. 9. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

SEC. 10. *Applications for adjustment and petitions for amendment*—(a) *Government contracts.* (1) The term "government contracts" is here used to include any contract with the United States or any of its agencies, or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States." It also includes any subcontract under this kind of contract.

(2) Any person who has made or intends to make a "government contract" and who thinks that a maximum price established in this regulation is impeding or threatens distribution of used fruit and vegetable containers which are essential to the war program and which are or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation No. 6,[7] issued by the Office of Price Administration.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1,[8] issued by the Office of Price Administration.

SEC. 11. *Records and reports.* All persons making sales covered by this regulation which amount to $50.00 or more in any one month must keep records which will show a complete description of the containers sold, the quantity, price, date of sale and the name and address of the buyer. Buyers must keep similar records including the name and address of the seller.

These records must be kept for two years for inspection by the Office of Price Administration.

SEC. 12. *Enforcement.* (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for revocation of licenses provided for by the Emergency Price Control Act of 1942, as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies. Sales and purchases by such agencies are nevertheless subject to the terms of the regulation.

SEC. 13. *Licenses.* The provisions of Licensing Order No. 1,[9] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or of one or more maximum price regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 14. *Registration.* Persons desiring to sell as dealers any of the products covered by this regulation must register with the Lumber Branch, Office of Price Administration, Washington, D. C. within 30 days after becoming subject to the regulation. Registration shall be accomplished by filing with the Office of Price Administration a statement of the applicant's qualifications as a dealer as defined in the regulation, a description of his warehousing and reconditioning facilities and the type of containers which he buys and sells.

The Office of Price Administration will issue to each person who registers in accordance with this section a registration certificate which shall be posted at all times in a conspicuous place in the registrant's place of business.

Persons who have previously filed their qualifications as dealers under Maximum Price Regulation No. 434 and received approval from this Office need not register under this section.

SEC. 15. *Relation to other regulations*—(a) *General Maximum Price Regulation.* Any sale or delivery covered by this regulation is not subject to the General Maximum Price Regulation.[4]

(b) *Second Revised Maximum Export Regulation.* The maximum price for export sales of used fruit and vegetable containers is governed by the Second Revised Maximum Export Regulation.[6]

This regulation shall become effective January 31, 1944.

NOTE: All reporting and record-keeping requirements of this Regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 25th day of January 1944.

Ration Order 5C is amended in the following respects:

1. Section 1394.7904 (e) is added to read as follows:

2. Section 1394.8153 (b) (4) is added to read as follows:

(4) In the States of Georgia and Florida no transfer in exchange for Class R coupons may be made by any dealer or by any licensed distributor from his retail facility, unless the transferor transports such gasoline from his place of business to some place of delivery selected by the transferee by means of delivery facilities, such as a tank truck, tank wagon, or portable drums, which he maintains and regularly uses for the purpose of transporting gasoline in quantities of twenty-five (25) gallons or more, from that place of business to places of delivery selected by the transferees, or unless transfers are made from such place of business directly into the fuel tanks of motorboats.

3. Section 1394.8215 (f) is added to read as follows:

He shall summarize such coupons on a summary form (Form OPA R–541) on which no other coupons are listed. On or before February 10, 1944, each such dealer shall surrender such coupons and summaries either to a distributor in exchange for a transfer of gasoline, or to the Board having jurisdiction over the area in which his place of business is located, in exchange for inventory coupons equal in gallonage value to the coupons so surrendered.

(2) Each licensed distributor in the States of Georgia and Florida shall, on or before February 10, 1944, deposit in his ration bank account all Class R coupons which are in his possession or control on February 1, 1944, at any place of business at which he does not maintain delivery facilities, such as a tank truck, tank wagon or portable drums, which he regularly uses for the purpose of transporting gasoline in quantities of twenty-five (25) gallons or more, from that place of business to places of delivery selected by the transferees, and which, under the terms of § 1394.7551 (a) (56) are deemed to be a part of his facilities, unless transfers are made from such place of business directly into the fuel tanks of motorboats.

(b) For the purposes of this section, a manufacturer is an essential producer if:

(1) His supply of new bicycle tires or tubes is required to meet military or essential civilian needs; or

(c) The relief granted under this section shall be limited to the amount necessary to permit the manufacturer to supply new bicycle tires or tubes: *Provided, however,* That where application is filed under paragraph (b) (2) above, the manufacturer's maximum prices will not be raised above the general level of prices prevailing for alternative sources of supply.

PART 1389—APPAREL

[Rev. MPR 287,[1] Amdt. 2]

MANUFACTURERS' PRICES FOR WOMEN'S, GIRLS', CHILDREN'S AND TODDLERS' OUTERWEAR GARMENTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

RMPR 287 is amended in the following respects:

1. Section 3 is amended to read as follows:

SEC. 3. *Spring Pricing Chart.* If you have been pricing under Rules 1, 2, 5 or 7 of MPR 287, the pricing chart you filed pursuant to § 1389.353 (a), together with any supplement filed pursuant to Rule 11 (§ 1389.356a (c)), is now called your "Spring Pricing Chart" and is to be used throughout the year. (If you were authorized to establish ceiling prices under Rule 6 or Rule 9 of MPR 287, your Spring Pricing Chart is the OPA order of authorization, except that you may not price under Rule 3 garments in category numbers not listed in your order of authorization. Before you may deliver any such garments you must apply for authorization to establish prices under section 12 (d).)

2. Section 5 (c) is amended to read as follows:

(c) *Manufacturers who made no deliveries during the period between July 1 and October 1, 1942, but did deliver garments during March, April, May or June 1942, or priced under Rules 5, 6 or 9 of MPR 287.* If you made no deliveries during the period between July 1 and October 1, 1942 of garments covered by MPR 287, but did deliver such garments during March, April, May or June 1942 or priced under Rules 5, 6 or 9 of MPR 287, you may apply for authorization to establish higher fall selling price lines to the field office of the Office of Price Administration which issued the original order of authorization under Rule 6 or 9, or where you filed your original Spring Pricing Chart. There copies of this application should be filed, setting forth the following:

(1) Your name and address;

(2) Category numbers of garments for which you wish to establish higher fall selling price lines;

(3) Highest fall selling price lines desired for garments in each category number listed in (2). (Except in the case of applicants who operated under Rule 5 of MPR 287, these price lines may not be higher than those listed in Appendix E (section 31));

(4) A list of the names and addresses of your five closest competitors unless you have been pricing under Rule 6 or Rule 9 of MPR 287 and have already filed such a list;

(5) The pricing rule of MPR 287 under which you priced prior to June 29, 1943.

3. Section 10 is amended to read as follows:

SEC. 10. *Pricing rules*—(a) *Rule 1: Sales at selling price lines listed on the pricing chart in effect on the date of delivery:* A manufacturer may sell garments in any selling price line listed on his pricing chart for garments of the same category number.

Garments of a category number and in a selling price line listed on a manufacturer's pricing chart must contain a direct cost no less than the minimum allowable cost for that category number and selling price line.

For example, if a manufacturer's minimum allowable cost for his $4.75 selling price line in Category No. 22 is $3.60, then every garment in Category No. 22 sold in a $4.75 selling price line must contain a direct cost of $3.60 or more.

However, a garment which contains the minimum allowable cost may be sold at a lower price than the selling price line.

For example, this same manufacturer may sell a garment in Category No. 22 which contains a direct cost of $3.60 or more at $4.50 or at any other price lower than $4.75. Customary discounts, allowances and trade differentials may not be changed, however, if the change would result in a higher net price.

(b) *Rule 2: Sales at selling price lines different from those listed on the pricing chart.* A manufacturer may, at his option, sell a garment in a selling price line different from those listed on his pricing chart: *Provided,* The garment contains the minimum allowable cost for the selling price line: *And provided also,* That the selling price line is not higher than the highest selling price line listed on his pricing chart in effect on the date of delivery for a garment of the same category number or in Appendix G (section 33), whichever is higher. The maximum allowable margin for the optional selling price line is the maximum allowable margin listed on the pricing chart for a garment of the same category number in either the next higher or the next lower selling price line, whichever margin is lower. (The maximum allowable margin for a selling price line higher than the highest listed on the pricing chart for a garment of the same category number, but equal to or lower than that listed in Appendix G (section 33) is the maximum allowable margin listed on the pricing chart for the highest selling price line in that category number.) The minimum allowable cost is calculated by multiplying the optional selling price line by the lower maximum allowable margin thus selected and subtracting the result from the optional selling price line.

For example, a manufacturer's Fall Pricing Chart contains selling price lines for misses' coats (Category No. 2) of $16.75 and $18.75, having maximum allowable margins of 32% and 36% respectively. If, in October, he chooses to sell misses' coats at $17.50, he calculates his maximum allowable margin for these $17.50 coats by taking the lower of the maximum allowable margins listed on his Fall Pricing Chart for his $16.75 and $18.75 selling price lines. The maximum allowable margin on his $17.50 coats is, therefore, 32%; and the minimum allowable cost for such coats is $11.90 ($17.50×32%=$5.60; $17.50—$5.60=$11.90).

If the manufacturer selects a selling price line lower than the lowest selling price line listed on his Spring Pricing Chart for a garment of the same category number, he must use, as his maximum allowable margin, the maximum allowable margin of that lowest selling price line.

For example, a manufacturer wants to sell misses' dresses (Category No. 22) at $2.75. The lowest selling price line for misses' dresses listed on his Spring Pricing Chart is $3.75, and the maximum allowable margin for $3.75 dresses is 20%. Misses' dresses which he now sells at $2.75 must contain a minimum allowable cost of $2.20. ($2.75 x 20%=$.55; $2.75—$.55=$2.20.)

(c) *Rule 3: Pricing garments of a category number not listed in the pricing chart in effect on the date of delivery.* A manufacturer who wishes to sell garments of a different category number from those listed on his pricing chart in effect on the date of delivery must price by this rule.

He finds the highest selling price line in which he may sell garments of a new category number by referring to the instructions in Appendix E (section 31). He may then sell garments in the new category number at any selling price line equal to or lower than the highest selling price line so found, or at the selling price line listed in Appendix G (section 33) for garments of the same category number, whichever is higher. He fixes maximum prices for the garments by taking a margin over direct cost no higher than the average of the maximum allowable margins for every selling price line in every category number listed on his Spring Pricing Chart. (The average of the maximum allowable margins is determined by finding the total of all the maximum allowable margins for all selling price lines listed on the Spring Pricing Chart and dividing the total by the number of selling price lines.)

For example, (a) A manufacturer listed on his Spring Pricing Chart 6 selling price lines, 3 for women's dresses (Category No. 21) having maximum allowable margins of 35%, 32%, and 41%, and 3 for misses' dresses (Category No. 22) having maximum allowable margins of 44%, 37%, and 30%. His maximum allowable margin for garments in a new category number is 36.5%. This is calculated by adding together all the maximum allowable margins on his Spring Pricing Chart (35% + 32% + 41% + 44% + 37% + 30%=219%) and dividing the sum by 6 (219%÷6=36.5%).

(b) If the selling price lines listed by the manufacturer in the above example were $7.75, $6.75 and $4.75 for women's dresses, and $6.75, $5.75 and $4.75 for misses' dresses, and he now wishes to make women's coats (Category No. 1), the Table in Appendix E indicates that he would use Group I. He could then sell women's coats in a $16.75 selling price line. Thus, his minimum allowable cost in that selling price line would be $10.64. This is calculated by taking a maximum allowable margin of 36½% on the $16.75 selling price line ($16.75×.365=$6.11; $16.75—$6.11=$10.64). He may also sell women's coats at any price lower than $16.75.

4. Section 11 is amended to read as follows:

SEC. 11. *Special provisions for manufacturing-retailers.* A "manufacturing-retailer" is a manufacturer who maintains one or more establishments selling at retail, or who otherwise sells substantially all of the garments that he manufactures to ultimate consumers. Manufacturing-retailers must prepare special pricing charts for garments which they sell to ultimate consumers. These charts should include only garments which were delivered to ultimate consumers during the base period. (If other garments were delivered, they are the basis of pricing charts which must be used for sales to persons who are not ultimate consumers.)

In preparing special pricing charts for garments which are sold to ultimate consumers, manufacturing-retailers calculate their maximum allowable margins as follows:

(a) If the average initial percentage margin for a selling price line is 30% or less, the average initial percentage margin is also the maximum allowable margin.

(b) If the average initial percentage margin is higher than 30%, the maximum allowable margin is 97% of the average initial percentage margin or 30%, whichever is higher.

No retail establishment maintained by a manufacturing-retailer may sell any garment manufactured by him at a selling price line higher than (1) the selling price line listed for that category number in Appendix G (b) (section 33 (b)), or (2) the highest selling price at which that retail establishment during the appropriate base period under this regulation, delivered a garment of the same category number manufactured by the manufacturing-retailer, or (3) the highest selling price at which that retail establishment may deliver a garment of the same category number under Rules 1, 2 or 3 of MPR 330, whichever selling price is highest.

However, a manufacturing-retailer may not under any circumstances sell any garment manufactured by him at a selling price line higher than the highest selling price line listed for a garment of the same category number on his pricing chart in effect on the date of delivery or the selling price listed in Appendix G (b) (section 33 (b)), whichever is higher.

5. Section 12 (d) is added to read as follows:

(d) A manufacturer who has received an order authorizing establishment of ceiling prices under Rule 6 or Rule 9 of MPR 287, or under section 12 (a) or (b) of this regulation, may not sell or deliver garments in any additional category numbers not listed in the order of authorization until he has been authorized to establish ceiling prices for garments in such additional category numbers. Two signed copies of an application for authorization to establish maximum prices for additional category numbers must be filed with the field office of the Office of Price Administration which issued the original order under Rule 6 or Rule 9, or under section 12 (a) or (b), setting forth the following:

(1) Applicant's name and address;

(2) Rule under which the original order was issued;

(3) Additional category numbers of garments now desired to be sold;

(4) Highest selling price line desired for each category number listed in (3). (These may not be higher than those listed in Appendix E (section 31));

(5) Maximum margin and terms of sale desired for each category number listed in (3);

(6) If the competitors named in the original application do not manufacture garments in the category numbers now desired, a list of five competitors who do manufacture those category numbers.

If authorization is given, it will be accompanied by instructions as to a method for establishing maximum prices of the garments to be sold. These instructions may be revised at any time by the Office of Price Administration.

A maximum allowable margin will not be authorized to any manufacturer, other than a manufacturing-retailer, that is higher than the maximum allowable margins listed in Appendix F (section 32).

6. Section 14 is amended to read as follows:

SEC. 14. *Amendments to pricing charts*—(a) *Correction of errors.* Any manufacturer who has filed a pricing chart and then finds that the pricing chart filed was incorrect, may apply to the Office of Price Administration for authorization* to correct the errors. Two signed copies of an application for authorization to correct the errors in a pricing chart must be filed with the field office of the Office of Price Administration where the original pricing chart was filed, setting forth the following:

(1) Applicant's name and address;

(2) Description of the errors which applicant wishes to correct, and the correct entries;

(3) Statement of the manner in which the error originally occurred.

If authorization is given, it will be accompanied by instructions stating the

*Copies may be obtained from the Office of Price Administration.

[1] 8 F.R. 9122, 10001, 10304.

correct entry to be made on the pricing chart or the method to be followed in calculating the corrected entry.

Until such correction has been authorized and until the manufacturer has received an acknowledgment from the Office of Price Administration of receipt of the corrected pricing chart, he may not take a higher maximum allowable margin than those listed in his pricing chart previously filed; nor may he sell in a higher selling price line than those listed in his pricing chart previously filed or those listed in Appendix G (section 33), whichever is higher.

(b) *Addition of prices delivered during March 1942.* Any manufacturer who, during March 1942, delivered garments in category numbers covered by MPR 287 prior to June 29, 1943, and who has filed a Spring Pricing Chart, and then finds that the pricing chart does not contain prices at which he actually delivered garments during March 1942, but which are different from "selling price lines" defined in section 7 (a), may apply to the Office of Price Administration for authorization to add such prices to his Spring Pricing Chart. Two signed copies of an application for authorization to add prices to a Spring Pricing Chart must be filed with the field office of the Office of Price Administration where the original Spring Pricing Chart was filed, setting forth the following:

(1) Applicant's name and address;

(2) A list of the prices which applicant wishes to add to his Spring Pricing Chart;

(3) A statement of the reasons why such prices were not listed in a supplement to the pricing chart pursuant to Rule 11 of MPR 287 and filed prior to June 29, 1943;

(4) A description of applicant's evidence that garments at such prices were actually delivered by him during March 1942.

Until addition of these prices has been authorized and until the manufacturer has received an acknowledgment from the Office of Price Administration of the receipt of his amended Spring Pricing Chart, he may not take a higher maximum allowable margin than those listed on his Spring Pricing Chart previously filed; nor may he sell in a higher selling price line than those listed on his Spring Pricing Chart previously filed or those listed in Appendix G (section 33), whichever is higher.

7. Section 15 (a) is amended to read as follows:

(a) No manufacturer shall deliver any garments in a selling price line higher than the highest selling price line listed for a garment of the same category number on his pricing chart in effect on the date of delivery, or in Appendix G (section 33), whichever is higher.

8. Section 17 (c) is amended to read as follows:

(c) *Purchase record.* A separate record of all purchases by type of material or trimming shall be kept which will indicate the following: (1) firm name of the supplier of materials and trimmings, (2) the date the materials and trimmings were received, (3) invoice number, (4) piece goods number of the material and trimmings, or if there is no piece goods number, the case number of the materials and trimmings, (5) number of yards, dozens or units received, (6) cost of freight, if freight is borne by the manufacturer of the garment, (7) gross price of materials and trimmings received, (8) percent and dollar discounts, (9) net price of materials and trimmings received, and (10) net price per yard, dozen or unit of materials and trimmings received.

9. Section 27 is amended by deleting the word "feminine" from paragraphs (a) and (c) thereof.

10. Section 30 (a) (8) is amended by adding a new paragraph following the first paragraph thereof, to read as follows:

In addition, the marker for each cutting must be kept until 6 months after the date of the cutting, or, if the marker is cut with the lay, a pattern of the average size in the size range must be kept until 6 months after the date of the first cutting of a style number.

11. Section 30 (a) (10) (v) is amended by adding 2 new paragraphs to read as follows:

However, in calculating direct cost, certain manufacturers may include 66⅔% of any increase in marine freight, marine insurance and war risk insurance over the rates paid by the manufacturer on garments shipped on March 31, 1942 or, if he made no shipment on that date, the rates paid on the last shipment he made prior to that date. In computing these costs, war risk insurance costs shall not exceed the amount of the applicable direct voyage war risk insurance premium which was or would have been charged for such shipment by the War Shipping Administration.

These increased costs may be included only by a manufacturer who did all of the following during or prior to March 1942, and who presently does all of the following: (1) ships cut garments to any of the possessions of the United States, (2) has some of the processes of manufacture performed in the possession, and (3) completes the garments after their return to the United States. Any manufacturer who includes these costs in his direct cost must preserve such premium notices, bills and receipts and all other records which he has showing rates paid on March 31, 1942 or, if he made no shipment on that date, the rates paid on the last shipment he made prior to that date. He must also keep all receipts for his current payments for marine freight, marine insurance and war risk insurance and a record showing his allocation of such costs to each cutting.

12. Section 30 (a) (14) is amended to read as follows:

(14) *Calculation of week work labor costs.* A manufacturer who pays any of his employees engaged in direct labor operations on a time basis must prepare a week work chart as described in (15) below, and keep this chart with his cost records. The estimates shown in the chart are the maximum amounts which may be used in calculating the minimum allowable cost. If a manufacturer finds that his estimates are too low, he may amend his chart by means of a notation on the chart showing the revised estimates and the date of the notation; but the revised estimates may not be regarded as effective for any period prior to the date of the notation.

If the estimate for any craft exceeds the manufacturer's actual direct labor cost, determined by reference to the records of (i) total wages paid to employees in the craft, and (ii) total garments manufactured during an accounting period chosen by the manufacturer and shown on the chart, the manufacturer's actual direct labor cost must be used in determining whether garments contain the minimum allowable cost.

13. Section 33 is added to read as follows:

SEC. 33 *Appendix G: Selling price lines available to all manufacturers and manufacturing-retailers*—(a) *Manufacturers' prices.* Regardless of the highest selling price lines listed on their pricing charts, manufacturers may deliver garments in the respective category numbers as follows:

TITLE 36—PARKS AND FORESTS

Chapter I—National Park Service

PART I—AREAS ADMINISTRATED BY THE NATIONAL PARK SERVICE [1]

ORDER DESIGNATING HOME OF FRANKLIN D. ROOSEVELT NATIONAL HISTORIC SITE

Whereas the Congress of the United States has declared it to be a national policy to preserve for public use historic sites, buildings, and objects of national significance for the inspiration and benefit of the people of the United States; and

Whereas the Congress of the United States by Joint Resolution of July 18, 1939 (53 Stat. 1062-5), authorized the head of any executive department to accept for and in the name of the United States title to any part or parts of the Franklin D. Roosevelt Hyde Park estate for use in connection with any designated function of the Government administered in such department; and

Whereas subject to certain reservations and conditions title to approximately 33.23 acres of said historic and nationally significant estate has been vested in the United States pursuant to said Joint Resolution, having been donated by the said Franklin D. Roosevelt; *

Now, therefore, I, Harold L. Ickes, Secretary of the Interior, by virtue of and pursuant to the authority contained in the Act of August 21, 1935 (49 Stat. 666), do hereby designate the following described lands, together with all historic structures thereon and all appurtenances connected therewith, situated in the Town of Hyde Park, County of Dutchess, and State of New York, to be a national historic site, having the name "Home of Franklin D. Roosevelt National Historic Site":

Beginning at a point in the west line of the New York and Albany Post Road where the said line is intersected by the southerly line of a 16.31 acre tract known as the Franklin D. Roosevelt Library site and described in the deed from Franklin D. Roosevelt and Anna Eleanor Roosevelt, his wife, to the United States, dated July 24, 1939, and recorded in the Dutchess County Clerk's Office in Book 576 of Deeds, at page 227, and which point is monumented by an iron pipe set five inches above the ground; thence along the southerly line of said library site the following courses and distances: North 87°27' West 0.05 of a chain (3.3 feet) to a granite monument set in the ground and marked "US FDR 1939", and North 87°27' West 17.87 chains (1179.42 feet) to a similarly marked granite monument; thence along the westerly line of the said library site North 0°10' East 8.45 chains (557.70 feet) to a similarly marked granite monument set in the division line between the lands of the said Franklin D. Roosevelt and land now or formerly of Mary Newbold Morgan; thence along the land now or formerly of said Mary Newbold Morgan the following courses and distances: South 87°06' West 7.56 chains (498.96 feet) to a point marked by a one-inch iron pipe set in a six-inch square concrete monument six inches above the ground with a brass cap marked "AP1 FDR 1943", and South 89°24' West 4.15 chains (273.90 feet) to a point in the center of a rock fence on said division line and which point is the northwesterly corner of the tract herein described; thence along other land of said Franklin D. Roosevelt the following four courses and distances: South 18°51' East 0.04 of a chain (2.64 feet) to an iron pipe monument constructed as aforesaid and marked "AP2 FDR 1943"; South 18°51' East 7.52 chains (496.32 feet) to an iron pipe monument constructed as aforesaid and marked "AP3 FDR 1943"; South 28°49' West 9.46 chains (624.36 feet) to an iron pipe constructed as aforesaid and marked "AP4 FDR 1943"; and South 43°56' East crossing a road leading to the river 0.68 of a chain (44.88 feet) to an iron pipe monument constructed as aforesaid, marked "AP5 FDR 1943", and set in the original division line between the southerly line of "Wheeler Place" and the northerly line of "Boreel Place"; thence along the said original division line and along other land of Franklin D. Roosevelt the following courses and distances: South 87°40' East 30.88 chains (2038.08 feet) to an iron pipe monument constructed as aforesaid and marked "AP6 FDR 1943", and South 87°40' East 0.10 of a chain (6.6 feet) to a point where the westerly line of said New York and Albany Post Road intersects the original southerly line of said "Wheeler Place" and the original northerly line of "Boreel Place", and which point is monumented by an iron pipe set six inches above the ground; thence continuing along the westerly line of the said road the following courses and distances: North 2°56' East 7.31 chains (482.46 feet) to an iron pipe set six inches above the ground and North 5°05' West 1.05 chains (69.96 feet) to the point or place of beginning, containing 33.23 acres, more or less.

The administration, protection, and development of this national historic site shall be exercised by the National Park Service in accordance with the provisions of the above-mentioned Joint Resolution of July 18, 1939, and the Act of August 21, 1935, supra, all subject to the reservations and conditions contained in the deed conveying said property to the United States.

Warning is expressly given to all unauthorized persons not to appropriate, injure, destroy, deface, or remove any feature of this historic site.

In witness whereof, I have hereunto set my hand and caused the official seal of the Department of the Interior to be affixed, at the City of Washington, this 15th day of January 1944.

SOLID FUELS IN NEW YORK REGION

Order No. G–28 under Revised Maximum Price Regulation No. 122. Solid fuels sold and delivered by dealers. Emergency sales of coke to domestic consumers.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of the Office of Price Administration by § 1340.259 (a) (1) and Rule 4 under § 1340.254 of Revised Maximum Price Regulation No. 122, and for the period commencing with the effective date of this order and expiring on April 1, 1944, *It is hereby ordered:*

(a) In Region II, consisting of the States of Delaware, Maryland, New Jersey, New York, the Commonwealth of Pennsylvania and the District of Columbia, the maximum prices for the sale and delivery of coke to domestic consumers, shall be determined in the following manner.

(1) Any dealer in coke, purchasing coke of the kind or kinds customarily sold by him, from his customary suppliers, shall not exceed his existing maximum price for sales of such coke.

(2) Any dealer who has established a maximum price for coke but purchases coke of a different kind or quality or from different sources of supply than formerly, shall calculate his maximum price for sales of such coke by taking the sum of the following:

First, the per net ton cost of such coke to the dealer, f. o. b. supplier's shipping point;

Second, the actual transportation cost from supplier's shipping point to the dealer's yard, dock or other terminal facility; and

Third, the margin over delivered cost on the dealer's similar sale of coke most nearly like the coke for which a maximum price is being calculated hereunder, taking into account class of purchaser, method of delivery, and terms of delivery: *Provided*, That, where sales or deliveries are contemplated in communities where coke is subject to area dollars-and-cents orders issued under Revised Maximum Price Regulation No. 122, dealers shall add no more than the margins authorized by the Regional Office of the Office of Price Administration. In such instances, dealers shall apply for a price to the Regional Office, setting forth in writing:

1. The locality in which sales and deliveries of coke will be made, and

2. The f. o. b. cost of coke and the actual transportation cost, as above described.

The Regional Administrator will then establish the maximum price which the applicant may charge for such coke in the place designated, which price shall be determined by reference to margins prevailing in the area for sales of coke.

(3) Any dealer who has not established a maximum price for coke under Revised Maximum Price Regulation No. 122 may, to insure accurate pricing, apply for a price to the Regional Office setting forth:

1. A description of the coke and name of supplier,

2. The locality in which sales and deliveries will be made, and

3. The f. o. b. cost of coke and the actual transportation cost from supplier's shipping point to the dealer's yard, dock, or other terminal facility.

The Regional Administrator will then establish the maximum price which the applicant may charge for such coke in line with maximum prices of the closest competitive sellers for like coke sales derived from the same sources.

(b) *Conditions and limitations.* Every dealer making sales of coke pursuant to the pricing authorization of this order must, as a condition to pricing hereunder, keep each kind of coke, from each supplier, separate in storage and delivery from any other kind of coke and from coke shipped by other suppliers, and from any other kind of solid fuel, and sell and invoice it under the description used by the supplier. The invoice shall also set forth the supplier's shipping point.

(c) *Records.* Every dealer making sales of coke subject to this order shall preserve, keep and make available for examination by the Office of Price Administration complete and accurate records of coke purchased and sold hereunder, and a record of every sale of such fuel, showing the date, the name and address of the buyer, if known, the per net ton price charged, and the coke sold. The coke shall be identified in the manner designated by the supplier as well as by the supplier's shipping point. The record shall also state separately each service rendered and the charge made for it.

(d) *Reports.* Every dealer subject to this order shall, within ten days after he determines or redetermines his maximum prices hereunder, report to the District Office of the Office of Price Administration under whose geographical jurisdiction his principal place of business is located:

(1) His maximum price for sales of each kind of coke from each supplier.

(2) The method employed in computing or determining that price including, where applicable, the margin added to delivered costs for sales to different classes of purchasers.

(3) A statement of the margin over delivered costs on the dealer's similar sale of coke most nearly like the coke priced hereunder, to different classes of purchasers.

(e) *Definitions.* When used in this Order No. G–28 the term:

(1) "Coke" means all coke, including reclaimed coke, when sold by dealers for use as fuel by "domestic consumers", as herein defined.

(2) Sales to "domestic consumers" shall refer to sales of coke for use in dwellings consisting of no more than thee family units, or in any building which would normally consume no more than twelve tons of anthracite annually.

(3) Unless the context otherwise requires, the definitions set forth in §§ 1340.255 and 1340.266 of Revised Maximum Price Regulation No. 122 shall apply to all other terms used herein.

(f) This order, which may be revoked, amended, or corrected at any time shall, unless earlier revoked or replaced, expire on April 1, 1944.

This Order No. G–28 shall become effective January 17, 1944.

NOTE: The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(56 Stat. 23, 765; Pub. Law 151, 78th Cong.; E.O. 9250, 7 F.R. 7871 and E.O. 9328, 8 F.R. 4681)

[Region VI Order G-1 Under MPR 280]

FLUID MILK IN ILLINOIS, ETC.

Order No. G-1 under Maximum Price Regulation No. 280. Maximum price for specific food products. Handler sales of fluid milk in Illinois, Minnesota, Wisconsin, certain counties in Iowa, and Lake County, Indiana.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of the Office of Price Administration under § 1351.817a of Maximum Price Regulation No. 280, it is hereby ordered:

(a) *Computation of base price.* The maximum price for interhandler sales of milk shall be the base price computed as set forth in this paragraph (a), plus the additions permitted by paragraphs (b) or (c), whichever may apply. The base price for any handler sale or delivery of fluid milk in bulk shall be the weighted average price paid by the handler to producers for all purchases of milk made during the calendar months of July and August, 1943. All prices included in the weighted average shall be prices for milk delivered to the handler's plant. Where the handler has paid an independent carrier to transport the milk from the producer to the handler's plant, the amount paid for such transportation shall be added to the price paid to the producer for the milk so transported. However, where the handler has transported milk to his plant in his own conveyance, the price paid for such milk shall not be included in computing the weighted average price. Where a handler has more than one plant at which he receives milk from producers, a separate base price shall be established for each such plant.

In computing base prices all purchases made during July and August 1943 shall be considered. Computation shall be made on the basis of 3.5% milk. For any milk received during these two months other than 3.5% the handler shall compute a price as if such milk had in fact been 3.5%, applying his own butterfat differentials in use at the time of the purchase for milk with a butterfat content of other than 3.5%. If the handler had established for any period of time during July or August, 1943 a differential in prices for graded milk and ungraded milk or for different grades of milk, or both, such a handler should figure a weighted average price separately for graded milk and ungraded milk or for each such different grade of milk.

(Exception). Whenever a handler's purchases of milk from producers are governed by the provisions of any order, agreement or license issued pursuant to the Agricultural Marketing Agreement Act of 1943, the base price shall be the Class 1 price currently established for such purchases at the time they are made or the base price established pursuant to this paragraph (a), whichever is higher.

(b) *Maximum prices established for handlers other than certain farmers' cooperatives serving cities over 100,000 population.* Except as provided in paragraph (c) hereof each handler shall determine for each of his plants his maximum price for handler sales of fluid milk in bulk f. o. b. the plant by adding to the base price determined by him for such plant under paragraph (a) of this order, that one of the following markups which is applicable to the sale made by him:

(1) 40¢ per cwt. when the seller receives, weighs, and tests the milk at his place of business, but does not cool or inspect the milk.

(2) 45¢ per cwt. when the seller receives, weighs, tests, inspects and cools the milk at his place of business and makes delivery into a tank truck or tank car.

(3) 50¢ per cwt. when the seller receives, weighs, tests, inspects and cools the milk and places it in cans provided by the purchaser.

(4) 55¢ per cwt. when the seller receives, weighs, tests, inspects and cools the milk and places it in cans provided by the seller.

(5) 15¢ less per cwt. than the price computed under section (b) (1), (2), (3), or (4) whichever is applicable for deliveries pursuant to an agreement covering a period of four months or more to supply a stated quantity of milk on a regular basis (such as five days a week) during the operation of the agreement and in which the buyer agrees to accept at least a minimum ascertainable quantity during the contract period.

The above markups are to be added to the base price (provided under paragraph (a) of this order) for 3.5% milk. In the case of sales of milk having a butterfat content in excess of 3.5%, 5¢ may be added to the maximum price (including the markup) for each 1/10 of a pound butterfat above 3.5%, and in the case of sales of milk with a butterfat content less than 3.5%, 5¢ must be deducted from the maximum price (including the markup) for each 1/10 of a pound butterfat below 3.5%.

(c) *Maximum prices established for certain farmers' cooperatives serving cities over 100,000 population.* Where a farmers' cooperative during July and August, 1943, processed fluid milk in a plant owned or leased by it and sold such fluid milk to retail or wholesale distributors of fluid milk serving cities over 100,000 population at a lower markup (over its cost delivered to its plant) than the applicable markup provided in paragraph (b) hereof, it shall not use the maximum price established under paragraph (b) hereof when making sales to such distributors. Instead, such a farmers' cooperative shall determine its maximum price f. o. b. its plant for sales to such distributors by adding to the cooperative's base price calculated under paragraph (a) hereof a markup which shall not exceed the highest markup taken in an actual sale by the cooperative to any such distributor of fluid milk during July and August, 1943. This markup shall be determined as the difference between the cost of the milk which was used for any such sale, delivered at the plant of the farmers' cooperative, and the price at which the cooperative sold such milk f. o. b. its plant.

(d) *Inability to fix maximum prices.* If a handler cannot compute his maximum price for sale of bulk milk at wholesale under the terms of this order he shall apply to the Regional Office of the OPA for a maximum price. Such application shall contain a statement of the reason why the applicant cannot avail himself of the pricing provisions of this order and such additional information as the applicant may deem necessary to the proper consideration of his application. The applicant shall furnish such additional information as the Regional Office may subsequently request in order to act on the application.

(e) *Definitions.* As used in this order:

1. "Handler sale" shall mean any sale of fluid milk by a person who, on his own behalf or on behalf of others, purchases fluid milk from producers, associations of producers, or other handlers, and who sells such fluid milk at wholesale in bulk (other than in glass or paper containers) to any persons other than stores, hotels, restaurants, institutions, and ultimate consumers.

"Handler sale" shall not include any sale of milk for use in manufactured dairy products such as butter, cheese, evaporated or condensed milk, powdered milk, casein, and ice cream. Sales by a farmers' cooperative shall be considered handler sales in all cases where it sells fluid milk which has been processed in a plant owned or leased by it or which it has had processed for it in some other plant.

2. "Handler" shall mean any person who makes a handler sale.

3. "Producer" means a farmer, or other person or representative, who owns, superintends, manages, or otherwise controls the operation of a farm on which milk is produced. A farmers' cooperative is a producer with regard to all sales of fluid milk by it, except sales of fluid milk which has been processed in a plant owned or leased by it or which it has had processed for it in some other plant.

4. "Person" means individual, corporation, partnership, association or other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, any other government, or any of its political subdivisions, and any agencies of any of the foregoing.

5. "Plant" shall mean an establishment equipped to receive, weigh and test milk, including an establishment which is further equipped to cool and inspect milk and place it in cans or in tank trucks or tank cars.

6. "Processes" or "processed" refers to the receiving, weighing and testing of milk in a plant and may include further handling such as inspecting, cooling and placing in cans, tank cars or tank trucks.

7. "Fluid milk" means raw or pasteurized liquid cows' milk of any butterfat content which is sold for human consumption in fluid form (including buttermilk).

(f) *Applicability.* This order applies to all handler sales of fluid milk for resale for human consumption, where physical delivery is made within the States of Illinois, Minnesota or Wisconsin, or within Lake County, Indiana, or within the following counties in Iowa:

Allamakee.	Henry.
Black Hawk.	Howard.
Bremer.	Jackson.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 21st day of January, A. D. 1944.

Notice is hereby given that a joint declaration or application (or both) has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by Electric Power & Light Corporation ("Electric"), a registered holding company, and its subsidiary, Mississippi Power & Light Company ("Mississippi").

All interested persons are referred to said joint declaration or application, which is on file in the office of the said Commission, for a statement of the transactions therein proposed, which are summarized below:

The aforesaid companies propose that:

Electric will make a "gratuitous contribution" to the capital of Mississippi of the following securities of Mississippi: (a) A Demand Loan in the principal amount of $190,000; (b) 1,493 shares of $6 preferred stock; (c) 35,000 shares of $6 second preferred stock; (d) 500,000 shares of common stock. In connection with the contribution of said second preferred stock, accumulated dividend arrearages, in the amount of $2,240,000, as of September 30, 1943, will be cancelled.

Mississippi will acquire the above securities and take the following steps:

(1) Cancel the securities surrendered to it as above and reduce its capital stock liability in the total amount of $6,149,941, the equivalent of the amount of the claim on liquidating of said preferred shares plus $2,500,641 attributable to common stock;

(2) Record the acceptance of the contribution of $190,000 principal amount of demand loan and credit its capital surplus account with said amount plus the above $6,149,941 reduction in capital stock liability;

(3) Charge to its capital surplus account a balance of $6,339,941 presently classified in its plant account which it has been ordered to eliminate therefrom;

(4) State its capital stock liability on its remaining outstanding 65,775 shares of $6 preferred stock at $100 per share and its capital stock liability on its remaining outstanding 500,000 shares of common stock, at $5 per share;

(5) Make certain other accounting adjustments stated to be in compliance with the orders of other regulatory bodies.

Mississippi in addition proposes to amend its certificate of incorporation, such amendments to provide in substance that:

(1) The present authorization for the issuance of second preferred stock ($6) shall be eliminated and the authorized preferred stock of Mississippi shall consist of 100,000 shares of no par value $6 preferred stock entitled in liquidation to $100 per share;

(2) In the event that accumulated and unpaid preferred dividends at the date of any annual meeting shall aggregate four full quarterly dividends a majority of the Preferred Stockholders, voting as a class, shall be entitled to elect a majority of the Board of Directors;

In the matter of Consolidated Electric and Gas Company, The Asheville Gas Company, The Durham Gas Company, Martinsburg Gas Company, Suffolk Gas Company, The Raleigh Gas Company, and Jersey Shore Gas Company.

Notice is hereby given that declarations or applications (or both) have been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by Consolidated Electric and Gas Company ("Consolidated"), a registered holding company, and the following subsidiary companies of said holding company, the Asheville Gas Company, The Durham Gas Company, Martinsburg Gas Company, Suffolk Gas Company, The Raleigh Gas Company and Jersey Shore Gas Company.

Notice is further given that any interested persons may, not later than February 10, 1944, at 5:30 p. m., e. w. t., request the Commission that a hearing be held on such matter, stating the reasons for such request and the nature of his interest or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter such declarations or applications (or both), as filed or as amended, may become effective or be granted as provided in Rule U-23 of the Rules and Regulations promulgated pursuant to said act or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania.

All interested persons are referred to said documents, which are on file in the office of the Commission, for a statement of the transactions therein proposed, which are summarized as follows:

Each of the six subsidiary companies of Consolidated hereinabove listed has recently sold all of its property and assets (other than cash). In view of such sales, it is stated that such sudsidiary companies no longer serve any useful purpose and should be liquidated and dissolved. Accordingly, it is proposed that Consolidated, the owner of all the outstanding securities of each of such subsidiaries, donate to each such subsidiary, as a capital contribution, the debt securities of such subsidiary for cancellation and also surrender to such subsidiary all the outstanding capital stock of such subsidiary for retirement and cancellation. In return for the surrender of its stock, each subsidiary will deliver to Consolidated, as a liquidating dividend or dividends, all of its assets, the same consisting solely of cash.

Consolidated will deposit the cash so to be received by it with the trustees under the indentures securing debt securities of Consolidated under which indentures the securities of such subsidiaries have been heretofore pledged, as required by the terms of such indentures, except in the case of The Raleigh Gas Company and Jersey Shore Gas Company. Having heretofore deposited cash with the appropriate trustee and secured the release of the pledged securities of the two last named subsidiaries in order that sales of their assets might be made free of liens, Consolidated will, in effect, reimburse its own treasury for the amounts so deposited.

It is stated that the amounts received by the six subsidiaries as the total consideration for the sales of their properties and assets were as follows:

The Asheville Gas Company	$85,279.20
The Durham Gas Company	99,968.87
Martinsburg Gas Company	57,000.00
Suffolk Gas Company	102,535.00
The Raleigh Gas Company	221,169.65
Jersey Shore Gas Company	22,100.00

Each of the six subsidiaries will be dissolved in accordance with the applicable state law.

By the Commission.

Southwestern Public Service Company now proposing to sell said mortgage debt to non-affiliated purchasers for a sales price of 92¼% of the principal amount thereof, plus accrued interest to the date of sale and, preliminary to such sale, to surrender the single note and mortgage presently evidencing and securing said debt and to accept in lieu thereof 380 bonds, each in the principal amount of $1,000 to be issued by the present owner of the mortgaged property and to be secured by a mortgage indenture running to a trustee, and said Southwestern Public Service Company having requested that such jurisdiction as may have been reserved to the Commission by reason of the terms or entry of its said order of July 8, 1942, over the terms and mode of disposition of said mortgage lien and indebtedness and the instruments evidencing the same, be released to the extent necessary to permit said proposed sale to be effected, and the Commission having fully considered said request, upon the basis of the record herein, and finding the same proper to be granted;

THE UNITED LIGHT AND RAILWAYS CO., ET AL.

ORDER RELEASING JURISDICTION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia 3, Pa., on the 24th day of January, A. D. 1944.

In the matter of The United Light and Railways Company, Continental Gas & Electric Corporation, Iowa-Nebraska Light and Power Company, Iowa Power and Light Company, Des Moines Electric Light Company, File No. 70–717; Illinois Iowa Power Company, File No. 70–704.

The Commission, by its order entered in these proceedings on August 16, 1943 (Holding Company Act Release No. 4497), having approved various transactions including, among others, the payment of a partial liquidating dividend, consisting of cash and securities in the aggregate amount of $6,865,000, by Iowa-Nebraska Light and Power Company to Continental Gas & Electric Corporation, the Commission having reserved jurisdiction over the accounting entries to record such partial liquidation, and the Commission having also reserved jurisdiction with respect to the allocation of fees and expenses of independent engineers and accountants, in the approximate amounts of $30,000 and $3,000, respectively, and with respect to the reasonableness and allocation of all other fees and expenses except those which were referred to specifically and passed upon in the Commission's findings and opinion; and

The Commission having by order dated January 3, 1944, released jurisdiction with respect to the reasonableness and the allocation of fees and expenses paid or incurred by Illinois Power Company (formerly Illinois Iowa Power Company); and

A supplemental application having been filed setting forth the proposed accounting entries to reflect the partial liquidation of Iowa-Nebraska Light and Power Company, and stating (1) that the actual fees and expenses of the independent engineers and accountants, in the amounts of $29,435.24 and $2,485, respectively, are to be charged to Continental Gas & Electric Corporation, (2) that an additional item of expense, in the amount of $5,000, has been charged to Iowa Power and Light Company to reflect the cost of qualifying its bonds for sale under the laws of various states and (3) that the balance of the fees and expenses, incurred by the applicants other than Illinois Power Company, in the amount of $26,166.51 and consisting of legal fees and expenses, are to be charged to Continental Gas & Electric Corporation; and

The Commission having examined the proposed accounting entries and finding that such entries properly record the partial liquidation of Iowa-Nebraska Light and Power Company and that jurisdiction reserved with respect thereto should be released; and

The Commission finding that said fees and expenses incurred by Iowa Power and Light Company and by Continental Gas & Electric Corporation are not unreasonable in amount and are proper charges to such applicants,

It is therefore ordered, That the jurisdiction reserved in the order entered herein on August 16, 1943, with respect to the accounting entries recording the partial liquidation of Iowa-Nebraska Light and Power Company and with respect to the reasonableness and the allocation of fees and expense paid or incurred by the various applicants be and the same is hereby released.

All interested persons are referred to said application or declaration, which is on file in the offices of the Securities and Exchange Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

The Niagara Falls Power Company operates certain properties under a license pursuant to the Federal Water Power Act. The Company is subject to orders of the Federal Power Commission dated June 9, 1942 and December 28, 1943, requiring the elimination of $14,500,573.56 from its project plant accounts, but permitting the Company to charge $14,497,768.11 of that amount to a capital surplus rather than earned surplus if such a capital surplus is duly created and the charge thereto is made prior to March 1, 1944. For the purpose of creating capital surplus in the latter amount the Company now proposes to reduce the stated value of its outstanding common stock, without par value, all of which is held by its immediate parent, Buffalo, Niagara and Eastern Power Corporation, from $35,575,565, as presently stated, to $21,077,796.89.

In its application or declaration the Company states that it does not believe that any provision of the Public Utility Holding Company Act of 1935 or rules thereunder is applicable to the proposed transactions and requests, in the alternative, that the application or declaration be dismissed by the Commission for want of jurisdiction or approved pursuant to any applicable provisions of the act or rules thereunder.

It appearing to the Commission that it is appropriate, in the public interest and the interests of investors and consumers, that a hearing be held with respect to said matter, and that said application or declaration shall not be granted or permitted to become effective except pursuant to further order of this Commission;

It is ordered, That a hearing on such matter be held on February 10, 1944, at 10:00 a. m. at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such date the hearing-room clerk in Room 318 will advise as to the room in which said hearing will be held. All persons wishing to be heard or otherwise to participate in the proceedings shall notify the Commission in the manner provided in Rule XVII of the Commission's Rules of Practice on or before January 29, 1944.

It is further ordered, That Henry C. Lank, or any other officer or officers of the Commission designated by it for that purpose, shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a Trial Examiner under the Commission's Rules of Practice.

It is further ordered, That, without limiting the scope of the issues presented by said application or declaration, particular attention will be directed at such hearing to the following matters and questions:

1. Whether the proposed transactions are in the public interest and the interests of investors and consumers, and not in contravention of the applicable provisions of the act and the rules and regulations promulgated thereunder.

2. The nature and scope of the order which should be entered, with respect to the proposed transactions.

THE UNITED GAS IMPROVEMENT CO.

ORDER GRANTING APPLICATION AND PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the city of Philadelphia, Pennsylvania, on the 25th day of January 1944.

The United Gas Improvement Company, a registered holding company and a subsidiary of The United Corporation, also a registered holding company, having filed an application and declaration and amendments thereto pursuant to sections 6, 7 and 12 of the Public Utility Holding Company Act of 1935 and Rules U-42, U-50, U-62 and U-23 promulgated thereunder with respect to the following transactions:

The United Gas Improvement Company proposes to change its 35,000,000 authorized shares of capital stock without par value into 3,500,000 shares of $13.50 par value each, and similarly convert its 23,252,000 outstanding shares of capital stock without par value into 2,325,200 shares with a par value of $13.50 each, one share of the new stock to be exchanged for each ten shares of the present stock. In lieu of fractional shares of the new stock, it is proposed to issue non-voting scrip in bearer form, which, during a period of one year commencing on or about September 7, 1944, will be exchangeable, in combination with other similar scrip, for the number of full shares represented thereby. After the one-year period, it is proposed to pay and discharge any unexchanged scrip by payment therefor in cash on the basis of the average closing price of the stock for the period from September 10 to September 14, 1945, inclusive. At the time of the payment of scrip in cash or upon the exchange thereof for full shares, the company further will pay an amount in cash equal to the fractional interest in dividends and/or distribution of capital assets then payable or distributable.

The stated purposes of the proposed transactions are to reduce the number of shares of capital stock so that they will be more proportionate to the substantially reduced assets of the company; to make the new shares more acceptable as collateral security than the present shares selling under $5 per share; and to reduce brokerage commissions on purchases or sales and transfer taxes on sales of the stock. The proposed transactions will be submitted to a stockholders' vote at the next annual meeting of stockholders, scheduled for May 1, 1944.

The difference of $549,239 between the stated capital applicable to the capital stock of the company immediately prior to the proposed conversion ($31,939,439) and the stated capital represented by the shares of the proposed new capital stock ($31,390,200) will be credited to the capital surplus account, and the 2,424 shares of present capital stock now held in the treasury will be canceled and retired by charging capital surplus with $3,329; and

Said application and declaration having been filed on December 29, 1943 and notice of said filing having been duly given in the form and manner prescribed by Rule U-23, and the Commission not having received a request for hearing with respect to said application and declaration within the period prescribed in said notice, or otherwise, and not having had a hearing thereon, the company having requested acceleration of the effective date; and

The Commission finding that the requirements of section 6, 7 and 12 (c) of the act and Rules U-42, U-50 and U-62 thereunder are satisfied, and deeming it appropriate in the public interest and in the interests of investors and consumers to grant said application, as amended, and to permit said declaration, as amended, to become effective, and that the effective date should be accelerated;

It is hereby ordered, Pursuant to Rule U-23 and the applicable provisions of the act and subject to the terms and conditions prescribed in Rule U-24, that the aforesaid application, as amended, be, and the same hereby is, granted forthwith and that the aforesaid declaration, as amended, be and the same hereby is, permitted to become effective forthwith.

By the Commission, Commissioner Healy dissenting for the reasons set forth in his memorandum of April 1, 1940.

[SEAL] ORVAL L. DUBOIS,
Secretary.

TITLE 30—MINERAL RESOURCES

Chapter VI—Solid Fuels Administration for War

PART 602—GENERAL ORDERS AND DIRECTIVES

[Reg. 12]

RESTRICTIONS ON DELIVERY OF COKE

On December 31, 1943, the Chairman of the War Production Board delegated to the Solid Fuels Administrator for War authority and discretion to control the distribution of coke by any person to any domestic consumer and the use of coke by any domestic consumer (WPB Directive 33, 9 F.R. 64). In order to assure the equitable distribution of the available supply of coke for domestic consumers, it is necessary to place restrictions upon deliveries of coke by retail dealers. Accordingly, in order to effectuate the purposes of Executive Order No. 9332, and by virtue of the authority conferred by that Order and Directive 33 of the War Production Board, the following regulation is issued by the Solid Fuels Administrator for War:

Sec.

602.221 Definitions.
602.222 Restrictions upon deliveries of coke by retail dealers.
602.223 Restrictions upon the ordering and receiving of coke by domestic consumers.
602.224 Limitations upon the applicability of this regulation.
602.225 Records.
602.226 Violations.
602.227 Damages for breach of contract.
602.228 Application for modification and exception.

AUTHORITY: §§ 602.221 to 602.228, inclusive issued under E.O. 9332, 8 F.R. 5355; E.O. 9125, 7 F.R. 2719; sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176.

§ 602.221 *Definitions.* (a) "Solid fuel" means all forms of anthracite, bituminous, sub-bituminous, and lignitic coals (including packaged and processed fuels, such as briquettes), and coke.

(b) "Coke" means all coke made from bituminous coal.

(c) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or organized group of persons.

(d) "Retail dealer" means any person (including the retail outlet, branch, or department of a person who is also a producer or wholesaler)—who acts in the capacity of a seller of coke in a transaction involving the sale, or sale and delivery, of broken bulk coke, physically handled in less than carload lots, without regard to quantity or frequency of delivery.

(e) "Domestic consumer" means any person who acquires coke for space heating, domestic hot water or domestic cooking but does not include any person to the extent that he acquires coke for use in an industrial process or for the production of power or for space heating which is incidental thereto.

(f) "Days' supply" means the minimum amount of coke and other usable solid fuels which it is reasonably expected will be consumed during any specified number of days following the placing of an order for coke.

§ 602.222 *Restrictions upon deliveries of coke by retail dealers.* (a) Except as provided in paragraph (c) of this section, no retail dealer shall deliver any coke to a domestic consumer if such consumer has more than a 30 days' supply of solid fuel on hand.

(b) A retail dealer may deliver coke in any quantity to a domestic consumer provided that the tonnage delivered, when added to the inventory on hand, does not exceed a 30 days' supply of solid fuel. The provisions of this paragraph shall not be deemed to require any retail dealer to deliver less than two tons of coke to any domestic consumer, but a retail dealer may deliver less than two tons of coke to any domestic consumer.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a retail dealer may deliver coke to a domestic consumer with more than a 30 days' supply of solid fuel, and such consumer may accept delivery, if such retail dealer has no orders from consumers with less than a 30 days' supply of solid fuel.

(d) Retail dealers shall, to the extent consistent with the provisions of this section, furnish coke first to those domestic consumers who are in most urgent need of such fuel, whether such consumers are contract or spot order customers. Accordingly, in accepting and filling orders for coke, no retail dealer shall discriminate among domestic consumers who are equally entitled to order and receive coke under this Regulation.

§ 602.223 *Restrictions upon the ordering and receiving of coke by domestic consumers.* (a) No domestic consumer may order coke in excess of the amount a retail dealer is permitted to deliver pursuant to § 602.222 of this regulation, and no such consumer may receive from all sources combined more coke than any retail dealer is permitted to deliver pursuant to § 602.222.

(b) No domestic consumer may receive any coke if he inflates, duplicates or pyramids his orders or contracts for solid fuel.

§ 602.224 *Limitations upon the applicability of this regulation.* The provisions of this regulation do not apply to deliveries of coke to or acquisition of coke by:

(a) Domestic consumers within the Limitation Area (States of Washington and Oregon and the following counties in the State of Idaho: Boundary, Bonner, Kootenai, Benewah, Latah, Nez Perce, Shoshone, Clearwater, Lewis and Idaho) designated in section 1 of Ration Order No. 14A, issued by the Office of Price Administration on September 18, 1943.

(b) All records required to be kept by this Regulation shall, upon request, be submitted for inspection, copy and audit by duly authorized representatives of the Solid Fuels Administrator for War.

§ 602.226 *Violations.* Any person who violates any provision of this Regulation or who, by any statement or omission, wilfully falsifies any records which he is required to keep, or who wilfully certifies false or misleading information to the Solid Fuels Administrator for War, or any person who obtains a delivery of coke by means of a wilfully false or misleading statement, may be prohibited from delivering or receiving any material under priority control. The Solid Fuels Administration for War may also take any other action deemed appropriate, including the making of a recommendation for prosecution under section 35 (A) of the Criminal Code (18 U. S. C. Sec. 80) or under the Second War Powers Act (Public, No. 507, 77th Cong., March 27, 1942).

§ 602.227 *Damages for breach of contract.* No person shall be held liable for damages or penalties for any default under any contract which shall result directly or indirectly from compliance with this regulation.

§ 602.228 *Application for modification and exception.* Any application for modification of or exception from any provision of this Regulation shall be filed in triplicate with the Solid Fuels Administration for War, Washington, D. C. The application shall set forth in detail the provisions sought to be modified or from which an exception is sought, and the reasons and data in support of such request for modification or exception.

PART 602—GENERAL ORDERS AND DIRECTIVES

[Reg. 13]

BITUMINOUS COAL IN DISTRICT 8

To relieve the critical shortage in the supply of bituminous coal of retail dealers at certain destinations in the States of Virginia, Tennessee, North Carolina, South Carolina, Georgia, Alabama and Florida, it is necessary to require certain producers in District No. 8 to ship all or a portion of their production of lump or double-screened domestic coal (not including household domestic stoker coal) to retail dealers at those destinations, and to require certain other producers in District No. 8 to make available each week for shipment, pursuant to specific directions issued by the Solid Fuels Administration for War, a portion of their week's production of such lump or double-screened domestic coal. It is also necessary to place restrictions upon deliveries of bituminous coal produced in District No. 8 by retail dealers at certain destinations in the above-named states. Accordingly, in order to effectuate the purposes of Executive Order No. 9332 (8 F.R. 5355), and by virtue of the authority conferred by that Order, the following Regulation is issued by the Solid Fuels Administrator for War:

Sec.

602.235 Definitions.
602.236 Required shipments of bituminous coal by certain producers in District No. 8 to certain destinations.
602.237 Restrictions upon the ordering and receiving of bituminous coal, and upon deliveries of bituminous coal, by retail dealers in the Southeast.
602.238 Reports.
602.239 Violations.
602.240 Damages for breach of contract.
602.241 Applications for modification and exception.
602.242 Effective date of this regulation.

AUTHORITY: §§ 602.235 to 602.242, inclusive, issued under E.O. 9332, 8 F.R. 5355; E.O. 9125, 7 F.R. 2719; sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176.

§ 602.235 *Definitions.* (a) "District No. 8," any specified "subdistrict" of said District No. 8 and any specified "market area" have the meaning established, pursuant to the Bituminous Coal Act of 1937, as amended, by the various schedules, orders, rules, regulations and practices of the Bituminous Coal Division of the Department of the Interior as of August 23, 1943.

(b) "Producer" means any person (except when engaged in retail dealer transactions) engaged in the business of mining or preparing bituminous coal (or the sales agent of such person).

(c) "Retail dealer" means any person (including the retail outlet, branch or department of a person who is also a producer or wholesaler) who acts in the capacity of a seller of bituminous coal in a transaction involving the sale, or

sale and delivery, of broken bulk bituminous coal, physically handled in less than carload lots without regard to quantity or frequency of delivery.

§ 602.236 *Required shipments of bituminous coal by certain producers, in District No. 8 to certain destinations.* (a) Each producer in the Virginia and Southern Appalachian Subdistricts of District No. 8 shall ship all of his weekly production of lump or double-screened domestic coal (not including household domestic stoker coal)—each producer in the Harlan Subdistrict of District No. 8, and each producer in the Big Sandy-Elkhorn Subdistrict of District No. 8 whose mine is located on the Chesapeake & Ohio Railway, shall ship not less than 50 percent of his weekly production of lump or double-screened domestic coal (not including household domestic stoker coal)—to destinations in the States of Georgia, Alabama, and Florida, destinations in those parts of the States of North Carolina and South Carolina within Market Areas Nos. 106, 109, and 110, destinations in that part of the State of Virginia within Market Area No. 101 and destinations in that part of the State of Tennessee consisting of Marion, Grundy, Warren, DeKalk, Putnam, Jackson and Clay Counties and east thereof.

(b) Each producer in the Kanawha, Logan, Hazard, and Williamson Subdistricts of District No. 8 shall make available for shipment pursuant to specific directions issued by the Solid Fuels Administration, 5 percent of each week's production of lump and double-screened domestic coal (but not including household domestic stoker coal). However, if no specific direction from the Solid Fuels Administration is received by any such producer by Thursday of any week, such producer may ship the entire production of lump and double-screened domestic coal of that week on orders on hand subject to the provisions of Solid Fuels Administration for War Regulation No. 10 (8 F.R. 15773) or of other regulations or directions issued by the Solid Fuels Administration.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, no producer described in those paragraphs shall be deemed to be required by such paragraphs to curtail his production, and he may ship coal upon any order if such shipment is necessary to permit uninterrupted operation at his mine.

§ 602.237 *Restrictions upon the ordering and receiving of bituminous coal, and upon deliveries of bituminous coal, by retail dealers in the southeast.* (a) No retail dealer in the States of Virginia, North Carolina, South Carolina, Georgia, Alabama, Tennessee and Florida may order and receive such an amount of lump or double-screened domestic coal (not including household domestic stoker coal) produced in District No. 8 as will result in his maintaining at his yard as storage or inventory tonnage exceeding 20 percent of his average monthly deliveries of such coal to consumers during November, December and January of the winter of 1942–43.

(b) Notwithstanding the provisions of Solid Fuels Administration for War Revised Regulation No. 7 (8 F.R. 15442), no retail dealer described in paragraph (a) of this section shall deliver any lump or double-screened domestic coal (not including household domestic stoker coal) to any consumer who has sufficient solid fuel (coal or coke) on hand to meet his minimum burning requirements for a period of 15 days. A retail dealer may deliver to a consumer, who has less than 15 days' supply of solid fuel (coal or coke) on hand, an amount of coal which when added to the consumer's supply of coal and coke will not result in the consumer having more solid fuel (coal or coke) than is necessary to meet his minimum burning requirements for a period of 15 days.

(c) Despite the provisions of paragraph (b) of this section, no retail dealer is required by this Regulation to make deliveries of less than one ton of lump or double-screened domestic coal (not including household domestic stoker coal) to any consumer entitled to receive such coal in accordance with this regulation.

§ 602.238 *Reports.* Each producer in District No. 8 shall report in writing on or before the fifth day of each month to Mr. Wayne P. Ellis, Area Distribution Manager, Solid Fuels Administration for War, 600 Transportation Building, Cincinnati, Ohio, the name and location of each retail dealer to whom coal is shipped, and the tonnage so shipped, in accordance with the provisions of this regulation. In lieu of such report, any producer may file with Mr. Ellis a copy of each invoice covering any tonnage shipped in accordance with this Regulation. The reporting requirements of this Regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

§ 602.239 *Violations.* Any person who wilfully violates any provision of this Regulation is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

§ 602.240 *Damages for breach of contract.* No person shall be held liable for damages or penalties for any default under any contract or order which shall result directly or indirectly from compliance with this Regulation.

§ 602.241 *Application for modification and exception.* Any application by a producer or retail dealer for modification of or exception from any provisions of this Regulation shall be filed in triplicate. Retail dealers shall file any such application with the nearest Area Distribution Manager of the Solid Fuels Administration for War. Producers shall file any such applications with Mr. Wayne P. Ellis, Area Distribution Manager, Solid Fuels Administration for War, 600 Transportation Building, Cincinnati, Ohio. The application shall set forth in detail the provisions sought to be modified or from which an exception is sought and the reasons and data in support of such request for modification or exception. The Area Distribution Manager shall send such application with his recommendation thereon to the Solid Fuels Administrator for War for appropriate action.

§ 602.242 *Effective date of this regulation.* This regulation shall become effective immediately.

Issued this 26th day of January 1944.

HAROLD L. ICKES,
Solid Fuels Administrator for War.

(a) A publisher who issues a newspaper five or six days per week (excluding Sundays) shall:

PART 3270—CONTAINERS

[Supplementary Order L–103–b as Amended Jan. 27, 1944]

GLASS CONTAINER AND CLOSURE QUOTAS

What This Order Does

§ 3270.36 *Supplementary Order L–103–b.* This order lists the only products which may be commercially packed in new machine-made, glass containers or with new metal closures. It specifies closure materials and sets forth the number of glass packages and metal closures which may be used for each listed product. In addition, some restrictions are placed upon the manufacture of closures.

The order limits "commercial packs" only. Although there are certain manufacturing restrictions, the use of glass containers or metal closures for home canning purposes is not affected.

Likewise, the provisions of this order cover only new glass containers and closures. Used containers or closures are not limited. However, closures which are fabricated from used closures—that is, where the used closures are a production material—are regarded as new closures made of "waste" and are governed by the pertinent provisions of this order.

Definitions of the various terms used in this order appear in paragraph (x), hereof.

Restrictions on Use of Glass Containers and Closures

(Note exceptions from these restrictions in paragraphs (p) through (v)).

(a) *Prohibited acceptances and uses of glass containers and closures.* No packer shall accept delivery of or use any new glass container, or any new metal closure for packing any product not listed in a schedule of this order. This restriction insofar as it relates to glass containers shall not go into effect until March 1, 1944.

(b) *Limitations on acceptance and use of glass containers and closures.* Likewise, during any calendar year beginning with 1944, no packer shall accept delivery of or use, for packing any product which is listed in a schedule of this order, more new glass containers or more new metal closures (other than closures made from waste) than his quota for that product. However, jobbers or retailers may obtain closures and glass containers and resell them in conformity with the provisions of this order.

(c) *Closure materials.* No packer shall accept delivery of or use, for packing any product, new metal closures made of any material except those permitted for that product in the schedules of this order. However, blackplate closures (including rejects) may be used wherever tinplate or terneplate is specified, and frozen plate may be used wherever tinplate, terneplate or blackplate is specified. Likewise, closures made of waste may be used in accordance with the following paragraph:

(d) *Closures made of waste.* Closures made of waste shall not be used for packing any product not listed in the schedules attached to this order. Closures made of waste may be used in addition to specified quotas for listed products.

(e) *Home canning jars.* No packer shall pack any commodity in a home canning jar. (Note that the use of these jars for home canning is not restricted).

Quotas

(f) *General.* Closure and glass quotas are stated separately in the attached schedules, and are not necessarily the same for any given product.

Quotas are not interchangeable as between listed products. That is, a packer who packs two products, product A and product B, must compute his quota (in the manner described in the following paragraph (g)) for each product separately. He cannot allot any portion of his quota for product A to product B, even if he does not pack his full quota of product A.

Furthermore, quotas may not be transferred from one packer to another except as provided in Priorities Regulation 7A.

(g) *Computation of quotas.* In most cases where this order provides a quota for the packing of any product, it does so, in the attached schedules, by stating a percentage figure followed by a calendar year—for instance, 100% 1943. Where this appears in the "glass quota" column opposite a product, it means, unless otherwise specified, that a packer's glass container quota for that product during 1944 and subsequent calendar years is computed as follows:

(1) He takes the number of new glass containers which he used for packing that product during the named base year.

(2) He subtracts the number of new glass containers which he used for packing that product during the named base year and which were quota exempt under the provisions of any prior order of the War Production Board or under any previous amendment of this order.

(3) He multiplies the resulting figure by the applicable percentage.

Identical rules apply to the computation of closure quotas, except that unless otherwise specified they are based on the number of new metal closures used during the specified base period.

The schedules of this order provide that the quotas for some products are based on the number of new metal closures or new glass containers accepted rather than those used during the specified base period. Here again, the method of computation, described in this paragraph, applies, except that the word "accepted" should be substituted for the word "used" in steps 1 and 2 above. Only the new metal closures or the new glass containers which a packer actually accepted delivery of and those which were invoiced to him during the applicable base period may be included in his quota base in such cases. But, for the purpose of making charges against quota, a packer must include the new metal closures and the new glass containers which he actually accepts delivery of, and those which are set aside for him or held by another party for his account—whether or not they are actually invoiced to him.

In a few cases, the schedules of this order set forth special rules, not covered by the above, for the computation of quotas for particular products. Such rules must be followed, and supersede the general statements contained in this paragraph (g) to the extent that they conflict with them.

(h) *Use of quotas.* As indicated above, most quotas are based on past use. The word "use" refers only to the actual filling operation in the case of glass and the actual capping operation in the case of closures. Therefore, to the extent that a person did not do this directly during the base period, he has no quota, despite the fact that he may have supplied the actual packer with the product, closures, containers, etc. After December 31, 1943, any packing done for him must be within the quota of the person performing the actual filling and capping operation.

In the case of products whose quotas are based upon acceptances, a person is deemed to have "accepted" glass containers or closures (for the purpose of computing quotas) only to the extent that he himself actually took possession of them or had them invoiced to him. If he did not do this during the base period, he has no quota, and the rules stated in the preceding paragraph of this paragraph (h) apply.

Packers who use or accept new glass containers or metal closures for packing products for the account of others, as well as for their own account, must conduct both operations within their own quotas. Without a special appeals grant under this order, they cannot re-

gard their use or acceptances of glass containers and metal closures for the account of others as an addition to their quotas. This is true even where the other person may represent to the packer that he has a quota which he is not using himself.

On the other hand, packers are entitled to include, in their own quota bases, their use or acceptances of new glass containers or new metal closures, for the account of others during the specified base periods.

Restrictions on Sale and Delivery of Glass Containers and Closures

(i) *General restrictions.* No person shall sell or deliver any glass containers or closures which he knows, or has reason to believe, will be accepted or used in violation of any provision of this order.

(j) *Export deliveries.* During any calendar year, no person shall deliver more empty new glass containers or more new metal closures to any person outside of the 48 States of the United States and the District of Columbia than he delivered to that person during 1943.

(k) *Certificates.* No person shall sell or deliver any new glass containers or new metal closures except under a purchase order or contract validated by the delivery to such person of a purchaser's certificate, signed manually, or as provided in Priorities Regulation 7.

This certificate shall be in substantially the form attached hereto as Exhibit A in the case of sales or deliveries of all glass containers, and of all metal closures except malt and non-alcoholic beverage closures. Attention is called to the fact that this certificate, once filed by a purchaser with a supplier, covers all future deliveries from that supplier to that purchaser.

The certificate should be in substantially the form attached hereto as Exhibit B, where sales or deliveries of malt or non-alcoholic beverage closures are concerned. This certificate differs from Exhibit A in that it must be filed with each purchase order for beverage closures in order to validate the order.

(l) *Outstanding certificates.* Certificates previously filed with a supplier under any previous amendment of this order, shall remain valid insofar as sales or deliveries of glass containers are concerned. Exhibit A certificates previously filed under order M-104, shall remain valid insofar as closure (other than malt or non-alcoholic beverage), deliveries are concerned. In either of the above cases, no new certificate need be filed by any purchaser to validate his orders placed with the supplier to whom the previous certification was made.

(m) *Cases where certificates need not be filed.* No certificates shall be required for the sale or delivery of home canning jars or home canning closures, nor shall any certificates be required for the sale or delivery of any kind of glass containers or closures to: (1) Retailers, for resale empty or unused; or (2) persons purchasing closures or glass containers from retailers.

(n) *Standard certifications.* The standard certification provided for in paragraph (d) of Priorities Regulation 7, cannot be used in place of the certifications provided by this order; nor may the certifications provided by this order be waived in accordance with paragraph (f) of Priorities Regulation 7.

Restrictions Relating Solely to Manufacture of Closures

(o) *Closure material.* (1) No person shall use any zinc, aluminum, tinplate, terneplate, blackplate, frozen plate, waste-waste or waste for the manufacture of the following types of closures:

(i) Cover caps which serve as a protective or decorative closure in addition to any original sealing medium (other than paraffin) such as another closure.

(ii) Double shell or semi-double shell caps.

(iii) Two-piece closures when both pieces are made of metal, except as permitted in paragraph (o) (2).

(2) No person shall use any zinc, aluminum, tinplate, terneplate, blackplate, or wire for the manufacture of any closure of the home canning type, except as, and to the extent permitted in Schedule VII attached to this order. No closure manufactured pursuant to Schedule VII shall knowingly be sold to, or used by, any person for packing any product for sale.

(3) No person shall use any tinplate, terneplate or blackplate heavier than 90 pounds per base box for the manufacture of crown caps. This restriction does not apply to rejects, frozen plate waste-waste, or waste.

(4) No person shall use for the manufacture of closures any tinplate with a tin coating in excess of 1.25 pounds per base box; and all persons manufacturing closures shall, to the greatest extent available, use 0.50 tinplate for the manufacture of closures for which tinplate is permitted by the provisions of this order.

(5) No person shall use any wire for the manufacture of paperboard disc plug caps, having a diameter of two inches or less, for milk bottles.

Exceptions Pertaining to Both Glass Containers and Closures

(p) *Deliveries to certain agencies and persons.* Nothing in this order shall prohibit the purchase, acceptance of delivery, or use (such use to be in addition to any quota specified in the schedules attached to this order) of glass containers or closures by any of the following persons or by any person for packing any product to be delivered to or for the account of any of the following persons:

(1) Army, Navy, Marine Corps, Maritime Commission, or War Shipping Administration of the United States (including persons operating vessels for such Administration or Commission for use thereon).

(2) Any person for packing products for retail sale or distribution through post-exchanges, sales commissaries, officers' messes, servicemen's clubs, ship service stores, or outlets; provided same are located at Army or Navy Camps, are not operated for private profit and are established primarily for the use of Army or Navy enlisted personnel within Army or Navy establishments or on Army or Navy vessels.

(3) American Red Cross, United Service Organizations, or such other nonprofit Defense Recreation Committees, engaged in the operation of recreation centers in the 48 States of the United States or the District of Columbia solely for military personnel, as are certified to be within the exemption provided by this paragraph (p) (3) by the Office of Defense Health and Welfare Services, OEM.

(4) Any agency of the United States purchasing for a foreign country pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(q) *Special provisions in schedules relative to exempt deliveries to certain agencies and persons.* The schedules of this order contain certain limitations on the exception provided by the preceding paragraph (p) in the case of certain products—as, for instance, ice cream mix and malt and nonalcoholic beverages. In such cases, the provisions of the schedules are controlling and supersede paragraph (p) to the extent that they conflict therewith.

Exceptions Relative to Glass Containers Only

(r) *Small users.* The restrictions of this order which pertain to glass containers shall not apply to any person during any calendar year in which he accepts no more than a total of five hundred ($500.00) dollars worth (cost price to him) of empty new glass containers for all products.

(s) *Large size glass containers.* The restrictions of this order which pertain to glass containers shall not apply to any glass container with a capacity larger than 140 fluid ounces.

(t) *Glass containers manufactured prior to the date of this order.* The restrictions of this order shall not prevent any person's acceptance or use, for a product not listed in the schedules of this order, of any glass container manufactured before January 1, 1944, if the glass container in question was originally manufactured for the purpose of packing an unlisted product, or was originally manufactured for packing a listed product but has a capacity not permitted for that product in the attached schedules of this order. This paragraph does not permit the quota free use of glass containers for listed products regardless of when the containers were manufactured.

(u) *Quota free use of certain glass containers in inventory of packer on or before December 31, 1943.* To the extent that as of January 1, 1944, a packer had in his possession, empty glass containers which he was permitted to accept under paragraphs (b) (c) and (d) of order L-103-b as amended November 1, 1943, (excluding containers which he was permitted to accept under paragraph (e) of that order), he may use them during 1944 for packing any listed product in addition to his quota for that product. Nothing in this paragraph shall permit the quota free use of glass containers "borrowed" against anticipated 1944 usage, in accordance with paragraph (e) of this order as amended November 1, 1943.

Exceptions Pertaining to Closures Only

(v) *Small users.* The restrictions of this order which pertain to closures shall not apply to any person during any calendar year in which he accepts no more than five thousand new metal closures for all products.

Prior Appeals

(w) *Appeals granted prior to December 31, 1943 under Order M-104 and Order L-103-b.* All appeals granted prior to December 31, 1943 under orders L-103-b and M-104 are cancelled and shall be ineffective on and after January 1, 1944. Therefore, after that date, no person shall accept delivery of or use or shall manufacture, sell or deliver any new glass container or any new metal closure except in accordance with the provisions of this order—unless he receives a new grant on appeal after January 1, 1944.

SCHEDULES—GENERAL EXPLANATION

Schedules I through VI list the only products which may be packed in new glass containers or with new metal closures. Schedule VII relates to the manufacture of home canning closures.

The data set forth in the two "quota" columns, opposite each product, indicate the number of new glass containers and new metal closures (determined in accordance with the general rules set forth in paragraph (g) of Order L–103–b), which may be used for packing that product. However, any special quota provisions which these schedules make applicable to any product, are controlling to the extent that they conflict with paragraph (g).

The "X" mark which appears opposite each product in one of the columns headed "closure material" indicates that, except as listed hereafter, only closures made of the specified material may be used to pack that product. The general exceptions from this rule are:

(i) Closures made of blackplate (including rejects) may be used, within quotas, wherever tinplate or terneplate is specified.

(ii) Closures made of frozen plate may be used, within quota, wherever either tinplate, terneplate or blackplate is specified.

(iii) Closures made of waste may be used in addition to specified quotas for listed products.

After March 1, 1944 all special provisions of these schedules relating to closure materials for specific products must be followed, and control to the extent that they conflict with the above.

All size specifications for glass containers set forth in these schedules must be followed in addition to the provisions of Order L–103 and its schedules.

Attention is called to paragraphs (p) through (v) of Order L–103–b which establish limited exceptions to the provisions of this order. Here again, any special provisions which these schedules contain relative to quota exemptions—as in the case of ice cream mix and certain beverages—must be observed.

SCHEDULE I—FOODS

No product packed in a can shall be repacked for sale in a glass container by the same or a different person, in the same or a different form, except as follows (or as otherwise specifically permitted in this schedule):

(i) When required for the packing of other products, pineapple may be repacked from No. 10 cans. Grape juice, grape pulp, citrus peel and pulp may be repacked from reusable cans, 5-gallons or larger. Apricots and peaches, solid pie pack, may be repacked from No. 10 cans or larger. No. 10 cans cut under this provision must be properly cleaned and returned to the nearest detinning plant.

(ii) Tomato paste, tomato pulp or puree, and tomato sauce may be repacked from No. 10, or from 5-gallon or larger reusable cans when required for packing other products, or for repacking in different form (other than in the form of tomato paste or tomato pulp or puree), but none may be repacked in the same form. No. 10 cans cut under this provision must be properly cleaned and returned to the nearest detinning plant.

MALT BEVERAGES

Product: Malt beverages, including only beer, ale, porter, near beer and mixtures thereof.

Glass Containers

(a) *Glass container quota.* During the period between January 1, 1944 and June 30, 1944, a packer's quota of glass containers for malt beverages shall be the same as it was for the period between July 1, 1943 and December 31, 1943. Even though he does not compute his quota in accordance with paragraph (g), he does make charges against his quota in accordance with that paragraph.

(b) *Exceptions from glass quota provisions.* In addition to his quota of glass containers for malt beverages, any packer may accept delivery of the following portion of the number of new or used glass containers used, or actually to be used, during the then current calendar year for delivering malt beverages to or for any of the persons listed under paragraph (p) of this order:

(1) *Export shipment.* The full amount of glass containers for delivering malt beverages to or for any such person for shipment to points outside the continental United States.

2. *Domestic consumption.* 8% of the full amount of glass containers for delivering malt beverages to or for any such person for use or distribution within the continental United States.

Closures

(c) *Closure quota (See Note 3).* 115% of the number of new metal closures used for malt beverages during 1943. (Quota exempt closures may not be included in base.)

(d) *Closure material.* (See Note 1). Rejects, electrolytic waste-waste and frozen blackplate. Hot dipped waste-waste may be used only to make malt beverage closures which are to be exported unused.

No closures made of waste may be used in addition to quota, pursuant to paragraph (d) of Order L-103-b, except as follows:

(1) Closures made of used cans.

PART 3291—CONSUMERS DURABLE GOODS

[Limitation Order L-323, as Amended Jan. 27, 1944]

DISTRIBUTION OF IMPORTED WATCHES

Section 3291.206 *Limitation Order L-323* is hereby amended to read as follows:

§ 3291.206 *Limitation Order L-323*—(a) *Imported watches frozen.* No importer shall sell, transfer or deliver any watch or any watch movement, either in a case or out of it, or any wrist chronograph or stop watch, which has been released from customs after January 1st, 1943, unless he receives specific permission from the War Production Board or unless the movement is one of those excluded by paragraph (b) below.

(b) *Certain movements not covered.* This order does not apply to the following movements or watches containing them:

(1) Pin lever.
(2) Cylinder.
(3) Roskopf.
(4) Lever type smaller than 6¾ Ligne.

(c) *How to get permission.* An importer who wants to get permission for any transfer of a watch, a watch movement, a wrist chronograph, or a stop watch, shall file Form 3524 with the War Production Board, Consumers Durable Goods. Division, Washington 25, D. C., Ref.: L-323, according to the instructions accompanying that Form.

(d) *How permission is granted.* The War Production Board will acknowledge in writing each application. Within 60 days of the date of the acknowledgment, the War Production Board will instruct each applicant what distribution may be made, If on the 60th day from date of acknowledgment no instructions have been received by the applicant, he may then assume that his application has been granted, and no further permission is required.

(e) *What is meant by "importer."* For the purposes of this order an "importer" means any person who has a symbol or an identifying mark recorded with the Bureau of Customs, U. S. Treasury Department, for the purpose of importing watches or watch movements, or any other person who in the course of his business, either directly or through an agent, brings watches or watch movements through customs into the continental United States.

(f) *Security transactions exempted.* The prohibitions in paragraph (a) do not apply to transfer of title in a watch or watch movement in order to secure an indebtedness but this does not permit the transfer of physical possession for such purposes.

(g) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(h) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(i) *Communications.* All reports required to be filed hereunder, and all communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Consumers Durable Goods Division, Washington 25, D. C., Ref: L-323.

PART 3293—CHEMICALS

[Conservation Order M-367]

GLUE

The fulfillment of requirements for the defense of the United States has created a shortage of glue for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3293.586 *Conservation Order M-367*—(a) *Definitions.* For the purposes of this order.

(1) "Hide glue" means glue known commercially as hide glue, including the types of glue known as coney and chrome glue, and also technical gelatin of the types commercially known as clarified hide glue.

(2) "Extracted bone glue" means glue made from dry bones and known commercially as extracted bone glue.

(3) "Green bone glue" means glue of the type known commercially as green bone glue.

(4) Except where the context otherwise indicates, "glue" means hide glue, extracted bone glue and green bone glue.

(5) "To acquire" means to accept delivery of glue from another person even if the glue delivered has been made for the person accepting it pursuant to a toll agreement from materials furnished and owned by the person accepting delivery. It also means to use glue to make adhesives or to use glue in any other type of manufacture if the glue has been made by the concern using it.

(6) "Jobber" means a person who acquires glue for resale to others in the form in which it is acquired by him.

(b) *Restrictions on acquisition of hide glue and extracted bone glue.* (1) Unless specifically authorized in writing by the War Production Board, no manufacturer shall acquire a greater aggregate amount of hide glue and extracted bone glue in any calendar quarter beginning with the first calendar quarter of 1944 than his quarterly quota. If a manufacturer intends to use the hide glue or extracted bone glue in one type of business or in more than one type carrying the same percentage figure in paragraph (b) (2), his quarterly quota is ¼ of the aggregate amount of hide glue and extracted bone glue acquired by him during the 12 month base period beginning July 1, 1942 and ending June 30, 1943, multiplied by the percentage figure appearing in paragraph (b) (2) opposite the use or uses to which the glues are to be put. If a manufacturer intends to use the glue in more than one type of business, and they do not all carry the same percentage figure in paragraph (b) (2), then his quarterly quota is ¼ of the sum of the amounts determined by multiplying the amount of hide glue and extracted bone glue acquired by him during the 12 month base period for each of the purposes for which he intends to use glue, by the percentage figure appearing in paragraph (b) (2) opposite the particular use. When hide glue or extracted bone glue is acquired for more than one purpose, it may be used for these purposes in whatever proportion the manufacturer wishes, regardless of the ratio between his acquisitions of glue for the same purposes in the base period.

(2) The percentage figures to be used in estimating the aggregate amount of hide glue and extracted bone glue which may be acquired by a manufacturer for different purposes without the specific authorization of the War Production Board are as follows:

	Percent
Manufacture of abrasives	100
Manufacture of adhesives	70
Book binding	70
Manufacture of containers of wood, paper and fiber	70
Manufacture of cork products (except gaskets)	70
Manufacture of gaskets	100
Manufacture of gummed paper and tape	80
Manufacture of matches	80
Manufacture of paper and paper products (except gummed paper and tape, and paper containers)	60
Manufacture of printer rollers	80
Manufacture of textiles	75
Woodworking (except wooden containers)	60
Other manufacturing uses	50

(3) Unless specifically authorized in writing by the War Production Board, no jobber shall acquire a greater aggregate amount of hide glue and extracted bone glue in any calendar quarter beginning with the first calendar quarter of 1944 than 70% of ¼ of the aggregate amount of such glues acquired by him during the 12 month period beginning July 1, 1942 and ending June 30, 1943.

(4) Unless specifically authorized in writing by the War Production Board, no person purchasing glue for export (except a foreign country under Lease-Lend) shall acquire a greater aggregate amount of hide glue and extracted bone glue in any calendar quarter beginning with the first calendar quarter of 1944 than 50% of ¼ of the aggregate amount of such glues acquired by him for export during the 12 month period beginning July 1, 1942 and ending June 30, 1943.

(5) Unless specifically authorized in writing by the War Production Board, no person shall acquire more than 50% of his quarterly quota of hide glue and extracted bone glue in any one of the three months in which the quota applies.

(c) *Restrictions on acquisition of green bone glue.* (1) Unless specifically authorized in writing by the War Production Board, no person (including a jobber or purchaser for export) shall acquire more green bone glue in any calendar quarter beginning with the first calendar quarter of 1944 than 100% of ¼ of the amount of green bone glue acquired by him during the 12 month period beginning July 1, 1942 and ending June 30, 1943.

(2) Furthermore, unless specifically authorized in writing by the War Production Board, no person shall acquire more than 50% of his quarterly quota of green bone glue in any one of the three months to which the quota applies.

(d) *Exemptions.* The restrictions on the acquisition of glue stated in paragraph (b) and (c), do not apply (1) to the acquisition of glue by the Army and Navy of the United States, U. S. Maritime Commission or War Shipping Administration; (2) to the acquisition of glue by any foreign country pursuant to the Act of March 11, 1941—"An Act to Promote the Defense of the United States". (Lease-Lend Act); or (3) to the acquisition of glue by any person if he acquires not more than 1,200 lbs. in any calendar quarter beginning with the first calendar quarter of 1944.

(e) *Restrictions on delivery of glue.* No person shall make delivery of glue to any other if he knows or has reason to believe such person is acquiring any or all of the glue in violation of the restrictions of this order.

(f) *Inventory restrictions.* Unless specifically authorized in writing by the War Production Board, no person shall accept delivery of glue, if the inventory of glue of the person accepting delivery is, or will, by virtue of such acceptance become, in excess of a 45 consecutive calendar days' inventory on the basis of his current method and rate of operation. Application for specific authorizations under this paragraph shall be made by letter setting forth the reason why the applicant needs to exceed the 45-day inventory limitation.

(g) *Application for specific authorization to acquire glue in excess of the exemption or quota.* Each person seeking specific authorization to acquire glue in any quarter beginning with the first quarter of 1944 in excess of 1,200 pounds or the sum of his quotas (whichever amount is larger) shall file application on Form WPB–2945 (formerly PD–600) in the manner set forth in the general instructions appearing on that form, subject to the special instructions appearing in Appendix A to this order. If there is any inconsistency between the general and specific instructions, the specific instructions must be followed. Applications for the first quarter of 1944 shall be made as soon as possible and applications for each subsequent quarter on or before the 20th day of the last month of the preceding quarter. The application provisions of this order have been approved by the Bureau of the Budget under the Federal Reports Act of 1942.

(h) *Miscellaneous provisions*—(1) *Applicability of regulations.* This order and all transactions affected hereby are subject to all applicable provisions of the regulations of the War Production Board as amended from time to time.

(2) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priorities control and may be deprived of priorities assistance.

(3) *Communications to War Production Board.* All applications required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Chemicals Division, Washington 25, D. C.

Issued this 27th day of January 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 1381—SOFTWOOD LUMBER

[RMPR 26,[1] incl. Admt. 5]

DOUGLAS FIR AND OTHER WEST COAST LUMBER

Sections 16 (d), 23, 25 are amended, and section 12 (d) and Article VI, Table 6 are added by Amendment 5, effective February 1, 1944, so that Revised Maximum Price Regulation 26 shall read as follows:

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328. A statement of the considerations involved in the issuance of this regulation, issued simultaneously herewith, has been filed with the Division of the Federal Register.[2]

ARTICLE VI—PRICE TABLES FOR EXPORT—"N" LIST

ARTICLE VII—TABLES OF ESTIMATED WEIGHTS

ARTICLE I—SCOPE OF THE REGULATION

SECTION 1. *Prices higher than ceiling prohibited.* (a) On and after June 9, 1943, regardless of any contract or other obligation, no person shall sell or deliver, and no person shall buy or receive in the course of business, any Douglas fir or other West Coast lumber for direct-mill shipment at prices higher than the maximum prices fixed by this regulation, and no person shall agree, offer, or attempt to do any of these things.

(b) Prices lower than the maximum prices may, of course, be charged and paid.

SEC. 2. *What products are covered.* (a) This regulation covers all Douglas fir (Pseudotsuga taxifolia), West Coast hemlock (Tsuga heterophylla and Tsuga mertensiana) and all species of true fir (Abies) lumber produced in those parts of Oregon, Washington, and Canada lying west of the crest of the Cascade Mountains, and in California and Alaska. Any such lumber produced in these areas is covered, regardless of the kind of mill or plant in which it is produced.

The regulation applies whether the particular item is specifically priced in the price tables or not (except switch ties and cross ties, which are covered in Maximum Price Regulation 284[3]—Western Primary Forest Products).

(b) If a mill is located in Oregon, Washington, or Canada near the crest of the Cascade Mountains, or in California, and has customarily graded and sold its lumber under the Western Pine Association Grading Rules, it may apply to the nearest office of the Office of Price Administration for special permission to use the maximum prices established in Maximum Price Regulation No. 94,[4] instead of prices established in Maximum Price Regulation No. 26. Such an application may be made by letter, and should be supported by evidence of the mill's actual practices in the past.

SEC. 3. *What transactions are covered*—(a) *Direct-mill shipments.* This ceiling applies to all shipments originating at a mill, no matter who the seller is, and no matter whether he usually is known as a mill, wholesaler, retailer or anything else. It does not apply to sales out of distribution yard stock. (The prices for yard sales may be found either in Maximum Price Regulation No. 215,[5] or in the General Maximum Price Regulation,[6] depending on the nature of the sale and the purchaser.) A shipment is regarded as originating at a mill if the lumber reaches the purchaser without ever becoming an integral part of the stock of a distribution yard. A sale is considered a sale out of distribution yard stock only if the lumber was a part of regular yard stock at the time the sale was made. For example, if a retail yard takes an order for a defense housing project, and then brings the lumber from a mill, puts it in his yard, and delivers it as needed, the sale is subject to this regulation.

(b) *How to tell a mill from a distribution yard.* The term "mill", as used here, covers what are known in the trade as sawmills, planing mills and concentration yards. Three types of establishment are described below: the first, (1), a typical sawmill or planing mill; the second, (2), a typical concentration yard; and the third, (3), a typical distribution yard. An establishment which resembles (1) or (2) more than it does (3) is considered a mill; and one which resembles (3) more than it does (1) or (2) is considered a distribution yard:

(1) "A typical sawmill or planing mill" is an establishment which is chiefly engaged in manufacturing lumber from logs or rough lumber by sawing or planing; which is located in or near a lumber producing area; which makes and sells chiefly Douglas fir and associated species of lumber;

(2) "A typical concentration yard" is an establishment which concentrates and prepares lumber for commercial shipment, which keeps in stock mostly Douglas fir and associated species of lumber, which has its lumber brought in chiefly in rough green form by truck from small local sawmills and sells chiefly for rail shipment, and which has been located at its particular site to be near the lumber producing area;

(3) "A typical distribution yard" is a wholesale or retail lumber yard which gets lumber from mills or other yards; unloads, sorts, stores, and resells or redistributes it; which regularly maintains a varied stock of lumber from different regions; which gets its lumber mostly by rail and sells mostly for truck shipment; which is equipped to make quick deliveries of many different items of lumber; and which has been located at its particular site in order to be near a lumber consuming area.

(c) *New yards.* In order to prevent violation of this regulation by unnecessary routing through yards, the Office of Price Administration will not recognize distribution yards set up after January 5, 1943, unless the new yard writes to the Office of Price Administration, Washington, D. C., and proves that it satisfies the requirements of the definition and that the purpose is not to get around this regulation by means of unnecessary yard business. Until approval is received, the new yard cannot consider itself a distribution yard for the purpose either of this regulation or of any other regulation issued by the Office of Price Administration.

(d) *No quantity limits.* There are no quantity limits on the transactions covered by this regulation. All direct-mill sales, large or small, are covered.

(e) "CPA yards," as defined in Maximum Price Regulation No. 215, are considered distribution yards, regardless of the above requirements.

SEC. 4. *What persons are covered.* Any person who makes the kind of sale or purchase described above, for himself or others, is subject to this regulation. The term "person" includes an individual, corporation, partnership, association or any other organized group, their legal successors and representatives, the United States or any government or any of their political subdivisions or any agency of any of the foregoing.

ARTICLE II—MAXIMUM PRICES AND TERMS OF SALE

SEC. 5. *Basic prices and cash discount*—(a) *Basic prices.* The maximum prices f. o. b. mill are set forth in Article V—Price Tables.

(b) *Cash discount.* If cash is paid, the maximum price must be reduced by the seller's August 1941 cash discount. For example, if the August 1941 discount for cash was 2%, and the maximum price without discount according to this regulation is $30.00, the maximum price when cash is paid is $29.40. In any case, on specific written allocations issued by the Office of the Chief of Engineers, War Department, the terms 30 days net may be used regardless of former practices.

SEC. 6. *Direct-mill retail sales.* An addition of $3.50 per thousand board feet may be made on a sale of less than 18,000 ft. BM (or less than carload if by rail), to any buyer who does not purchase for resale, where the shipment originates at a mill and the seller:

(a) Sees that the lumber is delivered to the job site at such time and in such manner as the buyer specifies;

(b) Gives the buyer the privilege of exchanging the lumber and returning unused material; and

(c) Agrees to make good any shortage promptly from stocks kept on hand for this purpose.

[3] Superseded by Revised Maximum Price Regulation No. 284, 8 F.R. 6544, 10560, 15906.

[4] 7 F.R. 10848; 8 F.R. 859, 1138, 4118, 7352, 8009, 8756, 11040, 12136, 12296, 12878.

[5] Superseded by Second Revised Maximum Price Regulation No. 215, 8 F.R. 14145.

[6] 8 F.R. 3096, 3849, 4347, 4486, 4724, 4978, 4848, 6047, 6962, 8511, 9025, 9991, 11955, 13724.

The size of the sale is determined by the total quantity involved in the transaction without regard to whether it is broken up into smaller orders or deliveries.

SEC. 7. *Sales on delivered basis*—(a) *Rail charges.* (1) Only two methods of selling are recognized by this regulation. Any other method is prohibited, as a device to evade the ceiling by manipulation of freight.

The two permitted methods are: on a delivered basis using the estimated weights in Article VII, or on an f. o. b. mill basis with actual freight (figured, of course, on actual weights) to be paid by the purchaser.

The two methods may not be combined in a single transaction; that is, a seller may not sell on a basis which gives him the benefit of favorable estimated weights but requires the use of actual weights on items where estimated weights would be unfavorable to him. Note that sales described as "ceiling delivered", or as f. o. b. mill with freight paid or included to a given destination, are to be treated as sales on a delivered basis. In such cases, the given estimated weights must be used. However, sales f. o. b. mill with seller to pay the freight to a stated destination and include it in his invoice to the buyer is a sale on an f. o. b. mill basis, and settlement on the basis of the actual weights must be made.

(2) The estimated green weights may be used only when green lumber is actually specified and shipped.

(3) The transportation charge, when estimated weights are used, must be evened out to the nearest quarter-dollar per 1000 feet board measure (nearest 5 cents per 1000 pieces of pickets).

(b) *Common or contract carrier (other than rail).* Where transportation is by common or contract carrier (other than rail) the only rule is that actual cost of transportation may be added to the f. o. b. mill ceiling.

(c) *Private truck.* When shipment is by truck owned or controlled by the seller, the following amounts may be added for transportation: For distances up to and including 10 miles, $1.50 per M'; over 10 and up to and including 20 miles, $2.00 per M'; and over 20 and up to and including 30 miles, $2.50 per M'. Where the distance is greater than 30 miles, the seller may charge the amount of the railroad charge at the carload rate for the most similar haul or $3.00 per M', whichever is greater. Distance, as used in this paragraph, means the distance from the mill to the point of destination as measured by the speedometer. No addition may be made for the return trip.

(d) *Trucking to rail shipping point.* When a truck haul precedes rail shipment, as when a mill located away from a railhead hauls lumber by truck to the railroad, no addition may be made for the truck haul. However, in the following cases a mill may apply for special permission to make an addition:

[Paragraph (d) as amended by Am. 2, 8 F.R. 11508, effective 8-24-43]

(1) Where the mill was located away from rail connections because it specialized in water-borne lumber, and where shortage of shipping has forced it to operate by rail;

[Subparagraph (2) revoked and former (3) redesignated (2) by Am. 2]

(2) Where a mill's rail connection has been abandoned since September 5, 1941, and it has no comparable rail shipping point.

The application should be made by letter to the Lumber Branch of the Office of Price Administration, Washington, D. C., and may be acted upon by letter or telegram. The addition may not be made on quotations or sales until permission has been received.

(e) *Truck delivery after rail haul.* When truck delivery to yard or job site follows a rail haul, and is specified in the order, the actual cost of truck delivery may be added. This may include the actual cost of handling and reloading involved in transfer from rail cars to trucks.

(f) *All-truck haul.* When an all-truck haul ends in delivery to the job site, no special addition may be made above the charges provided in paragraphs (b) and (c) of this section.

(g) *Portland rate on delivered sales to California.* Regardless of other provisions of this section, on delivered sales to purchasers in California, if shipment originates at a mill in California, or at a mill in Oregon from which the railroad freight rate to the California destination is less than the rate from Portland, Oregon to the same destination, the addition for transportation may be computed by multiplying the appropriate estimated weight as shown in Article VII by the applicable freight rate from Portland to the California destination. This provision does not apply to f. o. b. mill sales nor to direct-mill retail sales.

[Paragraph (g) as amended by Am. 4, 8 F.R. 16249, effective 12-6-43]

(h) *Government bill of lading.* Where shipment is made on government bill of lading, the maximum price payable to the shipper may be computed by determining what would be the maximum delivered price on the basis of estimated weights and commercial rates and subtracting therefrom the commercial rate times the actual weights.

[Paragraph (h) added by Am. 4, 8 F.R. 16249, effective 12-6-43]

SEC. 8. *Mixed car or mixed truck shipments.* (a) $2.00 additional per MBM may be charged for mixed car or mixed truck shipments. No addition may be made for mixed cargo shipment without special authorization under section 12.

(b) A mixed car shipment consists of four or more items as defined in paragraph (c) below, of at least 1000 board feet each. A mixed truck shipment consists of four or more items of at least 250 board feet each.

(c) For the purpose of paragraph (b), the following classifications of lumber of any different species constitute separate items:

(1) Boards, shiplap or strips.
(2) Dimension.
(3) Planks and small timbers, not exceeding 4" in thickness.
(4) Large timbers, exceeding 4" in thickness.
(5) Flooring.
(6) Siding.
(7) Ceiling or partition.
(8) Finish.
(9) Rough clears.
(10) Stepping.
(11) Mouldings.
(12) Silo stock.
(13) Gutter.
(14) Cribbing.
(15) Lath.
(16) Casing and base.

SEC. 9. *Sales for export.* Maximum prices F. A. S. vessel for lumber to be exported when graded in accordance with "N" Export Grading Rules adopted by the West Coast Lumbermen's Association and British Columbia Lumber and Shingle Manufacturers, Ltd., 1929, are set forth in Article VI of this regulation. Otherwise, the maximum prices for export sales are governed by Second Revised Maximum Export Price Regulation.[1]

[Sec. 9 as amended by Am. 2, 8 F.R. 11508, effective 8-24-43]

SEC. 10. *Lumber produced in Canada.* The maximum prices for lumber produced in Canada west of the crest of the Cascade Mountains and sold in the United States shall be the maximum prices f.o.b. mill set forth in Article V plus additions for transportation permitted by section 7: *Provided, however,* That the amount of such addition may not be greater than if the shipment had originated at Seattle, Washington.

SEC. 11. *Maximum prices for Alaska lumber.* (a) The maximum prices f.o.b. mill for shipments originating in Alaska and delivered to points outside the continental United States shall be the maximum f.o.b. mill prices set forth in Article V plus an amount equal to freight under the Maritime Commission's published freight rate from Seattle, Washington, to the mill's shipping point, including surcharges, War Risk insurance, and wharfage and handling charges under the published Seattle Wharfage and Handling rate for comparable lumber.

(b) The maximum delivered prices for shipments originating in Alaska shall be the maximum price arrived at according to paragraph (a) plus transportation charges permitted by section 7.

SEC. 12. *Grades, services, or extras not listed.* (a) If a seller wishes to sell a grade which is not specifically priced in the price tables, or wishes to make an addition for special workings, specifications, services, or other extras for which additions are not specifically permitted, he must apply to the Lumber Branch, Office of Price Administration, Washington, D. C., for a maximum price. He must provide the following information:

(1) The requested price;

(2) A complete description of the item to be priced;

(3) The price differential between it and the most comparable item in the price tables, between October 1, 1941 and June 1, 1942, from the seller's own records, or if that is impossible, from the experience of the trade. If no established price differential existed, a detailed analysis of comparative value should be furnished.

[1] 8 F.R. 4132, 5987, 7662, 9998, 15193.

(b) As soon as the request has been filed, quotations and deliveries may be made at the requested price, but the final payment may not be made until the price has been approved. Action on the request may be by letter or telegram.

(c) In all cases where special prices have been approved by the Lumber Branch of the Office of Price Administration under § 1381.62, paragraph (g) of the earlier regulation, Maximum Price Regulation 26, these special prices shall no longer apply if specific prices for the items are established by this regulation; but if no specific prices are established in the price tables, the price approved under the earlier regulation shall continue in effect.

(d) On any sale involving a "non-listed" price or addition contemplated by paragraph (a) of this section, if the seller, for any reason, shall have failed to apply for approval of a maximum price under paragraph (a), the maximum price for the item sold shall be $15.00 per thousand board feet, which maximum price shall include all allowances or additions for grade, size, condition, special workings, specifications or other extras.

[Paragraph (d) added by Am. 5, effective 2-1-44]

ARTICLE III—SPECIFIC DUTIES AND PROHIBITED PRACTICES

SEC. 13. *What the invoice must contain*—(a) *F. o. b. mill price.* All invoices must contain a sufficiently complete description of the lumber to show whether the price is proper or not. Any working, specification, or extra which affects the maximum f. o. b. mill prices must be mentioned in the description. The amount added for these does not have to be separately shown.

(b) *Charges for transportation.* In all delivered sales, the invoice must show the:

(1) Point of origin of shipment;
(2) Destination;
(3) Rail rate, if estimated weights are used; otherwise the actual amount added for transportation;
(4) The words "Direct-mill shipment".

(c) *Delivery and related charges.* Any separate charge which the seller is permitted to make for truck delivery after rail haul, or for trucking to railhead, must be separately shown on the invoice.

(d) *Direct-mill retail sale.* If the "direct-mill retail sale" mark-up is permissible and is added, this must be separately indicated in the invoice.

SEC. 14. *Averaging out*—(a) *Different grades, classes or sizes.* Different grades, classes or sizes of lumber may be sold and invoiced at an average price if all of the following conditions are observed:

(1) The footage of each item must be shown separately, and a piece tally must be furnished for each shipment.

(2) The average price for the lumber actually shipped must not be higher than it would have been if all the individual grades, classes, and sizes shipped had been sold separately at the individual ceiling price.

(3) If the order is shipped in more than a single carload, truckload, or boat shipment the following invoicing and charging practices must also be followed:

(i) The invoice must show that it is part of a larger order and identify the order. It must also show the individual ceiling prices for the various items of lumber actually contained in each shipment, and the average selling price agreed upon.

(ii) The charges which may be made and collected on account for each shipment must not exceed the average price agreed upon or the total of the ceiling prices for the items in the particular shipment, whichever is the lower. Thus, if an average price was quoted on widths from 4" to 12", and if a car of all 4" was shipped, only the 4" price can be charged and collected on that car. But if a car of all 12" widths was shipped, only the average price quoted could be charged on that car.

(iii) Upon completion of the order the seller must render a final invoice showing the quantity of each shipment or delivery, the freight charge for each if sold on a delivered basis, the amount received on account, the total amount due on the order at the agreed average prices, and a reconciliation of the total amount so computed with the maximum prices permitted by this regulation. Final payment and all necessary adjustments between buyer and seller are to be made upon the final reconciliation.

(b) *Different freight rates.* When a single order, for which a single flat delivered price was quoted and accepted, is shipped from two or more mills to a single destination on varying freight rates, the seller may average-out the transportation charges. For example, if a wholesaler bids $33.00 per MBM on a single order of a hundred thousand feet of lumber, the ceiling price being $30.00 per MBM and the estimated freight $3.00, he can ship half of it on a rate resulting in a $2.00 freight charge and half on a rate resulting in a $4.00 freight charge.

(1) Where this practice is adopted, the seller must observe all of the following conditions:

(i) Each invoice must state that the particular shipment is part of a larger order and identify the order. It must also show the individual rates for each shipment or delivery.

(ii) The transportation charges which may be made and collected for each shipment or delivery, on account, must not exceed the average transportation charge figured on the entire order or the actual transportation charge for the particular shipment based upon the permitted estimated weights, whichever is the lower.

(iii) Upon completion of the order the seller must render a final invoice showing the individual f.o.b. mill prices separately, the amount shipped from each mill, the freight charge for each shipment, and a reconciliation of the total amount so computed with the agreed delivered selling prices and also with the maximum prices permitted by this regulation. In the event that the sale was made at an average price for different grades, classes or sizes of lumber as well as an averaging-out of transportation charges, the provisions of (a) above shall also be observed. Final payment and all necessary adjustments between buyer and seller are to be made upon the final reconciliation.

SEC. 15. *What records must be kept.* All sellers and all buyers who, in any one calendar month, sell or buy 20,000 board feet or more of Douglas fir or other West Coast lumber, must keep records which will contain a complete description of the lumber involved, the name and address of the other party to the transaction, the date of the sale, and the price. Such records must be retained for two years, for inspection by the Office of Price Administration.

SEC. 16. *Prohibited practices*—(a) *General.* Any practice which is a device to get the effect of a higher-than-ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright overceiling price. This applies to changes in credit practices and cash discounts and to devices making use of commissions, services, transportation arrangements, premiums, special privileges, tying-agreements, trade understandings and the like.

(b) *Specific practices.* The following are some of the specific practices prohibited:

(1) Getting the effect of a higher price by changing credit practices from what they were in October 1941. This includes decreasing credit periods or making greater charges for extension of credit.

[Subparagraph (1) as amended by Am. 2, 8 F.R. 11508, 12315, effective 8-24-43]

(2) Refusing, without good reason, to ship except in specified or restricted random lengths, or in mixed cars, or under other circumstances which bring the seller an extra return.

(3) Selling as specified lengths or widths, a specific lot or shipment of lumber which is substantially equivalent to random lengths or widths, or reselling intact as specified lengths or widths a specific lot or shipment bought by the seller as standard or random lengths or widths, unless specifically permitted in the price tables. This prohibition shall not apply to shipments or deliveries which have been sorted out as to widths and lengths and then resold.

(4) Grading as a special grade lumber which can be graded as a standard grade; or wrongly or falsely grading or invoicing lumber.

(5) Making additions for special specifications, services, or other extras which are not specifically permitted.

(6) Refusing to sell on an f. o. b. mill basis, and insisting on selling on a delivered basis.

(7) Failing to invoice properly and in accordance with the requirements of this regulation.

(8) Unnecessarily routing lumber through a distribution yard.

(9) Quoting a gross price above the maximum price, even if accompanied by a discount the effect of which is to bring the net price below the maximum.

(10) Making additions for kiln-drying, anti-stain treatment or other services, treatments, or specifications unless they are expressly ordered by the buyer.

(11) Getting a higher price by charging the buyer for ripping or resawing, or charging on the basis of an original size larger than the item actually delivered (for example, charging the price of 4 x 4 ripped to 2 x 4 on a sale and delivery of 2 x 4's) except where the items ordered and delivered are nonstandard sizes not specifically priced in the tables. This prohibition has no application where the buyer specifies the larger size to be ripped or resawn into items of smaller size and the resulting items are priced higher in the tables than the original larger size; for example, the buyer may order 1 x 4 x 12' #2 Common, priced at $25.00 per MBM ripped to 1 x 2 x 12'. By buying the larger size ripped the price to the buyer is lower ($26.00) than it would have been had he ordered the 1 x 2 as such ($29.00). In this example the maximum price is $26.00.

(12) Making the buyer take something he does not want in order to get what he does want; for example, making a buyer who orders No. 2 Common take all the upper grades that develop.

(13) Breaking up an order or apportioning deliveries in order to get the $3.50 direct-mill retail sale addition.

(c) *Adding commission to ceiling prohibited.* It is unlawful for any person to charge, receive or pay a commission for the service of procuring (including buying, selling, or locating lumber, or for any related service such as "expediting") which does not involve actual physical handling of lumber, if the commission plus the purchase price results in a total payment by the buyer of lumber which is higher than the maximum price of the lumber. For purposes of this regulation, a commission is any compensation, however designated, which is paid for the procurement of lumber. This prohibition has no application to the case of a bona fide employer-employee relationship where the employee serves only one employer, insofar as lumber procurement is concerned, and where the compensation paid by the employer is a fixed salary and is not based directly or indirectly on the quantity, price or value of the lumber in connection with which the service is rendered.

[Paragraph (c) as amended by Supplementary Order No. 77, 8 F.R. 14310, effective 10-26-43]

(d) *Combination grades.* Lumber sold on combination grades may not be sold above the maximum price for the lowest priced grade actually named in the combination. For example, the maximum price for lumber sold as No. 2 Common and better is the maximum price fixed for No. 2 Common lumber. It is permissible to quote with specified higher grades as developed, but when the lumber is shipped, the quantities falling in each grade must be tallied separately on a board foot basis, separately identified by grade (except shop grades when sold to millwork establishments), and separately invoiced at prices not in excess of ceiling prices for the respective grades.

[Paragraph (d) amended by Am. 2, 8 F.R. 11508, effective 8-24-43 and Am. 5, effective 2-1-44]

SEC. 17. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of shipment; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after shipment. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to give the authorization.

The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

[Sec. 17 as amended by Supplementary Order No. 50 and Amendment 1 thereto, 8 F.R. 10568, 14310, effective 7-27-43]

SEC. 18. *Special pricing rules.* (a) Where the buyer specifies restricted lengths or an average length and the shipment or order fails to conform, the entire shipment must be priced at the random length price (unless the agreed price is lower).

(b) Where the buyer orders a random length shipment, and the given percentages of lengths as specified in footnotes to some of the price tables are not met because there is too large a percentage of shorts, the excess shorts must be priced at the separate prices for the short lengths.

(c) Where random length shipments required to average a specified length (e. g. 12' in the Board Table) fall short of this average, the price may not exceed that of the nearest shorter even length below the average length actually shipped.

(d) Where the order fails to specify the grade required, the seller may only ship and charge for No. 2 Common, unless otherwise agreed.

(e) Where the invoice does not specify the grade shipped or delivered, the price of the lowest grade in the shipment shall apply to the whole order.

(f) Where moisture content requirements are waived by the purchaser, the maximum price for the whole order, shipment, or delivery shall be the price herein established for green lumber. Where such a sale is made on a delivered basis, the seller may only use the given estimated weights for dry lumber in computing transportation costs.

(g) None of the additions permitted in the footnotes to the tables in Articles V and VI may be added to the prices of the various items set forth in the tables unless the order expressly requires the working, grade, condition, size, or length for which the additions are permitted.

ARTICLE IV—MISCELLANEOUS

SEC. 19. *Petitions for adjustment or amendment—(a) Government contracts.* See Procedural Regulation No. 6[9] for adjustment provisions on certain government contracts or subcontracts.

[Paragraph (a) as amended by Supplementary Order 83, effective 2-1-44]

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1[9] issued by the Office of Price Administration.

(c) In treating with petitions for amendment or adjustment, consideration will not be given to log and bolt costs which are higher than the applicable maximum purchase prices for logs and bolts established in Revised Maximum Price Regulation No. 161 (West Coast Logs), or Maximum Price Regulations 313 (Prime Grade Hardwood Logs) and 348 (Logs and Bolts), or any revision or amendment of these regulations. This rule shall be followed regardless of whether the petitioner gets logs and bolts by purchasing them, logging his own standing timber, contracting for the logging of his own standing timber, or any other means. All petitions in any way based on the cost of logs or bolts must show the actual cost to the petitioner of logs and bolts received at his plant during the three months immediately prior to filing the petition, and the cost which would have been incurred by the petitioner if all of these logs and bolts had been purchased by him at ceiling prices. To figure these ceiling prices the petitioner should refer to the regulation which fixes the maximum prices for purchases and sales of the kinds of logs and bolts received at his plant.

[Paragraph (c) added by Supplementary Order No. 47, 8 F.R. 5806, effective 5-8-43]

SEC. 20. *Enforcement.* (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942, as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. Persons who make sales covered by this regulation to war procurement agencies and buyers to whom lumber has been allocated by any such agencies are, however, subject to all the liabilities imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies.

SEC. 21. *Licensing.* The provisions of Licensing Order No. 1," licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation or schedule. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

[Sec. 21 as amended by Supplementary Order No. 72, 8 F.R. 13244, effective 10-1-43]

SEC. 22. *Grades.* All grade and size terms and "paragraph" references appearing in this regulation refer to, and have the meaning given in, the Standard Grading and Dressing Rules No. 12, issued by the West Coast Lumbermen's Association, effective March 1, 1943, or, in the case of export sales from the "N" list, to the "N" Export Grading Rules adopted by the West Coast Lumbermen's Association and British Columbia Lumber and Shingle Manufacturers, Ltd., 1929.

5a. For omitting any lengths in R/L groups covering more than one length bracket, the additions permitted by footnote 4 may be made only within the bracket

from which lengths have been omitted but such additions to the 8/20' brackets may not result in a price higher than the bracket price for 22/30'.

SEC. 25. *General notes.* (Applies to Entire Article V.)

1. Additions for special provisions permitted by this § 25 may be made only when the special provisions are not included in the desired grade and are specifically requested by the buyer. When additions are made for paragraphs 300, 301, 302, 303, and 305, the mill must furnish, with a copy retained in each seller's files, an official certificate of grade by the W. C. L. A., P. L. I. This certificate must be attached to the original invoice, except on truck orders involving more than one shipment where a certificate must be furnished either upon completion of the order, or at the end of every thirty-day period during the time of shipment on such specific order. This rule applies regardless of quantity, except that an order for less than 10,000 board feet for truck shipment direct to the job may be covered by mill certificate only.

When the buyer specifies inspection by his own or any other agency (which agency must have been approved by the Portland office), the purchaser may pay the cost of inspection without adjustment of the seller's price provided the purchaser shows that he has customarily borne the cost of inspection since October 1, 1941.

2. All grades 3"—Add $6.00 per M to the price of same grade, size and seasoning.

3. Machine droppings—Up to 15% to be included at $5.00 per M less.

4. For less than 1 M Board Measure—Add set up charge of $5.00.

XIV. All prices are based on one thousand feet board measure, except for lath and pickets which are based on one thousand pieces. The board measure of dressed lumber is based upon the corresponding dimensions of rough green lumber. No lumber is sold on less than one inch count unless otherwise specifically stated.

XV. [Revoked]

[Note XV revoked by Am. 4]

XVI. For surfacing thicker and/or wider than American Lumber Standard sizes, other than ¼" off, add $2.00 per M. This addition may not be made for hit-and-miss surfacing.

[Note, XVI as amended by Am. 4]

XVII. *Grade definitions.*

1. "E" Grade. This grade covers the "droppings" from "D" which would otherwise be wasted, and covers flooring, ceiling, dropsiding, rustic, shiplap, and finish.

The grade will admit the following defects which will not seriously impair the lumber for the use intended with a trim waste not to exceed 25%.

Splits, checks and shake-----	Not serious.
Tongue and groove----------	Scant.
Skips----------	H and M.
Stain----------	White specks.
Rot----------	Small spots.
Worm holes----------	
Pitch pockets----------	Large.

Knot holes, wane and other defects—that do not prevent use as cheap flooring, sheathing, finish, etc., in 4' lengths and longer.

2. *No. 4.* This grade covers the down-fall from 1" and thicker No. 3 which would otherwise be wasted. It may be either rough or surfaced. The defects which include splits, checks, shake, skips, rot, stain, worm holes, pitch pockets, knot holes, wane or other defects which in combination will not impair the lumber for the purpose intended.

3. *Shims.* Shims are boards that are too thin to be surfaced to standard sizes. They may be of such thicknesses as will surface to 1/16", 1/12", 3/16", 5/32", or 1 1/16", H./M., or rough if full thickness. Shims are graded as No. 3 and better or according to the grading rules applying to the similar grade of standard size boards.

[Note 3 as amended by Am. 5, effective 2-1-44]

XVIII. For bundling: Add $1.00 per M to Tables 1 and 2 only.

[Note XVIII as amended by Am. 2]

XIX. For stencilling, when required by buyer, to any extent beyond grade marking and/or the simple identification of pieces or lots, add 50 cents per M.

XX. Where a footnote under one price table requires the use of a price from another table, then such other table from which the price is obtained shall govern in all respects, including applicable footnotes.

XXI. All rough lumber shall be of sufficient width and thickness to permit dressing S4S to American Lumber Standards.

[Notes XIX, XX, and XXI added by Am. 5, effective 2-1-44]

SECURITIES AND EXCHANGE COMMISSION.

[File No. 59-5]

MIDDLE WEST CORPORATION, ET AL.

ORDER SEVERING RELATIONS, ETC.

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 24th day of January, A. D. 1944.

The Commission having on March 1, 1940, by notice and order duly served, instituted proceedings under section 11 (b) (1) of the Public Utility Holding Company Act of 1935 with respect to The Middle West Corporation and its subsidiary companies, and with respect to the holding company system of each of the subsidiaries of The Middle West Corporation which is a registered holding company; answers having been filed and hearings having been held, proposed findings and briefs in support thereof having been filed and exchanged, oral argument having been heard; and the Commission having duly considered the matter, being fully advised in the premises and having this day issued its findings and opinion herein; and

1. The Commission having determined to defer decision of the issues respecting the extent to which properties of Central Illinois Public Service Company, Kentucky Utilities Company and the subsidiaries thereof, all subsidiaries of The Middle West Corporation, may be retained by The Middle West Corporation pending the conclusion of reorganization proceedings in which the interests of The Middle West Corporation in Midland United Company and its subsidiaries shall have been determined; but having determined that, notwithstanding the extent of such interests as they may appear, there may be decided herein questions relating to the application of clauses (A), (B) and (C) of section 11 (b) (1) to The Middle West Corporation on the basis of the utility properties of Central Illinois Public Service Company, Kentucky Utilities Company and its subsidiaries, South Fulton Light and Power Company, Old Dominion Power Company, Dixie Power & Light Company (the issues under the said clauses of section 11 (b) (1) being unaffected by the extent to which The Middle West Corporation may acquire direct interests in utility properties in Indiana now system); and having determined that no other utility systems or other businesses may be retained therewith;

It is ordered, On the basis of the said findings and opinion, that The Middle West Corporation shall sever its relations with all properties, operations and companies, except those of Central Illinois Public Service Company and its subsidiaries, Kentucky Utilities Company, South Fulton Light and Power Company, Old Dominion Power Company, and Dixie Power & Light Company, by disposing or causing the disposition, in any appropriate manner not in contravention of the applicable provisions of the said act and the rules and regulations promulgated thereunder, of its direct and indirect ownership and control of such other properties and operations and of its direct and indirect holdings of securities issued and properties owned, controlled or operated by such other companies, jurisdiction being reserved to enter such further order or orders respecting companies and properties not herein ordered to be divested as shall appear necessary in the circumstances in accordance with the views expressed in the findings and opinion of the Commission herein this day issued.

2. The Commission having determined that decision of the issues respecting Kentucky Utilities Company as top company of its holding company system should be deferred for consideration together with the issues relating to the retainability of properties of The Middle West Corporation;

It is ordered, That jurisdiction be reserved to enter such further order or orders respecting Kentucky Utilities Company and its subsidiaries as shall appear necessary in the circumstances in accordance with the views expressed in the said findings and opinion.

3. The Commission having determined that opportunity for further argument should be granted upon the application of section 2 (a) (29) (A) to the major electric properties of the subsidiaries of Central and South West Utilities Company; and having determined that opportunity should be granted to introduce further evidence on the gas, water, and ice businesses of the said companies notwithstanding the Rules of Practice of the Commission, but having determined that certain properties may not be retained in the system of Central and South West Utilities Company;

It is ordered, That Central and South West Utilities Company shall by appropriate action divest itself in the manner outlined above, of all direct and indirect holdings of securities and interests in Roby & Northern Railway Company, Pittsburgh County Railway Company and McAlester Canning Company, of the utility assets of Public Service Company of Oklahoma in Pine Valley, Oklahoma, those of West Texas Utilities Company in the Dalhart and Texline areas, those of Central Power and Light Company in the Big Bend, Pleasanton and Zapata areas, the properties of Compania Electrica de Ojinaga, S. A., and of the gas properties of West Texas Utilities Company; and

It is further ordered, That, notwithstanding the Rules of Practice of the Commission, any of the respondents in this proceeding may, within fifteen days of the date hereof, apply for a rehearing on the issues respecting retainability of the gas, water, and ice businesses of Public Service Company of Oklahoma, Southwestern Light & Power Company, Southwestern Gas and Electric Company, Central Power and Light Company (with the exception of such businesses as are located in the Big Bend, Pleasanton and Zapata areas), and their subsidiaries, together with the electric utility operations of those companies, and jurisdiction is hereby reserved to enter such other and further orders respecting these issues as shall be appropriate in the circumstances; and

Jurisdiction is reserved to enter such further order or orders as shall be appropriate respecting the retainability by Central and South West Utilities Company of the major electric utility properties in its system as set forth in the opinion herein. Respondents will by further order of the Commission be afforded an opportunity for further argument on the application of section 2 (a) (29) (A) to the said properties at a time and place to be set by such further order.

4. The Commission having determined that American Public Service Company may retain its interest in the main interconnected electric utility properties of West Texas Utilities Company (not including the electric utility properties of that company in the so-called Dalhart and Texline areas as more specifically described in the said findings and opinion), and in the properties of Pecos Valley Power & Light Company, having determined that no other utility systems may be retained in addition thereto, and having determined to afford further opportunity to introduce evidence respecting the sewerage business of West Vernon Sewer Company, and the ice and water businesses of West Texas Utilities Company, excepting those in Dalhart and Texline;

It is ordered, That American Public Service Company shall, by appropriate action in the manner outlined above, divest itself of the assets of West Texas Utilities Company in the Dalhart and Texline areas and all gas utility operations of the said company; and

It is further ordered, That any of the respondents in this proceeding may apply, notwithstanding the rules of practice of the Commission, within fifteen days of the date hereof, for a rehearing on the issues respecting retainability of the sewerage business of West Vernon Sewer Company, and ice and water businesses of West Texas Utilities Company (except for those in the Dalhart and Texline areas) together with the electric utility operations of that company, and jurisdiction is reserved to enter such other and further orders respecting these issues as shall be appropriate in the circumstances.

5. The Commission having determined that Arkansas-Missouri Power Corporation may retain the single integrated electric utility system comprising its present properties, with the exception of its electric utility properties in and around Piedmont, Missouri, and between Arcadia and Old Mines, Missouri, having determined that no other utility systems may be retained in addition thereto, and having determined that no non-utility properties now owned, operated or controlled by it or its subsidiary East Missouri Power Company may be retained therewith;

It is ordered, That Arkansas-Missouri Power Corporation shall, by appropriate action in the manner outlined above, limit itself to those properties, operations and holdings specifically designated herein as retainable.

The Commission desiring to afford to such of the respondents as have had designated for them a single integrated system an opportunity to indicate their preference for limitation to any other single integrated public-utility system within the control of each of them and such other utility and non-utility operations and holdings as may be properly attendant thereto;

It is ordered, That, notwithstanding the provisions of the Commission's Rules of Practice, each of such companies may, within fifteen days of the date of this order, petition for leave to indicate a desire to be limited otherwise than as ordered herein and on the basis of a single system within its control other than (but not including) the system herein designated and retainable attendant operations and holdings; and the Commission retains jurisdiction to consider the said request and to make such other and further orders as may be necessary in the premises. If appropriate action under this paragraph is not taken within the time set forth herein, this order shall become final as respects the designations of single systems made herein.

It is further ordered, On the basis of said findings and opinion, that there be added to the list of companies dismissed as respondents to this proceeding in the order of the Commission herein dated June 27, 1940, The Home Ice Company.

It is provided, with respect to the findings, opinion and order herein, in their entirety, and with respect to the entry, publication and service thereof, that they shall be without prejudice to the right of the Commission to enter such further appropriate orders from time to time as the Commission may deem necessary to secure compliance by the respondents with the provisions of the Act and the pertinent rules and regulations thereunder and to carry out the provisions of this order; and

It is further ordered, That jurisdiction is reserved to the Commission to conduct such proceedings involving any or all of the respondents herein and to make such orders as it shall deem necessary or appropriate under section 11 (b) (2) or any other provision of the Public Utility Holding Company Act of 1935.

By the Commission.

Secretary.

(2) Bone in accordance with Army specifications for frozen boneless beef not less than 80 percent of the beef set aside, reserved, and held in accordance with (b) (1) (i) hereof, and not less than 80 percent of the beef set aside, reserved, and held in accordance with (b) (1) (ii) hereof: *Provided, however,* That the Order Administrator may exempt, wholly or partially, any Class 1 slaughterer from this requirement upon a proper showing that said slaughterer (i) does not have adequate facilities for boning, or (ii) does not have, or is unable to obtain, sufficient personnel to bone said beef, or (iii) is unable to comply with this requirement for any reason which appears to the Order Administrator to warrant such exemption.

(c) *Conversion weight.* Conversion weights shall be computed in accordance with (p) of Food Distribution Order No. 75–1 (8 F.R. 11327). The Director may, upon written application, revise any conversion weight factor where it is shown that such factor is working an undue hardship in the preparation of certain products.

(d) *Credits allowed on deliveries.* Subject to the provisions of (e) hereof, any set aside meat delivered to a governmental agency, authorized purchaser, or person entitled to purchase set aside meat under the provisions of a food distribution regulation, may be credited against the requirements of (b) hereof for meat of the type and grade so delivered.

(e) *Certificates.* No set aside meat shall be delivered to any authorized purchaser, and no credit shall be allowed for any such delivery unless, within 10 days after delivery, the slaughterer obtains a certificate signed by the authorized purchaser, acknowledging receipt of the meat, and containing the following: the name and address of both parties and the date of delivery; the contract number of the contract between the authorized purchaser and the governmental agency; and a statement by the authorized purchaser that the set aside meat so delivered, or an equivalent amount thereof, will be or has been used in the fulfillment of such contract. The slaughterer shall endorse on such certificate the conversion weight of such meat, together with a description permitting conversion in accordance with (p) of Food Distribution Order No. 75–1, *supra.* The slaughterer and the authorized purchaser shall each retain an original of such certificate for delivery to the Director upon request. All statements contained in or accompanying such certificate shall be deemed made to an agency of the United States. No person shall be entitled to rely upon any such certificate if he knows or has reasonable cause to believe it to be false.

(f) *Storage; packaging.* All beef set aside and reserved under this order shall be stored in such manner as to maintain the quality thereof, and shall be prepared and packaged in accordance with Army specifications.

(g) *Authorized purchasers required to redeliver.* Each authorized purchaser who receives set aside meat under the provisions of this order shall deliver all such meat, or an equivalent amount of set aside meat, to a governmental agency or person entitled to purchase set aside meat under the provisions of a food distribution regulation.

(h) *Allocation.* The Director may, in his discretion, by general order or written notice to individual slaughterers, order the allocation of meat set aside, reserved and held under this order to or among specific governmental agencies, authorized purchasers, or persons entitled to purchase set aside meat under a food distribution regulation. In the absence of such allocation, slaughterers may, subject to (e) hereof, sell meat so set aside, reserved and held to any such person or agency.

(i) *Existing contracts.* The provisions of this order shall not be construed as reducing the amount of meat which any Class 1 slaughterer is required to offer or to deliver under any existing contract with a governmental agency, as defined herein, or with the United States Maritime Commission.

(j) *Reports.* Every Class 1 slaughterer shall report to the Director the conversion weight of each week's production of set-aside meat, the amounts thereof delivered to governmental agencies, authorized purchasers, and persons entitled to purchase set-aside meat under a food distribution regulation, and the amount of set-aside meat purchased for delivery to governmental agencies.

In making such distribution due regard shall be given to essential civilian needs, and there should be no discrimination in the acceptance or filling of orders as between persons who meet the seller's regularly established prices and terms of sale or payment. Under this policy every seller of such items, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically without prejudice because of their size, location or relationship as affiliated outlets. It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction shall be deemed a violation.

(g) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

§ 6.5-25 *Hampton Roads and the Harbors of Norfolk and Newport News, Virginia.* * * *

NOTE 2: The established anchorages for Naval vessels having been found inadequate at times when an especially large number of Naval vessels are gathered in Hampton Roads, and the Navy Department having requested the establishment of a series of anchorage berths for such occasions in order that a Naval vessel may be ordered to proceed to a designated numbered or lettered anchorage berth in the harbor, the following arrangements have been made: An overlay for Naval anchorage berths in Hampton Roads has been superimposed on U.S.C. and G.S. Chart #400 by the Hydrographic Office of the Navy Department. This overlay, known as H.O. Anchorage Chart G, shows Naval anchorage berths in Anchorages A, B, C, E, F-1, and G. Those designated anchorage berths, with the exception of those in Naval Anchorage B which are primarily for Naval vessels, are not set aside for the exclusive use of Naval vessels, but permission wil be given for Naval vessels to use them when available. When the Captain of the Port receives notification from the proper Naval authorities that it is desired to utilize certain of the anchorage berths set out on the above-mentioned overlay in Anchorages A, C, E, F-1, or G, he will authorize their use by Naval vessels if they can be made available, the commercial condition at the time being given proper consideration. If in the opinion of the Captain of the Port there are sufficient reasons why the berths first asked for should not be used, he will confer with the Naval Officer making the request and if other berths can be agreed upon he will authorize their use, otherwise he will communicate the request to the Secretary of the Navy with a statement of the circumstances and his recommendation.

Amend § 6.5-25 (a) by adding the following notes to subparagraphs 3, 7, 9, and 10:

(a) *Rates.* Brokerage will be paid at the customary rates, but not in excess of the rates provided in this paragraph (a). No brokerage will be paid on cargoes procured under Lend-Lease requisitions moving from continental United States ports, except as provided in General Order 38 (§§ 301.51 through 301.57):

(1) General commercial cargo outward, commonly known as package cargo: 1¼% of the base freight rates before all surcharges, war or otherwise;

(b) *Qualified broker.* A "qualified broker" is one who conducts a bona fide brokerage business. No broker shall be qualified as to:

(1) Any cargo shipped by or to him or in his behalf, unless the shipping documents clearly identify him as an agent of a named principal;

(2) Any cargo in which he has a financial interest other than as authorized herein;

(3) Any cargo shipped by or to or on behalf of any person, firm, or corporation which bears an affiliate relationship to such broker either as subsidiary, parent, or through any other means of actual or possible control, directly or indirectly;

(c) *Brokerage certificate.* Brokerage fees as provided in paragraph (a) of this section may be paid only where a brokerage bill is presented, certified as follows:

> Certified and warranted that this bill is submitted for a service performed in the interest of this shipment described; that the undersigned has not been compensated for the service from any other source, and is a qualified broker within the meaning of General Order 34 of the War Shipping Administration; and that no portion of any amount paid hereunder shall revert directly or indirectly to any person having or having had a financial interest in this shipment. Further warranted and represented that the broker does not have an affiliate relationship, which includes but is not limited to relationship as a subsidiary or parent company, with either the shipper or the consignee; or with either the Agent, General Agent, or Berth Agent for the vessel. This warranty made in full knowledge that the United States, or its agents, will make payment thereon.

(d) *Payment.* The General Agent, Agent, or Berth Agent acting for the War Shipping Administration shall make payment against brokerage bills so certified if the payment of brokerage is consistent with customary commercial practice, and if such agent believes that a service was in fact performed, but in no event shall more than one brokerage be paid on any one cargo or shipment.

§ 306.93 *Commissions on fares.* General Agents and Agents are authorized to pay in all trades to bona fide travel or tourist agents a commission of 5% on fares paid by or for passengers traveling for private or commercial account. No commission shall be allowed on fares paid by or for repatriated seamen traveling as passengers.

§ 306.94 *Communication expenses.* (a) All cablegrams, telegrams, and radiograms that pertain directly and exclusively to the business of the United States, dispatched by Agents, General Agents, Berth Agents, and their branch houses and domestic and foreign subagents, between the continental United States and points outside of the continental United States, shall be for the account of the United States and the cost thereof shall be included in the voyage accounts. All telegrams, cablegrams, and radiograms that pertain directly and exclusively to the business of the United States, dispatched by foreign sub-agents and branch houses, shall be for the account of the United States and the cost thereof shall be included in the voyage accounts. Except as herein provided, communication expenses shall remain a part of the administrative and general expenses of the Agents, General Agents, and Berth Agents.

(b) To the extent that the cablegrams, telegrams, and radiograms referred to in paragraph (a) of this section are entitled to Government rate and are exempt from the Federal tax on communications, all Agents, General Agents, Berth Agents, and their branch houses and sub-agents are authorized and directed to certify that such messages pertain exclusively to official Government business and are for the account of the United States, as may be required to entitle such messages to the Government rate and tax exemption.

(c) Postage or express charges incurred in sending ships' disbursements accounts, manifests and other cargo documents to or from the continental United States, or between foreign ports, may be included in the voyage accounts as reimbursable items of expense.

§ 306.95 *Payments on account of recapture.* Each Agent, General Agent, and Berth Agent who receives compensation under the provisions of Subpart I, II, III, and IV of this order shall submit interim quarterly recapture statements in accordance with the provisions of § 306.96 on or before May 1, August 1, and November 1, of each year, covering the period from January 1 to March 31, June 30, and September 30, respectively. With each such interim statement and with the final statement at the end of the year, the Agent, General Agent, or Berth Agent shall remit to the Administrator 90% of the amount indicated in such statements to be recapturable, or, if previous interim remittances have been made during the same calendar year, such amount as when added to such previous interim remittance will amount to 90% of the amount indicated to be recapturable. All interim statements shall be subject to adjustment in the final statement at the end of the year, in accordance with § 306.96, which final statement shall be rendered not later than March 31 of the following year. Such payments as are made in accordance with the provisions of this section are to be considered as payments on account of recapture, as provided under § 306.96.

§ 306.96 *Recapture to eliminate excessive profits.* (a) If the aggregate amount of the compensation accrued to an Agent, General Agent, or Berth Agent, except compensation paid to an Agent who is not also a General Agent, under Subparts I, II, III and IV of this order, after deducting therefrom fees paid to subagents for performing services which are required to be performed by the Agent, General Agent, or Berth Agent under the provisions of this order, exceeds the sum of:

(1) Such agents' fair and reasonable overhead expense as determined by the Administrator for the comparable period involved, after deducting from such expense (i) sums allowed such agents and their related companies (as defined in Article 13 of the service agreements) in the Administrator's calculation of the hire for vessels chartered to the Administration to cover overhead expenses, and (ii) in instances where such agents or related companies engage in other activities in addition to the conduct of the business of the vessels in connection with which the aforesaid compensation accrued, such proportion of the agents' overhead expenses, as, in the judgment of the Administrator, is properly allocable to such additional activities; and

(2) $15.00 per day per vessel for all dry cargo, tank, and collier vessels operated by a General Agent under General Agency service agreements; $5.00 per day per vessel for all dry cargo, tank, and collier vessels operated by an Agent under Time Charter service agreements; and 5 cents per gross ton per month for passenger vessels operated by a General Agent under General Agency service agreement, as amended by Part II thereof, but not less than $15.00 per day per passenger vessel; then 90% of such excess shall be recaptured by, and remitted to, the United States. The permissible allowances provided in paragraph (a) (2), are based exclusively on the services rendered as Agents and General Agents, no such allowance being permitted for services as Berth Agents.

(b) For the purpose of adjusting earnings under this section, that portion of any salary paid by an Agent, General Agent, or Berth Agent in excess of the maximum provided by section 805 (c) of the Merchant Marine Act of 1936 shall be excluded; and all other salaries deemed by the Administrator to be excessive or unreasonable shall be excluded to such extent as they are deemed to be excessive or unreasonable by the Administrator. All Agents, General Agents, and Berth Agents, shall file with the War Shipping Administration, lists of salaries as required from time to time.

(c) Pursuant to section 403 (i) (2) of the Sixth Supplemental National Defense Appropriation Act of 1942, as amended, the Administrator hereby determines that the profits accruing from the compensation payable to an Agent, General Agent, or Berth Agent, except compensation paid to an Agent who is not also a General Agent, under Subpart I, II, III, and IV of the order, and after recapture as provided in paragraph (a) of this section, are determinable with reasonable certainty, and the Administrator further determines that the recapture provisions of paragraph (a) of this section are adequate to prevent excessive profits, and that based on these determinations said compensation payable after recapture is exempted from renegotiation pursuant to section 403 of said act; *Provided, however,* That in any case where the executive officers of any Agent, General Agent, or Berth Agent have not discharged their duties or responsibilities in an efficient or economical manner as determined by the Administrator, the said compensation shall be subject to renegotiation as provided in section 403 of said act.

§ 306.97 *Renegotiation.* The compensation payable under Subpart V of this order, or under Subparts I, II, III and IV of this order to an agent who is not also a General Agent, or any other compensation payable under this order which is not subject to the provisions of § 306.96, and the service agreements pursuant to which any of said compensation is payable, are subject to the provisions of section 403 of the Sixth Supplemental National Defense Appropriation Act of 1942, as amended, and payment of said compen-

sation is subject to the following provisions: (a) The Administrator may renegotiate said compensation at a period when the profits can be determined with reasonable certainty, (b) any amount of said compensation which is deemed by the Administrator to represent excessive profits and an amount of said compensation equal to the amount of reduction in said compensation of any sub-contractor under said service agreement pursuant to renegotiation of said sub-contract as hereinafter provided will be re-paid to the Administrator or may be retained by the United States, and, (c) the Agent, General Agent, or Berth Agent, as the case may be, will insert in each sub-contract for an amount in exoess of $100,000.00 made by said agents under their respective service agreements: (1) A provision for renegotiation by the Administrator and the sub-contractor of the contract price of such sub-contract at a period when the profits can be determined with reasonable certainty, (2) a provision for the retention by the United States or the repayment to the United States of any amount of the sub-contract price which is deemed by the Adminstrator to represent excessive profits, and, (3) a provision for relieving said agents from any liabilities to the sub-contractor on account of any amounts so retained by or re-paid to the United States.

§ 306.98 *Increases and reductions of compensation under certain circumstances.* (a) If the rates provided in this general order, with respect to an Agent, General Agent, Berth Agent, or their foreign sub-agents and branch houses, or with respect to the Agents, General Agents, or Berth Agents as a class, are found by the Administrator not to represent fair and reasonable compensation for the services required to be performed by the agent under the service agreements, based on the fair and reasonable average cost of performing such services as determined by the Administrator on the basis of maximum reasonable efficiency and economy of operations, then the Administrator, in his discretion, may adjust such compensation in such amount as he shall determine to be fair and reasonable under the circumstances.

(b) In addition to the compensation elsewhere provided in this order, the Administrator shall provide compensation in such amount as he shall determine to be fair and reasonable under the circumstances for (1) extraordinary services heretofore or hereafter rendered by an Agent, General Agent, or Berth Agent, or foreign sub-agent or branch house, which the Administrator finds were not intended to be covered by the compensation provided for in this order, and (2) services required to be performed before delivery or after redelivery or loss of a vessel.

(c) The Administrator reserves the right to make equitable reductions of compensation with regard to any vessel or vessels while idle. No compensation shall be allowed for any period of time lost by reason of the inefficiency of the Agent or General Agent.

(d) The Administrator reserves the right to exempt specific operations from the scope of this General Order 34, or to amend, modify, or terminate said order.

§ 306.99 *Accounting.* The payment and adjustment of the compensation provided in this order shall be subject to compliance by the Agent, General Agent, or Berth Agent with all and singular the terms and conditions of the applicable service agreements and of such rules and regulations appertaining thereto as have been, or from time to time may be, issued by the War Shipping Administration, including, but not limited to, fiscal regulations precribing instructions to be observed in billing for such compensation.

§ 306.100 *Effective date.* (a) Unless otherwise provided, this General Order 34 shall become effective on January 1, 1944, at 12:01 a. m., except that port services rendered to a vessel that has arrived in port prior to January 1, 1944, shall be completed, and compensated for, in accordance with the applicable provisions of General Order 12, rather than under §§ 306.73 and 306.75 of this order, but all such services rendered to a vessel that arrives in port after midnight December 31, 1943, shall be performed and compensated for in accordance with this General Order 34.

(b) Except as provided in paragraph (a) of this section, General Order 12 is cancelled and superseded by this General Order 34, effective as of December 31, 1943, at midnight.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 1—RULES OF PRACTICE AND PROCEDURE

APPLICATIONS FOR PERMITS TO CONSTRUCT OR CHANGE RADIO STATIONS

Upon consideration of a further report and recommendation of its Committee on Critical Radio Materials, and recommendations of the War Production Board, the Commission on January 18, 1944 determined that a further statement should be made with respect to policy in the consideration of applications for authorizations to construct or change radio facilities involving the use of materials.[1]

Present indications are that despite the tremendous expansion of radio production that has taken place in the last two years, the large burden on the industry of meeting military needs will not permit production of equipment for new stations or the expansion of existing stations. All orders and practices looking toward the conservation of equipment (such as Order 107, relating to operation with reduced power) should be retained in full force and effect. It would not be in the public interest to issue and have outstanding permits for authorizations the terms of which cannot be met within a reasonable period.

The Commission will give consideration to the issuance of conditional grants upon applications where it is shown (1) that a grant will serve an outstanding public need or national interest; (2) that the operation proposed is consistent with the provisions of the Rules and Regulations of the Commission and the conditions and standards prescribed in the Act; and (3) that, after due consideration of the policies and orders of the War Production Board and the facts with respect to existence or availability of necessary materials, there is reasonable prospect that the proposed operation in the vicinity in question can be provided for without substantial delay. The procedure to be employed is as follows:

(1) When a conditional grant is authorized, applicant will be notified to that effect and advised that a permit will not be issued until applicant has satisfied the Commission with respect to the following within 90 days[1] of notice of conditional grant:

(a) By evidence in writing from the War Production Board that any authorization of that Board necessary to carry the construction to completion has been obtained or that none is required.

(b) That applicant is in position to complete all construction necessary to the proposed operation within a reasonable period.

(c) Acceptance of the grant upon these conditions has been submitted in writing within 20 days of date of notice of grant.

(2) Upon a showing that satisfies the conditions prescribed in the conditional grant, the Commission will issue a regular authorization.

(3) If applicant fails to satisfy the conditions within the time allowed, the application will be designated for hearing or given such further consideration as may be found appropriate.

An applicant desiring any further consideration of an application for radio facilities or change in facilities which has been dismissed without prejudice pursuant to the Memorandum Opinion of February 23, 1942, or any one or more of the other statements of policy which have been issued with regard to equipment, may submit a petition for reinstatement of such application within 60 days hereof accompanied with amendments and supplemental information appropriate to any change in circumstances.

This statement is not to be construed as an invitation for the filing of applications; the policy set forth is intended only to permit grants that will serve an outstanding public need or national interest, as indicated in this statement.

Dated: January 26, 1944.

By the Commission.

Secretary.

[1] Order 107 appears at 7 F.R. 9348.

[1] This time may be extended to a maximum of not to exceed 120 days from the date of notice of intent to grant upon a satisfactory showing that there is reasonable assurance that the conditions can be met in the time specified.

PART 95—CAR SERVICE

FREIGHT CARS IN MEXICO

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 26th day of January, A. D. 1944.

Upon further consideration of Service Order No. 107 (8 F. R. 1403) of January 30, 1943, for the purpose of clarifying said order and good cause appearing therefor: *It is ordered,* That:

Service Order No. 107 (8 F.R. 1403) of January 30, 1943, be, and it is hereby, amended by substituting the following paragraphs (a) and (b) for the present paragraphs (a) and (b) in § 95.7:

§ 95.7 *Freight cars including refrigerator cars in Mexico.* (a) The Association of American Railroads, Car Service Division, Washington, D. C., as agent for all United States railroads subscribing to the car service and per diem agreement, is hereby directed to take immediate steps, by the placement of necessary embargoes, to restrict the number of freight cars, including refrigerator cars owned, leased, or otherwise controlled by railroads of the United States moving into Mexico during any semi-monthly period, so that the number of such cars shall not be in excess of the number of cars moving from Mexico to the United States during the previous semi-monthly period.

(b) The number of each type of freight cars, including refrigerator cars owned, leased, or otherwise controlled by railroads of the United States permitted to be in Mexico at any time may be changed by instructions issued by the Director of the Bureau of Service, Interstate Commerce Commission, Washington, D. C., by varying the ratio between cars permitted to be moved into and those moved out of Mexico. (40 Stat. 101, sec. 402, 41 Stat. 476, sec. 4, 54 Stat. 901; 49 U.S.C. 1 (10)-(17))

It is further ordered, That this order shall become effective at 12:01 a. m., January 28, 1944; that copies of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

By the Commission, Division 3.

CEDAR HILL COAL CO., ET AL.

ORDER TERMINATING GOVERNMENT POSSESSION

JANUARY 27, 1944.

The mining companies listed in Appendix A hereof do not operate their mines under collective wage agreements with any labor organizations, and have made application to the National War Labor Board for approval of certain wage adjustments in the terms and conditions of employment at said mines. Advice has been received that the National War Labor Board is ready to approve said applications. The companies have advised that they will put the adjustments into effect when approved, and that it is unlikely there will be a recurrence of work stoppages or threats of work stoppages because of labor disputes at their mines.

Based upon such information, and after consideration of all the circumstances, I find that, in accordance with the provisions of the War Labor Disputes Act of June 25, 1943 (Pub. No. 89, 78th Cong., 1st Sess.) possession and control by the Government of such mines should be terminated.

Accordingly, I order and direct that the possession by the Government of the mines of the mining companies listed in Appendix A, attached hereto and made a part hereof, including any and all real and personal property, franchises, rights, facilities, funds, and other assets used in connection with the operation of such mines be, and it is hereby, terminated and that there be conspicuously displayed at those mining properties copies of a poster to be supplied by the Coal Mines Administration and reading as follows:

NOTICE: Government possession and control of the coal mines of this mining company have been terminated by order of the Secretary of the Interior.

Provided, however, That nothing contained herein shall be deemed to preclude the Government from requiring the submission of information relating to operations during the period of Government possession and control as provided in Section 40 of the Regulations for the Operation of Coal Mines under Government Control, as amended (8 F.R. 6655, 10712, 11344), for the purpose of ascertaining the existence and amount of any claims against the United States so that the administration of the provisions of Executive Order No. 9393 (8 F.R. 14877) may be concluded in an orderly manner; *And provided further,* That except as otherwise ordered, the appointments of the Operating Managers for the mines of the companies listed in Appendix A shall continue in effect.

for Puerto Rico established pursuant to Food Production Order No. 14 (8 F.R. 17456).

(9) "Director" means the Director, Office of Materials and Facilities, War Food Administration.

(b) *General administration.* This order shall be administered by the Farm Rationing Committee. The Farm Rationing Committee may delegate any of the duties and functions imposed upon it by this order to any member of such Committee or to any officer or employee of the Agricultural Adjustment Agency in Puerto Rico.

(c) *Allocation of chemical fertilizer materials.* It shall be the duty of the Farm Rationing Committee to encourage the use of available chemical fertilizer on food crops so as to obtain the greatest practicable amount of food production in Puerto Rico. To this end the Committee shall require fertilizer manufacturers to set apart such quantities of fertilizer materials as it determines should be made available for use on food crops in order to maintain, as nearly as possible, an adequate supply of such materials for such purpose. The Farm Rationing Committee shall also endeavor to arrange, through the proper authorities, for shipments to Puerto Rico of sufficient quantities of fertilizer materials for use on food crops, sugarcane and tobacco, taking into account the shipping space allocated monthly for such purpose.

(d) *Manufacture and delivery of chemical fertilizer.* (1) From time to time, the Farm Rationing Committee shall prescribe a formula or formulae for the mixing of chemical fertilizer suitable for use on food crops, sugarcane and tobacco, taking into account the supply of fertilizer materials available or expected to be available in Puerto Rico; and no manufacturer shall mix chemical fertilizer except in conformity with a formula or formulae prescribed by the Farm Rationing Committee. (Unless otherwise specified, nitrogen prescribed in any formula will mean nitrogen (N) expressed in terms of ammonia (NH_3).)

(2) No fertilizer manufacturer, dealer, agent or other person shall deliver to any person, and no person shall accept, for use any chemical fertilizer of a formula not prescribed by the Farm Rationing Committee pursuant to paragraph (d) (1) hereof.

(e) *Directions.* (1) Each fertilizer manufacturer shall comply with such directions as may be issued from time to time by the Farm Rationing Committee with respect to the quantities, grades and kinds of mixed fertilizer to be manufactured and with respect to the use or delivery of any chemical fertilizer.

(2) Each dealer, agent or other person to whom this order applies shall comply with such directions as may be issued from time to time by the Farm Rationing Committee with respect to the delivery and use of chemical fertilizers.

Sugarcane

(f) *How chemical fertilizer for use on sugarcane is obtained.* (1) Any person who wishes to obtain chemical fertilizer for use on sugarcane must apply for a ration card in accordance with the procedure established by the Farm Rationing Committee. The ration card will be on a form prescribed by the Farm Rationing Committee. On application, the Farm Rationing Committee will issue to each sugarcane grower two ration cards during each fertilizer year. One card will be for the period September 1 to the end of the following February, and the other will be for the period March 1 to the following August 31. Each ration card will show the fertilizer requirements of the grower, as determined by the Farm Rationing Committee in accordance with paragraph (g) hereof. The Farm Rationing Committee may require applicants for ration cards for chemical fertilizer for use on sugarcane to take an additional amount of fertilizer for use on food crops. In such case, no ration card for chemical fertilizer for use on sugarcane shall be issued to any person, unless such person agrees to take and use such additional amount of fertilizer for use on food crops.

(2) A ration card for fertilizer for use on sugarcane will not of itself authorize a sugarcane grower to obtain fertilizer. The Farm Rationing Committee will, from time to time, determine the percentage of the fertiliser requirements of sugarcane growers, which may be delivered to them. Such percentage shall be determined for all sugarcane growers, taking into account the available supply of chemical fertilizer for use on sugarcane. The total of the percentages authorized by the Farm Rationing Committee during any fertilizer year may be more or less than 100 percent of growers' requirements depending upon the available supply of fertilizer. The Farm Rationing Committee shall notify fertilizer manufacturers, dealers and agents of each such determination.

(g) *Fertilizer requirements for sugarcane.* Each grower's requirements for chemical fertilizer for use on sugarcane during any fertilizer year shall be determined on the basis of such grower's normal use of chemical fertilizer on sugarcane in terms of a basic formula of 12–8–8 or its nitrogen equivalent in any other formula prescribed by the Farm Rationing Committee. Normal use shall be deemed to be the average amount of chemical fertilizer per acre used by such grower during the base period January 1, 1940, to April 30, 1941, as determined from the Agricultural Adjustment Agency records, but shall not be deemed to be less than 400 pounds per acre. A grower's requirements for chemical fertilizer for any fertilizer year shall be the product of his normal use of chemical fertilizer and his acreage under active cultivation during such year, as determined by the Farm Rationing Committee. In issuing a ration card for the period September 1 to the end of the following February, however, the acreage actively cultivated during the preceding fertilizer year shall be used in calculating fertilizer requirements. In issuing a ration card for the period March 1 through August 31, the actual acreage under active cultivation during the fertilizer year shall be used in making this calculation; and, if the actual acreage figure differs from the acreage figure used for the preceding period, such adjustments as may be necessary shall be made.

(h) *Delivery of fertilizer for use on sugarcane.* A sugarcane grower may obtain chemical fertilizer only upon presenting his ration card to a fertilizer manufacturer, dealer, agent or other person from whom such fertilizer is to be obtained. No fertilizer shall be delivered to any sugarcane grower for use on sugarcane until delivery has been made of the fertilizer for use on food crops, if any, which such grower is required to take. The quantity of fertilizer delivered to any grower at any time for use on sugarcane shall not exceed the quantity authorized by the Farm Rationing Committee pursuant to paragraph (f) (2) hereof, to be delivered at that time. Upon making delivery of such fertilizer, the fertilizer manufacturer, dealer, agent, or other person making such delivery shall sign and date the ration card as of the date of delivery and indicate thereon the kinds and quantities of fertilizer delivered.

Tobacco

(i) *How chemical fertilizer for use on tobacco is obtained.* (1) Any person who wishes to obtain chemical fertilizer for use on tobacco must apply for a ration card in accordance with the procedure established by the Farm Rationing Committee. The ration card will be on a form prescribed by the Farm Rationing Committee. One ration card will be issued to each applicant with respect to each tobacco crop. The ration card will show the applicant's fertilizer requirements for tobacco, determined in accordance with paragraph (j) hereof.

(2) A ration card for fertilizer for use on tobacco will not of itself authorize a tobacco grower to obtain fertilizer. The Farm Rationing Committee will, from time to time, determine the percentage of the fertilizer requirements of tobacco growers, which may be delivered to them. Such percentage shall be determined for all tobacco growers, taking into account the available supply of chemical fertilizer for use on tobacco. The total of the percentages authorized by the Farm Rationing Committee for any tobacco crop may be more or less than 100 percent of tobacco growers' requirements depending upon the available supply of fertilizer. The Farm Rationing Committee shall notify fertilizer manufacturers, dealers and agents of each such determination.

(j) *Fertilizer requirements for tobacco.* Each tobacco grower's requirement for chemical fertilizer for use on any tobacco crop shall be the product of his tobacco acreage, which shall not exceed his acreage allotment received under the Agricultural Conservation Program for 1943, and 800 pounds of chemical fertilizer in any formula prescribed by the Farm Rationing Committee.

(k) *Delivery of fertilizer for use on tobacco.* A tobacco grower may obtain chemical fertilizer only upon presenting his ration card to a fertilizer manufac-

turer, dealer, agent or other person from whom such fertilizer is to be obtained. The quantity of fertilizer delivered to any grower at any time for use on tobacco shall not exceed the quantity authorized by the Farm Rationing Committee, pursuant to paragraph (i) (2) hereof, to be delivered at that time. Upon making delivery of such fertilizer, the fertilizer manufacturer, dealer, agent or other person making such delivery shall sign and date the ration card as of the date of delivery and indicate thereon the kinds and quantities of fertilizer delivered.

Food Crops

(l) *How chemical fertilizer for use on food crops is obtained.* Any person who wishes to obtain chemical fertilizer for use on food crops must apply for a purchase permit in accordance with the procedure established by the Farm Rationing Committee. The purchase permit will be on a form prescribed by the Farm Rationing Committee. Purchase permits, which will be issued in triplicate, will authorize the purchase of chemical fertilizer in accordance with the requirement of each applicant. The Farm Rationing Committee is hereby authorized to establish the basis or method for determining the requirements for fertilizer for use on food crops. Such basis or method shall be uniformly applicable in determining the requirements of all persons growing the same crop or crops, and, so far as practicable, shall apply throughout the growing season for each crop.

(m) *Delivery of chemical fertilizer for use on food crops.* A farmer may obtain chemical fertilizer for use on food crops only by surrendering to a fertilizer manufacturer, dealer, agent or other person from whom such fertilizer is to be obtained, the original and one copy of his purchase permit. Upon making delivery of such fertilizer, the fertilizer manufacturer, dealer, agent or other person making such delivery shall sign and date the original and the copy, shall mail the original to the Farm Rationing Committee, and shall retain the copy on file for at least 60 days.

Appeals

(n) *Denial of applications for ration cards or purchase permits.* If the Farm Rationing Committee denies an application for a ration card or purchase permit, in whole or in part, it shall notify the applicant by a letter setting forth the reason for such denial. The applicant then may, within 15 days after receiving such notification, request the Farm Rationing Committee, in writing, to reconsider its action. Within 15 days after the receipt of such request, the Farm Rationing Committee shall notify the applicant by letter of its action on the reconsideration. If, after such reconsideration, the applicant believes that the final ruling of the Farm Rationing Committee is not in accordance with the provisions of this order, he may, within 15 days after receiving notification of such ruling, file with the Farm Rationing Committee a written appeal to the Director from such ruling, setting forth specifically the reasons for his appeal, and stating in full the facts upon which his appeal is based. The Farm Rationing Committee shall promptly transmit such appeal to the Director. The Director may require the furnishing of additional information by the applicant or the Farm Rationing Committee. The Director may affirm, reverse, or modify the decision of the Farm Rationing Committee or he may remand the matter to the Farm Rationing Committee. The decision of the Director shall be in writing, shall be communicated to the applicant and the Farm Rationing Committee and shall be final and conclusive.

(o) *Petition for relief from hardship.* Except as provided in paragraph (n) hereof, any person affected by this order who considers that compliance herewith would work an exceptional and unreasonable hardship on him may apply in writing for relief to the Director, setting forth in such petition all pertinent facts and information. Such petition shall be submitted, however, to the Farm Rationing Committee, which shall promptly transmit it to the Director with its recommendation. The Director may, upon the basis of such application and other information, take such action as he deems appropriate. The decision of the Director shall be in writing and shall be final and conclusive.

General Provisions

(p) *Restriction on delivery and use of chemical fertilizer.* No fertilizer manufacturer, dealer, agent or other person shall deliver to any person for use, and no person shall accept for use, any chemical fertilizer except as authorized by the Farm Rationing Committee by means of a purchase permit or a ration card issued pursuant to this order.

(q) *Records and reports of manufacturers, dealers, and agents.* Fertilizer manufacturers, dealers, agents and other persons to whom this order applies shall keep records for not less than two years of all deliveries of chemical fertilizer, including the quantities and kinds delivered and the names of persons to whom delivered, in such detail as the Farm Rationing Committee may prescribe, and shall make reports to the Farm Rationing Committee of all such deliveries in such form and detail as it may require. (This record keeping and reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.)

(r) *Audits and inspections.* Each fertilizer manufacturer, dealer, agent or other person to whom this order applies shall, upon request, submit such of his books, records, and accounts for audit and inspection by duly authorized representatives of the Farm Rationing Committee as may be necessary or appropriate to the enforcement or administration of the provisions of this order.

(s) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, or who conspires with another to perform any of such acts, is guilty of a crime and upon conviction may be punished by fine and imprisonment. In addition, any such person may by administrative suspension order be prohibited from receiving any deliveries of, or selling or otherwise disposing of, or using any chemical fertilizer or any other material now or hereafter authorized to be rationed or allocated by, or subject to the priority control of, the War Food Administrator, and may be deprived of any priority assistance. Further, the Director may recommend to the Office of Price Administration or to the War Production Board that any person who violates any provision of this order, or any amendment or supplement thereto, be denied the right to receive, use, sell or otherwise dispose of any other materials which now are or in the future may be under allocation.

(t) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless instructions to the contrary are issued, be addressed to the Farm Rationing Committee for Puerto Rico, P. O. Box 4349, San Juan, Puerto Rico, Ref. FPO 10.

PART 1401—DAIRY PRODUCTS

FLUID MILK AND CREAM IN EL PASO, TEX., SALES AREA

Pursuant to the authority vested in me by Food Distribution Order No. 79 (8 F.R. 12426), issued on September 7, 1943, as amended, and to effectuate the purposes of such order, it is hereby ordered as follows:

§ 1401.161 *Quota restrictions* — (a) *Definitions.* When used in this order, unless otherwise distinctly expressed or manifestly incompatible with the intent hereof:

(1) Each term defined in Food Distribution Order No. 79, as amended, shall, when used herein, have the same meaning as is set forth for such term in Food Distribution Order No. 79, as amended.

(2) The term "FDO 79" means Food Distribution Order No. 79, issued on September 7, 1943, as amended.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, sub-dealer, or secondary dealer, who purchases in a previously packaged and processed form milk, cream, or milk byproducts for delivery.

(4) The term "industrial user" means a person, as determined by the market agent, in the capacity of a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of for resale to consumers off the premises where made.

(5) The term "base" means the total pounds of milk solids delivered by a handler within the sales area during the base period (i) in the form of milk, or (ii) in the form of cream and milk byproducts, minus the milk solids in quota-exempt deliveries of milk, and cream and milk byproducts, as described in (j) hereof. (For the purpose of this order, the milk solids content of milk, milk byproducts, and cream shall be computed as follows: Each hundredweight of milk, cream, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of milk solids calculated by multiplying the pounds of butterfat in such milk, and cream and milk byproducts by .906; and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 62.5 pounds of milk solids plus one pound of milk solids for each one percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is hereby designated as a "milk sales area" to be known as the El Paso, Texas, milk sales area, and is referred to hereinafter as the "sales area":

The city of El Paso; that part of justices' precinct 1 south of North Line Drive extended and North Line Drive, northwest of U. S. Highway 54, south of Hercules Drive, east of Diana Drive, south of Gas Line Road, and southwest of the Southern Pacific Railroad; that part of justices' precinct 2 south of the north boundary of Fort Bliss Military Reservation to the intersection of U. S. Highway 62, and south of U. S. Highway 62; and the entire area of justices' precinct 8; all in El Paso County, Texas.

(c) *Base period.* The calendar month of June 1943 is hereby designated as the base period for the sales area: *Provided,* That the month of May may be used as the base period for computing base and quota for deliveries to elementary, junior high and high schools: *And provided further,* That in the computations set forth in (e) hereof the total deliveries to elementary, junior high, and high schools in the base period shall be divided by the number of days such schools were in session in lieu of the total number of days in the base period as set forth in (e) (1) and the average daily deliveries so determined shall be multiplied by the number of days such schools are in session in each quota period in lieu of the number of days in the quota period as set forth in (e) (2).

(d) The remainder of the calendar month in which the provisions hereof become effective and each subsequent calendar month, respectively, is hereby designated as the quota period for the sales area.

(e) *Handler quotas.* Quotas for each handler other than a sub-handler or producer-handler shall be determined as follows:

(1) Divide his respective bases by the number of days in the base period;

(2) Multiply the foregoing result by the number of days in the quota period; and

(3) Multiply the aforesaid resulting amounts by 100 percent in the case of the base for milk, and 75 percent in the case of the base for cream and milk byproducts.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, whichever represents his larger total deliveries; and,

(2) The applicable percentages shall be 100 percent in lieu of those specified in (e) (3).

(g) *Quota adjustments.* Each handler may increase his quota for milk within any quota period by one pound of milk solids for each one pound of milk solids he reduces his quota for cream and milk byproducts.

(h) *Cream deliveries.* The units of cream delivered subject to quota in any quota period shall not exceed 100 percent of the units of cream in his base, irrespective of the milk solids content of such deliveries.

(i) *Handler exemptions.* Quota shall not apply to any handler who delivers in a quota period a daily average of less than 200 units of milk, cream, and milk byproducts. For the purpose of this order, a unit shall be the equivalent in volume of the following: (1) One quart of milk, buttermilk, or fluid milk byproducts; (2) one-half pint of cream; and (3) one-half pound of cottage, pot, or baker's cheese.

(j) *Quota exclusions and exemptions.* Deliveries of milk, milk byproducts, or cream (1) to other handlers, except for such deliveries to sub-handlers, (2) to plants engaged in the handling or processing of milk, milk byproducts, cream or other dairy products from which no milk, milk byproducts, or cream, is delivered in the sales area, (3) to industrial users, and (4) to the agencies or groups specified in (d) of FDO 79, shall be excluded from the computation of deliveries in the base period and exempt from charges to quotas.

(k) *Transfers of bases.* The market agent is empowered to transfer base from one handler to another:

(1) Upon receipt of a request in writing from both handlers; and

(2) Upon application from a handler and written notice to the Director and to both handlers, (i) to permit deliveries to a purchaser not being served by a handler whose quota reflects deliveries to such purchaser in the base period, (ii) to permit a handler to serve an account which customarily rotates among several handlers inclusive of a contract let by a public agency or institution on a bid basis, and (iii) to permit a handler to serve an account which he is serving on the effective date of this order and which was served by another handler during the base period.

(l) *Consumer priorities.* In the distribution of milk subject to quotas established hereunder, a handler shall give preference in the order listed, taking into consideration the type of purchasers served by him in the base period, to:

(1) The need of children, expectant mothers, and invalids requiring milk;

(2) Homes and retail stores handling milk for consumption off the premises; and

(3) Establishments serving milk for consumption on the premises.

(m) *Petition for relief from hardship.* (1) Any person affected by FDO 79 or the provisions hereof who considers that compliance therewith would work an exceptional and unreasonable hardship on him, may file with the market agent a petition addressed to the Director. The petition shall contain the correct name, address and principal place of business of the petitioner, a full statement of the facts upon which the petition is based, and the hardship involved and the nature of the relief desired.

(2) Upon receiving such petition the market agent shall immediately investigate representations and facts stated therein.

(3) After investigation, the petition shall be certified to the Director, but prior to certification the market agent may (i) deny the petition or (ii) grant temporary relief for a total period not to exceed 60 days.

(4) Denials or grants of relief by the market agent shall be reviewed by the Director and may be affirmed, modified, or reversed by the Director.

(n) *Reports.* Each handler shall transmit to the market agent on forms prescribed by the market agent the following reports:

(1) Within 20 days following the effective date of this order, reports which show the information required by the market agent to establish such handler's quotas;

(2) Within 20 days following the close of each quota period, the information required by the market agent to establish volumes of deliveries of milk, cream and milk byproducts during the preceding quota period; and

(3) Handlers exempt from quotas pursuant to (i) hereof shall, upon the request of the market agent, submit the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts.

(o) *Records.* Handlers shall keep and shall make available to the market agent such records of receipts, sales, deliveries, and production as the market agent shall require for the purpose of obtaining information which the Director may require for the establishment of quotas as prescribed in (b) of FDO 79.

(p) *Expense of administration.* Each handler shall pay to the market agent, within 20 days after the close of each calendar month, an assessment of $0.015 per hundredweight of each of milk, milk byproducts, cream, and skim milk equivalent of cottage, pot, or baker's cheese delivered during the preceding quota period and subject to quota regulations under the provisions hereof.

(q) *Violations.* The market agent shall report all violations to the Director together with the information required for the prosecution of such violations.

(r) *Bureau of the Budget approval.* The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Subsequent record-keeping or reporting requirements will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(s) *Effective date.* This order shall take effect at 12:01 a. m., e. w. t., February 1, 1944.

(d) The remainder of the calendar month in which the provisions hereof become effective and each subsequent calendar month, respectively, is hereby designated as the quota period for the sales area.

(e) *Handler quotas.* Quotas for each handler other than a sub-handler or producer-handler shall be determined as follows:

(1) Divide his respective bases by the number of days in the base period;

(2) Multiply the foregoing result by the number of days in the quota period; and

(3) Multiply the aforesaid resulting amounts by 100 percent in the case of the base for milk, and 75 percent in the case of the base for cream and milk byproducts.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, whichever represents his larger total deliveries; and

(2) The applicable percentages shall be 100 percent in lieu of those specified in (e) (3).

(g) *Quota adjustments.* Each handler may increase his quota for milk within any quota period by one pound of milk solids for each one pound of milk solids he reduces his quota for cream and milk byproducts.

(h) *Cream deliveries.* The units of cream delivered subject to quota in any quota period shall not exceed 100 percent of the units of cream in his base, irrespective of the milk solids content of such deliveries.

(i) *Handler exemptions.* Quota shall not apply to any handler who delivers in a quota period a daily average of less than 200 units of milk, cream, and milk byproducts. For the purpose of this order, a unit shall be the equivalent in volume of the following: (1) One quart of milk, buttermilk, or fluid milk byproducts; (2) one-half pint of cream; and (3) one-half pound of cottage, pot, or baker's cheese.

(j) *Quota exclusions and exemptions.* Deliveries of milk, milk byproducts, or cream (1) to other handlers, except for such deliveries to sub-handlers, (2) to plants engaged in the handling or processing of milk, milk byproducts, cream or

other dairy products from which no milk, milk byproducts, or cream, is delivered in the sales area, (3) to industrial users, and (4) to the agencies or groups specified in (d) of FDO 79, shall be excluded from the computation of deliveries in the base period and exempt from charges to quotas.

(k) *Transfers of bases.* The market agent is empowered to transfer base from one handler to another.

(1) Upon receipt of a request in writing from both handlers; and

(2) Upon application from a handler and written notice to the Director and to both handlers, (i) to permit deliveries to a purchaser not being served by a handler whose quota reflects deliveries to such purchaser in the base period, (ii) to permit a handler to serve an account which customarily rotates among several handlers inclusive of a contract let by a public agency or institution on a bid basis, and (iii) to permit a handler to serve an account which he is serving on the effective date of this order and which was served by another handler during the base period.

(l) *Consumer priorities.* In the distribution of milk subject to quotas established hereunder, a handler shall give preference in the order listed, taking into consideration the type of purchasers served by him in the base period, to:

(1) The need of children, expectant mothers, and invalids requiring milk;

(2) Homes and retail stores handling milk for consumption off the premises; and

(3) Establishments serving milk for consumption on the premises.

(m) *Petition for relief from hardship.* (1) Any person affected by FDO 79 or the provisions hereof who considers that compliance therewith would work an exceptional and unreasonable hardship on him may file with the market agent a petition addressed to the Director. The petition shall contain the correct name, address and principal place of business of the petitioner, a full statement of the facts upon which the petition is based, and the hardship involved and the nature of the relief desired.

(2) Upon receiving such petition the market agent shall immediately investigate representations and facts stated therein.

(3) After investigation, the petition shall be certified to the Director, but prior to certification the market agent may (i) deny the petition or (ii) grant temporary relief for a total period not to exceed 60 days.

(4) Denials or grants of relief by the market agent shall be reviewed by the Director and may be affirmed, modified, or reversed by the Director.

(n) *Reports.* Each handler shall transmit to the market agent on forms prescribed by the market agent the following reports:

(1) Within 20 days following the effective date of this order, reports which show the information required by the market agent to establish such handler's quotas;

(2) Within 20 days following the close of each quota period, the information required by the market agent to establish volumes of deliveries of milk, cream and milk byproducts during the preceding quota period; and

(3) Handlers exempt from quotas pursuant to (i) hereof shall, upon the request of the market agent, submit the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts.

(o) *Records.* Handlers shall keep and shall make available to the market agent such records of receipts, sales, deliveries, and production as the market agent shall require for the purpose of obtaining information which the Director may require for the establishment of quotas as prescribed in (b) of FDO 79.

(p) *Expense of administration.* Each handler shall pay to the market agent, within 20 days after the close of each calendar month, an assessment of $0.015 per hundredweight of each of milk, milk byproducts, cream, and skim milk equivalent of cottage, pot, or baker's cheese delivered during the preceding quota period and subject to quota regulations under the provisions hereof.

(q) *Violations.* The market agent shall report all violations to the Director together with the information required for the prosecution of such violations.

(r) *Bureau of the Budget approval.* The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Subsequent record-keeping or reporting requirements will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

AUTHORITY: §§ 32.0–32.27, inclusive, issued under section 511 of the Merchant Marine Act, 1936 as added by the Act approved October 10, 1940, 54 Stat. 1106, and as amended by the Act of June 17, 1943, Public Law 78, 78th Cong., and section 3791 of the Internal Revenue Code, 53 Stat. 467; 26 U.S.C. 3791.

§ 32.0 *Introductory.* Section 511 of the Merchant Marine Act, 1936, as added by the Act of October 10, 1940 (54 Stat. 1106; 46 U.S.C. 1161), and as amended by the Act of June 17, 1943 (Public Law 78, 78th Congress), provides:

SEC. 511. (a) When used in this section the term "new vessel" means any vessel (1) documented or agreed with the Commission to be documented under the laws of the United States; (2) constructed in the United States after December 31, 1939, or the construction of which has been financed under titles V or VII of this Act, as amended, or the construction of which has been aided by a mortgage insured under title XI of this Act as amended; and (3) either (A) of such type, size, and speed as the Commission shall determine to be suitable for use on the high seas or Great Lakes in carrying out the purposes of this Act, but not of less than two thousand gross tons or of less speed than twelve knots, unless the Commission shall determine and certify in each case that a vessel of a specified lesser tonnage or speed is desirable for use by the United States in case of war or national emergency, or (B) constructed to replace a vessel or vessels requisitioned or purchased by the United States.

(b) For the purposes of promoting the construction of vessels necessary to carrying out the policy set forth in title I of this Act, any citizen of the United States who is operating a vessel or vessels in the foreign or domestic commerce of the United States or in the fisheries or owns in whole or in part a vessel or vessels being so operated, or who, at the time of purchase or requisition of the vessel by the Government, was operating a vessel or vessels so engaged or owned in whole or in part a vessel or vessels being so operated or had acquired or was having constructed a vessel or vessels for the purpose of operation in such commerce or in the fisheries, may establish a construction reserve fund, for the construction or acquisition of new vessels, to be composed of deposits of proceeds from sales of vessels, indemnities on account of losses of vessels, earnings from the operation of vessels, and receipts, in the form of interest or otherwise, with respect to amounts previously deposited. Such construction reserve fund shall be established, maintained, expended, and used in accordance with the provisions of this section and rules or regulations to be prescribed jointly by the Commission and the Secretary of the Treasury.

(c) In the case of the sale or actual or constructive total loss of a vessel, if the taxpayer deposits an amount equal to the net proceeds of the sale or to the net indemnity with respect to the loss in a construction reserve fund established under subsection (b), then, if the taxpayer so elects in his income-tax return for the taxable year in which the gain was realized, no gain shall be recognized to the taxpayer in respect of such sale or indemnification in the computation of net income for the purposes of Federal income or excess-profits taxes. For the purposes of this subsection no amount shall be considered as deposited in a construction reserve fund unless it is deposited within sixty days after it is received by the taxpayer except that (1) in the case of amounts received before December 10, 1940, the deposit may be made not later than February 7, 1941, and (2) in the case of amounts received at any time between May 27, 1941, and the date [1] of enactment of this amendatory clause, the deposit of which by the taxpayer is authorized by the amendments to subsection (b), the taxpayer may make such deposit at any time within one hundred and twenty days from such date of enactment, and the Commission may approve any such deposit previously made if, in other respects, it complies with the provisions of this section, as amended. As used in this subsection the term "net proceeds" and the term "net indemnity" mean the sum of (1) the adjusted basis of the vessel and (2) the amount of gain which would be recognized to the taxpayer without regard to this subsection.

(d) The basis for determining gain or loss and for depreciation, for the purpose of Federal income or excess-profits taxes, of any new vessel constructed or acquired by the taxpayer in whole or in part out of the construction reserve fund shall be reduced by that portion of the deposits in the fund expended in the construction of acquisition of the new vessel which represents gain not recognized under subsection (c).

(e) For the purposes of this section, (1) if the net proceeds of a sale or the net indemnity in respect of a loss are deposited in more than one deposit, the amount consisting of the gain shall be considered as first deposited; (2) amounts expended, obligated, or otherwise withdrawn shall be applied against the amounts deposited in the fund in the order of deposit; and (3) if any deposit consists in part of gain not recognized under subsection (c), any expenditure, obligation, or withdrawal applied against such deposit shall be considered to consist of gain in the proportion that the part of the deposit consisting of gain bears to the total amount of the deposit.

(f) With respect to any taxable year, amounts on deposit on the last day of such year in a construction reserve fund in accordance with this section and with respect to which all the requirements of subsection (g) have been satisfied, to the extent that such requirements are applicable as of the last day of said taxable year, shall not constitute an accumulation of earnings or profits within the meaning of section 102 of the Internal Revenue Code.

(g) The provisions of subsections (c) and (f) shall apply to any deposit in the construction reserve fund only to the extent that such deposit is expended or obligated for expenditure, in accordance with rules and regulations to be prescribed jointly by the Commission and the Secretary of the Treasury, under a contract for the construction or acquisition of a new vessel or vessels (or in the discretion of the Commission, for a part interest therein) entered into within two years from the date of such deposit only if under such rules and regulations—

(1) Within such period of two years not less than 12½ per centum of the construction or contract price of the vessel or vessels is paid or irrevocably committed on account thereof and the plans and specifications therefor are approved by the Commission to the extent by it deemed necessary; and

(2) In case of a vessel or vessels not constructed under the provisions of this title or not purchased from the Commission, (A) said construction is completed, within six months from the date of the construction contract, to the extent of not less than 5 per centum thereof (or in case the contract covers more than one vessel, the construction of the first vessel so contracted for is so completed to the extent of not less than 5 per centum) as estimated by the Commission and certified by it to the Secretary of the Treasury, and (B) all construction under such contract is completed with reasonable dispatch thereafter.

(h) The Commission is authorized under rules and regulations to be prescribed jointly by the Secretary of the Treasury and the Commission to grant extensions of the period within which the deposits shall be expended or obligated or within which construction shall have progressed to the extent of 5 per centum of completion as provided herein, but such extension shall not be for an aggregate additional period in excess of two years with respect to the expenditure or obligation of such deposits or more than one year with respect to the progress of such construction: *Provided, however,* That until the termination of the present war or until such earlier time as the Congress by concurrent resolution or the President may designate, in addition to the extensions hereinbefore permitted, further extensions may be granted ending not later than six months after such termination of the present war or such earlier date as may be so designated.

(i) Any such deposited gain or portion thereof which is not so expended or obligated within the period provided, or which is otherwise withdrawn before the expiration of such period, or with respect to which the construction has not progressed to the extent of 5 per centum of completion within the period provided, or with respect to which the Commission finds and certifies to the Secretary of the Treasury that, for causes within the control of the taxpayer, the entire construction is not completed with reasonable dispatch, if otherwise taxable income under the law applicable to the taxable year in which such gain was realized, shall be included in the gross income for such taxable year, except for the purpose of the declared value excess-profits tax and the capital stock tax. If any such deposited gain or portion thereof is so included in gross income for such taxable year, there shall (in addition to any other deficiency) be assessed, collected, and paid in the same manner as if it were a deficiency, an amount equal to 1.1 per centum of the amount of gain so included, such amount being in lieu of any adjustment with respect to the declared value excess-profits tax for such taxable year.

(j) Notwithstanding any other provision of law, any deficiency in tax for any taxable year resulting from the inclusion of any amount in gross income as provided by subsection (i), and the amount to be treated as a deficiency under such subsection in lieu of any adjustment with respect to the declared value excess-profits tax, may be assessed or a proceeding in court for the collection thereof may be begun without assessment, at any time: *Provided, however,* That interest on any such deficiency or amount to be treated as a deficiency shall not begin until the date the deposited gain or portion thereof in question is required under subsection (i) to be included in gross income.

(k) This section shall be applicable to a taxpayer only in respect of sales or indemnifications for losses occurring within a taxable year beginning after December 31, 1939, and only in respect of earnings derived during a taxable year beginning after December 31, 1939.

(l) For the purposes of this section a vessel shall be considered as constructed or acquired by the taxpayer if constructed or acquired by a corporation at a time when the taxpayer owns at least 95 per centum of the total number of shares of each class of stock of the corporation.

(m) The terms used in this section shall have the same meaning as in chapter 1 of the Internal Revenue Code.

Section 905 (a) of the Merchant Marine Act, 1936, as amended by section 39 (a) of the Act of June 23, 1938 (52 Stat. 964; 46 U.S.C. 1244 (a)), provides:

(a) The words "foreign commerce" or "foreign trade" mean commerce or trade between the United States, its Territories or possessions, or the District of Columbia, and a foreign country.

Section 905 (c) of the Merchant Marine Act, 1936, as amended by section 39 (b) of the Act of June 23, 1938 (49 Stat. 2016; 52 Stat. 964; 46 U.S.C. 1244 (c)), provides:

(c) The words "citizen of the United States" include a corporation, partnership, or association only if it is a citizen of the United States within the meaning of section 2 of the Shipping Act, 1916, as amended (U.S.C., title 46, sec. 802), and, in the case of a corporation, partnership, or association operating a vessel on the Great Lakes, or on bays, sounds, rivers, harbors, or inland lakes of the United States the amount of interest required to be owned by a citizen of the United States shall be not less than 75 per centum.

Section 2 of the Shipping Act, 1916, as amended (41 Stat. 1008; 46 U.S.C. 802, 803), provides:

SEC. 2. (a) That within the meaning of this Act no corporation, partnership, or association shall be deemed a citizen of the United States unless the controlling interest therein is owned by citizens of the United States, and, in the case of a corporation, unless its president and managing directors are citizens of the United States and the corporation itself is organized under the laws of the United States or of a State, Territory, District, or possession thereof, but in the case of a corporation, association, or partnership operating any vessel in the coastwise trade the amount of interest required to be owned by citizens of the United States shall be 75 per centum.

(b) The controlling interest in a corporation shall not be deemed to be owned by citizens of the United States (a) if the title to a majority of the stock thereof is not vested in such citizens free from any trust or fiduciary obligation in favor of any person not a citizen of the United States; or (b) if the majority of the voting power in such corporation is not vested in citizens of the United States; or (c) if through any contract or understanding it is so arranged that the majority of the voting power may be exercised, directly or indirectly, in behalf of any person who is not a citizen of the United States; or (d) if by any other means whatsoever control of the corporation is conferred upon or permitted to be exercised by any person who is not a citizen of the United States.

(c) Seventy-five per centum of the interest in a corporation shall not be deemed to be owned by citizens of the United States (a) if the title to 75 per centum of its stock is not vested in such citizens free from any trust or fiduciary obligation in favor of any person not a citizen of the United States; or (b) if 75 per centum of the voting power in such corporation is not vested in citizens of the United States; or (c) if, through any contract or understanding it is so arranged that more than 25 per centum of the voting power in such corporation may be exercised, directly or indirectly, in behalf of any person who is not a citizen of the United States; or (d) if by any other means whatsoever control of any interest in the corporation in excess of 25 per centum is conferred upon or permitted to be exercised by any person who is not a citizen of the United States.

(d) The provisions of this Act shall apply to receivers and trustees of all persons to whom the Act applies, and to the successors or assignees of such persons.

SEC. 48. DEFINITIONS.
When used in this chapter—
(a) *Taxable year.* "Taxable year" means the calendar year, or the fiscal year ending during such calendar year, upon the basis of which the net income is computed under this Part. "Taxable year" means, in the case of a return made for a fractional part of a year under the provisions of this chapter or under regulations prescribed by the Commissioner with the approval of the Secretary, the period for which such return is made.
(b) *Fiscal year.* "Fiscal year" means an accounting period of twelve months ending on the last day of any month other than December.

Section 3791 of the Internal Revenue Code, 53 Stat. 467; 26 U.S.C. 3791, in part provides:

SEC. 3791. RULES AND REGULATIONS. (a) *Authorization*—(1) *In general.* • • • the Commissioner, with the approval of the Secretary, shall prescribe and publish all needful rules and regulations for the enforcement of this title.
(2) *In case of change in law.* The Commissioner may make all such regulations, not otherwise provided for, as may have become necessary by reason of any alteration of law in relation to internal revenue.
(b) *Retroactivity of regulations or rulings.* The Secretary, or the Commissioner with the approval of the Secretary, may prescribe the extent, if any, to which any ruling, regulation, or Treasury Decision, relating to the internal revenue laws, shall be applied without retroactive effect.

Pursuant to the foregoing provisions of law, the following regulations are hereby prescribed and Treasury Decision 5035, General Order 38 of the United States Maritime Commission, promulgated January 31, 1941, [Part 32, Title 26, Code of Federal Regulations, 1941 Supp.] is hereby superseded as of June 17, 1943.

§ 32.1 *Definitions.* As used in these regulations, except as otherwise indicated by the context:

(a) The term "Act" means the Merchant Marine Act, 1936, as amended;

(b) The term "statute" means section 511 of the Merchant Marine Act, 1936, as amended;

(c) The term "section" means one of the sections of these regulations;

(d) The terms "Commission" and "Maritime Commission" mean the United States Maritime Commission;

(e) The term "citizen" means a person who, if an individual, was born or naturalized as a citizen of the United States or, if other than an individual, meets the requirements of section 905 (c) of the act and section 2 of the Shipping Act, 1916, as amended;

(f) The term "taxpayer" means a citizen who has established or seeks to establish a construction reserve fund under the provisions of the statute and this part, and may include a partnership;

(g) The term "corporation" includes associations and joint stock companies;

(h) The term "stock" includes the share in an association or joint-stock company.

Insofar as the computation and collection of taxes are concerned, other terms used in this part, except as otherwise indicated by the context, have the same meaning as in the Internal Revenue Code and the regulations thereunder.

§ 32.2 *Scope of statute.* The statute provides, under conditions specified, for the nonrecognition for income and excess-profits tax purposes of the gain realized from the sale or indemnification for loss of certain vessels including certain vessels in course of construction, or shares therein. It also permits the accumulation of the proceeds of such sales or indemnifications and of certain earnings without liability under section 102

[1] June 17, 1943.

of the Internal Revenue Code. (For the normal application of section 102, see §§ 29.102–1 to 29.102–4, inclusive, of this chapter, and the corresponding provisions of prior regulations.)

The benefits of the statute are available to any citizen as defined in § 32.1 (e), who during any taxable year beginning after December 31, 1939, owns, in whole or in part, a vessel or vessels within the scope of § 32.3. A citizen operating such a vessel or vessels owned by any other person or persons can derive no benefit from the provisions relating to the nonrecognition of gain from the sale or loss of such vessel or vessels so owned, but may establish a construction reserve fund in which he may deposit earnings from the operation of such vessel or vessels.

The statute applies only with respect to sales or losses of vessels within the scope of § 32.3 occurring within a taxable year beginning after December 31, 1939, or in respect of earnings derived from the operation of such vessels during a taxable year beginning after December 31, 1939. A loss to be within the statute must be an actual or constructive total loss. Whether there is a total loss, actual or constructive, will be determined by the Maritime Commission. As to what proceeds, earnings, or receipts may be deposited in the construction reserve fund, see §§ 32.13 and 32.14. The loss of a vessel which occurs during a taxable year beginning prior to December 31, 1939, is not within the scope of the statute, even though the taxpayer is indemnified during a later year.

§ 32.3 *Requirements as to operation.* The statute applies with respect to vessels operated in the foreign or domestic commerce of the United States or in the fisheries, and vessels acquired or being constructed for the purpose of such operation. The foreign commerce of the United States includes commerce or trade between the United States (including the District of Columbia), the Territories and possessions which are embraced within the coastwise laws, and a foreign country or other Territories and possessions of the United States. The domestic commerce of the United States includes commerce or trade between ports of the United States and its Territories and possessions, embraced within the coastwise laws. The fisheries include the fisheries of continental United States and its Territories and possessions, except the Philippine Islands (see section 5, 39 Stat. 547; 48 U.S.C. 1003). The statute does not apply to vessels operated in the foreign commerce or fisheries of any country other than the United States.

§ 32.4 *Application to establish fund.* Any person claiming to be entitled to the benefits of the statute may make application, in writing, to the Commission for permission to establish a construction reserve fund. The application shall be in such form and substance as the Commission may prescribe and shall designate, among other things, the depository or depositories with which the applicant proposes to establish the said fund. The original application shall be executed and verified by the taxpayer, or if the taxpayer is a corporation, by one of its principal officers, in triplicate, and shall be accompanied by eight (8) conformed copies when filed with the Commission.

§ 32.5 *Tentative authorization to establish fund.* Where the time between the receipt by the Commission of the application for permission to establish a construction reserve fund and the date prior to which an amount received from the sale or loss of a vessel must be deposited to come within the scope of the statute is insufficient to permit a determination of the eligibility of the applicant, the Commission may tentatively authorize the establishment of a construction reserve fund and the deposit of such amount therein. Such tentative authorization shall be subject to rescission by the Commission, if subsequently it is determined that the applicant is not entitled to the benefit of the statute, and, upon such determination, the fund shall be closed and all amounts on deposit therein shall be withdrawn.

§ 32.6 *Establishment of fund.* If the application is approved by the Commission, the Commission will adopt a resolution authorizing the establishment of a construction reserve fund with the depository or depositories designated by the taxpayer and approved by the Commission. The resolution will provide for joint control by the Commission and the taxpayer over such fund, will set forth the conditions governing the establishment and maintenance of the fund and the making of deposits therein and withdrawals therefrom, and will designate the representatives authorized to execute instruments of withdrawal on behalf of the Commission.

A certified copy of the resolution of the Commission will be furnished the taxpayer. If the taxpayer is a corporation, it shall promptly adopt, through its board of directors, a resolution satisfactory in form and substance to the Commission, authorizing the establishment and maintenance of the fund in conformity with the action of the Commission. If the taxpayer is not a corporation it shall promptly execute an agreement with the depository satisfactory in form and substance to the Commission to conform to the action of the Commission as set forth in the resolution. Certified copies of the resolutions of the Commission and of the taxpayer (if it is a corporation) will be furnished to the depository by the Commission and the taxpayer respectively for its guidance in maintaining the fund and honoring instruments of withdrawal. The taxpayer, if a corporation, shall also furnish the Commission with a certified copy of its resolution, or if not a corporation, a duplicate original of its agreement with the depository.

§ 32.7 *When reimbursement out of a construction reserve fund permitted.* If, prior to the establishment of a construction reserve fund under these regulations, a taxpayer has made necessary payments under a contract, which satisfies the provisions of these regulations and the statute, for the construction or acquisition of a new vessel, such taxpayer may, if subsequently authorized to establish a construction reserve fund under these regulations, draw against such fund as reimbursement for the amount, if any, of other funds which, with the approval or ratification of the Commission, the taxpayer used prior to the establishment of the fund for the purpose of making such necessary payments.

§ 32.8 *Investment of funds in securities.* Interest-bearing direct obligations of the United States, or obligations fully guaranteed as to principal and interest by the United States, may be deposited in the construction reserve fund in lieu of cash, and such obligations may also be purchased with cash on deposit in the fund. In instances where the taxpayer desires to deposit any other securities in the fund in lieu of cash, or to purchase such other securities with cash on deposit in the fund, the taxpayer shall make written application to the Commission and shall not consummate the transaction until the written consent of the Commission shall have been received. The application shall describe the securities fully. Every approval of such application by the Commission shall be conditioned upon agreement by the taxpayer forthwith to dispose of such securities upon subsequent request by the Commission. Immediately upon the purchase of any securities for deposit in the fund, the taxpayer shall advise the Commission, giving the date of purchase, a description of the securities, and the price paid therefor (net, brokerage and other charges, and gross). Ordinarily, the Commission will not approve the deposit in the fund in lieu of cash, or the purchase with cash on deposit in the fund, of securities not actively traded in on exchanges registered under the "Securities Exchange Act of 1934", or securities which are not legal for investment of trust funds.

§ 32.9 *Valuation of securities in fund.* In cases where securities are deposited in the fund in lieu of cash, or are purchased with cash on deposit in the fund, the "market value" of such securities must not be less than the amount of cash in lieu of which they are so deposited or with which they are so purchased. For the purpose of determining the amount in the fund, the "market value" of securities shall be determined in the following manner:

(a) In instances where no actual purchase is involved, such as the initial deposit of securities in the fund in lieu of cash, the last sales price thereof on the principal exchange on the day the deposit was made shall be deemed to be the "market value" thereof, or, if no such sales were made, the "market value" thereof will be determined by the Commission on such basis as it may deem to be fair and reasonable in each case.

(b) With respect to transactions involving the purchase of securities with cash on deposit in the fund, "market value" shall be the gross price paid (adjusted for accrued interest); *Provided,* That if such securities are purchased otherwise than upon a registered exchange the price shall be within the range of transactions on the exchange on the date of such purchase, or, if there were no such transactions, then the "market value" thereof will be determined by the Commission on such basis as it may deem to be fair and reasonable in each case.

If the securities on deposit in the fund are replaced by cash from the general funds of the taxpayer, the amount of cash to be deposited in the fund in lieu thereof shall be not less than the amount at which such securities were valued at the time of their deposit in the fund.

Purchase money obligations secured by vessels sold or irrevocable commitments to finance the construction or acquisition of new vessels which are deposited in the construction reserve fund as provided in § 32.13 ordinarily will be considered as equivalent to their face value.

§ 32.10 *Withdrawals from fund.* Checks, drafts, or other instruments of withdrawal to meet obligations under a contract for the construction or acquisition of a new vessel or vessels, after having been executed by the taxpayer, shall be forwarded to the commission at Washington with appropriate explanation of the purpose of the proposed withdrawal, including properly certified invoices or other supporting papers. Such instruments of withdrawal, if payable to the Commission, will be deposited by the Commission for collection, and the proceeds thereof, upon collection, will be credited to the appropriate contract with the Commission; but if drawn to the order of payees other than the Commission, after countersignature on behalf of the Commission, will ordinarily be forwarded to the payees.

An amount obligated under a contract for the construction or acquisition of a new vessel or vessels, whether the obligor has the entire or a partial interest therein within the scope of the statute, may not, so long as the contract continues in full force and effect, be withdrawn except to meet payments due or to become due under such contract.

Checks, drafts, or other instruments of withdrawal executed by the taxpayer for purposes other than to meet obligations under a contract for the construction or acquisition of a new vessel or vessels, whether the taxpayer has the entire or a partial interest therein, shall be drawn by the taxpayer to its own order and forwarded to the Commission at Washington, with appropriate explanation of the purpose of the proposed withdrawal. Such withdrawals may occur by reason of a determination by the Commission that the applicant is not entitled to the benefits of the statute (see § 32.5), or that a particular deposit has been improperly made (see § 32.13), or by reason of the election of the taxpayer to make such withdrawals. Upon receipt of such checks, drafts, or other instruments of withdrawal, the Commission shall give notice thereof to the Commissioner of Internal Revenue. The Commissioner shall advise the Commission of the receipt of the notice and the date it was received. The Commission shall not countersign such checks, drafts, or other instruments of withdrawal or transmit them to the taxpayer until the expiration of 30 days from the date of receipt of the notice by the Commissioner, unless the Commissioner or such official of the Bureau of Internal Revenue as he may designate for the purpose consents in writing to earlier countersignature by the Commission and transmittal to the taxpayer.

Upon the expiration of such 30-day period, or prior thereto if the aforesaid consent of the Commissioner has been obtained, the Commission will countersign the check, draft, or other instrument of withdrawal and forward it to the taxpayer.

The provisions of this section shall not be applicable to transactions deemed to be withdrawals by reason of the sale of securities held in the fund, for an amount less than the market value thereof at the time of their deposit (see § 32.21), nor to the cancellation of an irrevocable commitment deposited in the fund, upon proof satisfactory to the Commission that the terms of such commitment have been fully satisfied.

§ 32.11 *Time deposits.* Deposits in the construction reserve fund not invested in securities may be placed in time deposits when, in the judgment of the taxpayer, it is desirable and feasible so to do.

The taxpayer shall promptly advise the Commission of any time deposit arrangements made with the depository. The Commission reserves the right at any time to require the termination or modification of any such arrangements.

§ 32.12 *Election.* As a prerequisite to nonrecognition of gain on the sale or loss of a vessel, or a part interest therein as provided by the statute, the taxpayer, after establishing a construction reserve fund, must make an election in his income tax return, or if a partnership in the partnership return of income, for the taxable year in which the gain is realized. The election shall be with respect to each vessel or share therein and shall be shown by a statement to that effect, submitted as a part of, and attached to, the return. The statement, which need not be on any prescribed form, shall set forth a computation of the amount of the realized gain, the identity of the vessel, the nature and extent of the taxpayer's interest therein, whether such vessel was sold or lost and the date of sale or loss, the full price or full amount of indemnity, and the amount and date of each payment thereof, the basis for tax purposes and any other data affecting the determination of the realized gain.

Deposit of an amount equal to the net proceeds of the sale or loss of the vessel or of the taxpayer's interest therein must be made within the period specified in § 32.15 and may not be delayed beyond the specified period to await the execution or filing of a statement of election.

§ 32.13 *Deposit of proceeds of sales or indemnities.* The deposit required by the statute must be made in a construction reserve fund, established with a depository or depositories approved by the Commission and subject to the joint control of the Commission and the taxpayer. It is not necessary to establish a separate fund with respect to each vessel or share in a vessel sold or lost. However, with respect to any vessel sold or lost, or a share therein, the deposit must be in an amount equal to the "net proceeds" of the sale, or the "net indemnity" for the loss. By "net proceeds" and "net indemnity" is meant (1) the depositor's interest in the adjusted basis of the vessel plus (2), the amount of gain which would be recognized for tax purposes in the absence of the statute. In determining "net proceeds" the amount necessarily paid or incurred for brokers' commissions is to be deducted from the gross amount of the sales price. In determining "net indemnity", the amount necessarily paid or incurred purely for collection, or rate of exchange discounts on the payment, of the indemnity is to be deducted from the gross amount of collectible indemnity. Where the proceeds from the sale of a vessel include purchase money obligations, such obligations together with the entire collateral therefor, or in case of deposit of the proceeds of a share in the vessel a proportionate part of the obligations and collateral as determined by the Commission, shall be deposited, with the remainder of the proceeds, in the construction reserve fund as a part of the "net proceeds". The depository shall receive payment of all amounts due on such purchase money obligations and such amounts shall be placed in the fund in substitution for the portion of the obligations paid. If the taxpayer so desires, he may deposit in the construction reserve fund cash or approved securities in an amount equal to the face value of any purchase money obligations in lieu of depositing such obligations.

The taxpayer must deposit the full amount of each payment (including cash, notes, or other evidences of indebtedness) as a single deposit in the construction reserve fund. A payment divided between two or more depositories will be regarded as a single deposit. Amounts received by the taxpayer prior to the date of consummation of the sale of the vessel shall be considered as having been received by the taxpayer at the time the sale is consummated.

Where a vessel is subject to a mortgage or other encumbrance at the time of its sale or loss and the taxpayer actually receives only an amount representing the equity therein or a share in such equity corresponding to his share in the vessel, he shall deposit in the construction reserve fund the amount received and concurrently therewith other funds in an amount equal to the difference between the amount received and the "net proceeds" or "net indemnity". Such other funds may be in the form of cash, or, subject to the approval of the Commission, (1) interest-bearing securities, or (2) an irrevocable commitment to

finance the construction or acquisition of a new vessel in whole or in part by an obligor approved by the Commission in an amount equal to the amount by which the "net proceeds" exceeds the cash or securities deposited in the fund.

In case of the sale or loss of several vessels or shares therein, a deposit of the "net proceeds" or "net indemnity" with respect to one or more of the vessels or shares is permissible. Where several vessels or shares are sold for a lump sum, the "net proceeds" allocated to each vessel or share shall be determined in accordance with any reasonable rule satisfactory to the Commissioner of Internal Revenue.

A deposit which is not provided for by the statute shall, without unreasonable delay, be withdrawn from the fund and tax liability will be determined as though such deposit had not been made. (See §§ 32.10 and 32.22.)

§ 32.14 *Deposit of earnings and receipts.* A citizen may deposit all or any part of earnings derived from operation, within the scope of § 32.3, of a vessel or vessels owned either by himself or any other person. Such earnings may include payments received by an owner, as compensation for use of his vessel, from other persons by whom it is so operated. Earnings from other sources may not be deposited. Only earnings intended for construction or acquisition of new vessels may be deposited. The earnings deposited must be of taxable years beginning after December 31, 1939.

The earnings from operation of vessels which are eligible for deposit are the net earnings determined without regard to any deduction for depreciation, obsolescence, or amortization with respect to such vessels. Receipts from deposited funds, in the form of interest or otherwise, may be deposited.

§ 32.15 *Time for making deposits.* Deposits of amounts representing proceeds of the sale or indemnification for loss of a vessel or share therein must be made within 60 days after receipt by the taxpayer, except that (1) amounts received on or before December 9, 1940, may be deposited not later than February 7, 1941, and (2) amounts received at any time between May 27, 1941, and June 17, 1943, the deposit of which is authorized by the amendments to subsection (b) of section 511 of the act, made by Public Law 78, approved June 17, 1943, may be deposited not later than October 15, 1943, and the Commission may approve any such deposit previously made between May 27, 1941, and June 17, 1943, if in other respects it complies with the provisions of the statute and these regulations.

Earnings and receipts, within the scope of the statute, of taxable years beginning after December 31, 1939, may be deposited at any time. (See § 32.14.)

§ 32.16 *Tax liability as to earnings deposited.* Deposit in the construction reserve fund of earnings from operation of a vessel or vessels, or receipts, in the form of interest or otherwise, with respect to amounts previously deposited does not exempt the taxpayer from tax liability with respect thereto. Earnings and receipts deposited in a construction reserve fund established in accordance with the provisions of the statute and these regulations do not constitute an accumulation of earnings or profits within the meaning of section 102 of the Internal Revenue Code as long as the requirements of the statute and these regulations relative to the use of the fund in the construction or acquisition of new vessels are satisfied. For application of the statute in case earnings or receipts so deposited are later withdrawn for purposes other than the construction or acquisition of new vessels, or there is failure otherwise to comply with the statute or these regulations, see § 32.21.

§ 32.17 *Allocation of gain for tax purposes.* If the "net proceeds" of a sale or the "net indemnity" in respect of a loss are deposited in more than one deposit, the gain will be considered as first deposited. Amounts expended, obligated, or withdrawn will be applied against the amounts deposited in the order of deposit. If any deposit consists in part of gain not recognized under the statute, any expenditure, obligation, or withdrawal applied against such deposit will be considered to consist of gain in the proportion that the part of the deposit consisting of gain bears to the total amount of the deposit. If amounts on deposit in a construction reserve fund are expended, obligated, or withdrawn for construction or acquisition of new vessels, the portion thereof which represents gain will be applied in reduction of the basis of such new vessels for determining gain or loss, and for depreciation, for the purpose of Federal income or excess-profits taxes. If any amounts are withdrawn for purposes other than the construction or acquisition of new vessels, the portion thereof which represents gain, if otherwise constituting taxable income under the law applicable to the taxable year in which such gain was realized, will be included in the gross income for such taxable year, except for the purpose of the declared value excess-profits tax and the capital stock tax. (See § 32.22.)

The date funds are obligated under a contract for the construction or acquisition of a new vessel, rather than the date of payment from the fund, will determine the order of application against the deposits in the fund. When a contract for the construction or acquisition of a new vessel is entered into, amounts on deposit in the construction reserve fund will be deemed to be obligated to the extent of the amount of the taxpayer's liability under the contract. Deposits will be deemed to be so obligated in the order of deposit, each new contract obligating the earliest deposit not previously expended, obligated, or withdrawn. If the liability under the contract exceeds the amount in the construction reserve fund, the contract will be deemed to obligate, to the extent of that part of such excess not otherwise satisfied, the earliest deposit or deposits thereafter made.

Example. A taxpayer who makes his returns on the calendar year basis sells a vessel in 1941 for $1,000,000, realizing a gain of $400,000. $100,000 of the sale price is received in March 1941 when the contract is signed, and the balance of $900,000 is received in June 1941 on delivery of the vessel. The $1,000,000 is deposited in a construction reserve fund in July 1941. In December 1941 the taxpayer also deposits $150,000, representing earnings of that year. In 1942 he sells another vessel for $1,000,000, realizing a gain of $250,000. The sale price of $1,000,000 is received on delivery of the vessel in February 1942 and deposited in the construction reserve fund in March 1942. In September 1942 the taxpayer purchases for cash out of the construction reserve fund a new vessel for $1,750,000. To the cost of this vessel must be allocated the 1941 deposits of $1,150,000 and $600,000 of the March 1942 deposit. This leaves in the fund $400,000 of the March 1942 deposit. The amount of the unrecognized gain to be applied against the basis of the new vessel is as follows: $400,000 gain represented in the 1941 deposits, plus the same proportion of the $250,000 gain represented in the March 1942 deposit ($1,000,000) which the amount ($600,000) allocated to the vessel is of the amount of the deposit, i. e., $400,000 plus $\frac{600,000}{1,000,000}$ of $250,000, or $150,000, a total of $550,000. This reduces the basis of the new vessel to $1,200,000 ($1,750,000 less $550,000).

In 1943 the taxpayer sells a third vessel for $3,000,000, realizing a gain of $900,000. The $3,000,000 is received and deposited in the construction reserve fund in June 1943, making a total in the fund $3,400,000. In December 1943 the taxpayer contracts for the construction of a second new vessel to cost a maximum of $3,200,000, thereby obligating that amount of the fund, and in June 1944 receives permission to withdraw the unobligated balance amounting to $300,000. To the cost of the second new vessel must be allocated the $400,000 balance of the March 1942 deposit and $2,800,000 of the June 1943 deposit. The unrecognized gain to be applied against the basis of such new vessel is that proportion of the gain represented in each deposit which the portion of the deposit allocated to the vessel bears to the amount of such deposit, i. e., $\frac{400,000}{1,000,000}$ of $250,000, or $100,000 plus $\frac{2,800,000}{3,000,000}$ of $900,000, or $840,000, making a total of $940,000. The $200,000 withdrawn is applied against the June 1943 deposit and the portion thereof which represents gain will be recognized as income for 1943, the year in which realized. The computation of the recognized gain is as follows: $\frac{200,000}{3,000,000}$ of $900,000, or $60,000.

§ 32.18 *Requirements as to new vessels.* For the purposes of the statute and these regulations, the new vessel must be:

(a) Documented under the laws of the United States when it is acquired by the taxpayer, or the taxpayer must agree that when acquired it will be documented under the laws of the United States;

(b) (1) Constructed in the United States after December 31, 1939, or (2) its construction must have been financed under Title V or Title VII of the act, or (3) its construction must have been aided by a mortgage insured under Title XI of the act; and

(c) Either (1) of such type, size, and speed as the Maritime Commission determines to be suitable for use on the high seas or Great Lakes in carrying out the purposes of the act, but of not less than 2,000 gross tons or of less speed than 12 knots, except that a particular vessel may be of lesser tonnage or speed if the Maritime Commission determines and certifies that the particular vessel is desirable for use by the United States in case of war or national emergency, or (2) constructed to replace a vessel or vessels requisitioned or purchased by the United States, in which event it must be of such type, size, and speed as to constitute a suitable replacement for the vessel requisitioned or purchased, but if a vessel already built is acquired to replace a vessel or vessels requisitioned or purchased by the United States, such vessel must meet the requirements set forth in subparagraph (1) of this paragraph.

A vessel will be deemed to be constructed after December 31, 1939, only if construction was commenced after that date. Subject to the provisions of this section, a new vessel may be newly built for the taxpayer, or may be acquired after it is built.

It is not necessary that vessels shall be replaced vessel for vessel. The new vessels may be more or less in number than the replaced vessels, provided the other requirements of this section are met.

§ 32.19 *Contracts obligating deposits.* A contract for the construction or acquisition of a new vessel entered into prior to October 10, 1940, or a contract which supersedes, amends ,or supplements such a contract, is not within the scope of the statute. Unless otherwise authorized by the Commission, contracts for the construction of new vessels must be for a fixed price, or provide for a base price that may be adjusted for changes in labor and material costs up to but not exceeding 15 percent of the base price. Plans and specifications for the new vessel or vessels must be approved by the Commission to the extent it deems necessary. A deposit in a construction reserve fund may be expanded or obligated for expenditure for procurement under an acquisition or construction contract of a part interest in a new vessel or vessels, but only after obtaining the written consent of the Commission. The granting of such consent shall be entirely in the discretion of the Commission and it may impose such conditions with respect thereto as it may deem necessary or advisable for the purpose of carrying out the provisions of the statute. Applications for such consent shall be executed in triplicate, and, together with eight conformed copies thereof, filed with the Commission.

Within two years from the date of any deposit in a construction reserve fund, unless extension is granted as hereinafter provided, such deposit must be obligated under a contract for the construction or acquisition of a new vessel or vessels (or in the discretion of the Commission for a share therein), and at least 12½ percent of the construction or contract price of the entire vessel or vessels must be actually paid or irrevocably committed on account thereof. Amounts on deposit in a construction reserve fund will be deemed to be obligated for expenditure when a binding construction or purchase contract has been entered into and will be deemed to be irrevocably committed when due and payable in accordance with the terms of the contract of construction or acquisition. The Commission may, upon application and a showing of proper circumstances, allow an extension or extensions of time within which the contract shall be entered into and the deposits expended or obligated, or the 12½ percent of the construction or contract price paid or irrevocably committed, not to exceed two years in the aggregate, except that until the termination of the present war or until such earlier date as the Congress by concurrent resolution or the President may designate, further extensions may be granted by the Commission. Such further extensions may not run longer than six months after such termination or earlier date.

A taxpayer seeking an extension shall make application therefor, and transmit it with an appropriate statement of the circumstances, and appropriate documents in substantiation of the statement, to the Maritime Commission. The Commission will notify the Commissioner of Internal Revenue of any extension granted. In case an application for extension is denied, the taxpayer will be liable for delay as though no application had been made.

§ 32.20 *Period for construction.* A new vessel constructed otherwise than under the provisions of Title V of the act, and not purchased from the Maritime Commission, must, within six months from the date of the construction contract, or within the period of any extension, be completed to the extent of not less than 5 percent as estimated by the Maritime Commission and certified by it to the Secretary of the Treasury. In case of a contract covering more than one vessel it will be sufficient if one of the vessels is 5 percent completed within the six months' period from the date of the contract or within the period of any extension, and so certified. All construction must be completed with reasonable dispatch as determined by the Maritime Commission. If, for causes within the control of the taxpayer, the entire construction is not completed with reasonable dispatch, the Commission will so certify to the Secretary of the Treasury. For the effect of such certification, see § 32.21.

The Maritime Commission may, upon application and a showing of satisfactory reasons therefor, grant an extension or extensions of time within which the 5 percent of construction shall be completed, but such extensions shall not aggregate more than one year, except that until the termination of the present war or until such earlier date as the Congress by concurrent resolution or the President may designate, further extensions may be granted by the Commission. Such further extensions may not run longer than six months after such termination or earlier date. Application for extension shall be made in accordance with the procedure indicated by § 32.19. In case an application for extension is denied, the taxpayer will be liable for delay as though no application had been made.

§ 32.21 *Noncompliance with requirements.* Withdrawal from the construction reserve fund for purposes other than the construction or acquisition of new vessels, or failure to comply with the requirements of the statute or the regulations relative to the utilization of such funds in the construction or acquisition of new vessels, will result in the recognition, for the taxable year in which realized, of the amount of the gain represented in that portion of the fund involved. If securities on deposit in a construction reserve fund are sold and the amount placed in the fund in lieu thereof is less than the market value of the securities at the time of their deposit, the difference between such market value and the amount placed in the fund in lieu of the securities will be deemed to have been withdrawn.

In the event of noncompliance with the prescribed conditions relative to any contract for construction or acquisition of new vessels, recognition will extend to the entire amount of the gain represented in that portion of the construction reserve fund obligated under such contract. Thus, if the Maritime Commission determines and certifies to the Secretary of the Treasury that for causes within the control of the taxpayer construction under a contract is not completed with reasonable dispatch, the entire amount of the gain represented in the portion of the construction reserve fund obligated under the contract will be recognized even though all other conditions have been satisfied. In case of noncompliance with the requirements of the statute or these regulations, see § 32.17 as to the allocation of gain.

Noncompliance with the provisions of the statute or these regulations relative to the utilization of the deposited amounts may also, inasmuch as the statutory presumption of paragraph (f) of this section is then inapplicable, warrant an examination to ascertain whether such amounts constitute an unreasonable accumulation of earnings and profits within the meaning of section 102 of the Internal Revenue Code. Under that section and the regulations thereunder, if such amounts are deposited and the fund maintained in good faith for the purpose of the construction or acquisition of new vessels, such amounts will not constitute an unreasonable accumulation.

§ 32.22 *Extent of tax liability.* Inclusion of gain in gross income shall be for all income and excess-profits tax purposes, but not for the purposes of the declared value excess-profits tax and the capital stock tax. In lieu of any adjustment with respect to the declared value excess-profits tax, there is imposed for the taxable year in which the gain was realized (see § 32.17) an additional tax of 1.1 percent of the amount of the gain. No additional capital stock tax liability is incurred.

In the case of deposits in the construction reserve fund of amounts derived from sources other than those specified in the statute, or in the case

of failure to deposit an amount equal to the "net proceeds" or "net indemnity" within the prescribed statutory period, the taxpayer obtains no suspension or postponement of any tax liability and the tax is collectible without regard to the provisions of the statute. (See § 32.13.)

§ 32.23 *Assessment and collection of deficiencies.* Any additional tax, including the 1.1 percent of the amount of the gain imposed in lieu of declared value excess-profits tax, due on account of withdrawal from a construction reserve fund, or failure to comply with the provisions of the statute or the regulations, is collectible as a deficiency. Interest upon such deficiency will run from the date the withdrawal or noncompliance occurs. The amount of any deficiency, including interest and additions to the tax, determined as a result of such withdrawal or noncompliance, may be assessed, or a proceeding in court for the collection thereof may be begun without assessment, at any time and without regard to any period of limitations or any other provisions of law or rule of law, including the doctrine of res judicata.

§ 32.24 *Reports by taxpayers.* With each income tax return filed for a taxable year during any part of which a construction reserve fund is in existence the taxpayer shall submit a statement setting forth a detailed analysis of such fund. The statement, which need not be on any prescribed form, shall include the following information with respect to the construction reserve fund:

(1) The actual balance in the fund at the beginning and end of the taxable year;

(2) The date, amount, and source of each deposit during the taxable year;

(3) If item (2) consists of proceeds from the sale, or indemnification of loss, of a vessel or share thereof, the amounts of the unrecognized gain;

(4) The date, amount and purpose of each expenditure or withdrawal from the fund; and

(5) The date and amount of each contract, under which deposited funds are deemed to be obligated during the taxable year, for construction or acquisition of a new vessel and the identification of such vessel.

Taxpayers shall keep such records and make such additional reports as the Commissioner of Internal Revenue or the Maritime Commission may require.

§ 32.25 *Construction or acquisition by controlled corporation.* For the purposes of the statute and these regulations a new vessel is considered as constructed or acquired by the taxpayer if constructed or acquired by a corporation at a time when the taxpayer owns not less than 95 percent of the total number of shares of each class of stock of the corporation.

§ 32.26 *Basis of new vessel.* The basis for determining gain or loss and for depreciation for the purpose of Federal income or excess-profits taxes with respect to a new vessel constructed or acquired by the taxpayer with funds deposited in the construction reserve fund, is reduced by the amount of the unrecognized gain represented in the funds allocated under the provisions of these regulations to the cost of such vessel. (See § 32.17.)

§ 32.27 *Administrative jurisdiction.* Sections 32.3 to 32.11, inclusive, and §§ 32.18 to 32.20, inclusive, deal primarily with matters under the jurisdiction of the Maritime Commission. Sections 32.12, 32.16, and 32.17 and §§ 32.21 to 32.26, inclusive, deal primarily with matters under the jurisdiction of the Commissioner of Internal Revenue. Generally, matters relating to the establishment, maintenance, expenditure, and use of construction reserve funds and the construction or acquisition of new vessels are under the jurisdiction of the Maritime Commission; and matters relating to the determination, assessment and collection of taxes are under the jurisdiction of the Commissioner of Internal Revenue. Correspondence should be addressed to the particular authority having jurisdiction in the matter.

ROBERT E. HANNEGAN,
Commissioner of Internal Revenue.
JOHN L. SULLIVAN,
Acting Secretary of the Treasury.

Secretary.

MONTHLY BOARD OF APPEAL ACTION REPORT

ORDER PRESCRIBING FORM

[No. 240]

Pursuant to authority contained in the Selective Training and Service Act of 1940, as amended, I hereby prescribe the following change in DSS Forms:

Revision of DSS Form 109, entitled "Monthly Board of Appeal Action Report,"[1] effective immediately upon the filing hereof with the Division of the Federal Register. Upon receipt of the revised DSS Form 109, the use of the former supply of DSS Form 109 will be discontinued and all unused copies will be disposed of.

Chapter IX—War Production Board

Subchapter B—Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 5 55tat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 1041—PRODUCTION, TRANSPORTATION, REFINING AND MARKETING OF PETROLEUM

[Preference Rating Order P-98-b, as Amended Jan. 26, 1944[1]]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of critical materials for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1041.2 *Preference Rating Order P-98-b*—(a) *Purpose.* This order tells how persons engaged in the petroleum industry may obtain priorities assistance to secure material for their operations.

This order will not be used by foreign operators who will continue to use Priorities Regulation No. 9 and forms provided for in that regulation. Nor will the order be used to secure material to be used in the Territory of Hawaii. Such material may be obtained through the procedure established by the War Production Board Regional Office for Region X rather than through this order. Furthermore, this order will not be used by Canadian operators. All other operators must use the procedures of this order.

In general, this order provides priorities assistance to obtain material for three different purposes, and a separate procedure will be followed for each. They are as follows:

(1) Material for maintenance and repair purposes, operating supplies and laboratory equipment is secured under the MRO procedure, set out in the second major portion of this order (paragraphs (d), (e) and (f)). Preference ratings and an allotment symbol for controlled material are indicated and may be used in accordance with the procedure specified in that section.

(2) Material for most production activities, which include exploratory work and well drilling, is secured through the procedure described in the third major portion of this order headed, "Material for Use in Production" (paragraphs (g), (h), (i) and (j)). The preference rating to be used is indicated in paragraph (h). For controlled materials, however, an allotment number must be applied for unless use of the small order symbol is authorized. In either case, the preference rating and allotment number and symbol may be used only in accordance with the specified delivery order filing procedure, similar to that of the MRO provisions.

(3) A fourth major portion of this order (paragraphs (k), (l), (m) and (n)), describes how materials are secured for use in certain special production operations, natural gasoline recovery, transportation, refining and marketing. Here, application must be made for both a preference rating covering specific materials and an allotment of controlled materials. Any rating and allotment number assigned pursuant to such an application may be used without submitting delivery orders to the Petroleum Administration for War, unless the operator receives special instructions to the contrary.

The materials which are obtained under this order may be used only in accordance with the provisions of applicable Petroleum Administrative orders. A general description of the scope of these orders is given in the appropriate sections of this order.

(b) *Definitions.* (1) "Operator" means any person to the extent that he is engaged in the petroleum industry.

(2) "Petroleum" means crude oil, petroleum products and associated hydrocarbons, including but not limited to natural gas.

(3) "Petroleum industry" includes any of the following activities and any operation directly incident to these activities:

(i) The discovery, development or depletion of petroleum pools (production);

(ii) The extraction or recovery of natural gasoline and associated hydrocarbons (natural gasoline recovery);

(iii) The transportation, movement, loading or unloading of petroleum other than natural gas (transportation);

(iv) The processing, reprocessing or alteration of petroleum, including but not limited to compounding or blending (refining);

(v) The distribution or dispensing of petroleum products (other than natural gas) and the storing of petroleum products incident thereto (marketing);

and shall include for each of the above listed branches of the industry, to the extent applicable, the control of, or the investigation into more effective methods of conducting, petroleum industry operations by means of research, technical or control laboratories.

(4) "Maintenance and repair" means (without regard to accounting practice):

(i) The upkeep of any structure, equipment, or material in a sound working condition or the restoration or fixing of any structure, equipment, or material which has broken down or is worn out, damaged or destroyed;

(ii) Any other use of material not exceeding in material cost $500 for any one complete operation which has not been subdivided for the purpose of coming within this definition.

Maintenance and repair shall not include (*a*) the drilling, redrilling, deepening, plugging back, or multiple completion of any well or the initial installation on any well of pumping or other artificial lifting equipment, or (*b*) the extension or the initial construction or installation of a field gas gathering line, or (*c*) any use of material in connection with a service station or retail outlet other than for upkeep or restoration purposes, or (*d*) the installation or replacement in marketing of any "equipment" defined as such in Petroleum Administrative Order No. 12.

NOTE: Sub-divisions (c) and (d), formerly (b) and (c), redesignated Jan. 26, 1944.

(5) "Operating supplies" means any material other than material used for maintenance and repair which is essential to and consumed in the petroleum industry and which is normally carried by an operator as operating supplies or which is normally chargeable to operating expense, including among other items, chemicals, additives and blending agents.

(6) "Laboratory equipment" means material or equipment used exclusively for the purpose of controlling, or investigating more effective methods of conducting, petroleum industry operations by means of research, technical or control laboratories. This material or equipment shall not, however, include material for use in the construction of laboratory buildings or other structures.

(7) "Controlled material," "Class A product" and "Class B product" shall have the same meanings, respectively, as in CMP Regulation No. 1 of the War Production Board.

(8) "Delivery order" means any purchase order, contract, release or shipping instruction which constitutes a definite and complete instruction from a purchaser to a seller calling for delivery of any material or product. The term does not include any contract, purchase order, or other arrangement which, although specifying the total amount to be delivered, contemplates that further instructions are to be given before delivery is made.

(9) "Authorized controlled material order" means any delivery order for any controlled material as such (as distinct from a product containing controlled material) which is placed pursuant to an allotment as provided in this order or which is specifically designated to be such by any regulation or order of the Petroleum Administration for War or the War Production Board.

(c) *Priorities assistance for services and particular materials.* (1) An MRO rating assigned by this order may be used to secure services to the extent consistent with Priorities Regulation 3.

(2) No operator may apply a preference rating to obtain any material listed on Schedule A of this order.

(3) No operator may apply a preference rating to obtain any material listed on Schedule B except in accordance with the procedure described in that schedule.

NOTE: Paragraphs (c) (4), (5), (6) and (7), formerly (c) (3), (4), (5) and (6), redesignated Jan 26, 1944.

(4) Priorities assistance for the materials covered by Schedule C of this order may also be obtained under this order but only by filing the forms specified on that schedule in accordance with the instructions contained in that schedule. Schedule C includes all items on List B of Priorities Regulation 3 with the exception of those listed in Schedule B of this order.

(5) Priorities assistance may not be obtained under this order for material or equipment to be used by consumer accounts for or in the storage or dispensing of petroleum, including liquefied petroleum gas. Maintenance and repair for this type of equipment is covered under Preference Rating Order P-98-e.

(6) Priorities assistance may not be obtained under this order for tank trucks and trailers, railroad rolling stock, marine equipment or parts for any of these, unless the priorities assistance is used to secure the following:

(i) Material to be actually attached to a tank truck or trailer and necessary for containing, dispensing, measuring the movement of, or distributing petroleum;

(ii) Parts for railroad rolling stock, which rolling stock is owned or leased by the operator, is used on his premises and in the petroleum industry, and is not under the jurisdiction of the Interstate Commerce Commission;

(iii) Parts for marine equipment, which marine equipment is used or chartered by the operator, is used on or in the vicinity of his premises and in the petroleum industry, and for which no other method of securing priorities assistance exists.

Special methods for securing priorities assistance for the above equipment or equipment parts which may not be obtained under this order have been established by the Office of Defense Transportation, the Maritime Commision, and the War Production Board.

(7) Priorities assistance may not be obtained under this order for "residential construction" or "multiple residential construction", as defined in Order L-41 where the construction is in connection with natural gasoline recovery, transportation, refining or marketing. Priorities assistance may, on the other hand, be obtained under this order for material to be used as "lease equipment", as that term is defined in Petroleum Administrative Order No. 11.

[1] This document is a restatement of Amendment 1 to P-98-b as amended October 29, 1943, as it appeared in the FEDERAL REGISTER of January 27, 1944, page 961, and reflects the order in its completed form as of January 26, 1944.

MRO Material—Maintenance and Repair, Operating Supplies, and Laboratory Equipment

(d) *Allotment symbol and preference ratings.* To secure material for maintenance and repair, operating supplies or laboratory equipment (all known as MRO material) for use in any branch of the petroleum industry other than retail marketing an operator may use allotment symbol MRO–P–3 and preference rating AA–1. To secure MRO material for use in retail marketing an operator may use allotment symbol MRO–P–3 and preference rating AA–5.

(e) *How to use allotment symbol and preference rating.* To use the MRO allotment symbol and ratings, an operator must:

(1) Place the allotment symbol on delivery orders for controlled materials and the allotment symbol and preference rating on delivery orders for other MRO materials, certifying each delivery order in accordance with paragraph (r).

(2) Endorse on each delivery order of more than $100 (or accompany it by) a statement telling the specific use to which the material is to be put, the branch of the petroleum industry and the PAW District in which it is to be used, the approximate price, quantity and description of the material (including weight if it is a controlled material) and the month in which delivery of the material is required.

(3) Prior to placing each delivery order with a supplier, submit copies of the order to the District Office of the Petroleum Administration for War for the District in which the material will be used (or, if so desired by an operator in any branch of the industry other than production, for the District in which the purchasing office of the operator is located), Ref: Materials Division, as follows:

(i) If the delivery order is for $100 or less, no copy need be submitted.

(ii) If the delivery order is for controlled materials (other than aluminum) and has a total cost of more than $100 but not more than $2,500 and has no item of more than $500, one copy must be submitted for information purposes.

(iii) If the delivery order is for controlled materials (other than aluminum) and has a total cost of more than $2,500, or has any item of more than $500, two copies must be submitted for approval, and an operator may not place such an order with a supplier until approval of the order has been returned to him.

(iv) If the delivery order is for other than controlled materials or for aluminum, and has a total cost of more than $100, one copy must be submitted for information purposes.

In the case of delivery orders for the special materials listed on Schedule B, the filing instructions set out in that schedule apply.

(4) An operator requiring aluminum as a controlled material need only comply with the previous subparagraphs of this paragraph (e) to obtain 500 pounds or less from all sources during a calendar quarter. If the quantity required is more than 500 pounds, he must apply by letter for permission to purchase the excess amount (furnishing the applicable information called for by paragraph (d) of Supplementary Order M–1–i) to the Aluminum and Magnesium Division, War Production Board, Ref: M–1–i. If approved the operator must then place his delivery orders in accordance with the previous subparagraphs of this paragraph (e).

(5) To use a preference rating obtained for MRO material pursuant to a Form WPB–541 (PD–1A) application, an operator must place on the delivery order the rating and allotment symbol P–3.

(f) *Emergency MRO materials.* Where there has been an actual breakdown or suspension of operations, and where the methods specified above will not get the material on the date and in the quantity required, an operator may request authority to secure emergency MRO material by letter, telegram or telephone to the District Office (in the case of production), or to the Washington Office (in all other cases), Ref: P–98–b, supplying the following information:

(1) Date of actual breakdown or suspension of operations and exact explanation as to what extent operations are affected.

(2) Description of equipment to be repaired and its function in maintaining continuous operation.

(3) Quantity, approximate price and detailed description of necessary material (including weight if a controlled material) and number and date of delivery order(s) thereof.

If information is supplied by telephone, it must be confirmed within three days by letter or telegram. No delivery order for emergency MRO material need be submitted to the Petroleum Administration for War but an operator shall not place a delivery order with a supplier for the emergency MRO material until approval has been received and the delivery order has been certified in accordance with paragraph (r).

Material for Use in Production

(g) *Scope of paragraphs (g), (h), (i), (j).* The following paragraphs under this general heading of "Material for Use in Production" set forth the methods to be used by a production operator in securing and using priorities assistance to get the material he will need for most of his operations. However, these paragraphs do not cover methods for obtaining priorities assistance for MRO material or material for use in the following special production operations:

Gas cycling operations for condensate recovery (including gathering and injection lines in connection therewith),
Gas desulphurization operations,
Gas dehydration operations,
Pressure maintenance operations, or
A gas lift compression plant or a field gas booster plant where the material to be installed or added increases the rated capacity of the plant more than 500 hp.

Methods for securing MRO material have been set forth in paragraphs (d), (e) and (f) above, while methods for securing material for special production operations are set forth in paragraphs (k), (l) and (m) which follow.

References made in paragraphs (h), (i) and (j) immediately below, to production allotment numbers and symbols and ratings or to materials for use in production, apply only to the acquisition and use of material for the production operations covered by these paragraphs. Such references do not apply to MRO material or to material for use in the special production operations listed above.

(h) *Allotment number and symbol and preference rating.*

(1) *Application must be made for allotment of controlled materials.* To obtain controlled materials for use in production, an operator must secure an allotment and an allotment number by applying on PAW Form 35, except that a small quantity of carbon steel may be obtained (without such an application) through the use of allotment symbol PSO (petroleum small order), as described in subparagraph (h) (2) immediately following. PAW Form 35 applications will be filed in triplicate (3) with the District Office of the Petroleum Administration for War for the District in which operations are to be conducted, Ref: Materials Division.

Operators should file PAW Form 35 at least three months prior to the beginning of the calendar quarter in which the controlled materials are to be delivered, where operations can be planned to permit such advance filing. Otherwise, applications on that form should be filed not less than one month prior to the proposed delivery date of the controlled materials.

Interim assistance may be requested at any time by filing PAW Form 35 as a supplemental application.

(2) *Small order exception for carbon steel.* As an exception to the rule stated in the preceding suparagraph that an operator must apply for an allotment of controlled materials, an operator may use allotment symbol PSO to secure the delivery of no more than 10 tons of carbon steel as a controlled material during any calendar quarter for use in production.

If an operator will require more than 10 tons of carbon steel in any calendar quarter, he should apply on PAW Form 35 for an allotment of the total quantity of his estimtated needs in the manner described in the preceding subparagraph. By so doing, the operator will be able to use allotment symbol PSO to obtain up to 10 tons of carbon steel for unanticipated needs discovered after the application has been filed, and will thus be relieved of the need to file many interim applications.

NOTE: Paragraph (h) (3), formerly (h) (2), redesignated Jan. 26, 1944.

(3) To secure materials, other than controlled materials, for use in production, an operator may use preference rating AA–2X.

(i) *How to use allotment number and symbol and preference rating.* To use his allotment number or symbol and preference rating, a production operator must:

(1) Indicate on each delivery order for controlled materials the allotment number (and PAW Form 35 serial number) or allotment symbol PSO (in the case of a small order); and indicate on each delivery order for other materials the preference rating and allotment symbol P–1; certifying each delivery order in accordance with paragraph (r).

(2) Endorse on each delivery order of more than $100 (or accompany it by) a statement telling the specific use to which the material is to be put, the branch of the petroleum industry and the PAW District in which it is to be used, and the approximate price, quantity and description of the material (including weight and PAW Form 35 application serial number, if any, if it is a controlled material), and the month in which delivery of the material is required.

(3) Prior to placing each delivery order with a supplier, submit copies of the order to the District Office of the Petroleum Administration for War for the District in which the material is to be used, Ref: Materials Division, as follows:

(i) If the delivery order is for $100 or less, no copy need be submitted.

(ii) If the delivery order is for controlled materials, and has a total cost of more than $100 but not more than $2,500, and has no item of more than $500, one copy must be submitted for information purposes.

(iii) If the delivery order is for controlled materials, and has a total cost of more than $2,500, or has any item of more than $500, two copies must be submitted for approval, and an operator may not place such an order with a supplier until approval of the order has been returned to him.

(iv) If the delivery order is for other than controlled materials, and has a total cost of more than $100, one copy must be submitted for information purposes.

In the case of delivery orders for the special materials listed on Schedule B, the filing instructions set out in that schedule apply.

(j) *How to obtain authority to use materials.* Use of material in production is controlled by Petroleum Administrative Order No. 11, as amended and supplemented from time to time. Unless authority is granted by PAO–11 or an amendment or supplement to that order, to use material in the particular production operation, the operator must obtain an exception under PAO–11.

Material for Use in Special Production Operations, Natural Gasoline Recovery, Transportation, Refining and Marketing

(k) *Scope of paragraphs (k), (l), (m), (n).* The following paragraphs under this general heading of "Material for Use in Special Production Operations, Natural Gasoline Recovery, Transportation, Refining and Marketing" set forth the methods to be used by an operator engaged in any one of those industry branches or operations in securing and using priorities assistance to get the material he will need for his operations. The special production operations for which priorities assistance is made available by this major section are:

Gas cycling operations for condensate recovery (including gathering and injection lines in connection therewith),
Gas desulphurization operations,
Gas dehydration operations,
Pressure maintenance operations, or
A gas lift compression plant or a field gas booster plant where the material to be installed or added increases the rated capacity of the plant more than 500 h. p.

Methods for securing MRO material have been set forth in paragraphs (d), (e) and (f) above. References made in paragraphs (l), (m) and (n) immediately below to allotment numbers and ratings and to the use of material, apply only to the acquisition and use of material for the operations covered by these paragraphs. Such references do not apply to MRO material.

(l) *Allotment number and preference rating.* To secure equipment or material requiring an allotment number or preference rating for use in any special production operations, natural gasoline recovery, transportation, refining or marketing, an operator must file PAW Form 30 in accordance with the instructions set out on that form.

Form WPB–541 (PD–1A) may be used instead of PAW Form 30 to request a preference rating for machinery or equipment, if the machinery or equipment will be installed with the use of no more than $500 worth of material obtained through the MRO procedure of this order and if the machinery or equipment will be installed as part of a complete operation having a total material cost of no more than $5,000.

Form WPB–541 (PD–1A) may also be used instead of PAW Form 30 to request a preference rating for any material, regardless of cost, which will not be incorporated into a plant or other facility (for example, an item of construction machinery or equipment), unless a War Production Board order requires the use of some other form.

Form WPB–541 applications will be filed with the nearest War Production Board Field Office.

(m) *How to use allotment number or symbol and preference rating.* To use the allotment number and preference rating granted through a PAW Form 30 application an operator must place the allotment number on delivery orders for controlled materials and the allotment number and preference rating on delivery orders for other materials. On each delivery order for material rated after a Form WPB–541 application an operator must place the rating and either allotment symbol P–5 (in refining) or P–1 (in any other branch of the industry). Each delivery order must bear the standard certification of paragraph (r).

An operator may place authorized controlled materials orders only for the controlled materials specified for use in the operations designated on the PAW Form 30 application and may apply or extend the preference rating only to secure material requiring a rating and approved in connection with the PAW Form 30 or Form WPB–541 application.

Any rating or allotment number assigned pursuant to an application on either of such forms may be used without submitting delivery orders to the Petroleum Administration for War, unless the operator receives special instructions to the contrary.

(n) *How to obtain authority to use material.* (1) Use of material in transportation or refining, is governed by Petroleum Administrative Order No. 15 as amended and supplemented from time to time. Use of material in special production operations described above and in natural gasoline recovery is governed by Petroleum Administrative Order No. 11 as amended and supplemented from time to time. Since PAW Form 30 when filed as an application to secure material for use in connection with special production operations, natural gasoline recovery, transportation or refining, is also considered an application to use materials in connection with such operations, the authorization obtained by an operator by this form shall be considered authority to use the materials specified on the form in accordance with the provisions of such orders.

(2) Use of material (other than liquefied petroleum gas equipment) in

marketing is governed by Petroleum Administrative Order No. 12 as amended and supplemented from time to time. If use of the material (other than liquefied petroleum gas equipment) is not authorized by PAO–12 or an amendment or supplement to that order, the operator must secure an exception under that order.

(3) Installation of liquefied petroleum gas equipment is governed by Order L–86 as amended and supplemented from time to time. If the material to be used in marketing is liquefied petroleum gas equipment and installation of such is not permitted by Order L–86 or an amendment or supplement to that order, the operator must secure an exception under that order.

(4) Exceptions under PAO–12 or L–86 do not afford priorities assistance to secure material. Such priorities assistance should be applied for under paragraph (1). MRO material will, of course, be obtained through the MRO procedures of this order, or, where applicable, through Preference Rating Order P–98–e.

General Provisions

(o) *Allotments by operators.* An operator who has obtained an allotment of controlled materials may require the manufacture and installation of certain Class A products or may undertake the operation through a construction contractor. In either case it may be necessary for the operator to allot a portion of his allotment to the Class A product manufacturer or to the contractor (each of whom then becomes a "secondary consumer" under CMP Regulations) for reallotment or the placement of authorized controlled material orders. Any operator making such an allotment must follow the procedures in CMP Regulation No. 1, except as modified by this order.

(p) *Placement of delivery orders.* (1) In preparing or placing a delivery order an operator shall not alter the customary designation of any item or items for the purpose of making it appear that an item costs $500 or less or that the total cost of all items on the delivery order is $100 or less or $2,500 or less as the case may be.

(2) Any delivery order for controlled materials placed pursuant to this order and bearing the certification provided for in this order is an authorized controlled material order if the delivery order is in sufficient detail to permit entry on mill schedules and is received by the controlled materials producer at such time in advance as is specified in Schedule III of CMP Regulation No. 1, or at such later time as the controlled materials producer may find it practicable to accept the same. Attention is called to paragraph (t) of CMP Regulation No. 1 relating to rejection of orders by a controlled materials producer, including instances where less than minimum mill quantities, as specified in Schedule IV of the regulation, are requested by an operator.

(3) Where an allotment of controlled materials has been made and an allotment number authorized in connection with it, the allotment number endorsed upon any delivery order bearing the certification provided for in this order shall be an abbreviated allotment number consisting of a major program identification and the quarterly identification. In the event that no allotment number has been authorized, the appropriate allotment symbol stated in this order should be used. The allotment symbol MRO–P–3, authorized in connection with MRO material and allotment symbol PSO, in connection with production, shall constitute allotment symbols, for the purpose of all CMP regulations. In using these symbols no reference to a program or quarterly identification need be made.

(q) *Use, cancellation and reduction of allotment.* (1) An operator who receives an allotment of controlled materials on PAW Form 35 must reallot the same or place delivery orders for such materials within thirty days *after the allotment is received.* If such an allotment is not used in placing authorized controlled material orders or in making reallotments within such period, an operator must promptly notify the District Office for the District in which the material was to be used of the extent to which the allotment has not been reallotted, or orders have not been placed.

(2) An operator who receives an allotment of controlled materials pursuant to application on PAW Form 30 must use it only for the purpose for which it was authorized. If such an allotment is not used in placing authorized controlled material orders or in making reallotments, the operator must promptly notify the Washington Office of such facts.

(3) An operator who has made an allotment may cancel or reduce the same by notice in writing to the person to whom it was made. Where an allotment received by an operator is cancelled, he must cancel all allotments which he has placed on the basis of the allotment. Where an allotment received by an operator is reduced, he must cancel or reduce allotments which he has made, or authorized controlled material orders which he has placed, to the extent that the same exceeds his allotment as reduced. In the event this course of action is impracticable, the operator shall immediately request instructions of the District Office (in the case of production) or of the Washington Office (in all other cases).

(r) *Certification.* An operator may use an allotment number or symbol or preference rating authorized pursuant to this order by endorsing upon his delivery order a certification in substantially the following form:

> The undersigned purchaser certifies, subject to the penalties of section 35A of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, to receive the item(s) ordered for the purpose for which ordered, and to use any preference rating or allotment number or symbol which the undersigned has placed on this order.

This certification may be used as provided in Priorities Regulation No. 7. It may also be used instead of any other certification required by any regulation or order of the War Production Board, to the extent permitted by Priorities Regulation No. 7. The certification must be signed manually or by the use of a facsimile signature as provided in that regulation.

(s) *Restoration of inventories.* An operator may use an allotment number or symbol or preference rating authorized under this order to restore his inventory to a practicable working minimum. However, an operator may not secure replacements which would result in surplus material as defined in Preference Rating Order P–98–c as amended.

(t) *Restrictions.* An operator may not use the allotment number or symbol or the preference ratings authorized under this order to obtain material:

(1) For any purpose other than a purpose authorized under this order or in greater amounts or on earlier dates than required for any authorized purpose.

(2) Which can be secured without the use of an allotment number or symbol or preference rating.

(3) The use of which could be eliminated without serious loss of efficiency by substitution of less scarce material, or by change of design.

(4) In such amounts or on such dates that receipt of such amounts on the requested dates would result in surplus material as defined in Preference Rating Order P–98–c, as amended.

(5) Unless such operator is a participant in the PAW Materials Redistribution Program No. 2, if participation by the operator in this program is required.

(u) *Applicability of other orders and regulations.* (1) This order and all transactions affected hereby, except as herein otherwise provided, are subject to all orders and regulations of the War Production Board, as amended from time to time.

(2) None of the provisions of CMP Regulation Nos. 2, 5, or 6 (or the limitations incorporated in any CMP Regulation which otherwise would subject an operator to the provisions of CMP Regulation Nos. 2, 5, or 6) shall apply to an operator and no operator shall obtain any material under or be limited by the provisions of such regulations or limitations. The provisions of paragraphs (i), (s), (s–1) and (u) of CMP Regulation No. 1 shall not apply to an operator who secures material in accordance with the provisions of this order. Other than as set forth in paragraph (c) (7) hereof, the provisions of Limitation Order L–41, as amended from time to time, shall not apply to an operator as such operator is limited by the provisions of that order.

(3) Any preference rating, other than a rating for MRO material, assigned pursuant to the provisions of this order is assigned in lieu of a preference rating under an order in the P–19 series. Any reference in any order of the War Production Board to an order in the P–19 series shall constitute a reference to a preference rating assigned pursuant to this order.

(4) Privileges granted by other orders and regulations of the War Production Board to persons on Schedule I of CMP Regulation 5 shall be considered as applicable to petroleum operators, other than operators to the extent that they are engaged in retail marketing, operating under this order. For example, Order E–5–a on gauges and precision measuring hand tools classifies a person on Schedule I or II of CMP Regulation 5 as an "approved user". With the stated exception, an operator covered by P–98–b is in identically the same position, *Provided,* That certification clauses in and all other provisions of such other orders are complied with.

(5) Where a preference rating or allotment symbol, or both, is permitted or is required to be used by any other "E", "L", "M", "P", or "U" order or any regulation of the War Production Board to obtain a specific item of material, it will not also be necessary to follow any procedure of this order to obtain that item of material.

(v) *Further limitations on use of priorities assistance.* The Petroleum Administration for War may issue in its own name further restrictions or limitations on the use of priorities assistance by operators in the petroleum industry.

(w) *Communications.* All reports required to be filed hereunder and all communications concerning this order should, unless other directions are given, be addressed to the Petroleum Administration for War, Interior Building, Washington 25, D. C., Ref: P–98–b.

The addresses of the Petroleum Administration for War District Offices are set forth in Schedule D.

(x) *Violations.* Any person who willfully violates any provision of this order or who willfully furnishes false information to the Petroleum Administration for War or the War Production Board in connection with this order is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of or from processing or using material under priority control and may be deprived of priorities assistance by the War Production Board.

The reporting requirements of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 26th day of January 1944.

WAR PRODUCTION BOARD,

Recording Secretary.

SCHEDULE A

The items listed on this schedule may be delivered to operators without regard to preference ratings. No operator shall apply or extend any rating to get any of these items and no person selling any such item shall require a rating as a condition of sale.

Items on List A of Priorities Regulation 3.
Rock bits and core bits (rotary bits).

SCHEDULE B

NOTE: Schedule B added Jan. 26, 1944.

The procedure established by this schedule must be followed in order to request a rating for any item listed on it. Certain of these items are on List B of Priorities Regulation 3, and any rating secured under this procedure for such an item is not a blanket MRO rating and may be used to secure such item.

In order to request a rating under this procedure two copies of each delivery order (regardless of amount) must be submitted to the District Office of the PAW of the District in which the material will be used (or, if so desired by an operator in any branch of the industry other than production, for the District in which the operator's purchasing office is located). For each such delivery order, in addition to the statement which must regularly accompany an MRO delivery order submitted to PAW concerning the specific use to which the material will be put, the operator should include a detailed explanation of why he requires the particular item requested. An operator may not place a delivery order with a supplier covering these items until approval of such order has been returned to him. For convenience this will be referred to as the "special MRO procedure."

The following materials are covered by this schedule:

(a) Those items currently identified on (and more completely described in) List B of Priorities Regulation 3 as follows, and any equivalent items replacing them on revisions of that List B, when required as MRO material:

DESCRIPTION

Civilian defense devices.
Filing cabinets, wooden.
Fire protective equipment.
Furniture for use in offices, factories, industrial establishments and institutions, except furniture specifically designed for schools.
Medical, surgical and dental equipment and supplies (except parts for the maintenance or repair of existing equipment.)
Medical, surgical and dental instruments.
Slide rules, precision engineering, having a list price of $7.50 or more.
Venetian blinds.

(b) Construction machinery and equipment (on Schedule B of Order L–192) costing in excess of $500, when required as MRO material or as material for use in production.

SCHEDULE C

NOTE: Schedule C formerly Schedule B, Items (a), (b), (c), and (f) in the table amended January 26, 1944.

The special MRO procedure of Schedule B may be used to request a rating for only those items on List B of Priorities Regulation 3 as MRO material which are listed on that schedule. Many of the other items on List B of Priorities Regulation 3 may be secured without a preference rating and every attempt should be made to do so. If a rating is required for any of these remaining items or for any other item which cannot be secured with a blanket MRO rating, it should be applied for on Form WPB–541 (PD–1A), filed with the nearest WPB Field Office.

There are two general exceptions to this rule. In the first place, laboratory instruments and equipment may be obtained under the regular MRO procedure of this order. And secondly, the forms indicated below will be used for the items there listed.

Item	Preference rating form	Release or scheduling form	Filing instructions
(a) Cellophane	WPB–541		File with nearest WPB Field Office.
(b) Gas cylinders (as defined in M–233).	WPB–541		File with nearest WPB Field Office.
(c) Liquefied petroleum gas storage tanks.	WPB–541		File with nearest WPB Field Office.
(d) Steel shipping drums (as defined in L–197).	WPB–3233	WPB–3233	File with PAW, Washington, Ref: P–98–b.
(e) Wooden shipping containers (as defined in L–232, P–140).	WPB–2408		File WPB–2408 with PAW, Washington, Ref: P–98–b. File this form only if the preference ratings of P–140 are not sufficiently high to obtain delivery at the time the material is needed.
(f) Machine tools (as defined in E–1–b).	WPB–541		File with nearest WPB Field Office.

[Supp. Order L–103–b as Amended January 27, 1944, Correction [1]]

GLASS CONTAINER AND CLOSURE QUOTAS

Under the heading "Schedules—General Explanation" the last three paragraphs should read as follows:

[1] 9 F.R. 1007.

All special provisions of these schedules relating to closure materials for specific products must be followed, and control to the extent that they conflict with the above.

After March 1, 1944 all size specifications for glass containers set forth in these schedules must be followed in addition to the provisions of Order L-103 and its schedules.

Attention is called to paragraphs (p) through (v) of Order L-103-b which establish limited exceptions to the provisions of this order. Here again, any special provisions which these schedules contain relative to quota exemptions—as in the case of ice cream mix and certain beverages—must be observed.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 3, Direction 2 as Amended Jan. 29, 1944]

PAPER CUPS AND PAPER FOOD CONTAINERS

Direction 2 to Priorities Regulation No. 3, is amended to read as follows:

(a) *Purpose.* This direction provides an exception to the provisions of List B of Priorities Regulation No. 3, which prohibits the use of MRO ratings to obtain paper cups and paper food containers. By the terms of this direction, MRO ratings may be used to obtain paper cups and paper food containers but only to the extent specified herein.

(b) *Definitions.* For the purpose of this direction:

(1) "Paper cups and paper food containers" means all empty open nested paper cups and round nested paper food containers with or without lids. The term does not include flat envelope types of cup, wedge-shaped food pails or nested paper plates.

(2) "In-plant feeding" means the serving of food, drink or refreshments on the premises of a plant or business activity to its employees when the food or drink is prepared on the premises of the plant or business activity, or when the food, or drink prepared in bulk (such as coffee or soup), is brought to the plant or business activity and served in paper cups or paper food containers on the premises. It shall also include the serving of food, drink and refreshments by (1) military exchanges and service departments (as defined in Priorities Regulation No. 17), (2) hospitals serving their patients, (3) welfare organizations such as USO, Red Cross, etc., serving servicemen and their guests, and (4) persons engaged in serving passengers on trains and in planes.

(3) "A caterer or concessionnaire" means a person who has an agreement with an operator of a plant or business activity to regularly provide in-plant feeding for its employees, and who prepares his food or drink on the premises of the plant, or brings his food, or drink prepared in bulk (such as coffee or soup), to the plant and serves it on the premises. It does not include persons supplying food or drink in paper cups or paper food containers from outside the plant.

Use of Preference Ratings

(c) Any person may use the blanket MRO rating assigned to him by any regulation of the War Production Board (including CMP Regulation No. 5, CMP Regulation No. 5A and orders in the P, T, or U Series) to buy paper cups and paper food containers for in-plant feeding.

(d) A person, such as a caterer or concessionnaire, may use his customer's blanket MRO rating to buy paper cups and paper food containers for use in providing in-plant feeding to employees of the customer. In such a case, the customer must include the cost of the paper cups and paper food containers (but need not include the cost of the food contained in them or any other charge in connection with the in-plant feeding) in his own MRO expenditures for the purpose of figuring whether he is within any quota limitation (such as paragraph (f) of CMP Regulation No. 5) imposed by the regulation or order assigning the MRO rating.

(e) *Ratings on application.* Preference ratings for users not included above and preference ratings differing from those assigned may be assigned on application by any person on Form WPB 541 (formerly PD-1A) and the use of the rating may be conditioned upon the placement of orders with specified suppliers. The assignment of a rating to an applicant on this form will permit him to use that rating to get only the specific quantities and items applied for. Where any person making such application justifies his need for a rating upon the ground that he provides eating facilities patronized principally by workers engaged in a nearby plant, he shall accompany his application with a statement from a responsible official of the plant certifying to his workers' dependence upon the applicant's eating facilities.

(f) *Certificate.* The ratings assigned pursuant to or permitted to be used by this order may be applied or extended only by use of a certificate in substantially the form prescribed by Priorities Regulation No. 7.

(g) *Extension of ratings.* Ratings applied or extended to get paper cups or paper food containers may not be extended to obtain materials for use in their manufacture.

Restrictions

(h) *Inventory.* No person shall accept delivery of any paper cups and paper food containers which will increase his inventory of any size and type to more than his reasonably anticipated requirements for the ensuing thirty days, except that the minimum standard commercial packing case quantity may be purchased, whenever the purchaser's inventory is less than a 30-days' supply.

(i) *Equipment for use of chinaware.* No person may use his blanket MRO rating to purchase paper cups or paper food containers for the serving of hot food or beverages if such person has equipment for using chinaware or other containers. In the event that such equipment can only serve a portion of his needs, he may order only the quantity of paper cups or paper food containers required in excess of such equipment.

(j) *Paper cups as shipping containers.* Attention is called to the fact that persons buying paper cups and paper food containers for use in packaging food or other products for shipment or delivery are not permitted to use blanket MRO ratings for this purpose.

(k) *Persons not using paper cups before October 29, 1943.* Any person who did not use paper cups or paper food containers for in-plant feeding before October 29, 1943 may not use his blanket MRO rating to obtain them unless he files an appeal by letter in triplicate with the appropriate field office of the War Production Board and such appeal is granted. The granting of the appeal shall constitute authority to use his blanket MRO rating for his future requirements of paper cups and paper food containers for in-plant feeding. This provision shall not apply to military exchanges or service departments.

(l) *Prohibited uses.* No person shall sell or deliver the following types of paper cups if he knows or has reason to believe that they will be used for the purposes stated, and no person shall use such paper cups for those purposes: (1) packages of cups for commercial retail sales, (2) hot drink cups for serving cold foods and beverages and (3) paper cups to be served with individual bottled beverages. The above prohibition against delivering paper cups in packages to be used for commercial retail sales shall not apply to stocks already made up on January 29, 1944.

(m) *Appeals.* Any appeal from the provisions of this direction shall be made by filing a letter in triplicate with the appropriate field office of the War Production Board. The appeal should refer to the particular provision appealed from, state clearly the relief desired and explain fully the grounds for appeal.

(n) *Reports.* Any person affected by this direction shall file such reports and questionnaires as the War Production Board may request from time to time, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(o) *Termination date.* The provisions of this direction shall terminate and be void after May 1, 1944 unless previously extended. Any rating applied to an order to paper cups and paper food containers not shipped by that date shall be deemed void.

(p) *Communications.* All inquiries relating to this direction shall be addressed to: War Production Board, Containers Division, Washington 25, D. C., reference Direction 2 to Priorities Regulation No. 3.

Issued this 29th day of January 1944.

Recording Secretary.

(b) *Simplified practices.* After January 22, 1944, no producer may begin the manufacture or fabrication of any wood-boring bit which does not conform to the types, styles, sizes, dimensions, and grades set forth in Appendix A of this schedule. Notwithstanding this provision a producer may manufacture and fabricate non-conforming wood-boring bits to fill orders which were on his books before January 22, 1944. Non-conforming wood-boring bits may not be delivered or shipped by a producer after April 22, 1944.

(c) *Exemptions.* The following are exempt from the restrictions established by paragraph (b) of this schedule:

(d) *Sets.* No producer shall make for his inventory and no distributor shall acquire for his inventory or shelf stock any sets of wood-boring bits. Any number of bits in excess of one which have been grouped for purposes of sale as a unit shall be deemed a set for the purposes of this paragraph. Nothing contained in this paragraph shall prohibit a producer from producing sets to fill a specific order placed directly or indirectly by an ultimate consumer, or a distributor from making up a set or sets to fill a specific order placed by an ultimate consumer.

Issued this 29th day of January 1944.
